LOCUST REPORT TO 22-1-30

HOPPER AREAS

Northern Frontier Province —Evacuation complete, and staff discharged All hoppers that hatched out between Lasamis and Archer's Post have been destroyed, as also in the vicinity of Marsabit, which is 168 miles from the base of operations A few flying swarms have escaped

Meru —Some flying swarms have escaped from the Tharaka area, but they are not considered to constitute a menace

Embu —Staff has been reduced, and the remainder are in process of evacuation Few fliers have escaped

Kitui —Staff and equipment is being withdrawn Some flying swarms will rise from the inaccessible parts of this district Where flying swarms have settled on previously baited areas, as they are prone to do, many have died from eating the poisoned hoppers

Isiolo —The situation here is well under control Thin scattered bands of hoppers are reported from the eastern end of the Masai Reserve, but the laying was so light that it is unlikely that many hoppers will reach maturity

On the whole the situation is most promising Effective destruction from operations conducted is being continued by natural agencies to such an extent that no flying swarms of any dimensions are likely to persist
