Environmental Impact Mitigation Measures

Noise	<ul style="list-style-type: none"> • Sheltering of the site. • Restricting demolition to day time only. • Using well-conditioned demolition machines. • Providing those working at the site with PPE such as ear muffs and earplugs to reduce the levels of noise reaching the inner ear. 	Change of user conflicts	<ul style="list-style-type: none"> • For the purposes of the planned new developments the proponent should keep a record of the location of the decommissioned septic tanks and soak pits. • Change of user to be approved by the County Government of Mombasa and the Ministry of Lands. • Proponent to commit to implementation of the Environmental Management Plan at operational phase to mitigate change of user impacts. • The proponent and neighbors to constitute a liaison team to ensure compliance with EMP.
Solid waste generation	<ul style="list-style-type: none"> • Recover the reusable and recyclable components of the waste either for use in the new construction or for sale to other constructors/ recyclers. • Contract the services of a NEMA licensed demolition waste handler to deal with the non-usable, non-recyclable waste. 	Sourcing of raw materials	<ul style="list-style-type: none"> • The contractor will obtain raw materials for the construction from sources that are compliant with NEMA Regulations. • The contractor will procure quantities that are sufficient for the intended works only and recycle as far as practical to curtail wastage. • The contractor will commit to extensive use of recycled raw materials as will be appropriate and in a manner that does not compromise the safety of the development.
Workforce effluent	<ul style="list-style-type: none"> • Procure portable toilet facilities to be emptied regularly. 	Destruction of the physical environment	<ul style="list-style-type: none"> • Obtain a permit from Kenya Forest Service and County Government of Mombasa prior to cutting any trees on site. • Compacted areas to be ripped to prevent erosion. • Restore degraded areas through landscaping using trees and sediment binding grasses.
Air pollution	<ul style="list-style-type: none"> • Demolition will be conducted within the shortest time possible. • Restricting demolition to daytime at times when the wind intensity is low. • The site will be sheltered from the other parts of the premise. • The rubble will be sprinkled with water. • Workers on site will be provided with the necessary PPE such as dust masks. • The contractor will deploy dust control screens. 	Occupational health and safety of workers	<ul style="list-style-type: none"> • The contractor will provide workers with appropriate Personnel Protective Equipment (PPE) and ensure their use. • Workers to be trained on equipment use. • First aid facilities to be available on site. • Contractor to comply with the requirements of the Occupational Safety and Health Act (OSHA) by registering the site as a work place. • All visitors to the site to be provided with PPEs.
Occupational health and safety of workers and neighbors	<ul style="list-style-type: none"> • Provision of PPE to the workers. • Clear signposting and warning signs on site. • Accidents will be investigated and appropriate measure to prevent recurrence. • Demarcate and sign post routes and parking for traffic into the site. • Only allow the number of vehicles that can be accommodated at the designated parking at a time. 	Workforce sanitation	<ul style="list-style-type: none"> • Procure portable toilets for use by the workforce from a NEMA licensed waste management company.
Unused soak pit and septic tank	<ul style="list-style-type: none"> • The sewage in the septic tanks and soak pit will be pumped out by contracted NEMA accredited sewage handlers and transported offsite for disposal. • The septic tanks will be desludged and the sludge likewise taken off site for disposal. • The septic tanks should first be emptied of all residues and cleaned preferably with lime which acts as a disinfectant. • Once soak pits are emptied, lime can also be used as a disinfectant. • The holes should then be filled up with either sand or gravel to ground level. The disturbed areas once backfilled should be properly graded and seeded/ planted (if necessary) with appropriate vegetation (trees and grass). 	Solid wastes generation	<ul style="list-style-type: none"> • All recyclable materials should be collected and sent to a licensed company for recycling. • Provide litter bins that encourage the separation of wastes into paper, glass, plastics etc for recycling. • Contract a NEMA licensed solid waste handler to manage wastes from the development. • Comply with Legal Notice No. 121 of 2006 in management of solid wastes generated by the development.
		Increased demand for water for construction use	<ul style="list-style-type: none"> • The contractor will ensure prudent use of water resources during construction by avoiding wastage such as running pipes and taps. • The proponent should meter and monitor the water yields from the borehole on a monthly basis.
		Air pollution	<ul style="list-style-type: none"> • Contractor to deploy fine dust screens at the project site during construction.

- Sprinkle dust producing materials such as ballast with water during offloading on site.
