construction site thus reducing the emissions from vehicular traffic.

- All waste must be transported off-site for processing, not burnt or stored for any longer than is absolutely necessary.
- Machines must not be left idling for unnecessary periods of time.
- Regular and prompt maintenance of construction machinery and equipment. This minimizes generation of hazardous gases.
- Perform construction at times that persons are expected to be at work and school.
- Implement a traffic system that involves appropriate signals and signs to ensure the smooth flow of traffic.
- Monitor the air pollution levels regularly as per the Air Quality Regulations.
- Noise and Vibration Pollution.
- Install portable barriers to shield compressors and other small stationary equipment where necessary.
- Put up signs to indicate construction noise generating areas.
- Maintain all equipment.
- Workers to be provided with noise safety and protective gear.
- Silenced machinery and instruments should be employed to reduce the impact of noise on the existing neighbours and workers.
- Equipment such as drills, graders and cement mixers should also be used when the least number of neighbours can be expected to be affected.
- Schedule noisy activities concurrently during construction to reduce the exposure rate.
- Those working with machinery, vehicles and instruments that emit high levels of noise should be provided with ear plugs and ear muffs.
- The operation should be done during the day time 0800hrs to 1700hrs.
- Comply with Noise and Vibration Control Regulations.
- Dust pollution
- Spray stock piles of earth with water.
- Avoid pouring dust materials from elevated areas to ground.
- Cover all trucks hauling soil, sand and other loose materials.
- Provide dust screens where necessary.
- Sensitize workforce including drivers of construction vehicles.
- Exhaust Emissions.
- Vehicle idling time shall be minimized.
- Alternatively fuelled construction equipment shall be used where feasible.
- Equipment shall be properly serviced and maintained.

<i>Possible Impacts</i>	<i>Proposed Mitigation Measures</i>	<i>Possible Impacts</i>	<i>Proposed Mitigation Measures</i>
• Soil erosion	<ul style="list-style-type: none">Control earthworks.Soil traps should be established where erosion is predetermined.Introduce physical barriers such as racks to intercept soil material from being carried away by the run-off.Avoid unnecessary movement of soil materials from the site.Re-surface open areas on completion of the project and introduce appropriate vegetation.Control over excavation works especially during rainy / wet conditions.Leveling of the project site to reduce run-off velocity and increase infiltration of storm water into the soil.Ensure management of excavation activities.Utilize impervious material for areas that require paving.Accommodate the average number of parking spaces.Install drainage structures properly.Ensure that the drainage plan proposed is implemented as stipulated on the plan.		<ul style="list-style-type: none">Conduct periodical water quality monitoring to ensure that standards are maintained.Apply practices and use products that reduce the potential for contamination of ground water and surface water.Ensure that all chemicals are properly stored in a specific location.
		Site Cleanliness and Sanitary Facilities	<ul style="list-style-type: none">Special attention shall be paid to the sanitary facilities on site.Ensure that water, soap and sanitizer are available on site.Garbage shall be disposed of periodically and segregated before disposal.
		Road Safety	<ul style="list-style-type: none">Road signs next to facility.Enforce speed limits for construction vehicles.
		Security	<ul style="list-style-type: none">Guarding of sites/estates by a reputable security firm.Constant site patrols.Adequate screening of visitors to the site and a register of all on site.Collaboration with the existing national and county government security machinery.Partnership with neighbours and police in community policing.
• Water Sources	<ul style="list-style-type: none">Management of water usage. Avoid unnecessary wastage of water e.g. leaking taps.Avail storage tanks.Use of water bowzers and tankers to bring in water for construction activities i.e. during periods of high water demand (i.e. during slab formation).Install water conserving taps that turn-off automatically when water is not in use.Encourage water reuse/recycling during construction and occupation phases.Harvesting of rain water during rainy season.Roof catchments of building blocks will be provided with rainwater harvesting systems (gutters, down pipes and water storage facilities) to enhance collection and storage of the resulting run-off. Such water can be used in watering flower gardens, general cleaning etc.Provide notices and information signs to sensitize on means and needs to conserve water resource i.e. “Keep/Leave the Tap Closed”, etc. This will awaken the civic consciousness of the workers on site and residents with regard to water usage and management.Drill a borehole that will provide an alternative source of water.Store all raw materials away from the vicinity of water bodies.General refuse generated during these phases of the development must be stockpiled in one central area of the development site, away from existing water bodies.Clearance of vegetation must be avoided in periods of heavy rainfall to reduce the impact of runoff.	Occupational Health and Safety	<ul style="list-style-type: none">Ensure proper solid waste disposal and collection facilities.Ensure dustbin cubicles are protected from animals, rains and are well covered.Proper handling and disposal of solid waste.Provide suitable safety gear for all personnel.Proper treatment of waste water.All workers will be sensitized before construction begins on how to control accidents related to construction and Covid-19 measures.All moving parts of machine should be covered with suitable guards.Keep accidents and incidents records.Provide and enforce use of personal protective equipment, and train on occupational health.Fire-fighting equipment and First aid kits should also be provided at the site.Utilize “social distancing” by maintaining a 6-foot distance from other individuals on the site, especially enclosed spaces. It is advised to have no more than 10 individuals within an enclosed space.Provide soap and running water on all jobsites for frequent hand washing.Provide hand sanitizer when soap and running water are not available.Clean and disinfect all common spaces and high-touch surfaces on jobsites and in offices including shared tools.Construction activities must therefore be limited to the hours of 0800hrs to 1700hrs.

<i>Possible Impacts</i>	<i>Proposed Mitigation Measures</i>
Fire Hazards and Accidents	<ul style="list-style-type: none"> • Fire-fighting equipment and First aid kits should be provided at the site and trained fire emergency responders on site. • Proper signage should be in place. • Sensitize workers on fire safety. • Provide and enforce use of personal protective equipment, and train on fire safety response measures. • No storage of flammables on site where possible. • Proper handling and use of tools and machinery
Oil Leaks and Other Leaks	<ul style="list-style-type: none"> • All machinery shall be keenly inspected not to leak oils on the ground. This will be ensured through regular maintenance. • All oils/grease and materials will be stored in a well secured store on the project site. • There will be proper disposal of oil handling materials such as drums, oily clothes/papers/materials and cans. • There will be safe disposal of oil spills and filters from the construction machineries.
Vegetation	<ul style="list-style-type: none"> • Landscape the site by planting grass and trees at all disturbed areas. • Care for the trees/plants. • Retain vegetation screens to reduce the visual effect of this stage of the development. • Ensure that local building materials and muted colors are used to reduce the visual impacts of the development and the landscaping to hide it or blend in with the local environment. • Maintain all mature trees (trees > 25 cm) within the development where possible. • Incorporate as much local plants found within the area into the final landscaping of the property. • The developer should incorporate trees that are used by bird species for foraging to attract bird species to the area.
Socio-economic Impacts	<ul style="list-style-type: none"> • Persons from the nearby communities should be employed to work on the construction site. • Designate the roles and responsibilities of workers, which will enable a clear chain of command in the event of an accident and allows persons to be aware of their responsibilities in the event of such occurrences. • Place several fully equipped first aid kits on the project sites-. • Ensure that some workers are trained in basic first aid practices. • Signs must also be placed around the construction site displaying the numbers of the person responsible for handling emergencies on the site. • Develop and implement a Health and Safety Training Manual for employees. • Identify a specific area on the project site for vending type activities.

<i>Possible Impacts</i>	<i>Proposed Mitigation Measures</i>
	<ul style="list-style-type: none"> • Purchase goods and supplies from suppliers within the area.

THE ENVIRONMENTAL MANAGEMENT AND CO-ORDINATION ACT

(No. 8 of 1999)

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED CONSTRUCTION OF HDPE PIPES MANUFACTURING FACTORY, L.R. NO. RUIRU / MUGUTHA BLOCK 3/30 & 3/31 RUIRU MUNICIPALITY – KIAMBU COUNTY

INVITATION OF PUBLIC COMMENTS

Pursuant to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The proponent, Megapipes Solutions Limited proposes to build a Factory for manufacturing of HDPE Plastic pipes, namely double wall structured HDPE pipes (Weholite) and solid wall HDPE pipes for drainage and sanitation projects in Kenya and neighboring Countries. The Factory is designed to have various phases starting with building a 4000m² Factory for the manufacturing of Weholite pipes from 800mm to 3000mm diameter. Weholite is a structured wall pipe or structural panel made from high-density polyethylene (HDPE). HDPE structured wall pipes are manufactured by extrusion of a hollow rectangular box section which is continuously wound onto a mandrel. The factory will be developed on a 10 acres piece of land L.R. No. L.R. 11294/30 and 31 located in Mugutha Location, Ruiru Sub-County (Oaklands Properties Limited) within Kiambu County.

The following are the anticipated impacts and proposed mitigation measures:

<i>Possible Impacts</i>	<i>Proposed Mitigation Measures</i>
Permits and Licenses	<ul style="list-style-type: none"> • Proponent Obtains below listed permits / approvals • Registrations permit of site as place of work from Department of Occupational Health and Safety Registration (DOSHS). • Water Resources Authority (WRA) approvals water sources if from nearby streams • Approval of Plans by Kiambu County Government Physical Planning Department of any structures on site • Permits from Public Health Department (Kiambu County) of sanitation facilities installed on site

<i>Possible Impacts</i>	<i>Proposed Mitigation Measures</i>
Sedimentation Impacts of drainage channels downstream	<ul style="list-style-type: none"> Sand/silt traps should be used so as to prevent silt and any other sediments from getting into storm water channels Site stockpiles will be properly covered to avoid exposure to agents of soil erosion such as wind and rain The drainage system will be developed in a manner that prevents silt-laden runoff from entering surface water drains.
Water Quality Impacts within water resources downstream	<ul style="list-style-type: none"> Water containing such pollutants as cements, concrete, lime, chemicals and fuels shall be discharged into a conservancy tank for removal from site where applicable All vegetation materials either live or dead on site shall be cleared and removed before the area is excavated Regular monitoring of water quality standards of downstream water resources against the baseline undertaken during the EIA stage
Risk of accidents at work sites during Factory construction	<ul style="list-style-type: none"> Provide Personal Protective Equipment (PPE) including gloves, gum boots, overalls and helmets to workers. Use of PPE to be enforced by the Supervising Engineer. Fully stocked First Aid Kits to be provided within the Sites, and in all Project Vehicles Strict use of warning signage and tapes where the trenches are open and at other active construction sites Contractor to employ and train Safety Marshalls who will be responsible for management of plant and equipment traffic on site
Solid wastes impacts during construction of the Factory	<ul style="list-style-type: none"> Properly labelled and strategically placed waste disposal containers shall be provided at all places of work Litter bins should have secured lids to prevent animals and birds from scavenging All personnel shall be instructed to dispose of all waste in a proper manner Recycling of construction material shall be practiced where feasible e.g. containers and cartons
Liquid wastes Impacts during construction of the Factory	<ul style="list-style-type: none"> Water containing pollutants such as concrete or chemicals should be directed to a conservancy tank for removal from the site where applicable Potential pollutants of any kind and form shall be kept, stored and used in such a manner that any escape can be contained No grey water runoff or uncontrolled discharges from the site or working areas to any adjacent Storm water channels.
Sanitation issues resulting from both solid and liquid wastes on site during Factory construction	<ul style="list-style-type: none"> All temporary/ portable toilets or pit latrines shall be secured to the ground to the satisfaction of the engineer to prevent them from toppling over A wash basin with adequate clean water and soap shall be provided alongside each toilet. Staff shall be encouraged to wash their hands after use of the toilet, in order to minimize the spread of possible disease
Fuels, Oils and other hydro-carbons from plant and equipment	<ul style="list-style-type: none"> The contractor shall ensure that the machines and equipment are in good condition when on site.

<i>Possible Impacts</i>	<i>Proposed Mitigation Measures</i>
	<ul style="list-style-type: none"> Ensure proper handling of lubricants, fuels and solvents while maintaining the plant and equipment. Any chemical or fuel spills shall be cleaned up immediately. The spilt liquid and clean-up material shall be removed, treated and transported to an appropriate site licensed for its disposal. Follow specifications of the Occupational Health and Safety Act 2007, EMCA 2015 and others in the development and operation of stores
Risk to health and safety of community and workers during Factory construction	<ul style="list-style-type: none"> The Contractor shall keep noise level within acceptable limits and construction activities shall, where possible, be confined to normal working hours in the residential areas The Environmental Management and Coordination (Noise and Excessive Vibration Pollution) (Control) Regulations, 2009 provides 55decibel during the day and 35 decibel during the night. Provide a readily accessible first aid kit for all workers. Additionally can have emergency contacts in case a first responder is needed Ensure that all accidents / occurrences are investigated to establish root cause. These are then entered in the general register and reported to the County Safety and Health Officer within the prescribed timelines sufficient firefighting equipment shall be provided onsite ensure all fire escapes are not obstructed and open outwards or slide sideways PPE are used to protect the workers from physical, chemical or biological hazards which they are likely to encounter in their working environment.
Air pollution from Factory construction activities	<ul style="list-style-type: none"> All construction machinery shall be maintained and serviced in accordance with the contractor's specifications The contractor shall not carry out dust generating activities (excavation, handling and transport of soils) during times of strong winds Vehicles delivering soil materials shall be covered to reduce spills and windblown dust Water sprays shall be used on all earthworks areas within 200metres of human settlement.
Associated risks during contractor decommission of construction works	<ul style="list-style-type: none"> The site is to be cleared of all construction materials, including litter prior to hand over Fences, barriers and demarcations associated with the construction phase must be removed from the site Rehabilitation Activities of Environmental Cases identified must continue throughout the defect liability period Undertake a completion / Initial Environment, Health and Safety Audit

**IMPORTANT NOTICE TO SUBSCRIBERS TO
THE KENYA GAZETTE**

THE following notes are for the guidance of persons submitting "copy" for inclusion in the *Kenya Gazette, Supplement*, etc.:

- (1) *The Kenya Gazette* contains Notices of a general nature which do not affect legislation. They are, therefore, submitted to the Government Printer directly.
- (2) *Legislative Supplement* contains Rules and Regulations which are issued by the National or County Governments. Because of this, they must be submitted to the Government Printer through the office of the Attorney-General.
- (3) *Bill Supplement* contains Bills which are for introduction in the National Assembly, Senate or County Assemblies.
- (4) *Act Supplement* contains Acts passed by the National Assembly, Senate or County Assemblies.

All "copy" submitted for publication should be prepared on one side of an A4 sheet no matter how small the Notice is, each page being numbered and should be typed with double spacing. Copy should be clear, legible and contain no alterations.

Particular attention should be paid to the following points:

- (i) Signature must be supported by rubber-stamping or typing the name of the signatory in capital letters.
- (ii) Must be correct and filled in where necessary.
- (iii) Care should be taken to ensure that all headings to Notices and references to legislation are up to date and conform with the Revised Edition of the Laws of Kenya.

EXTRACT FROM THE CODE OF REGULATIONS, SECTION D—

Kenya Gazette

"D 34. (1) Communications for the *Kenya Gazette* should reach the Government Printer not later than 9 a.m. on Friday of the week before publication is desired. The Government Printer will not publish communications received after that hour until the next subsequent issue of the Gazette.

(2) Ministries will be required to pay for the *Kenya Gazette* and to meet the cost of advertising in it.

It is emphasized that these notes are for guidance only, but it is requested that persons submitting copy for publication first satisfy themselves that such copy is complete in every respect.
