THE ENVIRONMENTAL MANAGEMENT AND CO-ORDINATION ACT

(No. 8 of 1999)

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED KILIMANJARO COMMUNITY TRUST FENCE IN EMPIRON—MISIGIYIO AREA, RIFT VALLEY PROVINCE

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) Regulations, the National Environment Management Authority, (NEMA) has received an environmental impact assessment study report for the implementation of the proposed Kilimanjaro Community Trust Fence.

The proposed development involves laying down five strands wire, whereby three will be live wires and two earth wires. The fence shall cover a distance of 25 kilometres in total.

The proposed fence shall extend from the southern end of the existing Kimama fence running at the lower edge of the Loitokitok farmland and ends near the International boundary of Kenya and Tanzania making a length of 25 km. The Kilimanjaro community fence is located in Kajiado South Division, Rift Valley Province.

The following are the anticipated impacts and proposed mitigation measures.

Possible Environmental Impacts	Suggested Mitigation Measures
Loss of vegetation	<ul style="list-style-type: none"> Restrict clearing only to fence alignment section. Use some trees which falls under fence line as posts.
Vegetation trampling	<ul style="list-style-type: none"> Fence line to follow park-community land boundary as much as is possible.
Vegetation degradation due to restricted animal movement	<ul style="list-style-type: none"> Drive or walk along designated tracks.
Loss of soil micro organism	<ul style="list-style-type: none"> Scientific management of the mega herbivores in the park. Human labor to be used during clearance, transportation of materials to site and installation. Avoid use of heavy machineries.
Bar elephants access to watering points and salt licks	<ul style="list-style-type: none"> Provide alternative watering points and salt lick supplements.
Soil erosion	<ul style="list-style-type: none"> Human labor to be used during clearance, transportation of materials to site and installation. Allow regeneration of graminoid layer along the fence line after installation to cover the soil.
Soil compaction	<ul style="list-style-type: none"> Minimized use of heavy vehicles for poles transportation. Human labor to be used as much as is possible.
Air pollution and vegetation destruction	<ul style="list-style-type: none"> Pole treatment done outside the national park area and far from human settlements. Choice of pole treatment area to be relatively open and void of important plant species. Appropriate disposal of the treatment oil and chemicals.
Increased solid waste (from the construction and implementing team)	<ul style="list-style-type: none"> Appropriate waste material disposal methods to be employed; bins to be used and later disposed to designated municipal disposal sites.
Cleared trees and construction material remnant.	<ul style="list-style-type: none"> Cleared trees and shrubs to be disposed as firewood and logs using the existing Park Department legal procedures.
Possible Environmental Impacts	Suggested Mitigation Measures
Fence vandalism by	<ul style="list-style-type: none"> Establish community park policing.

poachers	<ul style="list-style-type: none"> • Increase community conservation education awareness. • Establish alternative income generating projects that are conservation compatible to reduce dependency on the park resources. • Enhance the existing conservation compatible community projects. • Encourage community subsistence agriculture.
Electric shock	<ul style="list-style-type: none"> • Sensitization and creation of awareness.
Fence destruction source of park fire	<ul style="list-style-type: none"> • Fix lightning arrestors strategically. • Regular maintain the fence maintenance track to act as fire break.
Skin injuries from fallen nails or wires and tree stumps	<ul style="list-style-type: none"> • Awareness and proper advice to those involved. • Workers should not walk bare-footed during clearance and fence construction. • Provide protective working gears. • Provision of First aid kits whenever work is in progress.
Falling injuries in the dug post holes	<ul style="list-style-type: none"> • No holes should be left dug overnight. • Workers advised on taking safety precautions.

The full report of the proposed project is available for inspection during working hours at:

- (a) Director-General, the National Environment Management Authority (NEMA), Popo Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.
- (b) Permanent Secretary, Ministry of Environment and Mineral Resources, N.H.I.F. Building, Community, P.O. Box 30521, Nairobi.
- (c) Provincial Director of Environment, Rift Valley Province.
- (d) District Environment Officer, Kajiado District.

The National Environment Management Authority invites members of the public to submit oral or written comments within thirty (30) days from the date of publication of this notice to the Director-General, NEMA, to assist the Authority in the approval process of the project.

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED 235 APARTMENTS PLOT NOS. 12715/7828- 7875 AT SYOKIMAU, OFF MOMBASA ROAD, NEXT TO PRESTIGE APARTMENTS, MAVOKO MUNICIPALITY, MACHAKOS COUNTY

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) Regulations, the National Environment Management Authority, (NEMA) has received an environmental impact assessment study report for the implementation of the proposed 235 apartments.

The project will entail construction of 235 3&2-bedroomed residential units on a 1.128 hectares. The development will be implemented in phases from block 1-47 depending on the success of the predecessor phases and it will entail 5 number 3&2-bedroomed

apartments in each block, green area behind the blocks, parking on ground floor and a waste treatment plant.

The proposed project is located on plot L.R Nos. 12715/7828-7875, Syokimau area, Mavoko Municipality next to Easy Prestige Apartments off Mombasa Road

The following are the anticipated impacts and proposed mitigation measures:

Possible Impact	Mitigation measures
Soil erosion and compaction	<ul style="list-style-type: none"> • The contractor will provide adequate soil conservation structures to ensure that areas prone to soil erosion are protected from runoff. • Avoid steep slopes. • Areas susceptible to erosion shall be properly sloped and compacted to reduce the effect of runoff, and shall be seeded immediately. • Rehabilitation of exposed sites as soon as practicable. • The site preparation activity should be scheduled. • Re-plant degraded areas with local species common in the area to complement natural vegetation regeneration to improve ground cover.
Occupational health and safety	<ul style="list-style-type: none"> • Ensure that building plans are approved by Mavoko Municipality Council. • Workers will be provided with adequate PPEs during the construction phase, these will include working boots, overalls, helmets, goggles, earmuffs and goggles. Workers will also be provided with harnesses and proper secure equipment s for scaling heights. • Workers will be provided with a well stocked first aid box, which will be replenished at all times and managed by trained first aiders. • The proponent will ensure that the contractor thro' the project manager obtain a workmen's act, as well as ordinance and regulations. • Adequate sanitary facilities will be provided with proper segregation for both genders where applicable. • The contractor will ensure that people providing food to the workers have been sensitized on the safe handling of food to avoid outbreaks of food poisoning.
Air and dust pollution	<ul style="list-style-type: none"> • The contractor to protect stockpiles of friable material subject to wind- throw by wetting, or with barrier, vegetable, or windscreen. • Restrict speed on loose surface roads during dry or dusty conditions; incidence. • Suppress dust during dry periods by use of water sprays. • Maintain equipment in good running condition-no vehicle to be used that generates excessive black smoke. • Enforce vehicle load restrictions to avoid excess emissions from engine overloading. • The contractor shall institute appropriate measures to minimize or avoid air

Noise pollution and excessive vibration	<p>quality impacts. This can be achieved through formulation of air quality management plan.</p> <ul style="list-style-type: none"> • The contractor to minimize/control emission of dust due to traffic movement and erosion of stockpile material and exposed soil. • The contractor to ensure that all equipment used and all facilities erected on site are designed and operated to control the emission of smoke, dust, fumes and any other air impurity into the atmosphere. • The contractor shall comply with the legal requirements for the managements of the noise impact specified in the recently gazetted noise quality regulations. • The contractor shall formulate noise management plan for minimizing the generation of noise and vibration from construction activities occurring on site and its impact on surrounding residents, businesses and workers. • All internal combustion equipment will have properly functioning silencers or mufflers. • Neighbours to the site to be notified about the construction schedule and activities, including blasting, should it be required. • Noise generating activities that take place near residential or sensitive institutional receptors will be restricted to between 0600-2000hrs, which is defined as 'daytime' in the Kenyan noise regulations.
Increase in solid waste	<ul style="list-style-type: none"> • Proponent will use an integrated solid waste management system by source reduction, recycling, composting, reuse or sanitary land filling. • The proponent will ensure that debris is collected by a NEMA approved waste handlers. • There will be central collection point for waste generated preferably with segregation of the same. • The proponent will provide or construct proper waste receptacles to avoid littering.
Effluent disposal	<ul style="list-style-type: none"> • The proponent will use waste treatment plant for effluent management. • The proponent will ensure that the materials used for construction are of the right standards as per the building code. • The proponent will ensure that required standards of effluent are maintained before disposal is done through quarterly laboratory analysis. • The proponent will ensure that there are routine checks for the sewer lines to ensure that there are no leakages.
Security	<ul style="list-style-type: none"> • The proponent will ensure that guards are available and proper intrusion surveillance equipments are installed and are working all the times.
Traffic movement for construction vehicles	<ul style="list-style-type: none"> • The proponent will ensure that there is adequate lighting in all areas and risk assessment is done regularly to identify

any new threats.

Water resources and water quality

- The proponent will ensure the neighbours are informed through signage about irregular movements and guards to be used to direct traffic.
- Remedial measures shall be implemented by the Contractor in the event of erosion resulting in the sedimentation of surrounding areas after due consideration of the costs and benefits of such removal activity.
- Infrastructure shall be designed to ensure that contaminated run-off does not reach watercourses.
- In the event of an oil spill the procedure contained in the emergency response plan will come into effect.

The full report of the proposed project is available for inspection during working hours at:

- (a) Director-General, the National Environment Management Authority (NEMA), Popo Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED RESIDENTIAL FLATS DEVELOPMENT ON PLOT L.R. NO. 4953/1465 ALONG THIKA-GARISSA ROAD, THIKA MUNICIPALITY, THIKA DISTRICT

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) Regulations, the National Environment Management Authority, (NEMA) has received an environmental impact assessment study report for the implementation of the proposed residential flats.

The proposed facility will see the construction of residential houses provided with a ground, first, second, third and fourth floors. The project will consist of eighteen (18) blocks with five floors. Each block contains two, three bedroomed house on each floor, making a total of one hundred and eighty units (180).

The proposed project is located on plot No. 4953/1465 – Thika Municipality along Thika - Garissa road.

The following are the anticipated impacts and proposed mitigation measures:

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT
FOR THE PROPOSED LORUK – TOT – MARICH PASS (B4)
150KM ROAD

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) Regulations, the National Environment Management Authority, (NEMA) has received an environmental impact assessment study report for the implementation of the proposed Loruk – Tot – Marich Pass (B4) 150 k.m. Road.

The proposed project will involve upgrading of the Loruk – Tot – Marich Pass (B4) 150km Road to bitumen standards. The intake of the project is to cover from Loruk – Tot – Marich Pass (B4) Road transversing the districts of Baringo, Marakwet and West Pokot.

The project anticipates the following impacts and mitigation measures:

<i>Possible Impacts</i>	<i>Mitigation Measures</i>
Camp health, safety and security concerns	<ul style="list-style-type: none"> Employ a Health & Safety Officer that deals with the health, water and sanitation and waste disposal in the camp sites. An NGO specialized in HIV/AIDS work should be appointed to run awareness courses for workers in all camps in coordination with each district's agencies on the HIV/AIDS. Arrangements must be made in advance with the Exhauster Services of the nearest Local Authority that has sewerage to clean out lined septic tanks. Install a well stocked First Aid facility. The contractor to attach an Operator safety Code against likely environmental hazards of the equipment brought to the site and must obtain a permit to purchase and handle chemicals that are hazardous. Proper security system that protects the camps on a 24 hours basis.
Major and minor drainage structures	<ul style="list-style-type: none"> The head-works of the road construction must keep a pump for removing pools of water with every rainfall. Maintain uncovered drain on either side of the road to prevent foreign soils from the road surface from eroding into adjacent land through run-off. Keep workers that de-silt and flush drainage channels so as to maintain their functional integrity. Implement contour drainages to control drainage of roadside water into the catchments. A perimeter fence to protect humans and livestock from falling into such holes/excavations.
Quarry sites and borrow pits	<ul style="list-style-type: none"> Notice of intended blasting must be known to all human traffic in the neighbourhood of blasting through the media. Though blasting should be restricted to a specified area, the minimum radius for human movement prior to blasting must be observed by the blaster. Provide blasters and borrow pit workers (excavators and haulers) with ear, nose and eye gauzes. Access roads and service lines inside the blasting areas shall be kept operational and shall be repaired or restored throughout the works.

Soil erosion

- The public shall be notified of haulage routes and turning of heavy trucks.
- Along the shoulders throughout the road corridor, improvise erosion abatement channels emptying into gully-pots on both sides of the road. They should be built at intervals of 50 meters and similar built at intervals of 70-meter intervals in low gradient terrain.
- Once excavated earth material has been brought to the road, it should be used as soon as possible and the treated road surface left in a compacted condition.
- Heavy construction equipment should not be allowed to park on the road side of areas with very loose soils or where the works have scarified the soils.
- Gully-pots and channels that are filled up should be cleared periodically and the silt hauled to borrow pits that are not any longer productively used.
- In the Kisumu-Bypass, water channels should be made to run into existing drainage and sewerage especially between Kondele and the railway and between Kondele and Manyatta. This will help to abate over-flow of run-off from construction channels.

Contamination of water courses

- Fuels and lubricants must be handled with care to avoid spillage along the road corridor.
- Construction vehicles that are stalled on the road-side must be towed to the contractor's site immediately.
- Ensure that bituminous emulsions are applied only during dry spells and should not be allowed to flow into adjoining channels, tunnels and surface water.
- At the start of the road construction, take samples of river water for full laboratory testing for water courses that are within 500 metres of the road corridor.

Dust pollution and uncontrolled traffic

- The surface of the diversion road should be kept murramed and smooth.
- Abate dust by sprinkling water continually- 3 times in the morning and in the afternoons.
- Properly written and clear signs must be posted at appropriate points to direct both construction and public traffic.

Crusher and asphalt plant operations

- At the Asphalt plant, build a perimeter fence for keeping punctured drums of asphalt; which should stand on heavy duty polythene paper
- To prevent dust from spewing from the crusher plant into the neighbourhoods and catchments, a scaffold or iron poles can be built to a height above the crusher vibrators.
- Workers should shower at the end of their shifts and given a half-pint of milk per shift.

Displacement and compensation

- Identify, list and compensate persons to be displaced according to the Project Affected Persons of Resettlement Action Plan.

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED CONSTRUCTION OF A PURE OIL STORAGE, USED OIL RECYCLING FACILITY AND AN OFFICE BLOCK, KOKOTONI AREA, MWATATE LOCATION, KWALE DISTRICT

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) Regulations, the National Environment Management Authority, (NEMA) has received an environmental impact assessment study report for the implementation of the proposed pure oil storage, used oil recycling facility and an office block.

The project will involve fencing the site, paving the ground, constructing an office block, installing the 4 above the ground tanks, used oil recycling machines.

The proposed project is to be undertaken on unsurveyed land, at Kokotoni area, Mwatate Location, Kwale District.

The following are the anticipated impacts and proposed mitigation measures

Possible Impact	Mitigation Measures
Air pollution	<ul style="list-style-type: none"> Sprinkling water where necessary, sensitize construction workers, and plant more vegetation to arrest any fugitive dust. Avoid unnecessary hooting and ensure putting off of engines when not in use.
Noise pollution	<ul style="list-style-type: none"> Sensitize drivers of construction machinery on effects of noise. Avoid playing heavy music. Implementation-on activities to be restricted to day time. Workers in the vicinity of or involved in high levels noise to wear safety protective gear.
Oil pollution	<ul style="list-style-type: none"> Proper storage handling of pure oil, and recycling of oil wastes. Maintain project tanks and equipment to avoid leaks.
Changes in hydrology /impeded drainage.	<ul style="list-style-type: none"> Proper installation of drainage structures. Install cascade to break the impact of water flowing in the drains. Ensure efficiency of drainage structure through proper design and maintenance. Provide gratings to the drainage channels.

Soil erosion

- Control
- Earthworks and compact loose soils.
- Install drainage structure properly.
- Ensure management of excavation activities.
- Control activities especially during rainy conditions.
- Provide soil erosion control and conservation structure where necessary.
- Efficiency of erosion control measures.

Public health and occupational safety

- Train construction workers on occupational health and safety.
- Ensure staff are medically fit and regularly examined.
- Provide full protective gear and Workmen's.
- Compensation cover in addition to the right tools and operational instruction manuals.
- Adopt sound waste management system to ensure proper solid waste disposal and collection facilities.
- Adopt sound development keeping practices.
- Ensure effective wastewater management.
- Sensitize staff on environmental management.
- Ensure good working condition of the sewerage system always and sanitary facilities should be clean and disinfected.
- Engage the services of qualified personnel and or ensure training.

Vegetation

- Landscaping of the site and vegetation (trees and flowers) in areas.

Road Safety

- Limited speed along roads leading to site.
- Provide bill boards at the site / entrance to notify and warn motorists.

The full report of the proposed project is available for inspection during working hours at:

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT
FOR THE PROPOSED EXTENSION OF HAZINA TRADE CENTRE
BY ADDITIONAL 34 FLOORS ON L.R NO 209/6708 BETWEEN
MOKTAR DADAH AND MONROVIA STREETS - NAIROBI
CENTRAL BUSINESS DISTRICT

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) Regulations, the National Environment Management Authority, (NEMA) has received an environmental impact assessment study report for the implementation of the extension of hazina trade centre by additional 34 floors.

The proposed project will comprise of 34 additional floors. The project will include the following processes during its design and implementation:

- Construction of the additional floors.
- Site landscaping.
- Finishing.
- Inspection.
- Occupation.

The project is located in Nairobi the capital city of the Republic of Kenya on L.R no 209/6708 between Moktar Dadah and Monrovia streets. Nairobi city is located some 140 km south of the equator on the Athi plains and some 500 km from the coast of Indian Ocean.

The following are the anticipated impacts and proposed mitigation measures:

Possible Impact	Mitigation measures
Noise pollution	<ul style="list-style-type: none"> • Ensure that construction is undertaken during the day-0700 hrs to 1800 hrs. • Use of equipment that have some noise control element. • Avoid unnecessary hooting and ensure putting off of engines when not in use. • Install portable barriers to shield the compressor to minimize the noise.
Solid waste management	<ul style="list-style-type: none"> • Ensure that durable construction material is used to avoid constant replacement. • Encourage the use of materials with some recycled content. • Ensuring that all the waste is dumped in approved dumpsites. • Ensuring that correct amount of material is ordered to avoid waste. • Use an integrated solid waste management system which entails source reduction, recycling, composting, re-use, combustion and sanitary land filling. • Use building material that has minimal packaging. • Use the excavated material for back filling.
Traffic density	<ul style="list-style-type: none"> • Ensure that billboards are put up indicating the construction hours. • Ensure that construction materials are transported in bulk to avoid unnecessary vehicle movement. • Ensure that transportation is undertaken during off peak hours.
Oil leaks and spills	<ul style="list-style-type: none"> • All oil products and materials should be stored in the designated stores. • Maintenance of machines should be regularly undertaken to avoid any

Increased sewerage effluent	<ul style="list-style-type: none"> leakages. • Oils should be restrained from reaching the ground from the service bays. • Installing oil interceptors along the drainage channels. • Use hard, durable, impervious and material that cannot be corroded constructing of the sewer. • All waste pipes should have cleaning rods accessible from outside i.e. free to every art of the system for inspection, cleaning and repair. • Use heavy duty covers which are airtight as approved by the specialists all manholes on driveways and parking. • All drain pipes passing under the building, the drive way or the parking should be of heavy duty PVC pie tubes encased in 150mm concrete surround.
Air pollution	<ul style="list-style-type: none"> • Provide protective gear e.g. masks for workers on site. • Workers should be trained on the hazards that produce dust. • Control over areas that generate dust through cleaning and dampening to keep down the dust. • Ensure all machinery and vehicles are well maintained to reduce emissions.
Increased Energy Consumption	<ul style="list-style-type: none"> • Monitor energy consumption and set targets in order to control consumption. • Sensitize the tenants on how to save on energy. • Use energy saving electrical appliances e.g. fluorescent tubes.
Increased water demand	<ul style="list-style-type: none"> • Install water conserving automatic taps and toilets. • Repair damaged pipes promptly.
Increased solid waste generation	<ul style="list-style-type: none"> • Use an integrated solid waste management system through source reduction, recycling, composting, re-use, combustion, and sanitary land filling. • Sensitize the tenants on the non use of polythene bags which are non bio degradable.
Demolition waste	<ul style="list-style-type: none"> • All foundations must be removed and recycled or dumped into licensed disposal site. • Use an integrated solid waste management system through source reduction, recycling, composting, re-use, combustion, and sanitary land filling. • Donate re-usable materials to individuals, institutions and NGOs. • Ensure the site is restored to its original status through introducing a landscaping programme. • Reserve vegetation having conservation value, medicinal or fruit trees.
Increased worker accidents in the site	<ul style="list-style-type: none"> • Ensuring that accidents and dangerous occurrences in the construction site is reduced. • The premises should have a third party insurance policy as per the statutory requirements. • Training the workers on safety measures • Ensuring that the site is well organized and material stored appropriately to reduce accidents.

- Accidents caused by machinery on the site
- A Health and safety Committee should be formed where all people are represented.
 - Ensure maintenance of a general register within the facility as stipulated by the Factories & Other Places of work Act.
 - Ensure that machinery and protective equipment comply with the prescribed safety standards.
 - Ensure that the machinery used does not cause stress to the workers.
 - Train and supervise the workers on how to use the machines and procedures of operation.
 - Test the procedures regularly to ensure that they are applicable.
 - Provide a well equipped first Aid box.
 - Train persons on first Aid procedures.
 - Ensure that all chemicals used in the premises are labeled appropriately and used for the prescribed purposes.
 - Provide the workers with protective clothing especially when handling the chemicals.
 - Develop a system of disposing off chemical containers in order to avoid their re-use.

The full report of the proposed project is available for inspection during working hours at:

- (a) Director-General, the National Environment Management Authority (NEMA), Popo Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.

**IMPORTANT NOTICE TO SUBSCRIBERS TO
THE KENYA GAZETTE**

THE following notes are for the guidance of persons submitting "copy" for inclusion in the *Kenya Gazette, Supplement*, etc.:

- (1) *The Kenya Gazette* contains Notices of a general nature which do not affect legislation. They are, therefore, submitted to the Government Printer directly.
- (2) *Legislative Supplement* contains Rules and Regulations which are issued by the Central Government. Because of this, they must be submitted to the Government Printer through the office of the Attorney-General.
- (3) *Bill Supplement* contains Bills which are for introduction in the National Assembly.
- (4) *Act Supplement* contains Acts passed by the National Assembly.

All "copy" submitted for publication should be prepared on one side of an A4 sheet no matter how small the Notice is, each page being numbered and should be typewritten with double spacing. Copy should be clear, legible and contain no alterations.

Particular attention should be paid to the following points:

- (i) Signature must be supported by rubber-stamping or typing the name of the signatory in capital letters.
- (ii) Dates must be correct and filled in where necessary.
- (iii) Care should be taken to ensure that all headings to Notices and references to legislation are up to date and conform with the Revised Edition of the Laws of Kenya.

EXTRACT FROM THE CODE OF REGULATIONS, SECTION D—

Kenya Gazette

"D 34. (1) Communications for the *Kenya Gazette* should reach the Government Printer not later than 9 a.m. on Friday of the week before publication is desired. The Government Printer will not publish communications received after that hour until the next subsequent issue of the Gazette.

(2) Ministries will be required to pay for the *Kenya Gazette* and to meet the cost of advertising in it.

It is emphasized that these notes are for guidance only, but it is requested that persons submitting copy for publication first satisfy themselves that such copy is complete in every respect.
