Increase traffic floor	<ul style="list-style-type: none"> • Have sign post to direct and caution drivers on ongoing construction activities.
Explosives	<ul style="list-style-type: none"> • Have proper handling of explosives during transportation and storage. The explosives shall be clearly labeled and marked and arranged and stored in a separate store. • Fire fighting appliances shall be installed to be used in case of accidents of fire. • Have a first aid box which is equally equipped. • Train a first aider and he/she shall be present at site at all times. • A danger sign shall be placed at the door (purchased from pelicans). • An expert in handling explosives shall be contacted and be present during rock blasting and excavation. • Provide ear muffins during blasting to minimize noise levels for the workers and erect a perimeter wall to minimize noise generation. • Provide PPE to workers.

Increased crime/insecurity	<ul style="list-style-type: none"> • Pour water on the open ground to minimize dust emissions. • Provide security guards at the site. • Control the casual workers by providing them with shelter on the site. • Adapt emergency response plans involving workers during construction phase and occupation. • Ensure all equipment are in good working order. • Have a trained first aider on site.
Increased fire and health risk/workers accidents and hazards	<ul style="list-style-type: none"> • Organize for hospital arrangement for workers who are injured by having a car on site for transportation. • Have water hydrants. • Have fire equipment for the project.
Increased run off	<ul style="list-style-type: none"> • Constructed drains and channels to manage over flow and run off.
Increased urban density	<ul style="list-style-type: none"> • Improved built environment. • To create green infrastructure.
Increased power consumption	<ul style="list-style-type: none"> • Provide an automatic generator for use. • Seek alternative sources e.g. solar, biogas.
Landscape and visual impacts	<ul style="list-style-type: none"> • The facility shall initiate programs that shall involve green infrastructure and replanting of both exotic and indigenous trees along the perimeter fence, walkways, inter access ways, etc. The project shall encourage eco friendly principles and enhance the environment.
Oil/grease spills	<ul style="list-style-type: none"> • Store in appropriate containers and room. • In case of accidental spills, quick mechanism for recovery and clean up shall be instituted.
Increased demand for water	<ul style="list-style-type: none"> • Manage water use. • Recycle water and use it for gardening. • Utilize roof catchments, install gutters. • Have extra storage water tanks.

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT
FOR THE PROPOSED PETROL SERVICE STATION ON L.R.NO.
KAJIADO/KAPUTIEI NORTH/22606, ISINYA TOWNSHIP,
KAJIADO DISTRICT

INVITATION FOR PUBLIC COMMENTS

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) regulations, the National Environmental Management Authority (NEMA), has received an environmental impact assessment study report for the implementation of the proposed petrol service station.

The project will consist of a retail outlet for petroleum products which has the following salient features, structural steel canopy, concrete driveway to provide access into and from the petrol station, a service bay, service yard and a tire centre for vehicles' maintenance, a shop for spare parts, 4 no. of toilet-rooms for men and ladies, a parking for six vehicles, store, septic tank, an interceptor tank, underground storage tanks as follows: for diesel-30,000 liters, super petrol-20,000 liters, unleaded regular -20,000 liters and kerosine-10,000 liters, 4 no. of fuel-dispensing pumps.

The project is situated in Isinya Township along Nairobi-Namanga Road on a 0.15ha piece of land. It is within the jurisdiction of Kajiado County Council on L.R. No. Kajiado/Kaputiei-North/22606.

The following are the anticipated impacts and proposed mitigation measures.

<i>Possible impacts</i>	<i>Mitigating measures</i>
Disturbance and loss of vegetation	<ul style="list-style-type: none"> Using the excavated or newly introduced soil for landscaping. Introduction of new vegetation to restore biodiversity. Plant appropriate trees along the plot boundary.
Soils, geology and topography disturbance and soil erosion	<ul style="list-style-type: none"> Soil conservation measures shall be applied e.g. landscaping. Excavated soil shall be used to level the ground. Introduction of vegetation cover to prevent run off. Provision of adequate drainage facilities to control surface run off.
<i>Possible Impact</i>	<i>Mitigation Measures</i>
Interference with drainage, water quality and increased runoff.	<ul style="list-style-type: none"> Construct a segregated drainage system in which pure rainwater from roofs of buildings is directly discharged into the open storm water drainage channels while the oil-contaminated waste water is channelled into the OWS for treatment. Appropriate storage, servicing and disposal of construction plant and equipment. Introduce rain harvesting techniques. Landscaping all unpaved areas. Disposal of solid waste in designated areas.
Noise pollution	<ul style="list-style-type: none"> Fitting all mechanically powered plants with suitable silencers. Use of ear muffs by construction personnel. Controlled use of machinery. Control the working time such that noise generated from the site does not cause a nuisance to the surrounding areas.
Generation of solid wastes.	<ul style="list-style-type: none"> Re use by-products where possible. Contract licensed garbage collection company.

Increased traffic

Increased insecurity due to development

Increased worker accidents on the site

Fire hazards

- Raw materials shall be used at optimum levels, through source reduction, recycling, composting, re-use, combustion, and sanitary land filling.
- Display NO DUMPING OF WASTE warning signs in affected areas.
- Provision of access ways for vehicles.
- Movement of pedestrians and vehicles in and out of the site should be controlled.
- Traffic signs shall be provided at strategic locations to guide traffic.
- Provide all day and night security guards.
- Secure the project site with appropriate fencing.
- A third party insurance policy shall be acquired as per the statutory requirements.
- All activities by workers shall be clearly identified and monitored.
- All areas prone to high risk and accidents shall be identified and warning signs provided.
- All workers on site must wear protective gear and equipment.
- Install fire fighting equipment in strategic locations.
- Provide water hydrants.
- Provide signs showing fire fighting installations, emergency exits, and emergency procedures at strategic positions.
- Place alarm devices at strategic points.
- Place emergency numbers at strategic locations.
- Practice fire emergency drills more often.
- Ensure that the workers have undergone formal training on fire risk management.

The full report of the proposed project is available for inspection during working hours at:

- Director-General, National Environment Management Authority, Popo Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT
FOR THE PROPOSED DOG KENNELS, OFFICE FACILITIES AND

VEHICLE WORKSHOP ON L.R NO. 27/332 & 27/335, NORTH MUTHAIGA, OFF KIAMBU ROAD

INVITATION FOR PUBLIC COMMENTS

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) regulations, the National Environmental Management Authority (NEMA), has received an environmental impact assessment study report for the implementation of the proposed dog kennels, office facilities and vehicle workshop.

The proposed project comprises of construction of a dog hold yard, a vehicle workshop and security guards training facility. The development will be of single floor permanent buildings comprising of:

- 114 dog kennels, 5 puppy kennels, overhead tank, guard house, 3 training rooms, toilets, 2 offices, soak pit/ septic tank, kitchen and washing yard, spares store, 10 parking bays.

The project is located in North Muthaiga, off Kiambu Road, opposite Wonderjoy Gardens about 1.5 km from Kiambu Road. The proposed development plot is on L.R No. 27/ 332 and 335 and measures about 4470 square metres.

The following are the anticipated impacts and proposed mitigation measures.

<i>Negative impacts</i>	<i>Mitigation measures</i>
High demand of raw materials	<ul style="list-style-type: none"> • Source building materials from local suppliers who use environmentally friendly processes in their operations. • Ensure accurate budgeting and estimation of actual construction material requirements to ensure that the least amount of material necessary is ordered, minimizing damage or loss of materials.
Increased storm water, runoff and soil erosion	<ul style="list-style-type: none"> • Roof water to be harvested and stored in water reservoirs for use in cleaning and in the toilets. • A storm water management plan that minimizes impervious area infiltration by use of re-charge areas and use of detention and/or retention with graduated outlet control structure shall be designed.
<i>Possible impacts</i>	<i>Mitigating measures</i>
	<ul style="list-style-type: none"> • Apply soil erosion control measures such as leveling of the project site construction of soil-galleys on sloppy sections to reduce run-off velocity and increase infiltration of storm water into the soil. • Ensure that construction vehicles are restricted to existing roads to avoid soil compaction within and around the project site and ripping any compacted areas.
Increased solid waste generation	<ul style="list-style-type: none"> • Use of an integrated solid waste management system i.e. through a hierarchy of options: reduction, sorting, re-use, recycling and proper disposal. • Through accurate estimation of the sizes and quantities of materials required, order materials in the sizes and quantities they will be needed, rather than cutting them to size, or having large quantities of residual materials.
Dust emission	<ul style="list-style-type: none"> • Ensure strict enforcement of on-site speed limit regulations. • Avoid excavation works in extremely dry weathers if and when possible. • Sprinkle water on graded access routes when necessary to reduce dust

generation by construction vehicles.

Exhaust emission	<ul style="list-style-type: none"> • Personal Protective equipment to be worn. • Vehicle idling time shall be minimized. • Alternatively fuelled construction equipment shall be used where feasible; equipment shall be properly tuned and maintained • Sensitize truck drivers to avoid unnecessary racing of vehicle engines at loading/off-loading points and parking areas, and to switch off engines at these points.
Noise and vibration during construction period	<ul style="list-style-type: none"> • Sensitize construction vehicle drivers and machinery operators to switch off engines of vehicles or machinery not being used. • Sensitize construction drivers to avoid gunning of vehicle engines or hooting especially when passing through sensitive areas such as churches, residential areas and hospitals. • Ensure that construction machinery are kept in good condition to reduce noise generation. • Ensure that all generators and heavy-duty equipment are insulated or placed in enclosures to minimize ambient noise levels. • Trees around and within the site shall provide some buffer against noise propagation. • The noisy construction works shall entirely be planned to be during day time when most of the neighbors are away at work.
Increased energy consumption	<ul style="list-style-type: none"> • Ensure electrical equipment, appliances and lights are switched off when not being used, Install energy saving fluorescent tubes at all lighting points instead of bulbs which consume higher electric energy.
<i>Negative impacts</i>	<i>Mitigation measures</i>
Generation of waste water	<ul style="list-style-type: none"> • Provision of means for handling sewage generated by construction workers. • Conduct regular checks for sewage pipe blockages or damages since such vices can lead to release of the effluent into the land and water bodies. • Monitor effluent quality regularly to ensure that the stipulated discharge rules and standards are not violated.
Incidents, accidents and dangerous occurrences	<ul style="list-style-type: none"> • Ensure that provisions for reporting incidents, accidents and dangerous occurrences during construction using prescribed forms obtainable from the local Occupational Health and Safety Office (OHSO) are in place.
Occupational health and safety risks during construction and operational phases	<ul style="list-style-type: none"> • Well stocked first aid box which is easily available and accessible shall be provided within the premises. • Fire fighting equipment such as fire extinguishers and hydrant systems shall be provided at strategic locations such as stores and construction areas. • Regular inspection and servicing of the equipment must be undertaken by a reputable service provider and records of such inspections maintained.

Safety and security	<ul style="list-style-type: none"> • Ensure general safety and security at all times by providing day and night security guards and adequate lighting within and around the construction site.
Oil spills	<ul style="list-style-type: none"> • A designated garage section of the site fitted with oil trapping equipments to be planned for changes. Such an area shall be well protected from contaminating the soil.
Hydrology and Water quality degradation	<ul style="list-style-type: none"> • Hazardous substance control and emergency response plan that will include preparations for quick and safe clean up of accidental spills. • Hazardous-materials handling procedures to reduce the potential for a spill during construction. • Identify areas where refueling and vehicle maintenance activities and storage of hazardous materials, if any, will be permitted. • Make sure the project is at least fifteen metres away from the center/highest flood point of the river touching on one site of the project site.
Increased pressure on infrastructure	<ul style="list-style-type: none"> • Co-ordinate with other planning goals and objectives for region. • Up-grade existing infrastructure and services, if and where feasible.
Air pollution	<ul style="list-style-type: none"> • Suitable wet suppression techniques need to be utilized in all exposed areas. • All unnecessary traffic must be strictly limited on site; speed controls are to be enforced.
Conserving the nearby river channel	<ul style="list-style-type: none"> • Consult with WRMA to confirm the original water course as well as assist in ensuring its conservation.
Potential noise pollution from dogs during the operation phase	<ul style="list-style-type: none"> • Proper and sufficient food and water. • Adequate shelter. • The opportunity to display normal patterns of behavior. • Protection from and rapid diagnosis of any significant injury or distress. • Adequate exercise. • Proper disposal of waste from the kennels and the kitchen. • Constructing sound proof dog kennels. • Ensuring that the site acts as resting place for the dogs during the day (for a duration of 6-8 hours only). • No dog activities during the night (between 6pm and 8am).
Socio-economic/cultural impacts/community engagement/HIV/AIDS awareness	<ul style="list-style-type: none"> • Provide priority in employment opportunities to people from the neighbouring community. • Security to be provided on site at all times. • Fence around the site to minimise intrusion and promote good neighbourliness, including respect for neighbours' privacy. • Develop a grievance mechanism, which shall outline how Securex will address any complaints or grievances raised by the neighbours or by their employees. • All communication with the community

shall be documented.

- Try as much as possible to complete the project within the stipulated time to reduce nuisance to the neighbour.
- Provide training and awareness on HIV/AIDS at the workplace and where possible, avail literature on HIV/AIDS awareness to staff.
- Develop and communicate the company policy for HIV/AIDS in line with Government policy guidelines.
- Display communicative posters within company premises on HIV/AIDS related messages.
- Due to the magnitude and nature of the project, the Firm of experts shall carry out monitoring and evaluation. More so an initial environmental audit shall also be carried out within a period of 12 months after commencement of the operations.

Emergence of new environmental concerns during the construction and operation phase

The full report of the proposed project is available for inspection during working hours at:

- (a) Director-General, National Environment Management Authority, Popo Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.
- (b) Permanent Secretary, Ministry of Environment and Mineral Resources, N.H.I.F. Building, Community, P.O. Box 30521, Nairobi.
- (c) Provincial Director of Environment, Nairobi Province.
- (d) District Environment Officer, Westlands and Langata.

The National Environment Management Authority invites members of the public to submit oral or written comments within thirty (30) days from the date of publication of this notice to the Director-General, NEMA, to assist the Authority in the approval process of the project.

THE ENVIRONMENTAL MANAGEMENT AND CO-ORDINATION ACT

(No. 8 of 1999)

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY STRATEGIC ENVIRONMENTAL ASSESSMENT REPORT FOR THE ECONOMIC STIMULUS PROGRAMME (ESP) “REFORESTATION, SUSTAINABLE DEVELOPMENT AND CARBON SEQUESTRATION PROJECT IN KENYAN DEGRADED LANDS”

INVITATION OF PUBLIC COMMENTS

Proposed Carbon Project Components

The proponent proposes to expand the restoration of degraded lands by exploiting the following options—

- Tree planting by 4,200 primary schools to fast track reforestation initiative;
- Improvement of market centres in rehabilitating 210 “jua kali” sheds and 200 hospitals through a beautification initiative of landscaping by plating grass, flowers and trees;
- Minimize soil erosion around 200 fish ponds and promote effective use of water in irrigation for improved agriculture productivity in Bura, Hola, Pekera, Tana Delta, Kibwezi, Ahero, West Kano, Bunyala, Mwea and South West Kano;

Alternative Options

The reforestation of degraded lands option shall study the reforestation technological and land use inputs for the proposed

expansion of restoration of the ecosystem that shall facilitate, meet current and future forestry service demands for Kenya. The proponent with the advice of the lead expert has settled on the carbon sequestration of ecosystem restoration for the economic stimulus programme as it was considered to be economical in term of resources and the technological input. The fish ponds will consist of excavations, breaking soil, dumping soil and treading on biodiversity. The potential environmental impact of the fish ponds will be released of stored carbon dioxide (CO₂) gas a greenhouse gas from below the ground.

The strategic environmental assessment considered the following alternatives carefully.

If there is no project:

The people living in the Kenya rural areas are amongst the poorest in the country with 62% of the people living below the poverty line thus making the rural area the most poverty stricken f the country. Implementation of sound projects such as the Economic Stimulus Programme that provide clear measurably benefits to the poor communities, opportunities for knowledge exchange and capacity building and natural resource management skills would have a significant impact on the livelihoods and quality of life to the communities involved in this project. Livelihoods are unlikely to occur without Economic Stimulus Programme (ESP).

The ESP was initially conceived as an economic project with sustainable livelihoods as its core focus. However, it was redesigned as a carbon project with a focus on environmental management, protection, conservation and development within the framework of enhancing carbon sequestration, reducing poverty in the poor areas through the promotion of income generating activities, training communities to access technology for forest production, markets and carbon financing.

The alternative of designing environmental project was considered and rejected in view of the extreme poverty and social issues in poor communities. Other alternatives discussed included (a) having a larger number of components, (b) a rural village enterprise managed by Community Development Fund (CDF) or all of its partners. The alternative selected reduced the complexity of the project. The Arid Lands Resources Management Project that has been tried and tested as being successful in the delivery of resources to communities was selected. The lessons learnt will assist with the carbon project aimed at reforestation, sustainable development in Kenyan degraded lands.

The ESP is in line with the priorities of Vision 2030 and National Climate Change Response Strategy. On its own, the Government of Kenya would not be able to meet the targets of this vision thereby the input of development partners and approach to mobilizing resources from carbon markets among other development partners like the World Bank, African Development Bank, French Development Agency, Swedish Development Co-operation would provide a higher probability of achieving the goals of the vision for the rural areas. The focus on environmental impacts and the mitigation measures that are inbuilt in ESP provide strong linkages between environmental integrity and the reduction of poverty in rural areas. The ESP support would provide for greater monitoring, supervision and evaluation for proposed development activities.

No environmental governance component: The original project was conceived without a focus on environmental governance issues of the Kenyan rural areas. Lack of environmental governance would have meant that the project activities would ignore compliance to requirements of sustainable use in relevant legislation and in particular environmental guidelines, procedures, practices safeguards, rules and regulations.

Analysis of alternative construction material and technology:

4,200 primary schools are involved in the tree planting initiative. Most of the planting will be done in degraded lands within and or around schools. Some schools for example Funyula, Naivasha and Ahero have taken the tree planting initiative with excitement and doing much more with their own internal resources to sustain the process. Other project sites with tree planting, landscaping, beautification include; hospitals, market centres and around fish ponds. However, inadequate seedlings impact tree planting and not easy to obtain indigenous species.

Affected parties consulted

Athi-River Primary School, DEO, DFO; Naivasha and Laikipia Primary schools, DEO, DFO; Ahero and Bondo Primary schools, DEO, DFO; Nambale and Funyula Primary schools; DEO, DFO,

Fisheries Local Government; Kitui and Mwingi Primary schools, DEO, DFO; Garissa Primary School, DEO, DFO; Nyeri and Murang'a Primary schools, DEO, DFO; Kwale and Kilifi Primary schools, DEO, DFO.

Affected areas:

(a) Existing Indigenous Forest- Expansion and rehabilitation of market centres with jua kali sheds, hospital facilities and centres of higher learning may lead to clearing of some the existing indigenous forest affecting the rich biodiversity.

(b) Rivers and wetlands_

(i) construction of fish ponds along the lake shores or river banks may affect the wetland areas through pollution that may contaminate water and make it unsafe for domestic use.

(ii) Encroachment in the wetland supporting the river is foreseen, then the wetlands will be drained and the lake shores and river banks end affected that may result into deteriorationof the ecosystem.

Anticipated impacts and mitigation measures.

Potential Impacts	Mitigation Measures
Soil erosion and compaction, increased dam sediments, obstruction of natural water channels	<ul style="list-style-type: none"> Develop soil erosion management measures Limit the circulation of heavy machinery to minimal areas. Locate access roads perpendicularly or diagonally to the slope rather than along steep slopes. At the end of drilling works, level off the soils and facilitate plant regeneration. Plan work in sections to avoid opening up areas that are left undeveloped.
Increased waste deposits and blockage of open sewers, decreased oxygen levels in the fish ponds	<ul style="list-style-type: none"> Encourage separate treatment for industrial and domestic effluent. Conduct awareness on need of appropriate waste management practices including reduction, reuse, recycle, segregation, pre-treatment among others
Potential Impacts	Mitigation Measures
Reduced amount of water flow downstream, increased irrigation operations, reduced water quality including, contamination with heavy metals and nutrients, diversion of water	<ul style="list-style-type: none"> Avoid open dumping of solid waste on wind ward side of the fish ponds. Construction of waste screens and sediment traps. Observe the water Act, 2007, and the 30% water rights for downstream users. Use of metering methods including v-notches and sluices. Construction of sediment traps. Keep natural water channels free from obstruction. Conduct water quality monitoring at river recharge points. Incorporate biological treatment methods in fish ponds to improve water quality. Develop monitoring strategies and penalties for individuals diverting water from main sources.
Avoid interference with animals drinking points, loss of vegetation cover/Deforestation, destruction of indigenous tree species in the forest,	<ul style="list-style-type: none"> Avoid constructing at animals water drinking points. Avoid selecting sites sheltering or frequented by wildlife. Preserve migration corridors for wild and domestic animals.

perturbation of terrestrial, aquatic and avian wildlife, increase in poaching due to non-resident workers, derangement of terrestrial, aquatic and avian wildlife (competition for food and water resources)	<ul style="list-style-type: none"> • All trees uprooted to pave way for weir and access construction should be replanted. • Avoid interference with wildlife breeding sites. • Control introduction of invasive plants and animal species in forest, sewage ponds and water bodies. • Promote the development of community nurseries. • Environmental conservation measures should be instituted.
Degradation of air quality and ambient noise due to excavations operations, degradation of air quality by vehicles emissions and dust during constructions, interference with domestic and wildlife due to excessive and destructive noise evolution of odours and green house gases from stagnant water	<ul style="list-style-type: none"> • Operate equipment with air pollution control systems. • Insulate noisy machines when working near animal habitats. • Maintain vehicles and machinery in good condition in order minimize gas emissions and noise. • Ensure continuous maintenance of sewage treatment plant and develop appropriate sludge handling procedures. • Avoid construction of fish ponds on windward side to avoid spread of dust emissions, odours.
Migration communicable diseases, resources competition, loss of cultural heritage, destruction of private property including farm produce and other investments, loss of land, gender equity	<ul style="list-style-type: none"> • Conduct continuous public awareness and encourage participation throughout the project span to discuss contentious issues including compensation of project affected persons. • Communicate on project progress to community members and alert on sections to be developed to reduce destruction and interference. • Accord local community employment and business opportunity as a priority. • Implement HIV/AIDS and other communicable diseases programmes in conjunction with line ministries.
<i>Potential Impacts</i>	<i>Mitigation Measures</i>
	<ul style="list-style-type: none"> • Establish labour camps at reasonable distance from villages. • Where possible offer women equal employment opportunities to men. • Develop secondary uses of fish farming to generate income.
Injuries and accidents to workers, communicable diseases, suffocation, poisoning, floods, disease vectors, cultivation along fish ponds and water supply lines	<ul style="list-style-type: none"> • Complying with work place legal requirements, provision of protective professional equipment. • Employment of competent work force, instituting safety drills, disaster preparedness and management programmes. • Develop appropriate structures that meet recommended standards. • Control disease vectors using appropriate methods. • Conduct education and awareness on effects of cultivating using sewage water, inference with water supply etc.

IMPORTANT NOTICE TO SUBSCRIBERS TO THE KENYA GAZETTE

THE following notes are for the guidance of persons submitting "copy" for inclusion in the *Kenya Gazette, Supplement*, etc.:

- (1) *The Kenya Gazette* contains Notices of a general nature which do not affect legislation. They are, therefore, submitted to the Government Printer directly.
- (2) *Legislative Supplement* contains Rules and Regulations which are issued by the Central Government. Because of this, they must be submitted to the Government Printer through the office of the Attorney-General.
- (3) *Bill Supplement* contains Bills which are for introduction in the National Assembly.
- (4) *Act Supplement* contains Acts passed by the National Assembly.

All "copy" submitted for publication should be prepared on one side of an A4 sheet no matter how small the Notice is, each page being numbered and should be typewritten with double spacing. Copy should be clear, legible and contain no alterations.

Particular attention should be paid to the following points:

- (i) Signature must be supported by rubber-stamping or typing the name of the signatory in capital letters.
- (ii) Dates must be correct and filled in where necessary.
- (iii) Care should be taken to ensure that all headings to Notices and references to legislation are up to date and conform with the Revised Edition of the Laws of Kenya.

EXTRACT FROM THE CODE OF REGULATIONS, SECTION D—

Kenya Gazette

"D 34. (1) Communications for the *Kenya Gazette* should reach the Government Printer not later than 9 a.m. on Friday of the week before publication is desired. The Government Printer will not publish communications received after that hour until the next subsequent issue of the Gazette.

(2) Ministries will be required to pay for the *Kenya Gazette* and to meet the cost of advertising in it.

It is emphasized that these notes are for guidance only, but it is requested that persons submitting copy for publication first satisfy themselves that such copy is complete in every respect.
