INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The Proponent (Crown Paints Kenya Limited) is proposing to construct a warehouse for mixing and storage of water based paints on her piece of land at Kisian (L.R. No. Kisumu / Ojola / 4790). The site is situated at Kisian Junction along Kisumu – Busia Road, Ojola Sub-Location, South – West Kisumu Location, Otonglo Division Of Kisumu North District in Kisumu County. It is anticipated that once the warehouse has been constructed, raw materials for manufacture of water based paint will be transported from Nairobi to the site for mixing, packaging, storage and dispatch to the market, this will drastically reduce the Crown Paints Kenya Limited's operation costs - which will in turn lead to a reduction in the price of water based paints in the region.

The following are the anticipated impacts and proposed mitigation measures:

| Impact | Mitigation Measure |
|------------------------|---|
| Excavation of the dead | <ul style="list-style-type: none"> The two grave sites on the plot will be identified; and The remains of the dead will be excavated and re-buried elsewhere in line with the local traditions. |

It is suggested that the contractors identify suitable land fill sites with the necessary consultations; • A suitable contractor (NEMA certified) should be commissioned to provide collection and disposal services; • The Proponent should ensure that the contractor recovers all solid waste and building debris from the site and disposes it in a sensible manner before commissioning of the site; and • Waste segregation, reuse; provision of waste bins | Fire and Explosion Hazards | • A firefighting equipment must be available at the site and on the vehicles; • No burning of solid waste should be carried out close to or within the facility; • Annual inspection of the electrical wiring system in the facility. |
| Noise and Vibration | • Use of PPEs; • Regular maintenance of equipment to keep it in good working condition; • Operators of construction equipment to be made aware of the potential noise issues and how to minimize noise emissions; and • Construction and transportation activities to be undertaken during daytime (i.e. from 8 am to 6pm). | Water consumption | • Process water will be treated and reused (closed circuit); • The area is served by both piped and borehole water; • Enough water storage tanks to be constructed ; • Avoid unnecessary wastage of water during operation; and • Residuals from fuels and lubricants used on site should be stored safely awaiting appropriate disposal in order to prevent migration of contaminant hydrocarbons into the site soil and water bodies. |

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY
THE DRAFT STRATEGIC ENVIRONMENTAL ASSESSMENT FOR
THE AMBOSELI ECOSYSTEM MANAGEMENT PLAN (2008-
2018)

INVITATION OF PUBLIC COMMENTS

PURSUANT to Regulation 42 and 43 of the Environmental (Impact Assessment and Audit) Regulations, of 2003, the National Environment Management Authority (NEMA) has received a Draft Strategic Environmental Assessment (SEA) for the Amboseli Ecosystem Management Plan (2008-2018).

The SEA findings are expected to ensure that the implementation of the plan is environmentally sustainable. The ten (10) year plan has the following key objectives:

- maintaining seasonal wildlife movements across the entire ecosystem which is critical for the valued species in the area,
- promoting public-private partnerships with local communities in the ecosystem in order to ensure more equitable sharing of benefits derived from the natural resources,
- promoting sustainable tourism in the ecosystem, and
- providing opportunities for research and conservation education.

The five management programmes in the plan are: a) Ecological Management, b) Tourism Development and Management, c) Community Partnership and Education, d) Security and e) Ecosystem Operations. Each of the management programmes has a 3-year Activity Plan consisting of individual management actions and day-to-day management activities that will be implemented and reviewed on regular basis.

The findings of the SEA showed that the plan is dominated by positive impacts in all the 5 programmes. Out of 250 plan activities only 27 were found to have potential negative impacts as highlighted below.

1. Ecological Management and Tourism Development Programmes

*Potential Impact**Proposed mitigation*

- | | |
|---|--|
| 1. Social impacts of charcoal trade ban on community livelihoods and poverty reduction | Enforce the Forest Act (2002) Charcoal regulations |
| 2. Impact of construction of wildlife watering points on resource conflict | Restrict the construction of wildlife watering points in Amboseli National Park and Community Conservancies in the Group Ranches |
| 3. Impact of the construction of the Visitor Centre on range environment in Amboseli National Park | Undertake pre-project EIA and subsequently conduct regular EA after commissioning the Visitor Centre |

| 6. Impact on range environment of developing and marketing tourist Bandas at the Losikutok conservation area in Mbirikani Group Ranch | Undertake pre-project EIA and subsequently conduct regular EA after commissioning the Bandas |
| 7. Impact on the range environment of establishing and operating community tourism Bandas in Ologulului/Olorarashi Group Ranch | Undertake pre-project EIA and subsequently conduct regular EA after commissioning the Bandas |

2. Community Partnership and Education Programme

- | | |
|---|--|
| 1. Impact of rehabilitation of Namelok and Kimana wildlife barrier fences | Evaluate the impact of the fence and carry out regular EA |
| 2. Impact of supplying adequate water to the dry season grazing zones | Undertake pre-project EIA and conduct regular EA |
| 3. Impact of re-establishing gazetted livestock holding grounds in Loitokitok Sub County and improvement of support infrastructure in the livestock markets | Undertake pre-project EIA and conduct regular EA |
| 4. Impact of constructing slaughter houses in the Amboseli ecosystem | Undertake a project feasibility study; ensure the local pastoralists have share in ownership of the slaughterhouse; engaging competent slaughterhouse managers |
| 5. Impact of establishing a livestock Disease Free Zone (DFZ) | Undertake pre-project EIA and conduct regular EA |
| 3. Security Education Programme | |
| 1. Impact on cross border wildlife security measures | Community participation in the implementation of joint security trans-boundary initiatives through their local and village leaders |
| 2. Deployment of adequate intelligence staff on public interests | Integration of wildlife and ecosystem security committees with county administration and security systems |
| 3. Deployment of adequate security to KWS facilities on land degradation | The plan should be very clear on land use and zoning so as to avoid conflicting land uses in one location and to avoid the devaluation of the tourism products by spinoff enterprises around the KWS gates, outposts and offices |
| 4. Ecosystem Operations and Management Programme | |
| 1. Impact of establishing a small medical laboratory at the Amboseli Health Clinic on water resources | The health clinic should eventually be served with an incinerator |
| 2. Impact of construction of staff houses and additional offices to house research and procurement sections | All future office and staff residences should be located outside the park in order to reduce the environmental footprint |
| 3. Impact of developing tourist roads outside the park | The roads should be designed with barriers manned by community game scouts in order to reduce the secondary negative impacts to conservation and tourism |
| 4. Impact of rehabilitating the former staff canteen to convert it into a boarding facility for children from Amboseli Primary School. | Land use zoning to determine the most appropriate locations of essential services in the ecosystem |
| 5. Impact from the provision of adequate water at the gates on protection of wildlife corridors and threatened species | Water supply at the gates should be restricted to national park uses and the adjacent environment outside the gate gazetted as non-development areas with disincentives for potential business investors |
| 6. Impact of constructing a gate at Kitirua entry point on protection | Zone Kitirua area as a zone for high end tourism with |

of threatened species

restriction to mass tourism so as to reduce the visitor impacts and retain it as a buffer zone

The SEA has also identified some areas in which the Amboseli Ecosystem Management Plan (2008-2018) can be strengthened in order to be more compliant with existing national environmental policies, legal frameworks and strategic plans as well as regional and international environmental obligations.

The full Draft Strategic Environmental Impact Assessment for the Amboseli Ecosystem Management Plan (2008-2018) is available for inspection during working hours at:

 - Form a Health and Safety Committee to improve on the health and safety.
 - Undertake a risk assessment of the plant operations and implement necessary safety measures
 - Enhance a health and safety policy and emergency response procedures.
 - Conduct Health and safety audits annually and put in place appropriate corrective measures
 - Provide appropriate PPEs
 - Formulate contingency measures for accidental occurrences
- Storage and handling of raw material/Scrap tyre
- The storage area will be paved to contain leachate from entering the soil
 - Flammable or combustible liquids, hazardous wastes or other ignitable materials should not be stored close to tyre stockpiles.
 - To prevent pests, vermin and diseases vectors, the stockpiles kept outdoors should be treated pesticides or insecticides for vector control
 - To prevent runoff water washing off the insecticides or pesticides off the tyres, the area should be kerbed.
