THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED SEISMIC SURVEY FOR BLOCKS L 10A & 10B

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) Regulations, the National Environment Management Authority, (NEMA) has received an environmental impact assessment study report for the implementation of the proposed seismic survey for blocks L 10A & 10B.

The proponent proposes to conduct an offshore two dimensional (2-D) and three dimensional (3-D) seismic survey programme in exploration blocks L-10A and L-10B off the Kenyan coast. The seismic survey programme will be undertaken to help determine whether there may be commercial deposits of oil and gas that can be produced from these two blocks.

The L-10A and L-10B Blocks are located offshore Mombasa in the south of Kenya, and adjoin Kenya's marine border with Tanzania. The southern block L-10B is approximately 20 km north of Pemba Island, Tanzania.

The following are the anticipated impacts and proposed mitigation measures:

<i>Environmental issue</i>	<i>Mitigation Measures</i>
Mortality of cetacean or permanent damage to hearing and other sensitive parts.	Implement the <i>Marine Mammals Management Plan</i> which is to include: <ul style="list-style-type: none"> • Baseline surveys
Disruption to sensitive cetacean from introduction of submarine noise which could interfere with echo-location, feeding, communication and other behaviour.	<ul style="list-style-type: none"> • Avoidance of key periods in the life cycle of some of the species • Surveillance throughout seismic activities • Use of suitably trained marine mammal observers (MMOs). • soft starts with shut down if animals observed within close range (i.e. less than 500 m)
Direct physical contact with cetaceans by passing streamer, tail buoy or air guns and/or impact cetaceans from contact with hull or propellers	Implement the <i>Marine Mammals Management Plan</i> specifically: <ul style="list-style-type: none"> • Surveillance throughout seismic activities • Towed passive acoustics • Shut down if animals observed within close range (i.e. less than 500 m)

accidental oil spill.

Disruption to sensitive turtles from introduction of submarine noise

Direct physical contact with turtles by passing streamer, tail buoy or air guns, hull or propellers

Potential impact to turtles from accidental oil spill.

Potential damage to corals from accidental oil spill or wastewater discharges

Physical damage to corals from the streamers or tail buoy if sections are lost during operations

Degradation of marine water quality from discharge of macerated food and effluent

Degradation of marine water quality from accidental oil spill

Disruption to fishing activities by damage to vessels or fishing equipment if tangled in streamer cable, tail buoy or air guns

Interruption to fishing, shipping and recreational activities during seismic survey operations

Potential accidental oil spill impacting fish

Perceived/actual loss of livelihood.

Plan which will include details of refuelling procedures in port and bunkering operations at sea

• Implement the *Marine Mammals Management Plan* which will adequately address concerns over impacts to turtles.

• Observation of turtles and reporting of any impacts by MMO. If entanglement occurs with the equipment review design to assess whether modification can be made to reduce the risk of entanglement.

• Implement contractor *Fuel Management Plan* which will include details of refuelling procedures in port and bunkering operations at sea.

• Controlled through the Contractor's *Streamer Recovery Plan*. This plan will detail the response procedures for finding and recovering a lost streamer and prevent it impacting any coast fishers or coral reefs.

• Implement *wastewater and waste management plans* which comply with MARPOL 73/78 (including *Regulation 8(1) (b) of Annex IV* on Sewage and putrescible wastes disposal).

• Implement *Fuel Management Plan* which will include details of refuelling procedures in port and bunkering operations at sea.

• Implement *Community Consultation Plan* to ensure that fishers avoid the areas of operation and ensure that boat has procedures to spot and communicate with any fishers that it encounters. During consultation provide clear explanation of how Grievance Mechanism will be implemented.

• Implement *Community Consultation Plan*, which includes a Grievance Mechanism, to inform the fishers as to when the survey operations will be undertaken and where so as to ensure that fishers avoid the areas of operation (particularly the 2D survey area). Community Consultation will identify the most efficient communication mechanisms for this information.

• Ensure that the support vessels for the seismic operations will have qualified staff on board who will be responsible for implementing procedures to take fishers out of the area if any are spotted and ensure that communications with the any fishers that are encountered are in the local language.

• Contractor *Fuel Management Plan* which will include details of refuelling procedures in port and bunkering operations at sea.

• Implement *Community Consultation Plan*, which includes a Grievance Mechanism, to inform the fishers as to when the survey operations will be being undertaken and where so as to ensure that fishers avoid the areas of operation (particularly the 2D survey area).

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT
FOR THE PROPOSED SUBDIVISION OF 662 HECTARES OF
KYANZAVI FARM, KYANZAVI SUB-LOCATION, KYANZAVI
LOCATION, MATUNGULU DISTRICT

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) Regulations, the National Environment Management Authority, (NEMA) has received an environmental impact assessment study report for the implementation of the proposed subdivision of 662 hectares of Kyanzavi farm.

The proponent proposes to subdivide 662 hectares not occupied by coffee plantations into 1890 agricultural plots to its members. This translates to 1.50 acres per share certificate. The coffee farms will be surveyed as individual plots and the title deeds registered in favour of the company i.e. Kyanzavi Farmers Company Ltd.

Kyanzavi farm is located in Kyanzavi location, Kyanzavi Division, Matungulu District. The farm is only 15 kilometers from Tala-Kangundo Township along the Tala - Thika highway. The farm is a combination of four farms i.e. L.R. No. 1846/4, 5846/3, 1848/2 and 1851/3/2. The farm has a total acreage of 1860 hectares

The following are the anticipated impacts and proposed mitigation measures:

<i>Environmental issue</i>	<i>Mitigation Measures</i>
Pollution of water	<ul style="list-style-type: none"> Put "NO SWIMMING, BATHING, WASHING" signs near the dams. Fence the dams and provide a buffer. Provide water troughs at strategic points as animal watering points. Introduce innovative solid waste disposal methods e.g. burning, composting. Plant reeds and trees around the dams to sieve any effluent. Awareness campaigns. Construction of treatment ponds at the factory.
Uncontrolled water extraction	<ul style="list-style-type: none"> Install better filters at the coffee factory Install water meters at extract point/Pumping station.
Soil Erosion	<ul style="list-style-type: none"> Terracing along contours. Protect slopes and catchments areas by construction and maintenance of artificial drains. Afforestation.

Deforestation	<ul style="list-style-type: none"> Erect silt and soil traps. Community awareness on better farming techniques. Planting woodlots (Each parcel holder to reserve 10% for woodlot planting). Planting of trees on buffer of dams.
Silting of dams	<ul style="list-style-type: none"> Plant trees on the buffer of the dams. Plant reeds to salve the soil before getting into the dams. Terracing along contours. Protect slopes and catchments areas by construction and maintenance of artificial drains. Afforestation. Erect silt and soil traps. Community awareness on better farming techniques.
Loss of flora and fauna	<ul style="list-style-type: none"> Plant more pine trees. Conserve the dams by creating buffer zone and fencing. Community awareness.
Depletion/ reduction of water supply	<ul style="list-style-type: none"> Afforestation. Creation of buffer around the dams. Metering water abstraction levels. Drilling of boreholes to supplement existing water source. Use of rain harvesting method e.g. water tanks, water pans.
Conflict on shared water resources	<ul style="list-style-type: none"> Provide a pipe to a strategic point on the boundary of the farm where livestock can water. Provide water troughs. Provide access roads to the watering points.
Accident	<ul style="list-style-type: none"> Put "NO SWIMMING BATHING, WASHING" signs near the dams. Provide a shower next to the chemical chamber at the coffee factory. Provide railing bankers at the coffee barriers reception pits.

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT
FOR THE PROPOSED KENYA E-GOVERNMENT EXPANSION
PROJECT IN FORTY SEVEN COUNTIES

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) Regulations, the National Environment Management Authority, (NEMA) has received an environmental impact assessment study report for the implementation of the proposed Kenya e-Government Expansion Project in forty-seven counties.

The proposed project involves construction of fiber links as protection rings to improve NOFBI in government offices in Nairobi and the other seven provinces countrywide.

The e-government expansion project is to cover the following Counties in Kenya: Nairobi, Busia, Kericho, Kisii, Kisumu, Machakos, Malindi, Meru, Turkana, Uasin Gishu, Kiambu, Kirinyaga, Muranga, Nyandarua, Kilifi, Kwale, Lamu, Taita, Tana River, Isiolo, Kitui, Marsabit, Mandera, Wajir, Siaya, South Nyanza, Baringo, Elgeyo/Marakwet, Kajiado, Laikipia, Nandi, Narok, Samburu, Trans Nzoia, West Pokot, and Bungoma.

The following are the anticipated impacts and proposed mitigation measures:

Possible Impact	Mitigation measures
Terrestrial habitat alteration	<ul style="list-style-type: none"> Re-vegetation of disturbed areas with native plant species. Undertake selective clearance by removing tall woody species leaving saplings, for quick regeneration of vegetation along the way-leave.
Noise and vibration	<ul style="list-style-type: none"> Sensitize the workforce and truck drivers on issues of equipment maintenance. Supervise construction traffic, maintain plant and equipment, undertake construction only during the daytime for peace of the neighbours, workers to wear ear plugs, muffs as part of the personal protective gear.
Aquatic habitat alteration	<ul style="list-style-type: none"> Minimizing clearing and disruption to riparian vegetation.
Risk of leaks or spills	<ul style="list-style-type: none"> Regular maintenance of site equipment. Investigate the possibility of catalytic converters. Safety procedures for fuel storage and refuelling. Dispose of oil residues carefully.
Soil erosion	<ul style="list-style-type: none"> Soils excavated for the erection of towers should be used for re-filling and should not be left exposed to wind or water for long periods. The contractor should avoid steep terrain during the transportation of construction material by using alternative routes or use light vehicles where appropriate. Riverine vegetation should be minimally disturbed during the construction phase to reduce soil erosion and safeguard riverbank protection. Re-plant degraded areas with local species common in the area to complement natural vegetation regeneration to improve ground cover.
Air pollution (dust, fuel emissions)	<ul style="list-style-type: none"> Control speed of construction vehicles. Prohibit idling of vehicles. Water should be sprayed during the construction phase on excavated areas. Regular maintenance of plant and equipment. Provision of dust masks for use when

working in dusty conditions.

- | | |
|---|--|
| Contamination of ground and surface water | <ul style="list-style-type: none"> Maintenance of construction vehicles should be carried out in the Contractor's camp and a recognized garage. Proper storage, handling and disposal of oil wastes from machinery, discourage servicing of machinery and vehicles. |
| Management of solid Waste | <ul style="list-style-type: none"> Contractor must dispose solid wastes away from the site to an approved disposal site. Temporary pit latrine for construction workers. |
| Working at heights. | <ul style="list-style-type: none"> Testing structures for integrity prior to undertaking work. Implementation of a fall protection program that includes training in climbing techniques and use of fall protection measures. Inspection, maintenance, and replacement of fall protection equipment. Installation of fixtures on tower components to facilitate fall protection systems. An approved tool bag should be used for raising or lowering tools or materials to workers on structure. Use of helmets and other protective devices will mitigate against scratches, bruises, punctures, lacerations and head injuries due to dropping objects. |

FOR THE PROPOSED MIXED USE DEVELOPMENT ON PLOT
NO. L.R. NO. 27081/18, THIKA

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) Regulations, the National Environment Management Authority, (NEMA) has received an environmental impact assessment study report for the implementation of the proposed mixed use development.

The proponent proposes to undertake a mixed use development that will comprise of a shopping mall, commercial godowns, apartments, houses and semi detached as well as detached dwellings. There will also be a recreational area that will have social amenities

such as a football ground, a basketball court and a nursery school and clinic.

The site of the proposed development is 2 km from Thika's Central Business District adjacent to the area of Thika called Makongeni.

The following are the anticipated impacts and proposed mitigation measures:

<i>Possible Impact</i>	<i>Mitigation measures</i>
Dust	<ul style="list-style-type: none"> • Water sprinkling of the ground. • Regular water addition to unpaved roads to be used by trucks. • Control the speed and movement of construction vehicles.
Noise	<ul style="list-style-type: none"> • Restrict construction activities to day time hours. • Machines should be serviced to reduce on noise.
Destruction of the physical environment	<ul style="list-style-type: none"> • Landscaping and replanting that will blend with the environment. • Leveling of soils at the end of earth works. • Proper disposal of the excavated soils.
Health and safety hazards	<ul style="list-style-type: none"> • Document emergency response procedures. • Use of suitable personal protective equipment (PPEs). • Use of stable ladders and other climbing/support structures that have been tested and approved. • Train the construction workers on safety measures. • Fencing/covering of risky areas such as deep pits. • Safety signage to be put up before commencement of works.
Contamination of water resources by sewage	<ul style="list-style-type: none"> • Provision of sanitary facilities for the construction staff. • Installation of adequate water supply
Increase in traffic flow	<ul style="list-style-type: none"> • Put up adequate road traffic signage
Fire hazards and accidents	<ul style="list-style-type: none"> • Install fire fighting facilities during both the construction and operation phases. • Sensitize workers on fire safety during all project phases. • First aid box to be kept on site as well as training on its use. • Conduct fire drills to test preparedness of staff.
Destruction of the physical environment	<ul style="list-style-type: none"> • Site landscaping and planting of tree belts to prevent soil erosion and to reduce wind velocity.
Indiscriminate disposal of solid waste	<ul style="list-style-type: none"> • Provision of adequate number of solid waste containers. • Contract a licensed solid waste transporter.

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED NAIROBI TRANSMISSION RING PROJECT

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) Regulations, the National Environment Management Authority, (NEMA) has received an environmental impact assessment study report for the implementation of the proposed Nairobi transmission ring project.

The proposed project involves construction of an electricity transmission line and new sub-stations which includes:

- Suswa-Isinya 400 kV transmission line
- Suswa 400/220 kV substation
- Thika road and Ngong 220/66 kV substations

The proposed Suswa 400/220 kV substation is to be located near the Suswa township on a 100 acre plot. The proposed 220/66 kV Ngong substation is to be located just behind the wind turbines near the Savannah Restaurant and campsite at the foot of the Ngong Hills. The proposed 220/66 kV Thika Road Substation will be located opposite the Kenyatta University within Gicheha Farm.

The following are the anticipated impacts and proposed mitigation measures:

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED PETROLEUM DEPOT AND STRATEGIC PETROLEUM RESERVE IN MALILI DIVISION, MUKAA DISTRICT

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) Regulations, the National Environment Management Authority, (NEMA) has received an environmental impact assessment study report for the implementation of the proposed depot and strategic petroleum reserve.

The Proponent proposes to develop a bulk petroleum receipt, storage, handling and distribution depot and a truck parking facility to accommodate up to one hundred petroleum tank trucks. The proponent also wishes to develop petroleum strategic storage reserves for the country to cushion Kenyans from erratic pump prices resulting from international crude oil prices.

The proposed development is located in Malili division of Mukaa district in Makueni constituency.

The following are the anticipated impacts and proposed mitigation measures:

<i>Environmental Issue</i>	<i>Mitigation Measures</i>
Geology and topography	<ul style="list-style-type: none"> In order to prevent irreversible construction compaction effects arising from construction plant and equipment ensure that to the extent possible, construction is undertaken during dry periods. On completion, all non – built up areas should be landscaped. To prevent soil erosion, all non – built up areas should be landscaped and appropriate soil binding grass planted.
Surface Water	<ul style="list-style-type: none"> If possible undertake initial construction activities during the dry season to prevent water/soil run – off especially on side slopes. Water should also be diverted away from the project footprint areas through properly constructed drainage channels. Ensure that spills emanating from construction plant and equipment are cleaned immediately. Any petroleum products stored on site must be stored in banded areas to prevent contamination of surface water. Contractor to adhere to Construction HSE management plan during the construction phase.
Ecology	<ul style="list-style-type: none"> Set up measures to ensure that during preconstruction and construction, impacts on sensitive ecological areas and individual protected biota are minimized and that good management is exercised during operation so as to prevent ecological impacts.
Air Quality	<ul style="list-style-type: none"> Develop and implement effective measures for minimization of dust during the preconstruction and construction phase, followed by rehabilitation in a timely manner. Contractor to ensure that construction plant and equipment is in a good state of repair at all times to prevent adverse exhaust air emissions.
Waste	<ul style="list-style-type: none"> Develop and implement safe procedures for management of non – hazardous and hazardous wastes in accordance with Legal Notice number 121: Waste Management Regulations, 2006. Contractor is responsible for this during the construction phase and the

	<p>Proponent during the operational phase of the project.</p> <ul style="list-style-type: none"> For Human wastes and waste water the proponent should install septic tanks. A septic tank system is an onsite sewage facility is appropriate in such an area with no connection to main sewage pipes provide by the government. Due to large workforce expected during both the construction and operational phases (including the oil marketers) a minimum of three septic tanks will be required. Exhausted wastes will be disposed in Athi river where the nearest sewerage system is. 	<p>provision of OSHA, WIBA and their respective subsidiary legislation. Specifically ensure that the construction complies with L.N.40:Building Operations and Work of Engineering Construction Rules,1984.</p> <ul style="list-style-type: none"> The proponent will upgrade the road leading to the site. A fire protection system will be included in the design of the depot. An efficient security firm will be hired to ensure security in the depot and within the area.
Noise and Vibration	<ul style="list-style-type: none"> Contractor's plant and equipment should comply as a minimum with requirements of L.N.61: Noise & Excessive Vibrations Pollution Control Regulations, 2009. The project will be designed to maintain noise levels at 70 dB(A) at the fence line Installation of pumps with low horse rating which operate with minimal noise. 	<p>Oil leakage</p> <ul style="list-style-type: none"> Depot design will provide for drainage and effluent treatment points (Oil water interceptors).
Socio - economics	<ul style="list-style-type: none"> The Proponent should create public awareness about "safe" land uses of any future projects in the vicinity of the proposed project area. Implement measures to manage expectations about job creation during the preconstruction, construction and operational phases. THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT
FOR THE PROPOSED RESIDENTIAL APARTMENTS AND A
COMMERCIAL BLOCK ON PLOT L.R.NO. SIGONA/1625 IN
KIKUYU TOWN COUNCIL IN NAIROBI

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) Regulations, the National Environment Management Authority, (NEMA) has received an environmental impact assessment study report for the implementation of the proposed residential apartments and a commercial block.

The development will have residential apartments and a commercial block of 198 residential units and 3 shops. The units are grouped into 13 Block A types which are three bedroom blocks and 4 Block B types which are two bedroom blocks. The development will occupy 65% of the total plot coverage. The total size of the plot is 1.517 Ha.

The proposed residential apartments will be on plot L.R No. SIGONA/1625 in Kikuyu Town Council in Nairobi. The site is next to Sigona Clinic off the Nairobi-Nakuru Highway.

The following are the anticipated impacts and proposed mitigation measures:

Environmental issue Mitigation Measures

Vegetation disturbance	<ul style="list-style-type: none"> • Ensure proper demarcation and delineation of the project area to be affected by the construction work. • Specify location for vehicles and equipment and areas of the site which shall be kept free of traffic equipment and storage. • Designate access routes and parking within the site. • Introduction of vegetation (trees, shrubs and grass) on open spaces and around the project site and their maintenance. • Design and implement an appropriate landscaping programme to help in revegetation of part of project area after construction.
Increased solid waste generation	<ul style="list-style-type: none"> • Use of an integrated solid waste management system i.e. through a hierarchy of options: 1. Reduction at source, 2. Recycling, 3. Reusing, 4. Incineration, 5. Sanitary Land filling. • Through accurate estimation of the dimensions and quantities required. • Use of durable, long lasting materials that shall not need to be replaced as often as, thereby reducing the amount of waste generated over time. • Provide facilities for proper handling and storage of construction materials to reduce the amount of waste caused by damage or exposure to the elements. • Use building materials that have minimal or no packaging to avoid generation of excessive packaging waste. • Reuse packaging materials such as cartons, cement bags, empty metal and plastic containers to reduce waste at site. • Dispose waste more responsibly by contacting a waste registered handler who will dispose the wastes at designated sites only. • Waste collection bins to be provided at designated points only.
Dust emission	<ul style="list-style-type: none"> • Ensure strict enforcement of on-site speed limit regulations. • Sprinkle water during excavation works by heavy machines. • Sprinkle water on graded access routes when necessary to reduce dust generation by construction vehicles. • Dust masks to be provided to employees and worn. • Use environmentally friendly fuels. • Minimize the period for machinery idling. • Pursue good practices in energy use during operations and sensitize staff. • Provide appropriate personnel protective equipment to site workers.
Health and safety	<ul style="list-style-type: none"> • Comply to the OSHA • Provide personnel and passers-by signage and warnings traffic control signs and warning. • Develop a traffic management plan to ensure that site vehicles do not interfere with the regular traffic on the Project

	<ul style="list-style-type: none"> • area. • Provide for appropriate signage and warnings at work sites. • Provide appropriate personnel Protective Equipment (PPE) to site workers. • Provide for First Aid facilities as per the OSHA, 2007. • Provide for an appropriate traffic management plan to avoid congestion on road leading to her project area. • Provide and clearly display emergency contacts. • Develop and implement detailed and site specific Emergency Response Plans • Ensure fire extinguishers are stationed in visible places. • Security personnel and occupants to be trained in fire fighting skills. • Drilling exercise to be conducted regularly. • Train substation operators on fire-fights • Ensure machinery is regularly serviced to improve efficiency in consumption of energy. • Energy management through use of sound/appropriate equipment. • Application of rated equipment in welding and related works. • Use of efficient mechanical plant and energy savers on sites.
Fire hazards	
Energy resources management	
Water and energy management	<ul style="list-style-type: none"> • Provide adequate and appropriate drainage infrastructure where required. • Ensure machinery is regularly serviced to avoid leakages and/or spillages. • Implement erosion and sedimentation controls. • Energy management through use of sound equipment. • Application of rated equipment in welding and related works. • Use of efficient mechanical plant and energy savers on sites.
Noise and vibrations	<ul style="list-style-type: none"> • Sensitize construction vehicle drivers and machinery operators to switch off engines or machinery not being used. • -Sensitize the construction vehicle drivers to avoid unnecessary hooting. • Ensure that construction machinery are kept in good condition to reduce noise generation. • Sound barriers to be erected round the construction site. • The noisy construction. • Works should be entirely planned to be during day time.
Increased storm water, runoff and soil erosion	<ul style="list-style-type: none"> • Surface runoff and roof water shall be harvested and stored in reservoirs so that it can be used for other purposes within the project site. • A storm water management plan that minimizes impervious area infiltration by use of recharge areas and use of retention with graduated outlet structures shall be designed. • Apply soil erosion control measures such as leveling of the project site to reduce run-off velocity and increase infiltration of storm water into the soil. • Ensure that compacted areas are ripped

- Oil spills
- to reduce run-off.
 - -Install oil trapping equipments in areas where there is a likelihood of oil spillage such as during the maintenance of construction of maintenance equipment
 - Soil in such an area shall be well protected from contamination.

The full report of the proposed project is available for inspection during working hours at:

(a) Director-General, the National Environment Management Authority (NEMA), Popo Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.
