GAZETTE NOTICE No. 9032

THE ENVIRONMENTAL MANAGEMENT AND
CO-ORDINATION ACT
(No. 8 of 1999)

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT
FOR THE PROPOSED PETROL SERVICE STATION ON LR.
NO.MBOONI/ KALAWANI/1609, MAKUENI COUNTY

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The Proponent (Jackson Muthoka Kieti) intends to construct a petrol service station consisting of 3No. underground tanks, a tyre centre, air pump area, car wash, generator room, service bay and a three sets of dispensing pumps with an overhead canopy. There will also be a shops area that will include a shop, 2No stores, the manager's office, two toilets, a cyber café, late night chemist, accommodation rooms, a conference room, septic tank, kitchen/Fast food and a liquor store. There is also a verandah, acceleration and deceleration lane, and pavements for easy circulation within the facility.

The following are the anticipated impacts and proposed mitigation measures:

Environmental Impacts Mitigation Measures

Soil erosion	<ul style="list-style-type: none"> • All construction should be done using the recommended building materials and equipments. • Use of heavy machinery which causes massive destabilization of soil and killing of organisms should be avoided. • Natural organism niches should be conserved. And also construction activities to be confined within the site area. 		<ul style="list-style-type: none"> • Train the site workers on basic first aid methods. • Provide first aid kit on site in case of small cuts/bruises. • Provide a public "NOTICE" on the ongoing works.
Dust pollution	<ul style="list-style-type: none"> • Providing workers with protective gadgets like dust masks and ear muffs. • Sprinkling water on concrete surfaces to be demolished I case of excessive dust. • Ensure all water vessels are tightly covered. 	Public health	<ul style="list-style-type: none"> • Provide a sanitary unit on site. • Food for the site workers to be prepared in hygienic conditions.
Oil and grease	<ul style="list-style-type: none"> • Regular maintenance of construction machines and vehicles to note leaking. • All repairs and servicing of machines and vehicles should be done at the recommended sites. • Proper disposal of used oils and grease. 	Electrical safety	<ul style="list-style-type: none"> • Use of qualified electricians in the installation of all electrical gadgets. • All electrical cables should be earthed in the correct manholes. • Use of protective clothing for the workers on site. • "Danger warning" warning signs should be placed at strategic place on site. • Install fire extinguishers.
Solid waste generation	<ul style="list-style-type: none"> • Installation of waste bins/pits on site to avoid scattering on the ground. • Dumping of unwanted materials on the recommended places. • Re-using any recyclable materials. 	Oil/Fuel spillage	<ul style="list-style-type: none"> • Standby Generator should be installed properly by qualified technicians to ensure they are not leaking any fuel or oil which may cause fire outbreak. • The fuel channels (pipes, pumps, dispensers) should be well maintained to note any leakage. • Only authorised operators should dispense products to customers. • Pumps should be locked when not in use. • Any spillage of fuel/paraffin should be washed with plenty of water and soap • Fire hydrants and sand buckets should be placed strategically In case of fire. • Frequent checks on piping system to note leakage.
Noise and vibrations.	<ul style="list-style-type: none"> • Turning off construction machines and vehicles while not in use. • Use of protective gadgets for the ears e.g. ear muffs. • Use of machine of low noise and vibration levels. 	Fire safety	<ul style="list-style-type: none"> • Keep well services and working fire hydrants. • Keep dry sand buckets in place in case of outbreaks. • Train the operators on ways of fighting fire. • Have a chart of hotlines within the facility, this include fire services, Ambulance, police etc. • Keep the facility dry of any fuel or oil spillage.
Air pollution	<ul style="list-style-type: none"> • Sprinkling of water during the dry seasons. • Construction workers should use protective clothing, e.g. dust masks and goggles. 		<ul style="list-style-type: none"> • Install warning signs on the facility e.g. DO NOT SMOKE, SWITCH ENGINE, SWITCH OFF • Designate an emergency ASSEMBLY POINT within the compound.
Topography	<ul style="list-style-type: none"> • Proper landscaping should be done after the end of all the construction works. • Planting of trees and grass in areas where they had been cleared. 	Solid waste	<ul style="list-style-type: none"> • Donate any reusable remains to any willing individual/organization. • Dispose off any un reusable waste into the approved dumpsites. • Sell metallic waste to licensed scrap metal dealers. • Demolition's to be done in phases to avoid damage of re-usable items.
Landform	<ul style="list-style-type: none"> • Reverting the land to its original form by filling the excavations and planting trees or grass in the affected areas. 		
Public participation	<ul style="list-style-type: none"> • Proper sensitization of the community at the initial stages of the project with aim of educating them on advantage of the project. • Involving the community on its implementation especially as casuals. 		
Occupational safety and health (OHS)	<ul style="list-style-type: none"> • Provide safety gears to the workers e.g. overalls, helmets, gloves, boots. • Provide tyre repair/inflating chamber to avoid accidents. • Treating water before domestic use. • Water should used sparingly to avoid wastage e.g. use of press on taps. • Install sanitary facilities. • The generator house should be located away from the working area to avoid excessive noise. • The dismantling exercise should be carried out separately to avoid accidents to people who might be on the ground. 		

The full report of the proposed project is available for inspection during working hours at:

(a) Director-General, NEMA, Popo Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.

(b) Permanent Secretary, Ministry of Environment and Mineral Resources, NHIF Building, Community, P.O. Box 30521, Nairobi.

(c) County Director of Environment, Makueni County.

The National Environment Management Authority invites members of the public to submit oral or written comments within thirty (30) days from the date of publication of this notice to the Director-General, NEMA, to assist the Authority in the decision making process of the plan.

THE ENVIRONMENTAL MANAGEMENT AND
CO-ORDINATION ACT

(No. 8 of 1999)

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT
FOR THE PROPOSED MODEL STANDARD PETROL STATION
ON PLOT TITLE NO. MN/ II /12385, KISAUNI, MOMBASA
COUNTY

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The Proponent (National Oil Corporation of Kenya Ltd) is proposing to develop a Model Standard Petrol Station. The project highlights include: a canopy over the pumps, sales office, a restaurant, a store, underground fuel tanks, compressor/generator, tyre centre & car wash, drive ways, walkways, acceleration and deceleration lanes, interceptor tank and washrooms.

The following are the anticipated impacts and proposed mitigation measures:

<i>Environmental/Social Impact</i>	<i>Proposed Mitigation Measures</i>
Air pollution	<ul style="list-style-type: none"> Control speed and operation of construction vehicles. Prohibit idling of vehicles. Spray water on excavated areas. Maintenance of construction plant and equipment. Sensitize construction workers. All bare areas should be landscaped after construction. Workers should be provided with dust masks if working sensitive areas.
Noise pollution	<ul style="list-style-type: none"> Maintain plant equipment. Construction should be carried out only during daytime i.e. 0800 – 1700 HRS. Workers to wear ear muffs if working in noisy section. Management to ensure that noise from the residents is kept within reasonable levels.
Traffic density	<ul style="list-style-type: none"> Proper signage put in place to notify neighbours of the activity and presence of heavy vehicles and to direct traffic. Presence of boards directing patrons to the site Strict adherence to traffic rules.
Flora & Fauna	<ul style="list-style-type: none"> The flora and fauna should be restored after construction by landscaping and maintaining the introduced plants.
Soil erosion & compaction	<ul style="list-style-type: none"> Provide soils conservation structures on the areas prone to soil erosion to reduce impact of erosion. There should be designated pathways

Solid waste

and driveways for movement within the compound to avoid unnecessary compaction.

- All bare areas should be well landscaped after completion.
- Construction debris should be collected by a licensed private contracted waste collection company
- Excavation waste should be re-used or backfilled.
- Waste generated should be collected by a privately contracted waste collection company and the contractor should ensure the construction of a central waste collection point with bulk storage facilities.

Oil spills and leaks

- The site should have waste receptacles with bulk storage facilities at convenient points to prevent littering during occupation.

- Machinery should be well maintained to prevent oil leaks.

- Contractor should have a designated area where maintenance is carried out and that is protected from rain water.

- All oil products should be stored in a site store and handled carefully.

Security

- Control of secondary businesses.
- Round the clock security for the facility.
- Adequate lighting and an alarm system installed at strategic points.

- Bushes around and within the site cleared to avoid hiding areas for thieves.

Underground fuel storage and handling

- Use properly maintained hoses and fittings

- Make the cement screeds in all the chambers using water proof material.

- Install a monitoring well next to the tanks to check on leaks

- Use water finding dipstick and/ or a hydrometer to check on density/ specific gravity

- Ensuring no spills during refilling and /or when offloading the fuel

Vegetation loss

- Designate access pedestrian routes and parking zones that are cabro-paved

- Provide signs marked do not Walk/ Park on the grass

- The flora and fauna should be restored after construction by landscaping and maintaining the introduced plants.

Occupational Health and Safety

- Provide Personal Protective Equipment
- Train workers on personal safety and how to handle equipments and machines

- A well stocked first aid kit shall be maintained by a qualified personnel

- Report any accidents / incidences and treat and compensate affected workers

- Provide sufficient and suitable sanitary conveniences which should be kept clean

The full report of the proposed project is available for inspection during working hours at:

(a) Director-General, NEMA, Popo Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.

(b) Permanent Secretary, Ministry of Environment and Mineral Resources, NHIF Building, Community, P.O. Box 30521, Nairobi.

(c) County Director of Environment, Mombasa County.

The National Environment Management Authority invites members of the public to submit oral or written comments within thirty (30) days from the date of publication of this notice to the Director-General, NEMA, to assist the Authority in the decision making process of the plan.

GAZETTE NOTICE NO. 12345

THE ENVIRONMENTAL MANAGEMENT AND CO-ORDINATION ACT

(No. 8 of 1999)

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED RESIDENTIAL FLATS AT NHC CHANGAMWE ESTATE ON PLOT NO. MN/VI/2584, CHANGAMWE, MOMBASA COUNTY

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The Proponent (National Housing Corporation) is proposing to construct six (6) three (3) storey residential blocks comprising of thirty (30) two-bed roomed houses and eighteen (18) three-bed roomed houses all totalling to forty eight (48) residential units; NHC Changamwe Estate on Plot No. MN/VI/2584, Changamwe, Mombasa County.

The following are the anticipated impacts and proposed mitigation measures:

Environmental Impacts Mitigation Impacts

Structural stability of the buildings	<ul style="list-style-type: none"> • Ensure the building and structural plans are approved by CGM. • Ensure the right construction and quantity of materials are used • Ensure the premise construction is supervised by qualified personnel • Ensure the inspection and structural design are done by a registered engineer
Management of construction waste and efficient sourcing and use of raw materials	<ul style="list-style-type: none"> • Segregate waste by separating hazardous waste from non-hazardous waste • Provide adequate and suitable solid waste collection containers • Containers for storing hazardous waste including used oil should be securely banded, labeled and disposed as required by Waste Management Regulations • Contract a NEMA licensed waste company or CGM to collect solid waste from the site for appropriate disposal at approved sites. • Contract a scrap metal dealer with a valid license for appropriate disposal • Minimize waste generated by adopting cleaner production methods such as conserving raw materials, enabling recovery and re-use of the waste • Use durable, long- lasting materials which will not need to be replaced as often, thereby reducing the amount of construction waste generated over time. • Provide facilities for proper handling

and storage of construction materials to reduce the amount of waste caused by damage or exposure

- Use building materials that have minimal packaging to avoid generation of excessive packaging waste
- Source building materials from companies that have undergone satisfactory environmental impact assessment/audit and received NEMA approval.
- Ensure that wastage, damage or loss (through run-off, wind, etc) of materials at the construction site is kept minimal.
- Provide dust screens to minimize air pollution especially to the adjacent residential buildings
- Dust emissions from piles of soil or from any other material during earthwork, excavation, and transportation should be controlled by wetting surfaces.
- Piles and heaps of soil should not be left over after construction is completed.
- Excavated sites should be covered with suitable solid material
- Strictly enforce onsite speed controls and limit unnecessary traffic within the site.
- Ensure that traffic routes on site are sprinkled with water regularly to reduce amount of dust generated by the construction trucks.
- Sensitize truck drivers to avoid unnecessary racing of vehicle engines at loading/offloading areas, and to switch off or keep vehicle engines
- Ensure that all transport and construction equipments are in good serviceable condition and no service is carried out on site.
- Ensure that no fuels or oils are stored on site but procure them when needed.
- Construct storm water drains
- Contractor should avoid heaping excavated soil around adjacent residential houses this will minimize soil from block the drainage systems and avoid health risks.
- Provide workers with insurance cover for such as workmen's compensation.
- Provide proper scaffolds for construction at high level
- Document and display on-site emergency procedures.
- Use appropriate signage to direct and control flow of traffic
- The construction site should be registered as per OSHA 2007 and the DOHSS should be notified of the construction works before commencement
- A general accidents register should be kept on- site
- Provide and enforce use of personal protective equipments
- Ensure proper storage of materials and equipments to avoid accidents
- Provide temporary sanitary facilities during construction
- Water surfaces during excavation and

Dust generation and
exhaust emissions

Oil spills

Storm-water drainage

Occupational Health and
Safety

	<ul style="list-style-type: none"> construction to reduce dust generation Restrict un-necessary movement of the public to the site in order to avoid accidents. All access to the hazardous areas should be secured with a fence Ensure portable fire extinguishers are provided and in working condition near probable ignition sources. Provide adequate and clean water for drinking. Maintain environmental management records on site at all times
Energy consumption	<ul style="list-style-type: none"> Sensitize staff to switch off equipments and lights when not being used Consider the possibility of using alternative sources of energy especially renewable ones such as solar Monitor energy use during construction activities and set targets for efficient energy use Have proper planning of transportation of materials in order to save on fuel
Water use	<ul style="list-style-type: none"> Any water leaks through damaged pipes should be fixed promptly. Sensitize the staff to use water efficiently/sparingly. Enhance rain water harvesting by use of tanks and other containers. Install automatic water taps
Traffic impacts	<ul style="list-style-type: none"> Ensure strict enforcement of on and off - site speed limits as well as limiting unnecessary traffic within the project site Provide parking areas for the trucks and avoiding parking on the road sides. Provide entry and exit points into the sites. Erect proper warning signs at a safe distance on the access roads to warn motorists of heavy vehicle turning. Ensure trucks do not damage road structures and drainage systems. Ensure only serviceable trucks are used during transportation Transport most construction materials during off peak hours
Sewerage disposal	<ul style="list-style-type: none"> Connect the premise to MWSC sewer line. Ensure proper maintenance of internal sewer network. Ensure that sewage pipes are not blocked or damaged since such vices can lead to release of the effluent, resulting in land and water contamination
Emergency/hazard response/preparedness plan	<ul style="list-style-type: none"> There must be a well designed and documented emergency preparedness plans including fire emergency procedures.
Fire protection	<ul style="list-style-type: none"> Regular inspection and servicing of the extinguishers should be undertaken by a reputable service provider and records maintained Fire safety signs should be prominently displayed within the buildings Residents should be sensitized on fire safety
Electrical Safety	<ul style="list-style-type: none"> Circuits must not be overloaded The circuitry of the distribution board

	<ul style="list-style-type: none"> switches must be clearly marked There should be no live exposed connections Electrical fittings near all potential sources of ignition should be flame proof All electrical equipments should be earthed Provide day-night security guards and adequate lighting within and around the estate
General safety and security	
Demolition waste management at decommissioning	<ul style="list-style-type: none"> All buildings, foundations, equipments, structures and partitions that will not be used for other purposes shall be removed and recycled/reused Dispose reusable demolished facilities as prescribed by public procurement and disposal Act 2005, Cap 412C Where recycling/reuse of the equipments, implements, structures, partitions and other demolition waste is not possible, the materials should be taken to a licensed waste disposal site

The full report of the proposed project is available for inspection during working hours at:

(a) Director-General, NEMA, Popo Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.

(b) Permanent Secretary, Ministry of Environment and Mineral Resources, NHIF Building, Community, P.O. Box 30521, Nairobi.

(c) County Director of Environment, Mombasa County.

The National Environment Management Authority invites members of the public to submit oral or written comments within thirty (30) days from the date of publication of this notice to the Director-General, NEMA, to assist the Authority in the decision making process of the plan.

B. M. LANGWEN,
for Director-General,

MR/2836471 *National Environment Management Authority.*

THE ENVIRONMENTAL MANAGEMENT AND CO-ORDINATION ACT

(No. 8 of 1999)

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED FUEL FILLING STATION CUM COMMERCIAL SERVICES ON PLOT L.R. NO. EMBAKASI RANCHING - P- 6966, NAIROBI COUNTY

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The Proponent (Lucy Mathenge) is proposing to construct a Filling Station Cum commercial facility comprising of: Four pump isles, two underground petroleum storage tanks (UPSTs), a heavy duty covered man-hole for each of the UPSTs, a Mini market, Car wash open to sky, Oil Interceptor, An acceleration section, Air and water point, An office section, Sanitary facilities/washrooms, soak pits, Associated piping works, compressor/ Generator Room, Staffroom, Store, Service bay and business space

The following are the anticipated impacts and proposed mitigation measures:

Impacts

Proposed Mitigation Measures

Liquid Wastes	<ul style="list-style-type: none"> • Maintenance of drainage channels and oil interceptor tanks • Discourage or avoid disposal of oil contaminated water on the ground • Covering the whole operation area with concrete hardstand 	<ul style="list-style-type: none"> • ensure the construction of a central waste collection point with bulk storage facilities • The site should have waste receptacles with bulk storage facilities at convenient points to prevent littering during occupation
Gaseous Wastes	<ul style="list-style-type: none"> • Keep the forecourt clean; it should be regularly sprinkled with water to minimize dusts generated by traffic i.e. always suppress dust by water-spraying before sweeping. • The facility owner/ dealer to use unleaded gasoline and low sulphur diesel, which is less polluting. • To avoid bad smells, spillages should be immediately cleaned up. An appropriately designed container for waste collection should be provided on the site for temporarily storage of uncollected trash. Prompt disposal of such material should be done. • Avoid open-air incineration of trash near the station. 	<ul style="list-style-type: none"> • Oil leaks and spills <ul style="list-style-type: none"> • Machinery should be well maintained to prevent oil leaks. • Contractor should have a designated area where maintenance is carried out and that is protected from rain water. • All oil products should be stored in a site store and handled carefully.
Air pollution	<ul style="list-style-type: none"> • Control speed and operation of construction vehicles. • Prohibit idling of vehicles. • Spray water on excavated areas. • Maintenance of construction plant and equipment. • Sensitize construction workers. • All bare areas should be landscaped after construction. • Workers should be provided with dust masks if working in sensitive areas. 	<ul style="list-style-type: none"> • Security <ul style="list-style-type: none"> • Control of secondary businesses. • Round the clock security for the facility. • Adequate lighting and an alarm system installed at strategic points. • Bushes around and within the site cleared to avoid hiding areas for thieves. • Occupational Health and Safety <ul style="list-style-type: none"> • Provide Personal Protective Equipment • Train workers on personal safety and how to handle equipment and machines • A well-stocked first aid kit shall be maintained by a qualified personnel • Report any accidents / incidences and treat and compensate affected workers • Provide sufficient and suitable sanitary conveniences which should be kept clean
Noise pollution	<ul style="list-style-type: none"> • Maintain plant equipment. • Construction should be carried out only during daytime i.e. 0800 – 1700 HRS. • Workers to wear ear muffs if working in noisy section. • Management to ensure that noise from the residents is kept within reasonable levels. 	<ul style="list-style-type: none"> • Fire and Explosion Hazards <ul style="list-style-type: none"> • Need to have sufficient powder fire extinguishers conveniently located near each fuel dispenser, in store and serviced after every six months; • Designing and clearly displaying the fire emergency response plan on the walls of the station • Provide appropriate training to the staff on fire emergency procedures • Provide warning signs such as “No Smoking”. • Install one water hydrant • Put sand buckets at every location • Provision of fire blankets
Traffic density	<ul style="list-style-type: none"> • Proper signage put in place to notify neighbours of the activity and presence of heavy vehicles and to direct traffic. • Presence of boards directing patrons to the site • Strict adherence to traffic rules. 	<ul style="list-style-type: none"> • Loss of vegetation <ul style="list-style-type: none"> • Designate access pedestrian routes and parking zones that are cabro paved • Provide signs marked do not Walk/ Park on the grass • The flora and fauna should be restored after construction by landscaping and maintaining the introduced plants.
Flora & fauna	<ul style="list-style-type: none"> • The flora and fauna should be restored after construction by landscaping and maintaining the introduced plants. 	
Soil erosion & compaction	<ul style="list-style-type: none"> • Provide soils conservation structures on the areas prone to soil erosion to reduce impact of erosion. • There should be designated pathways and driveways for movement within the compound to avoid unnecessary compaction. • All bare areas should be well landscaped after completion. 	<p>The full report of the proposed project is available for inspection during working hours at:</p> <p>(a) Director-General, NEMA, Popo Road, off Mombasa Road, P.O. THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT
FOR THE PROPOSED MODEL STANDARD PETROL STATION
ON PLOT TITLE NO. 753, KING'ONG'O, IN NYERI COUNTY

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The Proponent (National oil Corporation of Kenya Ltd is proposing to develop a Model Standard Petrol Station. The project highlights include: a canopy over the pumps, sales office, a restaurant, a store, underground fuel tanks, compressor/generator, tyre centre & car wash, drive ways, walkways, acceleration and deceleration lanes, interceptor tank and washrooms.

The following are the anticipated impacts and proposed mitigation measures:

<i>Environmental/ Social Impact</i>	<i>Proposed Mitigation Measures</i>
Air pollution	<ul style="list-style-type: none"> Control speed and operation of construction vehicles. Prohibit idling of vehicles. Spray water on excavated areas. Maintenance of construction plant and equipment. Sensitize construction workers. All bare areas should be landscaped after construction. Workers should be provided with dust masks if working sensitive areas.
Noise pollution	<ul style="list-style-type: none"> Maintain plant equipment. Construction should be carried out only during daytime i.e. 0800 – 1700 HRS. Workers to wear ear muffs if working in noisy section. Management to ensure that noise from the residents is kept within reasonable levels.
Traffic density	<ul style="list-style-type: none"> Proper signage put in place to notify neighbours of the activity and presence of heavy vehicles and to direct traffic. Presence of boards directing patrons to the site Strict adherence to traffic rules.
Flora & Fauna	<ul style="list-style-type: none"> The flora and fauna should be restored after construction by landscaping and maintaining the introduced plants.
Soil erosion & compaction	<ul style="list-style-type: none"> Provide soils conservation structures on the areas prone to soil erosion to reduce impact of erosion. There should be designated pathways and driveways for movement within the compound to avoid unnecessary compaction. All bare areas should be well landscaped after completion.
Solid waste	<ul style="list-style-type: none"> Construction debris should be collected by a licensed private contracted waste

collection company

- Excavation waste should be re-used or backfilled.
- Waste generated should be collected by a privately contracted waste collection company and the contractor should ensure the construction of a central waste collection point with bulk storage facilities.
- The site should have waste receptacles with bulk storage facilities at convenient points to prevent littering during occupation.
- Machinery should be well maintained to prevent oil leaks.
- Contractor should have a designated area where maintenance is carried out and that is protected from rain water.
- All oil products should be stored in a site store and handled carefully.
- Control of secondary businesses.
- Round the clock security for the facility.
- Adequate lighting and an alarm system installed at strategic points.
- Bushes around and within the site cleared to avoid hiding areas for thieves.
- Use properly maintained hoses and fittings
- Make the cement screeds in all the chambers using water proof material.
- Install a monitoring well next to the tanks to check on leaks
- Use water finding dipstick and/ or a hydrometer to check on density/ specific gravity
- Ensuring no spills during refilling and /or when offloading the fuel
- Designate access pedestrian routes and parking zones that are cabro-paved
- Provide signs marked do not Walk/ Park on the grass
- The flora and fauna should be restored after construction by landscaping and maintaining the introduced plants.
- Provide Personal Protective Equipment
- Train workers on personal safety and how to handle equipments and machines
- A well stocked first aid kit shall be maintained by a qualified personnel
- Report any accidents / incidences and treat and compensate affected workers
- Provide sufficient and suitable sanitary conveniences which should be kept clean

Oil spills and leaks

Security

Underground fuel storage and handling

Vegetation loss

Occupational Health and Safety

The full report of the proposed project is available for inspection during working hours at:

(a) Director-General, NEMA, Popo Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.

(b) Permanent Secretary, Ministry of Environment and Mineral Resources, NHIF Building, Community, P.O. Box 30521, Nairobi.

(c) County Director of Environment, Nyeri County.

The National Environment Management Authority invites members of the public to submit oral or written comments within thirty (30) days from the date of publication of this notice to the

Director-General, NEMA, to assist the Authority in the decision making process of the plan.

B. M. LANGWEN,
for Director-General,

MR/3112340

National Environment Management Authority.

GAZETTE NOTICE NO. 12348

THE ENVIRONMENTAL MANAGEMENT AND
CO-ORDINATION ACT
(No. 8 of 1999)

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT
FOR THE PROPOSED PHASE 1 OF WILLOW PARK HOMES ON
L.R. NO. KIAMBAA/THIMBIGUA/2116, KIAMBU COUNTY

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The Proponent (The Northside Developers Ltd) is proposing to develop apartments that will consist of 10 apartment blocks of 5 types with a total of 148 units.

The following are the anticipated impacts and proposed mitigation measures:

Environmental Impacts Mitigation Impacts

Noise pollution	<ul style="list-style-type: none"> Provision of barriers such as walls around the site boundaries to provide some buffer against noise Installation of portable barriers to shield compressors and other small stationary equipment where necessary Put up signs to indicate construction activities Maintain all equipments Silenced machinery and instruments should be employed Equipment such as drills, graders and cement mixers should also be used when the least number of residents can be expected to be affected Workers working with machinery, vehicles and instruments that emit high levels of noise should be provided with ear plugs and ear muffs Sensitize workforce including drivers of construction vehicles
Air pollution/particulate matter(dust)	<ul style="list-style-type: none"> Stockpiles of earth should be sprayed with water or covered during dry seasons. Buffer area of trees and other vegetation will serve as natural windbreaks •Provide PPE such as nose masks to the workers in dust generation areas. All raw materials must be sourced as close as possible to the construction site thus reducing the emissions from vehicular traffic. Machines must not be left idling for unnecessary periods of time. Vehicle speeds in the construction area will be limited to minimize dust in the area The construction contractor will water the site with exposed soil surfaces twice daily during dry seasons Avoid pouring dust materials from

	<ul style="list-style-type: none"> elevated areas to ground Cover all trucks hauling soil, sand and other loose materials Provide dust screen where necessary
Increased solid waste	<ul style="list-style-type: none"> The contractor and proponent should contract private refuse handlers and Karuri Town Council to facilitate waste handling and disposal from site. The materials should be properly segregated to encourage recycling of some wastes. Demolished stones can be used as backfills
Loss of biodiversity	<ul style="list-style-type: none"> After project completion, proponent should rehabilitate the site by planting local trees, grass and ornamental flowers at all disturbed areas Remove as little vegetation throughout the site as possible Retain vegetation screens to reduce the visual effect of this stage of the development Maintain all mature trees (trees > 25 cm) within the development; The developer should incorporate trees that are used by bird species for foraging to attract bird species to the area.
Soil erosion	<ul style="list-style-type: none"> Control earthworks Provide soil conservation structures on areas prone to soil erosion to reduce impact by run-off Control construction activities especially during rainy seasons Ensure that the drainage plan proposed is implemented as stipulated on the plan. The provision of a system of culverts should be considered. Conduct landscaping after project completion to maximally control any possible chance of soil movement. The proponent will maintain a 15m buffer zone so as to protect the riparian ecosystem of Kaaruchi River
Water sources	<ul style="list-style-type: none"> Management of water usage. Avoid unnecessary wastage of water Avail storage tanks. Roof catchments should be provided with water harvesting systems to enhance collection & storage of rain water Store all raw materials away from the vicinity of water bodies. General refuse generated during these phases of the development must be stockpiled in one central area of the development site, away from existing water bodies. Clearance of vegetation must be avoided in periods of heavy rainfall to reduce the impact of runoff. Install siltation traps within the drainage design to collect silt and sediments Conduct periodical water quality monitoring to ensure that standards are maintained.
Sewage & effluent	<ul style="list-style-type: none"> Routine checkups of and monitoring of the WWTP to avoid leakages and blockages

- Public health and occupational safety
 - Construction of a WWTP to be done to meet the standards by Karuri Town Council
 - Adequate sanitary facilities should be provided and standard cleanliness maintained
 - Proper handling and disposal of solid waste
 - Provide suitable safety gear for all personnel
 - Proper treatment of waste water
 - Construction activities must therefore be limited between 0800hrs and 1700hrs
 - First aid kit to be provided on site and ensure that a crew member is trained in basic first aid practices.
 - Signs must also be placed around the construction site displaying the numbers of the person responsible for handling emergencies on the site
 - Contractor should have workmen's compensation cover which should comply with workmen's compensation Act
- Road safety
 - Road signs on main roads
 - Enforce speed limits for construction vehicles
 - Implement a traffic system that involves appropriate sig Perform road repair and construction at times that persons are expected to be at work and school and signs to ensure the smooth flow of traffic
- Socio economic concerns
 - Develop a Corporate Social Responsibility programme which could provide assistance to the community.
 - Persons from the nearby communities should be employed to work on the construction site.
 - Purchase supplies to be used in the construction should be sourced from nearby suppliers
 - Implement HIV/AIDS and other communicable diseases programmes in conjunction with relevant ministries
 - Where possible offer women equal opportunities as men

The full report of the proposed project is available for inspection during working hours at:

(a) Director-General, NEMA, Popo Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.

(b) Permanent Secretary, Ministry of Environment and Mineral Resources, NHIF Building, Community, P.O. Box 30521, Nairobi.

(c) County Director of Environment, Kiambu County.

The National Environment Management Authority invites members of the public to submit oral or written comments within thirty (30) days from the date of publication of this notice to the Director-General, NEMA, to assist the Authority in the decision making process of the plan.

THE ENVIRONMENTAL MANAGEMENT AND
CO-ORDINATION ACT
(No. 8 of 1999)

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED 1250 TCD SUGAR PLANT AT OLEPITO VILLAGE, TANGA KONA AREA IN BUSIA COUNTY

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The Proponent, (West Kenya Sugar Company Limited) is proposing to construct a sugar factory comprising of the following: Mill House, Boiling house, Clarification House, TG hall, Boiler area, Workshop, Store, Spray pond/Cooling Tower, Sugar Go-down, Generator Room, Molasses Tank, HR Office, Sales office, Engineering Office, MFG office/Lab, Acc/cooling , Auto work shop/Auto store, Switch Board, Bagasse store, Fire Station, Medical Center, Car Parking, Time office, Time Office, Agricultural office, Administrative Office, Cane Yard, Canteen, Distillery, Water Treatment Plant, Raw Water tank for sugar plant, Raw Water Plant for co/gen, Weighbridge/Transport Office, Diesel Tank, and an Effluent Treatment Plant.

The following are the anticipated impacts and proposed mitigation measures:

<i>Impacts</i>	<i>Mitigation Impacts</i>
Noise pollution and vibrations	<ul style="list-style-type: none"> • Adherence to manufacturer's specifications and use of modern technology machines. • Provide ear protection devices for the workers operating the devices.
Off-site Impacts when transporting machinery	<ul style="list-style-type: none"> • Transport the machinery in serviced vehicles. • Pour water continuously to reduce the dust levels on the road heading to the factory or make a more permanent road. • Transport where possible off-peak to avoid traffic inconveniences and possible high risk accidents. • Use the qualified and experienced driver to transport the machinery to the factory.
Dust pollution	<ul style="list-style-type: none"> • Provide and enforce the use of dust masks by workers at the site.
Occupational health & safety hazards	<ul style="list-style-type: none"> • Observe occupational health and safety measures. • Train workers on Occupational Health and safety and enforce use of PPEs. • Install first aid kits at the premise. • Maintain data base for material safety data sheets for all inputs. Make it available to key personnel. • Install emergency showers.
Fire hazards	<ul style="list-style-type: none"> • Install fire extinguishers and fire hydrants at high risk zones at the factory premises. • Formulate fire evacuation procedures. • Come up with a fire assembly point. • Conduct regular fire drills.
Solid waste generation	<ul style="list-style-type: none"> • Segregate the wastes • Use bagasse from the cane as fuel for steam and power generation. • Use filter and dry lime from the juice clarification processes to make a soil conditioning product for agricultural land. • Use compost organic solids from press mud to make high quality organic manure for agricultural production.

- Come up with proper waste management strategies such as incineration of waste papers, recycling of waste water and composting of vegetative wastes.
 - Convert beet pulp into cattle feed.
- Accidents and Insecurity
- Employ day and night security guards; install security lights, alarms and a strong perimeter fence (preferably electric).
 - Build capacity on safe working procedures.
 - Have first aid kits.
- Dust generation and particulate matter
- Determine inventory of cane mill dust generation to determine surplus dust available.
 - Use wet scrubbers to remove dust from drying and cooling of sugar.
 - Reduce fugitive dust from roads and areas by cleaning and maintaining a sufficient level of humidity.
 - Install ventilation systems with filters on transport systems for dry sugar and on sugar packing equipment.
 - Conduct noise mapping.
- Noise pollution
- Provide workers with noise protection gear.
 - Observe the frequency of the sound, time of day and the time duration especially if it affects the areas surrounding the factory.
- Poor house keeping
- Ensure the floor is dry at all times and proper drains are made for the waste water after cleaning or even in case of a spill during operation.
 - Areas should be well labeled and designated to give direction to the visitors and even serve as a reminder to the workers and even storage areas.
 - There needs to be proper lighting in the work area to avoid accidents due to poor visibility of the room.
- Air pollution
- Undertake fuel gas analysis for the boilers.
 - Increase number of trees on the site as carbon sequesters.
 - Conduct continuous stack gas analysis.
 - Undertake volatile organic carbons (VOC) measurement.
- Waste water discharge
- Apply for effluent discharge license from NEMA.
 - Install a waste water pre-treatment facility.
 - Treat and reuse the waste water generated
 - Construct a proper wetland.
 - Protection of aquifers and the water table from ingress of pollutants.
- Oil spills
- Provide oil interceptors along the drains from probable sources of oil contaminants.
 - Ensure all machinery is in top condition to avoid leakage.
 - Bund and roof all hazardous chemical storage areas.
 - Install central waste oil collection system for safe disposal.
 - Keep records for waste oil disposal.

- Install oil interceptors.
 - Bund all oil containers and store them away in a safe room.
- Energy consumption
- Conduct an energy audit to yield an efficiency enhancement program.
 - Develop performance indicator for energy consumption.
 - Use waste fiber from the cane as fuel for steam and power generation.
 - Ensure that the bagasse moisture level is below 50% before is used as boiler fuel.
 - Reuse vapor from vacuum pans for heating water and juice.
 - Ensure even energy consumption by management of batch processes (e.g. centrifuges, vacuum pans) to schedule energy demand and equalize steam demand on the boilers.

The full report of the proposed project is available for inspection during working hours at:

(a) Director-General, NEMA, Popo Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.

(b) Permanent Secretary, Ministry of Environment and Mineral Resources, NHIF Building, Community, P.O. Box 30521, Nairobi.

(c) County Director of Environment, Kakamega County.

The National Environment Management Authority invites members of the public to submit oral or written comments within thirty (30) days from the date of publication of this notice to the Director-General, NEMA, to assist the Authority in the decision making process of the plan.

B. M. LANGWEN,
for Director-General,

(No. 8 of 1999)

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED CONSTRUCTION OF TOWN HOUSES AND APARTMENTS (MILLENNIUM LIMITED) ON PLOT L.R. NO. 209/11393 IN EMBAKASI, NAIROBI COUNTY

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The Proponent (Kings Developers) is proposing to construct 40 town houses and apartments of three blocks with parking spaces, community hall and children playground.

The following are the anticipated impacts and proposed mitigation measures:

Impacts

Changes in hydrology

Mitigation Measures

- Install cascades to break the impact of water flowing in the drains.
- Ensure efficiency of drainage structures through proper design and maintenance. Design should be with respect to (water) peak run-off volumes (i.e. consider periods or seasons when there is high intensity of rainfall)
- Provide granting to the drainage

Soil erosion	<ul style="list-style-type: none"> channels Control earthworks Install drainage structures properly Compact loose soil Landscaping Ensure management of excavation activities Control activities especially during rainy conditions. Provide soil erosion control structures on the steep sides Efficiency of erosion control measures. Ensure standard farming methods on the provided gardens 	Vegetation	<ul style="list-style-type: none"> Ensure effective waste water management. Design of sewerage system should be as provided in the plans. Sensitize residents on environmental management Provision of Personal Protective Equipment (PPE) Plant vegetation in areas where vegetation is unnecessarily removed Landscaping and planting all disturbed areas. Plantings and grassing should be done just before the rains or irrigated on dry spells using water conserved during the wet season
Air pollution	<ul style="list-style-type: none"> Control speed and operation of construction vehicles Discourage idling of vehicles Water should be sprayed during the construction phase of excavated areas. Regular maintenance of construction plant and equipment Engage sensitive construction workers 	Fire training/emergency response	<ul style="list-style-type: none"> Adapt effective emergency response plans involving all both during construction and occupation phases To enhance health and safety preparedness among stakeholders Ensure equipment is in good working condition Install firefighting equipment as provided elsewhere in the report Sensitize the residents on fire risks i.e. conduct regular fire drills. Adapt effective emergency response plan Maintain fire fighting machinery regularly Provide emergency numbers at strategic points
Noise pollution	<ul style="list-style-type: none"> Sensitize drivers of construction machinery on effects of noise Maintain plant equipment Construction activities to be restricted to daytime Workers in the vicinity of high-level noise to wear safety and protective gear. Provide barriers such as walls and trees around site boundaries to provide some buffer against noise prorogation 	Security	<ul style="list-style-type: none"> Provide security guards and facilities during construction period The gate should always be controlled by the security men, even during occupation
Oil pollution	<ul style="list-style-type: none"> Proper storage, handling and disposal of oil wastes Maintain plant and equipment to avoid leaks Maintenance of construction vehicles should be carried out in the contractors yard off the site Provide oil interceptors along the drains leading from car wash and services bays 	<p>The full report of the proposed project is available for inspection during working hours at:</p> <p>(a) Director-General, NEMA, Popo Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.</p> <p>(b) Permanent Secretary, Ministry of Environment and Mineral Resources, NHIF Building, Community, P.O. Box 30521, Nairobi.</p> <p>(c) County Director of Environment, Nairobi County.</p>	
High water demand	<ul style="list-style-type: none"> Management of water usage. Avoid unnecessary wastage Recycling of water at the construction phase where possible. Make use of roof catchments to provide water i.e. for general purpose and provide water storage facilities to individual housing units. Install water conserving taps that turn off automatically when water is not being used. Source water from other sources to increase the water supply capacity of the NCC 	<p style="text-align: right;">B. M. LANGWEN, for Director-General, National Environment Management Authority.</p>	
Contractors lay down area	<ul style="list-style-type: none"> Special attention should be paid to the sanitary facilities on the site Garbage should be disposed off periodically and at approved dumpsites 	GAZETTE NOTICE No. 12681	
Road safety	<ul style="list-style-type: none"> Enforce speed limits for construction vehicles especially along roads leading to the site Provide bill boards at the site/entrance to notify motorists about the development 	<p style="text-align: center;">THE ENVIRONMENTAL MANAGEMENT AND CO-ORDINATION ACT (No. 8 of 1999)</p>	
Public health and occupational safety	<ul style="list-style-type: none"> Ensure proper solid waste disposal and collection facilities 	<p style="text-align: center;">THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED CONSTRUCTION OF EDUCATION INSTITUTION – AL JAMAE TUS SAIFAYA CAMPUS ON PLOT L.R. NO. 19983/9, KAREN AREA, NAIROBI COUNTY INVITATION OF PUBLIC COMMENTS</p>	

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The Proponent (Dawaat F. Hadiyah) is proposing to construct an Educational Institution Campus (Al Jamae Tus Saifiya Campus) around Saiffer Park to serve the community. The educational Institution will be installed with modern equipment, computer section, library, hostels, cafeteria, mosque, and associated amenities on Plot L.R No. 19983/9, in Karen Area, Nairobi County.

The following are the anticipated impacts and proposed mitigation measures:

<i>Possible Impacts</i>	<i>Proposed Mitigation Measures</i>
Hydrology and Water supply quality Degradation	<ul style="list-style-type: none"> Hazardous substance control and emergency response plan that will include preparation for quick and safe cleanup of accidental Identify areas where refueling and vehicle maintenance activities and storage of hazardous material is well maintained and protected.
Dust and exhaust emission	<ul style="list-style-type: none"> Ensure strict enforcement of onsite speed limit regulations Sprinkle water on graded access routes when necessary to reduce dust generation by construction vehicles Personal protective equipment shall be used Equipment shall be properly tuned and maintained
Noise pollution and vibration	<ul style="list-style-type: none"> Sensitive construction vehicle drivers, machinery operators to switch off vehicles or machinery not in use. Ensure that construction machinery is kept in good condition to reduce noise generation. Buffer the site against noise propagation. Construction to be undertaken during the day when most of the neighbors are at work
Incidents, accidents and dangerous occurrences	<ul style="list-style-type: none"> Ensure that provisions for reporting incidental and dangerous occurrences during construction using prescribed forms obtained from the local occupational health and safety office (OHSO) are in place. Enforcing adherences to safety procedures and preparing contingency plan for accidental response in addition to safety education and training shall be emphasized. Ensure the premises is insured as per statutory requirements (Third party and workman's compensation) Develop efficient, clean well-lit and adequate sanitary conveniences have been provided for construction workers
Oil Spills	<ul style="list-style-type: none"> A designated garage section of the site fitted with trapping equipment to be planned for changes. Such an area shall be well protected from contaminating the soil
Solid waste generation	<ul style="list-style-type: none"> Use of an integrated solid waste management system i.e. recover, recycle and reuse Through accurate estimation of the sizes and qualities of materials required, order materials in sizes and qualities of materials Ensure that damaged or wasted

construction materials are recovered for refurbishing and use in other projects

- Donate recyclable/ reuse or residual materials to local community groups, institutions, and individual local residents or home owners.
 - Provide facilities for proper handling and storage of construction material to reduce the amount of waste caused by damage or exposure.
 - Use building materials that have minimal or no packaging to avoid the generation of excessive packaging waste.
 - Reuse packaging materials such as cartoons, cement bags among others
 - Dispose waste more responsibly by dumping at designated points on site or landfill only
 - Waste collection bins to be provided at designated points on site.
 - Running educational campaign amongst residents.
- Increased Storm water runoff and soil erosion
- Roof water harvesting and storing in underground reserves for use in cleaning common areas and watering gardens
 - A storm water management plan that minimizes impervious area infiltration by use of recycled areas and use of detention and / or retention with graduated outlet control structures shall be designed
 - Apply soil erosion control measures such as leveling of the project site to reduce run-off velocity and increase infiltration of storm water into the soil.
 - Ensure those construction vehicles are restricted to existing roads to avoid soil compaction within and around the project site.
 - Ensure that any compaction areas are ripped to reduce run-off.
- Generation of waste water
- Provision of means for handling sewerage generated by construction workers
 - Conduct regular checks for sewage pipe blockages or damages since vices can lead to release of the effluent into the land water bodies
 - Monitor effluent quality regularly to ensure that the stipulated discharge rules and standards are not violated
- Vegetation
- Landscaping, and planting of all disturbed area,
 - Planting flowers/ exotic tress and grassing
- Security
- Secure site by providing security guard
 - Build a buffer/ security wall and provide entrance to the area

The full report of the proposed project is available for inspection during working hours at:

(a) Director-General, NEMA, Popo Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.

(b) Permanent Secretary, Ministry of Environment and Mineral Resources, NHIF Building, Community, P.O. Box 30521, Nairobi.

(c) County Director of Environment, Nairobi County.

The National Environment Management Authority invites members of the public to submit oral or written comments within

thirty (30) days from the date of publication of this notice to the Director-General, NEMA, to assist the Authority in the decision making process of the plan.

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT
FOR THE PROPOSED RESETTLEMENT SITE AT GATHIGIRI
IN GATHIGIRI SUB-LOCATION, TEBERE LOCATION, MWEA
DIVISION, KIRINYAGA COUNTY

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The Proponent (National Irrigation Board) is proposing to improve the infrastructure (including road network, electricity, piped water and residential houses) of the Gathigiri site to make it habitable for the resettlement of displacement persons from Kabare at the sites of the proposed Thiba Dam and Mutithi Irrigation scheme.

The following are the anticipated impacts and proposed mitigation measures:

<i>Environmental Impacts</i>	<i>Mitigation Impacts</i>
Landscape visual impact	<ul style="list-style-type: none"> Design of infrastructure that conforms to the project site features
Soil and water contamination	<ul style="list-style-type: none"> Design appropriate sanitary facility considering efficacy and sustainability.
Potential lack of support from project area community	<ul style="list-style-type: none"> Timely dissemination of project facts to PAPs, host community and other stakeholders. Convening of meetings with PAPs and Host Community to disseminate project facts.
Vegetation damage, habitat loss and invasion by exotic species	<ul style="list-style-type: none"> Utilize appropriate clearing techniques e.g. by using human labour as opposed to heavy machinery. Maintain native ground cover by selective removal of tree which cannot be incorporated in the project design. Minimizing clearing and disruption to riparian vegetation.
Generation of Solid Waste	<ul style="list-style-type: none"> Provide strategically located solid waste collection container. Collect together all generated waste from site clearing. Transport and dispose all waste away from site. Liaise with local authority on suitable dumping site for spoils.
Noise pollution (excess noise and vibration)	<ul style="list-style-type: none"> Use of noise reduction/ hearing protection devices when working with noisy equipment. Use of serviceable chain saws (low noise emission). Instruct machinery operators to avoid raving of engines. Carry out site preparation activities during the day.
Soil Erosion	<ul style="list-style-type: none"> Soils excavated are to be used for backfilling construction areas while the

excess soil is disposed of away from site.

Air Pollution (dust, fuel emissions)	<ul style="list-style-type: none"> Soils are not to be left exposed to wind/water. Riverine vegetation to be minimally disturbed when carrying out soil excavation activities during construction. Soil erosion is to be reduced and riverbank protection enhanced. Control speed of construction vehicles. Prohibit idling of vehicles. Water is to be sprayed during the construction phase on dusty areas to reduce dust emission. Regular maintenance of vehicle & equipment. Provision of dust masks for use in dusty conditions. Use of serviceable vehicles and machinery to avoid excessive smoke emission.
Excess noise and vibration	<ul style="list-style-type: none"> Use of noise reduction/ hearing protection devices when working with noisy equipment or noisy environment. Use serviceable equipment with low noise emission. Instruct truck/machinery operators to avoid raving engines.
Generation of Solid Waste	<ul style="list-style-type: none"> Provide communal solid waste collection containers. Liaise with local authority on suitable dumping site for waste. Use of the excavated soil to backfill.
Risk of fire	<ul style="list-style-type: none"> Carry out monitoring of the vegetation that is more susceptible to fire. No burning of materials is to be permitted at the site.
Site Area & Groundwater Water Pollution	<ul style="list-style-type: none"> No domestic waste is to be disposed of at the project area. Provision of used oil containers at a central point. Use of waste bins/proper waste management.
Injury to Workers	<ul style="list-style-type: none"> Appropriate head, hand and foot protection (PPE) during the manual clearing of vegetation and construction activities. Adopting ergonomic work flow designs that fit physical tasks to employees and not vice versa while maintaining a balance with productivity.
Loss of land use, loss of property, population relocation, Land acquisition	<ul style="list-style-type: none"> Inform and provide a plan to farmers currently cultivating land to be used for resettlement. Sensitize local population and PAPs on planned project activities. Sensitize workers on proper waste management.
Temporary road use risk to local population	<ul style="list-style-type: none"> Pre-notification on the intension to move large equipment by road. Observe strict code of conduct by the transporters.
Working at heights	<ul style="list-style-type: none"> Use of construction site barrier tapes to isolate the site(working) area to bar intruders from accessing the area in case of a dropping object.

	<ul style="list-style-type: none"> • Testing of structures for integrity prior to undertaking work. • Provision harnesses and scaffolds for working at heights. • Inspection, maintenance, and replacement of fall protection equipment. • Use of helmets and other protective devices to mitigate against injuries due to dropping objects. • Provide first aid facilities at the site. 		<ul style="list-style-type: none"> • recommendations implemented.
Loss of farm crops at the resettlement site	<ul style="list-style-type: none"> • Discuss with the crop owners. • Develop and provide a resettlement plan to crop owners and farmers at the resettlement site area. 		<ul style="list-style-type: none"> • Hold meetings between PAPs and host community before PAPs resettle at the site.
Community misconceptions	<ul style="list-style-type: none"> • Awareness creation amongst the PAP and locals on the project facts. • Community issues responded to promptly. • Project progress reports and monitoring reports to be prepared and recommendations implemented. • Hold at least two meetings annually to sensitize local community. 		<ul style="list-style-type: none"> • No waste is to be disposed of at the project site. • It is to be ensured that used oil from vehicles is not released to the ground. • Used oil is to be put into containers and appropriately disposed of by a NEMA approved agent. • Provision of used oil containers at a central point.
Increase in social vices/ Security Concerns	<ul style="list-style-type: none"> • Conduct Information Education and Communication amongst the community and the project staff. • Hold meetings between Host and PAP community. • Have regular police patrols at the beginning of infrastructure development. 		<ul style="list-style-type: none"> • Expansion/ equipping of AHITI Ndomba Primary School to be able to accommodate new students from the resettlement site.
Surface run-off and Sedimentation from Construction activities	<ul style="list-style-type: none"> • Ensure that access roads, sanitation facilities, and houses are not constructed in riparian land, floodplain, waterways and wetlands. • Installation of sediment traps/screens to control runoff and sedimentation. • Construction of effective drainages and culverts. 		<ul style="list-style-type: none"> • Expansion/equipping of Kutus Dispensary to be able to offer health services to the PAPs and Local community.
Health issues for construction workers	<ul style="list-style-type: none"> • Sensitize workers on use of protection facilities like mosquito nets appropriate gear when working in waterlogged areas to avoid Bilharzia. • Provide workers on sexually transmitted diseases and emphasize on use of condoms. 		<ul style="list-style-type: none"> • Consider energy-saving stoves; • Sensitize workers and PAPs on conservation; • Consideration for designing and installing a biogas system that is going to generate cooking gas for the PAPs using sewage waste from the households at the site. • Provision of alternative energy source to PAPs including: • NIB to facilitate identification of sponsor in the health sector who can support the project and reduce URTI prevalence in the project area.
Sanitary facilities for PAPs	<ul style="list-style-type: none"> • Installation of appropriate sanitary facilities. • Installation of appropriate sewage works. • Installation of conservancy tanks. 		<ul style="list-style-type: none"> • Provision of communal solid waste containers (skip). • Regular disposal waste depending rate fill up.
Maintenance of facilities	<ul style="list-style-type: none"> • Use of barrier tapes to isolate the maintenance areas. • Provide harnesses and scaffolds for working at heights. • Inspection, maintenance, and replacement of fall protection equipment. 		<ul style="list-style-type: none"> • Provision of electricity network connection for the PAPs. • Use of electricity for lighting; • Significant reduction of air pollution at the household level hence reduction in URTI prevalence.
Risk of fire	<ul style="list-style-type: none"> • Induction on safety tips to PAPs. • No burning of any materials is to be permitted at the site. 		<ul style="list-style-type: none"> • Control of construction vehicle speed. • Prohibition of idling of vehicles. • Water is to be sprayed on building undergoing demolition during decommissioning o reduce dust emission. • Regular maintenance of vehicles and equipment. • Provision of dust masks for use in dusty conditions. • Use of serviceable vehicles and machinery to avoid excessive smoke emission.
Community misconceptions	<ul style="list-style-type: none"> • Awareness creation amongst the community on the project facts. • Ensure community issues/questions are responded to promptly. • Preparation of project progress and monitoring reports and 		<ul style="list-style-type: none"> • Noise reduction/ hearing protection devices when working with noisy equipment. • Use of serviceable equipment with low noise emission; • Instruction to truck/machinery operators to avoid raving of engines. • Use of noise protection (ear muff) during demolition.
		<ul style="list-style-type: none"> • Pollution of surface water and Waste management 	
		<ul style="list-style-type: none"> • Disruption of schooling activities 	
		<ul style="list-style-type: none"> • No Health Centre at resettlement for PAPs 	
		<ul style="list-style-type: none"> • Cutting down of trees/ Deforestation to get firewood 	
		<ul style="list-style-type: none"> • Household Solid Waste 	
		<ul style="list-style-type: none"> • Pollution of air from kerosene lamp causing URTI 	
		<ul style="list-style-type: none"> • Air Pollution (dust, fuel emissions) 	
		<ul style="list-style-type: none"> • Noise pollution 	

- Injury to Workers
- Use of appropriate head, hand and foot protection (PPE) during demolition of structures.
 - Adopting ergonomic work flow designs that fit physical tasks to employees.

The full report of the proposed project is available for inspection during working hours at:

(a) Director-General, NEMA, Popo Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.

(b) Permanent Secretary, Ministry of Environment and Mineral Resources, NHIF Building, Community, P.O. Box 30521, Nairobi.

(c) County Director of Environment, Kirinyaga County.

The National Environment Management Authority invites members of the public to submit oral or written comments within thirty (30) days from the date of publication of this notice to the Director-General, NEMA, to assist the Authority in the decision making process of the plan.

THE ENVIRONMENTAL MANAGEMENT AND CO-ORDINATION ACT

(No. 8 of 1999)

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED RESETTLEMENT SITE AT AHITI NDOMBA IN MWEA EAST DISTRICT, KIRINYAGA COUNTY

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The Proponent (National Irrigation Board) is proposing to improve the infrastructure (including road network, electricity, piped water and residential houses) of the Ahiti Ndomba site to make it habitable for the resettlement of displacement persons from Kabare at the sites of the proposed Thiba Dam and Mutithi Irrigation scheme.

The following are the anticipated impacts and proposed mitigation measures:

<i>Environmental Impacts</i>	<i>Mitigation Impacts</i>
Landscape visual impact	<ul style="list-style-type: none"> • Design of infrastructure that conforms to the project site features
Soil and water contamination	<ul style="list-style-type: none"> • Design appropriate sanitary facility considering efficacy and sustainability.
Potential lack of support from project area community	<ul style="list-style-type: none"> • Timely dissemination of project facts to PAPs, host community and other stakeholders. • Convening of meetings with PAPs and Host Community to disseminate project facts.
Vegetation damage, habitat loss and invasion by exotic species	<ul style="list-style-type: none"> • Utilize appropriate clearing techniques e.g. by using human labour as opposed to heavy machinery. • Maintain native ground cover by selective removal of tree which cannot be incorporated in the project design. • Minimizing clearing and disruption to riparian vegetation.
Generation of Solid Waste	<ul style="list-style-type: none"> • Provide strategically located solid waste collection container. • Collect together all generated waste from site clearing. • Transport and dispose all waste away

from site.

Noise pollution (excess noise and vibration)

- Liaise with local authority on suitable dumping site for spoils.
- Use of noise reduction/ hearing protection devices when working with noisy equipment.
- Use of serviceable chain saws (low noise emission).
- Instruct machinery operators to avoid raving of engines.
- Carry out site preparation activities during the day.

Soil Erosion

- Soils excavated are to be used for backfilling construction areas while the excess soil is disposed of away from site.
- Soils are not to be left exposed to wind/water.
- Riverine vegetation to be minimally disturbed when carrying out soil excavation activities during construction.
- Soil erosion is to be reduced and riverbank protection enhanced.

Air Pollution (dust, fuel emissions)

- Control speed of construction vehicles.
- Prohibit idling of vehicles.
- Water is to be sprayed during the construction phase on dusty areas to reduce dust emission.
- Regular maintenance of vehicle & equipment.
- Provision of dust masks for use in dusty conditions.
- Use of serviceable vehicles and machinery to avoid excessive smoke emission.

Excess noise and vibration

- Use of noise reduction/ hearing protection devices when working with noisy equipment or noisy environment.
- Use serviceable equipment with low noise emission.
- Instruct truck/machinery operators to avoid raving engines.

Generation of Solid Waste

- Provide communal solid waste collection containers.
- Liaise with local authority on suitable dumping site for waste.
- Use of the excavated soil to backfill.

Risk of fire

- Carry out monitoring of the vegetation that is more susceptible to fire.
- No burning of materials is to be permitted at the site.

Site Area & Groundwater
Water Pollution

- No domestic waste is to be disposed of at the project area.
- Provision of used oil containers at a central point.
- Use of waste bins/proper waste management.

Injury to Workers

- Appropriate head, hand and foot protection (PPE) during the manual clearing of vegetation and construction activities.
- Adopting ergonomic work flow designs that fit physical tasks to employees and not vice versa while maintaining a balance with productivity.

Loss of land use, loss of

- Inform and provide a plan to farmers

property, population relocation, Land acquisition	<p>currently cultivating land to be used for resettlement.</p> <ul style="list-style-type: none"> • Sensitize local population and PAPs on planned project activities. • Sensitize workers on proper waste management. 	<ul style="list-style-type: none"> • Provide harnesses and scaffolds for working at heights. • Inspection, maintenance, and replacement of fall protection equipment.
Temporary road use risk to local population	<ul style="list-style-type: none"> • Pre-notification on the intension to move large equipment by road. • Observe strict code of conduct by the transporters. 	<ul style="list-style-type: none"> • Induction on safety tips to PAPs. • No burning of any materials is to be permitted at the site.

GAZETTE NOTICE NO. 12684

THE ENVIRONMENTAL MANAGEMENT AND
CO-ORDINATION ACT
(No. 8 of 1999)

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT
FOR THE PROPOSED BG GROUP OFFSHORE EXPLORATORY
DRILLING IN BLOCK L10A & L10B

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The Proponent (BG Kenya) is proposing to explore for the presence of hydrocarbons in blocks L10A and L10B. The project involves the mobilization of drill ships, drilling of wells, testing, plugging or abandoning of wells (depending on results) and demobilization, transfer of supplies by support vessels and personnel by helicopter.

The following are the anticipated impacts and proposed mitigation measures:

Impacts

Mitigation Measures

- Release of hydrocarbons and chemicals into the ocean
- Implement Chemicals and Hydrocarbons Spill Prevention Mitigation and Management Plan.
 - Development of a detailed Oil Spill Response Plan, based on the findings of this EIA, integrated with DSM-1 operational management plans.
 - Provision of Tier 1 oil spill response capacity on DSM-1 to contain minor spills of fuel from the vessels, and Tier 2

oil response in country, and international Tier 3 capacity engaged.

- Clean-up and removal of synthetic oil based mud from cutting to achieve 5% by weight oil content.

- Implement Waste Mitigation and Management Plan.

- Implement Fisheries and Wildlife Mitigation and Management Plan.

- Noise impacts on the avifauna and marine fauna
- Ensuring equipment is maintained in good working order to minimise the generation of excessive noise which may be transmitted to the marine environment.

- Implement Noise Mitigation and Management Plan.

- Implement Fisheries and Wildlife Mitigation and Management Plan.

- Introduction of marine alien invasive species
- Mobilisation from neighbouring country (Tanzania), combined with compliance with MARPOL guidelines and DSM-1 operational management plans.

- Implement Fisheries and Wildlife Mitigation and Management Plan.

- Implement Waste Water Mitigation and Management Plan

- Strains on the local infrastructure
- Overall impact of the Project on the general business of Mombasa and the surrounding will be minimal in scale. The wastes generated by the drilling however could comprise wastes which the local infrastructure (waste disposal routes) is unable to manage.

- Implement Waste Mitigation and Management Plan

Water Quality

- Mobilisation from neighbouring country (Tanzania), combined with compliance with MARPOL guidelines and DSM-1 operational management plans.

- Implement Fisheries and Wildlife Mitigation and Management Plan.

- Implement Waste Water Mitigation and Management Plan

- Impact of released drill cuttings on pelagic and benthic fauna and flora
- Clean-up and removal of synthetic oil based mud from cutting to achieve 5% by weight oil content.

- Implement Waste Mitigation and Management Plan.

- Implement Fisheries and Wildlife Mitigation and Management Plan.

- Loss of contents of fuel bunker through collision
- Implement Chemicals and Hydrocarbons Spill Prevention Mitigation and Management Plan.

- Development of a detailed Oil Spill Response Plan, based on the findings of this EIA, integrated with DSM-1 operational management plans.

- Provision of Tier 1 oil spill response capacity on DSM-1 to contain minor spills of fuel from the vessels, and Tier 2 oil response in country.

- Social impacts
- Worker briefing on appropriate behaviour when in Mombasa/Nairobi as part of H&S briefing for all workers.

- Supported by Community Grievance System

The full report of the proposed project is available for inspection during working hours at:

(a) Director-General, NEMA, Popo Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.

(b) Permanent Secretary, Ministry of Environment and Mineral Resources, NHIF Building, Community, P.O. Box 30521, Nairobi.

(c) County Director of Environment, Mombasa County.

The National Environment Management Authority invites members of the public to submit oral or written comments within thirty (30) days from the date of publication of this notice to the Director-General, NEMA, to assist the Authority in the decision making process of the plan.

GAZETTE NOTICE NO. 12685

THE ENVIRONMENTAL MANAGEMENT AND
CO-ORDINATION ACT
(No. 8 of 1999)

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT
FOR THE PROPOSED JAFFERY COMPLEX IN MBARAKI,
MOMBASA COUNTY

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The Proponent (K.S.I Jamaat – Trust Board Development Committee) is proposing to construct Jaffery Complex in Mbaraki, Mombasa, Kenya.

The following are the anticipated impacts and proposed mitigation measures:

<i>Impacts</i>	<i>Mitigation Measures</i>
Hydrology and Water supply quality Degradation	<ul style="list-style-type: none"> Hazardous substance control and emergency response plan that will include preparation for quick and safe cleanup of accidental Identify areas where refueling and vehicle maintenance activities and storage of hazardous material is well maintained and protected.
Dust and exhaust emission	<ul style="list-style-type: none"> Ensure strict enforcement of onsite speed limit regulations Sprinkle water on graded access routes when necessary to reduce dust generation by construction vehicles Personal protective equipment shall be used Equipment shall be properly tuned and maintained
Noise pollution and vibration	<ul style="list-style-type: none"> Sensitive construction vehicle drivers, machinery operators to switch off vehicles or machinery not in use. Ensure that construction machinery is kept in good condition to reduce noise generation. Buffer the site against noise propagation. Construction to be undertaken during the day when most of the neighbors are at work
Incidents, accidents and dangerous occurrences	<ul style="list-style-type: none"> Ensure that provisions for reporting incidental and dangerous occurrences during construction using prescribed forms obtained from the local occupational health and safety office (OHSO) are in place.

Oil spills	<ul style="list-style-type: none"> Enforcing adherences to safety procedures and preparing contingency plan for accidental response in addition to safety education and training shall be emphasized. Ensure the premises are insured as per statutory requirements (Third party and workman's compensation). Develop, efficient, clean well-lit and adequate sanitary conveniences have been provided for construction workers. A designated garage section of the site fitted with trapping equipment to be planned for changes. Such an area shall be well protected from contaminating the soil
Solid waste generation	<ul style="list-style-type: none"> Use of an integrated solid waste management system i.e. recover, recycle and reuse Through accurate estimation of the sizes and qualities of materials required, order materials in sizes and qualities of materials Ensure that damaged or wasted construction materials are recovered for refurbishing and use in other projects Donate recyclable/ reuse or residual materials to local community groups, institutions, and individual local residents or home owners. Provide facilities for proper handling and storage of construction material to reduce the amount of waste caused by damage or exposure. Use building materials that have minimal or no packaging to avoid the generation of excessive packaging waste. Reuse packaging materials such as cartoons, cement bags among others Dispose waste more responsibly by dumping at designated points on site or landfill only Waste collection bins to be provided at designated points on site. Running educational campaign amongst residents
Increased storm water runoff and soil erosion	<ul style="list-style-type: none"> Roof water harvesting and storing in underground reserves for use in cleaning common areas and watering gardens A storm water management plan that minimizes impervious area infiltration by use of recycled areas and use of detention and / or retention with graduated outlet control structures shall be designed Apply soil erosion control measures such as leveling of the project site to reduce run-off velocity and increase infiltration of storm water into the soil Ensure those construction vehicles are restricted to existing roads to avoid soil compaction within and around the project site. Ensure that any compaction areas are ripped to reduce run-off.
Generation of waste water	<ul style="list-style-type: none"> Provision of means for handling sewerage generated by construction workers Conduct regular checks for sewage pipe

blockages or damages since vices can lead to release of the effluent into the land water bodies

- Monitor effluent quality regularly to ensure that the stipulated discharge rules and standards are not violated
- Vegetation
 - Landscaping, and planting of all disturbed area
 - Planting flowers/ exotic trees and grassing
- Security
 - Secure site by providing security guard
 - Build a buffer/ security wall and provide entrance to the area

The full report of the proposed project is available for inspection during working hours at:

- (a) Director-General, NEMA, Popo Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.
- (b) Permanent Secretary, Ministry of Environment and Mineral Resources, NHIF Building, Community, P.O. Box 30521, Nairobi.
- (c) County Director of Environment, Mombasa County.

The National Environment Management Authority invites members of the public to submit oral or written comments within thirty (30) days from the date of publication of this notice to the Director-General, NEMA, to assist the Authority in the decision making process of the plan.

B. M. LANGWEN,
for Director-General,

**IMPORTANT NOTICE TO SUBSCRIBERS TO
THE KENYA GAZETTE**

THE following notes are for the guidance of persons submitting "copy" for inclusion in the *Kenya Gazette, Supplement*, etc.:

- (1) *The Kenya Gazette* contains Notices of a general nature which do not affect legislation. They are, therefore, submitted to the Government Printer directly.
- (2) *Legislative Supplement* contains Rules and Regulations which are issued by the Central Government. Because of this, they must be submitted to the Government Printer through the office of the Attorney-General.
- (3) *Bill Supplement* contains Bills which are for introduction in the National Assembly.
- (4) *Act Supplement* contains Acts passed by the National Assembly.

All "copy" submitted for publication should be prepared on one side of an A4 sheet no matter how small the Notice is, each page being numbered and should be typewritten with double spacing. Copy should be clear, legible and contain no alterations.

Particular attention should be paid to the following points:

- (i) Signature must be supported by rubber-stamping or typing the name of the signatory in capital letters.
- (ii) Dates must be correct and filled in where necessary.
- (iii) Care should be taken to ensure that all headings to Notices and references to legislation are up to date and conform with the Revised Edition of the Laws of Kenya.

EXTRACT FROM THE CODE OF REGULATIONS, SECTION D—

Kenya Gazette

"D 34. (1) Communications for the *Kenya Gazette* should reach the Government Printer not later than 9 a.m. on Friday of the week before publication is desired. The Government Printer will not publish communications received after that hour until the next subsequent issue of the Gazette.

(2) Ministries will be required to pay for the *Kenya Gazette* and to meet the cost of advertising in it.

It is emphasized that these notes are for guidance only, but it is requested that persons submitting copy for publication first satisfy themselves that such copy is complete in every respect.
