THE STATUTORY INSTRUMENTS ACT

(No. 23 of 2013)

REGULATORY IMPACT STATEMENT

PURSUANT to section 8 of the Statutory Instruments Act, 2013, the Cabinet Secretary for Lands and Physical Planning notifies the general public that a Regulatory Impact Statement on the proposed Sectional Properties Regulations, 2021 to effect the implementation of the Sectional Properties Act, 2020 has been prepared to assess the impact of the regulations on the community and businesses.

The main objective of the proposed regulations is to facilitate the implementation of the Sectional Properties Act, 2020 which provides for division of buildings into units to be owned by individual proprietors and common property to be owned by the proprietors of the units as tenants in common. The Act also provides for the use and management of the units and common property and other connected purposes.

Given that the main objective of the Act is to give ownership of units in an apartment and high-rise buildings or even units developed in a horizontal setting albeit on one parcel of land, it is necessary to make regulations that facilitate this model of ownership and living within the framework provided by the Act. Power to make regulations is provided under section 59 of the Act. The following is a summary of what the regulations seek to provide for:

- (a) Procedure for making application for registration of a Sectional Plan and a corporation.
- (b) The procedure for registration of sectional plans and consequent keeping of a Sectional Plans Register where all Sectional Plans will be registered.

- (c) The procedure for registration of a Corporation and the corresponding keeping of a corporation register.
- (d) Procedure for opening unit registers both for freehold and leasehold parcels based on the Registered Sectional Plan and subsequent procedure of issuing certificates of title and certificates of lease respectively.
- (e) Procedure for preparation of Sectional Plans and the provision of standard forms to guide the process.
- (f) Procedure for converting long-term leases in respect of properties or units not properly georeferenced.
- (g) Prescribe fees payable under the Act.

This is therefore to request all persons likely to be affected by the proposed regulations to submit written memoranda on the proposed regulations to reach the undersigned within fourteen (14) days from the date of publication of this notice.

The draft Regulatory Impact Statement and the proposed regulations are available on the Ministry's website: <https://lands.go.ke>. The proposed regulations and the Regulatory Impact Statement are also available on request through the Ministry's email address at spregulations@gmail.com during normal working hours.

Due to the prevailing global health concerns, the Ministry also welcomes any stakeholder who would prefer virtual interaction on the subject matter to notify the Ministry through the email address given below in order for the Ministry to prepare for such meetings. The virtual meetings will be scheduled as public fora and will take place between Tuesday 27th April and Thursday 6th May, 2021 starting from 10.00 a.m. to 4.00 p.m. to discuss the proposed Regulations and the Regulatory Impact Statement and comments received.

THE ENVIRONMENTAL MANAGEMENT AND CO-ORDINATION ACT

(No. 8 of 1999)

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED DEGAZETTING OF SEREGEYA LIKUYANI BLOCK 1 FROM TURBO FOREST RESERVE, KAKAMEGA COUNTY

INVITATION OF PUBLIC COMMENTS

PURSUANT to Regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The proponent County Government of Kakamega proposes to degazette Seregeya Likuyani Block 1 Turbo Township from Turbo Forest Reserve in Kakamega County. The area to be gazetted consists of 140 acres for the development of Seregeya Likuyani Block 1 Turbo Township i.e. a market, CGK offices and social amenities: 460 acres of agricultural land; and 100 acres under police station and National Youth Services (NYS). The area is completely settled but still under Turbo Forest Reserve.

The following are the anticipated impacts and proposed mitigation measures:

<i>Possible Impacts</i>	<i>Mitigation Measures</i>
Limited land-holding rights	<ul style="list-style-type: none"> • Issue title deed to affected settlers.
Limited access to communal resources and assets	<ul style="list-style-type: none"> • Develop appropriate means of access through demarcation and creation of access roads within the degazetted area. • Develop an all-inclusive joint forest management plan between Kenya Forest Service (KFS) and the community or update the existing management plan to cater for the current issues.
Limited access to social services and facilities and increased pressure on existing social services and facilities	<ul style="list-style-type: none"> • Establish and/or construct all the needed peripheral developments within the degazetted area.
Changed subsistence/ livelihoods and income-earning capacities	<ul style="list-style-type: none"> • Capacity build community members through training on feasible agribusiness opportunities.
Changes in movement and socialization	<ul style="list-style-type: none"> • Sensitize and bring together the people in the community and educate them on need for staying together in harmony.

Possible Impacts Mitigation Measures

patterns and other impacts on social groupings and social behaviours

Loss of forest land forest resources and challenges in forest management

- Properly demarcate the forest land to differentiate it from the community land and enforce laws governing access to and use of forest resources.
- Re-establish vegetation in farms, riparian areas and in annihilated areas within the forest through implementation of well-designed afforestation and reforestation programmes by planting of appropriate plants.
- Sensitize the community on the importance of conserving the forest and the need for staying together in harmony.

Increase in spread of sexually transmitted diseases

- Develop sexually transmitted diseases (STDs), HIV and AIDs control measures such as provision of condom dispensers in places, which are accessible by all people e.g. at public offices.
- Create awareness of STDs, HIV and AIDS among the people through posters.

Increased traffic flow

- Properly plan the project activities to reduce the number of trips done or the number of vehicles on the roads.
- Inform the area residents of the planned surveys in advance so that they can be prepared for them.

Post-excision establishment of social and physical infrastructure

- Seek to establish amicable relationships with stakeholders and manage the impact of the project activities on affected people.
- Put in place a pre-emptive community liaison structure aimed at identifying potential issues arising from project-related impacts and addressing them before they become grievances.
- Establish a grievance redress mechanism targeting communities and other project stakeholders but not applicable to commercial and employee-employee relationships, and which will allow stakeholders to easily put forth their concerns relating to the project, implementation and have them addressed in a prompt and respectful manner.
- Ensure the grievance redress mechanism is available to the affected community members and stakeholders at no cost.
- Address all raised grievances, real or imagined and take reasonable steps to maintain confidentiality of the parties to the mechanism and regardless of the complainants' participation in this process, give a guarantee that the complainant's statutory rights to undertake legal proceedings remain unaffected.
- Educate all project stakeholders on the availability and use of the grievance redress mechanism in a manner that is understandable to all, before, during and after construction of the proposed project.

Increased spread of Covid-19

- Provide facemasks to all project personnel and visitors.
- Ensure all project personnel and visitors

Possible Impacts Mitigation Measures

maintain a social distance of at least 1.5 m where there are two or more people gathered and avoid crowding people together.

- Subject all persons getting to the sites to rapid Covid-19 screening i.e. temperature check and other vital signs including getting to record where have recently travelled to.
- Install handwashing facilities with adequate running water and soap, or sanitizing facilities at the entrance to the sites and to all consultation and meetings venues.
- Where possible use only virtual methods of meetings and avoid one-on-one meetings.
- Ensure routine sanitization of shared social facilities and other communal places routinely including wiping of door knobs, hand rails etc.
- Where one-on-one meetings cannot be avoided, hold meetings in small groups or focused group discussions (FGDs) and in adherence to all GOK guidelines in place and subject all the participants strictly observing at least 1.5 m social distancing, regular hand washing, sanitizing and limited duration of meeting.

The full report of the proposed project is available for inspection during working hours at:

INVITATION OF PUBLIC COMMENTS

PURSUANT to Regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The proponent, County Medical Investment Company Limited, is proposing to install an Incineration Plant in Embu County.

The following are the anticipated impacts and proposed mitigation measures:

<i>Impacts</i>	<i>Mitigation Measures</i>	<i>Impacts</i>	<i>Mitigation Measures</i>
Dust disturbances	<ul style="list-style-type: none"> • Employees involved in the construction work to be provided with dust masks. • Project management and contractor to enforce strict use of personal protective clothing. • Complaints of dust related ailments among employees given access to medical attention. 		<p>and emission control technologies for the pollutant of concern.</p> <ul style="list-style-type: none"> • Having well-trained and certified employees that ensure that the combustor is operated to maximize combustion efficiency and that the emission control devices are operated to optimize conditions for pollutant capture or neutralization.
Loss of vegetation	<ul style="list-style-type: none"> • Limit vegetation clearing to areas within the site boundary where it is absolutely necessary. • Replant vegetation. 		<ul style="list-style-type: none"> • Installation of well-designed and well-operated fine-particle of air pollution control device (apcd) such as filtration collectors, primary fabric filters (baghouses) and electrostatic collectors.
Noise and vibrations disturbances	<ul style="list-style-type: none"> • All construction work to be limited to daytime only. • All employees likely to be exposed to ear noise to be provide with ear protectors; • Contractor to ensure strict enforcement on user of ear protectors. • Where applicable and possible exceptionally noisy machines to be fitted with noise reduction devices. • Any employee who may complain about ear related pain and or complication while at work to access medical attention at the expense of the contractor or project proponent. 		<ul style="list-style-type: none"> • Apply dry and wet electrostatic precipitators (esps) and ionizing wet scrubbers; and wet inertial-impaction collectors. • Maintain a maximum gas flow-rate limit to ensure adequate residence time in the combustion chamber and proper operation of the air pollution control equipment. • Optimize baghouse pressure drop, bag-break detection, wet scrubber pressure drop, ph, and liquid-to-gas ratio. • Quarterly stack emission assessment of the incinerator. • Installation of acid gas scrubbers such as packed-bed absorber. • Optimize flue-gas temperature and to maximize condensation and capture of pollutants while avoiding gas dew point problems.
Solid and liquid wastes	<ul style="list-style-type: none"> • Construction solid waste to be handled, managed and disposed according to the waste management regulations. • Waste handling bins to be provided for workers onsite, each bin should have a lid which should always be covered. • Colour code to be used to distinguish waste bins of different wastes. • Solid waste to be disposed only at licensed disposal sites. • In a case of cement bagging, they can be stored recycled or put into different usage. 		<ul style="list-style-type: none"> • Installation of stack-gas monitors. • Designing and operating the combustion process to minimize pb vaporization. • Designing and operating the primary combustion chamber to minimize fly-ash carryover.
Occupational injuries	<ul style="list-style-type: none"> • Appropriate personal protective equipment such as safety belts for workers working at height to be provided. • Proper use of PPE provided. • Appropriate training of workers of ways of working safely. • Appropriate supervision at workplace. • Rest times to be strictly observed to reduce stress. 	Solid waste (bottom ash, fly ash, scrubber water, lime and activated carbon)	<ul style="list-style-type: none"> • Initial sorting of municipal-solid to remove stream of large items unsuitable for burning (such as whole refrigerators, gas stoves, and auto batteries). • Knowledge of the intrinsic properties of the material, including the physical, chemical, and leaching properties by the incinerator operator. • Solid waste to be handled managed and disposed according to the environmental management and co-ordination (waste management) regulations 2006. • Employ services of a NEMA licensed waste collection company. • Solid waste to be collected after every two days for disposal at NEMA licensed disposal sites.
Degradation of local air quality	<ul style="list-style-type: none"> • Installation of electrostatic precipitators, fabric filters, or wet inertial scrubbers for particulate matter control. • Limiting the ash content of the waste feed via source control or selection. • Optimize voltage and other electric conditions of an esp (to maximize capture of particles). • Designing and operating the primary combustion chamber to minimize fly-ash carryover. • Choosing advanced combustion designs 	Occupational hazards or injuries to works, visitors and general public	<ul style="list-style-type: none"> • Plant operators and workers training in hazardous-material management and annual refresher courses. • All workers should be provided with protective gear. • A first aid kit should be provided within the site. • The proponent should have workmen's compensation cover (WIBA).

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT
FOR THE PROPOSED HOSPITAL DEVELOPMENT ON PLOT
L.R. NO. NDUMBERI/ NDUMBERI/2958 AT NDUMBERI AREA
OFF KIAMBU SUB-COUNTY, KIAMBU COUNTY

INVITATION OF PUBLIC COMMENTS

PURSUANT to Regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The proponent Sophia Wanjiku John, proposes to construct a modern five- floor hospital with a capacity of 60 beds, an incinerator, associated facilities and amenities on plot L.R. No. Ndumberi/Ndumberi/2958 at Ndumberi area off Kiambu Sub-County, Kiambu County.

The following are the anticipated impacts and proposed mitigation measures:

Possible Impacts Mitigation Measures

Noise and vibration	<ul style="list-style-type: none"> The noisy operation related works should entirely be planned to be during day time i.e. 8 a.m. to 5 p.m. Use of appropriate personal protective equipments. Fix noisy equipment with silencers. Sensitize workers on dangers of excess noise.
Soil erosion	<ul style="list-style-type: none"> Excavate only areas to be affected by the buildings. Cover/sprinkle water on loose soils. Excavated soil to be disposed into designated dumping site. Provide soil conservation structures on the areas prone to soil erosion mostly to reduce impact by the run-off.
Increased surface run-off	<ul style="list-style-type: none"> Provide rain water harvesting and storage facilities. Construction of proper storm drains that will collect and dispose storm water from the project site.
Air pollution	<ul style="list-style-type: none"> Water sprinkling on loose materials e.g. Sand and soil. Use of dust screens.

Possible Impacts	Mitigation Measures
	<ul style="list-style-type: none"> Equipment shall be properly tuned and maintained. Discourage the use of wood fuel and encourage the use of renewable energy resources e.g. solar energy Use of appropriate personal protective equipments.
Increased demand	<ul style="list-style-type: none"> Harvest rain-water. Recycling or re-use of water where possible. Avoid unnecessary wastage. Use of taps that turn off automatically. Install a discharge meter at water outlets to determine and monitor total water usage.
Road safety	<ul style="list-style-type: none"> Provide bill boards at the site/entrance to notify motorists and general public about the development. Employ well trained and experienced drivers. No parking on road reserve. Observe traffic rules.
Occupational health and safety impacts	<ul style="list-style-type: none"> All workers should be provided with protective gears. Provide First Aid Kit on site. Take insurance cover for workers on site. Provide adequate sanitary facilities. Provide fire extinguishers and hydrants within the premises. Install lightning arrester.
Loss of biodiversity	<ul style="list-style-type: none"> Project construction should disturb as little area as possible. Landscaping and planting of appropriate vegetation cover e.g. grass, shrubs and flowers. Prevent any form of pollution to the environment.
Increased electricity demand	<ul style="list-style-type: none"> Use renewable energy sources e.g. solar energy. Install energy saving bulbs. Switch off electrical equipment, appliances and lights when not being used.
Solid waste management	<ul style="list-style-type: none"> Provide facilities for proper handling and storage of waste. Segregate the waste at the site. Encourage re-use and re-cycling of wastes where applicable. Engage services of a registered waste handler to dispose the waste at designated disposal sites.
Medical generation	<ul style="list-style-type: none"> Provide and ensure the usage of well labelled color-coded bins and liners. Hazardous waste to be kept in safe, designated, closed and covered areas awaiting collection to the final disposal site. Proper use of an incinerator. Contract a registered medical waste handler for collection and disposal of medical wastes at designated sites.

Possible Impacts Mitigation Measures

- Effluent disposal
- Provide adequate and safe means of handling all effluents from the facility by connecting to the sewerage system serving the entire project area.
 - Install an onsite treatment plant that can pre-treat some effluent to recommended standards before final discharge.
 - Ensure regular monitoring of the sewage discharged from the project to ensure that the stipulated sewage/effluent discharge rules and standards are not violated.
 - Conduct regular inspections and maintenance for drainage pipe blockages or damages and fix appropriately.

The full report of the proposed project is available for inspection during working hours at:

**IMPORTANT NOTICE TO SUBSCRIBERS TO
THE KENYA GAZETTE**

THE following notes are for the guidance of persons submitting "copy" for inclusion in the *Kenya Gazette, Supplement*, etc.:

- (1) *The Kenya Gazette* contains Notices of a general nature which do not affect legislation. They are, therefore, submitted to the Government Printer directly.
- (2) *Legislative Supplement* contains Rules and Regulations which are issued by the National or County Governments. Because of this, they must be submitted to the Government Printer through the office of the Attorney-General.
- (3) *Bill Supplement* contains Bills which are for introduction in the National Assembly, Senate or County Assemblies.
- (4) *Act Supplement* contains Acts passed by the National Assembly, Senate or County Assemblies.

All "copy" submitted for publication should be prepared on one side of an A4 sheet no matter how small the Notice is, each page being numbered and should be typed with double spacing. Copy should be clear, legible and contain no alterations.

Particular attention should be paid to the following points:

- (i) Signature must be supported by rubber-stamping or typing the name of the signatory in capital letters.
- (ii) Must be correct and filled in where necessary.
- (iii) Care should be taken to ensure that all headings to Notices and references to legislation are up to date and conform with the Revised Edition of the Laws of Kenya.
