The project plot area measures about 2.5 acres (1.002 ha).

The design for the commercial building tower provides for the construction of four components; a commercial component of about 30,000 square meters of total floor area, a residential component of about 10,000 square meters of total floor area, a hotel of about 15, 000 square meters of total floor area and a retail component of maximum 15,000 square meters. This make the total planned development to have an accumulated total area of 70,000 square metres. The following are the anticipated impacts and proposed mitigation measures:

Possible Impacts	Mitigation measures

A storm water management plan that minimizes impervious area infiltration by use of recharge areas and use of detention and/or retention with graduated outlet control structure will be designed. Install drainage structures properly. Ensure management of excavation activities. Landscaping of disturbed areas.
Increased solid waste generation	<ul style="list-style-type: none"> Use of an integrated solid waste management system i.e. through a hierarchy of options: 1. Source reduction 2. Recycling 3. Composting and reuse 4.

Air pollution

Noise pollution

Dust Generation

Exhaust Emissions

Liquid waste release into the environment

Combustion 5. Sanitary land filling.

- Private waste disposal company to be contracted to transport and dispose the solid waste from site.
