THE NATIONAL ENVIRONMENT MANAGEMENT

AUTHORITY

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT
FOR THE PROPOSED GARDEN CITY BUSINESS PARK ON
PLOT NO. L.R. NO. 10119 IN RUARAKA SUB-COUNTY,
NAIROBI CITY COUNTY

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The proponent, Kasarani Investments Holdings Limited is proposing to construct Garden City Business Park on plot No. L.R. No. 10119 in Ruaraka Sub-County, Nairobi City County. The components of the project include:

- Subdivision of 23.53 acres' piece of land into 10 subplots essentially for mixed use purposes, designed with both functionality, comfort and convenience in mind incorporating: modern business hotels; a hospital (with its own secure entrance); green spaces and a pedestrian boulevard linking the Business park to Garden city mall, residential village and central park.
- Development of modern office spaces in two of the subplots.

The following are the anticipated impacts and proposed mitigation measures:

<i>Impact</i>	<i>Mitigation Measures</i>
Environment (biodiversity and soil characteristics)	<ul style="list-style-type: none"> • Implement good housekeeping practices such as solid waste management plan in order to prevent/minimize any source of hazards to native flora and fauna. • Maintaining of landscaped gardens, terraces, conservation and management of the vegetation and gardens. • Preservation of the excavated top-soil for future site restoration procedures, particularly in high disturbed areas. • Compacting areas with loose soil and providing structures for soil erosion. • control on steeper areas of the site and controlling activities during the rainy season.
Waste water	<ul style="list-style-type: none"> • Water recycling measures will be in place to ensure reduction in the amount of waste water. • Wastewater generated will be channeled in the main sewer line. • Proponent will ensure that storm water channels are maintained regularly and lawn gradient is in place to assist in water flow.
Solid waste	<ul style="list-style-type: none"> • Strict adherence to EMC (Waste Management) Regulations of 2006. • Ensuring wastes are transported and disposed by NEMA licensed waste handlers. • Ensuring all wastes are dumped in their designated areas and through legally acceptable methods approved by NEMA and County Government of Nairobi Assessing and creating opportunities for Reducing, Reusing, Recycling and Recovering of demolition waste.
Air quality	<ul style="list-style-type: none"> • Covering of all haulage vehicles carrying debris, sand, aggregate and cement. • Stockpiles of fine materials should be wetted or covered with tarpaulin during windy conditions. • Sensitize truck drivers to avoid unnecessary racing of vehicles at

loading.

Occupational health and
safety risks (OHS)

- offloading sites and parking areas and encourage them to keep vehicle engines off at these points.
- Controlling the speed and operation of construction vehicles, especially over unpaved roads.
- Employing an OSH plan that will outline all OSH risks and provide a strategy for their management.
- Raising awareness and training workers on safe use of the equipments and associated risks.
- Ensure there is security in and around the site to control the movement of people.
- Creating safe and adequate emergency assembly points that are well labeled.
- Maintain on site telephone contacts for Nairobi County fire brigade and any emergency provider such as St. John ambulance, Kenya Red Cross, among others.

Noise and vibration

- All workers operating in noisy areas will be provided with PPEs, such as ear plugs to protect them against extreme noise.
- Adoption of equipment with in-built noise control elements where necessary.
- Construction works should be carried out only during daytime.
- Complying with the EMC (Excessive vibration and Noise) Regulation of 2009.

Increased traffic

- A well-structured traffic Management Plan will need to be developed and implemented.
- Placing signs around the site notifying other vehicles about the heavy traffic and to set the speed limit around the site.
- Flagmen should be employed to control traffic and assist construction vehicles as they enter and exit the project site.
- Ensuring all drivers for the project comply to speed regulations.

Chemical and oil spill

- Identify high risk spill areas (e.g. generators, fuel tanks, and lubricant and oils storage rooms), and have impervious surfaces (concrete floors) and capture facilities in place.
- Prepare and display on site spill response procedures and train all the workers on response management.
- Use of water-based fluids including non-toxic chemicals.
- Servicing of the vehicles and other machines should not take place at the site, if it happens the contractor should make sure it is done in a designated area made of cement floor for easier trapping of any spills.

The full report of the proposed project is available for inspection during working hours at:

- (a) Director-General, NEMA, Popo Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.
