THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED SMALL SCALE COPPER MINING ON SECTIONS OF 6 ACRES OF PRIVATE LAND, KASALANI VILLAGE, KASAALA LOCATION, IKUTHA WARD, KITUI SOUTH, KITUI COUNTY

INVITATION OF PUBLIC COMMENTS

Pursuant to Regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The proponent, Geotech Mining Company Limited, is proposing to carry out small scale copper mining as provided by the Mining Act, 2016. The sections of land proposed for small scale mining is private land largely used for agropastoral activities. The company has been given mining rights by the Ministry of Mines and Geology to carry out prospecting and mining of copper in a 3.8km² land. Within the allocated mining site, the company has discovered commercially viable copper ore deposits in sections of 6 acres of land. The main objective of the proposed project is to evaluate the effects/impacts of proposed small scale copper mining in relation to the environment i.e. physical, biological and social- economic environments.

The following are the anticipated impacts and proposed mitigation measures.

<i>Impact</i>	<i>Proposed Mitigation Measures</i>
Land degradation /Soil erosion	<ul style="list-style-type: none"> Avoid soil transport from the mine to avoid soil contamination with heavy metals. Use grasses to rehabilitate the site since they withstand soil contamination better. Silt fence should be established where erosion is predetermined. Introduce vegetation in already mined areas. Introduce physical barriers such as rocks to intercept soil material from being carried away by the run-off. Storm water in the mines to be contained in the pits and run-off to other areas avoided.
Air pollution /Dust and other emissions	<ul style="list-style-type: none"> Constant sprinkling of water to the bare areas. Identify wind direction during operation to avoid exposure to emission. Minimize the generation of bad emission from trucks used by assessing and evaluating whether they contain toxic by products. All the workers should be provided with masks to avoid inhaling such gases. Develop a respiratory monitoring programme for the mine workers.

<i>Impact</i>	<i>Proposed Mitigation Measures</i>	<i>Impact</i>	<i>Proposed Mitigation Measures</i>
	<ul style="list-style-type: none"> To limit exposure level, practice duty controls. Apply engineering controls to reduce dust pollution. 	Change on land /Loss of land	<ul style="list-style-type: none"> Backfill the mined pits. Fence the area and allow natural regeneration. Aid in revegetation using suitable species. Stabilize the soil PH for quick recovery.
Habitat and vegetation disturbance (Fauna and Flora)	<ul style="list-style-type: none"> Leave high value trees. Designate traffic in specified and most efficient routes. Minimize area of clearance. Reintroduce the vegetation that co-exist with the site. Minimize earthworks. Reduce noise at the source. Allow wild game to migrate. Avoid pumping waste water in the mine pits into vegetated areas. 	Water pollution	<ul style="list-style-type: none"> Waste water accumulating in the mining pits should never be used for human, livestock and domestic. Treat water in the pits of heavy metals before discharge to the environment. Harmonize and design drainage ditches with the natural drainage to avoid affecting nearby land. Divert run-off around working area. Install sedimentation traps or screen next to the silt fence by arranging a layer of stone chips and gravel to trap any loose soil to the river.
Noise and resulting vibrations	<ul style="list-style-type: none"> Avoid rock blasting. If blasting is mandatory then: <ul style="list-style-type: none"> Obtain a blasting permit Obtain noise permit Develop a timetable for blasting Forewarn residents and workers before blasting Avoid blasting in adverse weather conditions Strictly use controlled blasting Use a licensed blaster Use few shot holes per blasting episode Take action against incidental injury/damage caused by blasting Reduce noise at the source point. Mining should only be done during the day time. Planning the trips of the vehicles can reduce such impacts. Screening using baffle moulds material e.g. soil and wastes that has already been remove to access the rock. Locate screening baffle moulds on site boundary to reduce noise. The workers to be provided with earmuffs during operation hours. Supervision of the site by a person with knowledge of dangerous mining activity and accepted mining practices. Correct stemming aid the control of ground vibration. 	Visual Intrusion	<ul style="list-style-type: none"> Backfilling the mined pits using earth excavated wastes. Rehabilitate open pits by planting native tree species. Consider fencing off mined pits to allow for natural regeneration. Waste water in the mining pits should not be used for livestock and wildlife consumption.
		Land restoration and landscaping	<ul style="list-style-type: none"> Filling in the depressions and mined pits before moving to another section to prevent ponding. Landscaping and replanting of trees and other similar vegetation. All pits where water may collect to form ponds should be filled A layer of top soil should be introduced so as to achieve vegetation growth.
Solid and effluent wastes (Oil and other spills)	<ul style="list-style-type: none"> Soil and earth excavated wastes to be used for backfilling excavated pits. Surface run-off from waste pits should be captured and treated to remove suspended solids prior to discharge. Safe disposal of oil spills and filters from machineries. Prompt clean up in case of spills. Train workers on recognizing a split condition. 	Occupation health and safety	<ul style="list-style-type: none"> Risky and sensitive mining pits to be secured by danger tape. Fence off the mine site. Post cautionary signages at the mine site. Isolate the working site from the rest of the community for their safety. All depressions should be filled and replanted. All moving parts of machine should be covered with suitable guards. Keep accidents and incidents records. Provide, and enforce use of personal protective equipment and trained on occupational health. Fire-fighting equipment and first aid kits should also be provided at the site.

The full report of the proposed project is available for inspection during working hours at:

- Director-General, NEMA, Popo Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.
- Principal Secretary, Ministry of Environment and Forestry, NHIF Building, Community, P.O. Box 30521, Nairobi.
- County Director of Environment, Kitui County.

The National Environment Management Authority invites members of the public to submit oral or written comments within thirty (30) days from the date of publication of this notice to the Director-General, NEMA, to assist the Authority in the decision making process of the plan.

NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY
ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT
FOR THE PROPOSED RESIDENTIAL DEVELOPMENT IN KILIFI
COUNTY

INVITATION OF PUBLIC COMMENTS

Pursuant to Regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The proponent, Superior Homes (Kenya) PLC, is proposing to construct residential apartments comprising 202No. two bedroom units, 108No. three bedroom units, 43No. bedroom villas associated facilities and amenities in Kilifi County.

The following are the anticipated impacts and proposed mitigation measures:

Impact	Proposed Mitigation Measures
Vegetation disturbance	<ul style="list-style-type: none"> Ensure areas which will not be affected by the development are not cleared. Embark on intensive planting of trees to restore and conserve the nature history once the project construction is complete and when decommissioned. Undertake landscaping in order to replant trees in areas not covered by housing development.
Soil and water pollution	<ul style="list-style-type: none"> Apply soil erosion control measures such as leveling of the project site to reduce run-off velocity and increase infiltration of storm. water into the soil. Ensure that construction vehicles are restricted to existing graded roads to avoid soil compaction within the project site.
Air Pollution (dust and gaseous emissions)	<ul style="list-style-type: none"> Ensuring strict enforcement of onsite speed limit regulation. Sprinkling of water on open surfaces and dusty grounds. Provision of personal protective equipment such as dust masks to workers and other visitors on site.
Noise and excessive vibration	<ul style="list-style-type: none"> Sensitize vehicle drivers to switch off engines of vehicles at the site when not in use. The project activities be planned to be during the day when most of the neighbours shall be away at work and children at school. Leave a tree buffer zone around the project site so as to reduce the impacts of noise to the neighbours. Machinery and vehicles to be used should be frequently maintained so as to reduce the noise which they may produce.

Impact

Proposed Mitigation Measures

Increased Solid waste generation	<ul style="list-style-type: none"> Use of an integrated solid waste management system i.e. through a hierarchy of options Ensure construction materials left over will be used in other projects rather than being disposed of. Ensure that damaged or wasted construction materials will be recovered for refurbishing and use in other projects Provide facilities for proper handling and storage of construction materials to reduce the amount of waste caused by damage or exposure to the elements Use building materials that have minimal or no packaging to avoid the generation of excessive packaging waste
Occupational safety and health hazards	<ul style="list-style-type: none"> Implement all necessary measures to ensure health and safety of workers and the general public during operation of the housing project as stipulated in Factories and Other Places of Work Act Cap 514 Well stocked first aid box which is easily available and accessible should be provided within the premises Provision must be made for persons to be trained in first aid, with a certificate issued by a recognized body.
Increased effluent waste generation	<ul style="list-style-type: none"> The proponent should provide means for meeting workers' sanitation needs at the site such as a pit latrine. The pit latrine onsite should not be demolished but to be used by the workers during the project cycle
Increased water demand	<ul style="list-style-type: none"> Promptly detect and repair of water pipe and tap leaks Sensitize clients to conserve water Ensure taps are not running when not in use Install water conserving taps that turn-off automatically when water is not being used Install a discharge meter at water outlets to determine and monitor total water usage.
