INVESTIGATION REPORTS COVERING THE PERIOD 1ST
JANUARY TO 31ST MARCH, 2015

EACC/AT/INQ/3/2015

Inquiry into allegations of embezzlement of KShs.19 million by Nairobi City County Officials.

Investigations established that on various dates between February 2014 and December, 2014, the Nairobi County Chief Finance Officer and the County Secretary approved the withdrawal of a sum of KSh. 19 million from the County's account. The investigations established that the money was withdrawn by an officer from the office of the Chief Finance Officer. Investigations further established that the withdrawals were purported to be for payment for various goods supplied to the County and services rendered arising from several procurements as well as allowances.

The investigations further revealed that most of the payments were not supported by any Payment Vouchers as required and that the purported procurement for various goods and services did not in fact take place. It was further established that the suspects used the said procurements and payment for overtime and meal allowances as a cover up to embezzle money from the Nairobi County. The purported suppliers of the goods for which the alleged payments were being

made confirmed that they did not supply any goods to the County nor provide any services.

The investigations established massive embezzlement of public funds and unaccounted for payments by the suspects using fictitious payees, who the Commission was of the opinion were culpable.

A Report was compiled and forwarded to the Director of Public Prosecutions on 31st March, 2015 with recommendations that the suspects, namely the County Secretary, Chief Finance Officer, Principal Accountant, Auditor and Secretary be charged with various offences namely; Conspiracy to commit an offence of economic crime contrary to section 47A (3), of Abuse of office contrary to section 46, Fraudulent acquisition of public property contrary to section 45(1)(a) and Fraudulent making payment from public revenue for goods not supplied contrary to section 45 (2) (a) (ii) of the Anti- Corruption and Economic Crimes Act, 2003 and Uttering false documents contrary to section 353 of the Penal Code.

EACC/FI/INQ/46/2014

Inquiry into allegations that Machakos County Government single sourced services for construction of perimeter wall around the County Assembly offices at an exaggerated amount of Kshs.29 million.

The investigation revealed that the Machakos County Assembly identified the need to fence off the County Assembly premises by putting up a perimeter wall. The County Assembly approved the budget for this construction at KSh. 5 million, and purportedly approved the use of direct procurement for the subject contract for reason that the financial year was about to come to an end.

Investigation further revealed that the County Tender Committee (CTC) approved the use of direct procurement and floating of Quotations to pre-qualified bidders. The bids were evaluated and the tender awarded to the lowest evaluated bidder. The investigations further established that the successful bidder embarked on the works and implemented the project.

Investigations established that the decision by the Tender Committee and the County Assembly Board to approve direct procurement for this particular contract was in breach of the Public Procurement and Disposal Act and Regulations since the reason for the selection of the said method was not justifiable. It was not also the jurisdiction of the Assembly Board to perform the functions of the Tender Committee.

A Report was compiled and forwarded to the Director of Public Prosecutions on 21st January, 2015 recommending prosecution of the officials who were culpable for the breaches of procurement processes; with the offences of Careless failure to comply with the law relating to procurement contrary to section 45(2) (b) as read with Section 48 (1) of the Anti-Corruption and Economic Crimes Act, 2003.

Investigations established that the Moi International Airport Security Committee identified the need for a police shelter at the toll station gate to shield the officers manning the gate from the sun, create a rest room and a search area.

Contrary to the allegations made, the investigations established that a sum of KSh. 4 million was expended for the construction of a temporary shelter since there were no available funds to cater for the construction of a larger and permanent structure. The project for the larger shelter was shelved until such time when the Kenya Airports Authority would provide and approve sufficient funds for the project. The investigations further established that the KSh. 4 million was properly accounted for.

No culpability was established either on the part of the Airport Manager or any other officer involved in the project for the alleged misappropriation of public funds.

Investigations established that the aforementioned projects was one of the CDF funded projects for which KSh. 2.5 million was set aside. The investigations further established that due procurement procedures were followed in identifying the contractor and in the award of the contract and the project was completed.

However, before payment was made to the contractor, a report of alleged irregularities was made to the Commission. The Commission was of the opinion that the only pending issue in the matter was the Inspection of the road project and certification of the work done to determine whether it met the tender requirements and ascertain how much money should be paid to the contractor thereof. No culpability was established in regard to any of the officials involved in the said road project.

The Chinese national was also charged with contravention of the immigration laws. Investigations further established that after the said national was charged, it was alleged that the immigration officers involved in the case had solicited for a benefit, and the case against the Chinese national was withdrawn.

The investigations did not reveal any evidence of bribery or abuse of office against the Immigration Department officers to warrant their prosecution. However, the investigations revealed that there were several challenges in the implementation of the Citizens and Foreign Nationals Management Service Act; and specifically with regard to the issuance of work permits to foreigners.

A Report was compiled and forwarded to the Director of Public Prosecutions on 16th January, 2015 recommending closure of the file due to insufficient evidence to prove the allegations made. Investigations revealed that the NEMA County Director of Environment declined to issue an operation licence to some companies operating plants in Mombasa. The complainant alleged that even after meeting the conditions given by NEMA in order for the permit to be issued, no permit was issued and instead the County Director solicited from him a benefit of KSh. 2,000,000 which he was to give to the Director General NEMA.

However, owing to the lapse of time from the time of the alleged solicitation in August, 2013 and December, 2013 when the complaint was made, the Commission was not able to ascertain the veracity of the complaint of solicitation.

The evidence obtained however raised internal issues regarding inspections and issuance of permits issues which needed to be addressed internally by NEMA.

The investigations established that the subject parcel was initially un-alienated government land which was alienated twice to different individuals. The first alienation was done in 1998, registration done and certificate of lease issued in the names of individuals. A second alienation was done over the same parcel and registration done in 2002 to trustees of a political organisation. A dispute over ownership arose which ended up in the High Court of Eldoret but before it was determined, the concerned parties agreed to settle the matter out of court. They agreed to sell the property and share the proceeds.

Investigations revealed the land in question though originally public land was available for alienation and thus the allocation done. It however appears that two allotments were made in respect of the same land giving rise to the dispute. The investigations did not establish that the land in question was irregularly/unlawfully acquired to warrant any action against the persons concerned.

On 6th May, 2015, the DPP accepted the recommendation for closure.

THE ENVIRONMENTAL MANAGEMENT AND CO-ORDINATION ACT

(No. 8 of 1999)

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY

NOTICE TO THE PUBLIC TO SUBMIT COMMENTS ON AN ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED SUGARCANE PLANTATION AND PROCESSING MILL FOR DOMINION FARMS LIMITED IN THE FLOOD PLAIN OF RIVER YALA IN SIAYA AND BONDO SUB- COUNTIES, SIAYA COUNTY

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The proponent (Dominion Farms Limited) is proposing to establish sugarcane plantation and put up a processing Mill in the 5,000 acres of land owned by the company within the Flood Plain of River Yala Siaya and Bondo Sub-Counties, County. The plantation will depend entirely on rain as a source of water. Therefore, no irrigation is required. The community members will be allowed to cultivate sugarcane in their own farms and sell them to DFL. Technical drawings for the proposed sugarcane processing mill show that it will have the following compartments;

- Sugarcane receiving section or yard
- Processing section having a sugarcane milling; a juice clarification; evaporation and boiling; and curing and cooling sections
- Packaging section
- Storage section with 6 No. silos
- Steam generation section having boilers
- Power generation section with turbine set

An effluent treatment plant will also be constructed for the purpose of managing effluent from sugar processing. This will end up in an artificial wetland that will be established to finalize the process of wastewater purification.

The following are the anticipated impacts and proposed mitigation measures:

<i>Environmental and Social impacts</i>	<i>Mitigation measure</i>
Soil management	<ul style="list-style-type: none"> Avoid cultivating land to a fine tilth. Minimize tillage in preparation of the plant crop and the maintenance of ratoon crops. Practice early fill-in of plant cane to allow soil to consolidate and reduce erosion. Adopt a modified contour system in which rows are planted approximately on the contour, coupled with the use of contour banks and waterways. Avoid sugarcane burning as a harvesting practice to improve total soil carbon stock. Minimizing tillage and use of sugarcane residues as soil cover to minimize soil erosion and improve carbon stock. Carry out soil sampling and testing to determine sugarcane crop nutrition requirements.
Biodiversity loss	<ul style="list-style-type: none"> Leave endemic and/or threatened species untouched and/or resettled within protected biodiversity zones and/or other suitably protected areas. Advice and support to nearby farmers who may suffer from increased wildlife foraging on their fields. Leave some areas uncleared as wildlife

	corridors.		granular products or refillable containers.
Water resource management	<ul style="list-style-type: none"> Consider strategic re-vegetation in sensitive areas where the land had been previously cleared, particularly along river and stream banks. Play an active role in the development and implementation of catchment protection programmes. Adopt biological or other environment-friendly weed control practices. Leave riparian buffer zones around sugarcane plantations with grass vegetation for trapping nutrients and suspended sediments. Minimize environmental impacts from the use of artificial fertilizers by rotating the sugarcane crop with nitrogen fixing crops and non-crop plants like legumes. On-farm drainage works must not drain water into adjacent designated wetlands. 	Hazardous waste management such as oil spills from farm machinery and other chemicals	<ul style="list-style-type: none"> Used chemical containers that require temporary storage prior to disposal should be triple rinsed, punctured and stored out of reach of flood waters. Attend approved chemical-handling accreditation courses and participate in refresher courses. Store chemicals in a well-ventilated, secure and child-proof areas constructed of arc-mesh with impervious bounding. Do not exceed the label rate of the chemical or pesticide. Prior to spraying, notify neighbours who may be affected. Carry out spraying operations under appropriate weather conditions.
	<ul style="list-style-type: none"> Use recommended pesticides, herbicides and other chemicals in the recommended quantities, mixture ratios, application intervals and application time. Consider biological control of pests and an Integrated Pest Management (IPM) system. Retain harvest residues from green cane harvesting as mulch and thus help reduce the number of weeds during the early establishment phase of ratoon crops. 		<ul style="list-style-type: none"> Demarcate the project area to be affected by the construction works to avoid spill-over effects. Re-establish vegetation through implementation of a well-designed landscaping programme. Provide inter-connected open drains as a measure to control movement of surface run-off. Consider using porous pavements and/or spaced slabs on pavements to facilitate infiltration. Install gutters to harvest rainwater from the roof of the buildings and water tanks to store the harvested water and thus reduce surface run-off.
	<ul style="list-style-type: none"> Adopt green cane harvesting and trash blanketing. Make every effort to retain, incorporate or otherwise dispose of tops by using as animal feeds rather than burning them. In case burning must be used for harvesting, it must be in accordance with the established permit system. 		<ul style="list-style-type: none"> Keep all generators and noisy equipment in sound-proof rooms or in enclosures to minimize ambient noise levels. Avoid hooting of vehicles at the site and when passing through sensitive areas such as churches, schools and hospital.
Weed, pest and disease control		Removal of vegetation, excavation and compaction and ground surface sealing	
Fire management	<ul style="list-style-type: none"> Adopt green cane harvesting and trash blanketing. Make every effort to retain, incorporate or otherwise dispose of tops by using as animal feeds rather than burning them. In case burning must be used for harvesting, it must be in accordance with the established permit system. 	Noise and vibration	<ul style="list-style-type: none"> Construct a septic tank and a soak pit at the site and install in-house flush toilets, bathrooms and sinks. Regularly check all drainage pipes to fix leakages, remove blockages and prevent back-flooding. Construct an effluent treatment plant for the sugarcane processing effluent and carry out laboratory analysis of effluent before it is released into the receiving environment to ensure that the standards according to EMCA, 1999 are not exceeded.
	<ul style="list-style-type: none"> Calibrate the fertilizer applicator if available each time you change the product you are applying. Where feasible, apply fertilizer below ground, either stool split or directly beside the sugarcane stool. Use bio-solids treated sewage and effluent sludge as a source of nitrogen and organic matter. Conduct soil tests and make record each time you apply chemicals. Read and follow Material Safety Data Sheet in application of any agro-chemical. 	Effluent, sewerage and wastewater and sanitary conveniences	
Agro-chemical usage		Solid wastes including excavated soil mill process wastes	<ul style="list-style-type: none"> Use excavated soil in filling of site and pot holes on access roads. Install dustbins for temporary holding of solid wastes. Separate solid wastes at the source into recyclable and non-recyclable. Regularly collect and dispose wastes to avoid accumulation. Use filter mud as manure. Bagasse will be used as fuel for the boiler to produce steam for electricity production. Give out bagasse to other companies that find it useful for making briquettes and plywood.
Farm waste management	<ul style="list-style-type: none"> Do not use creeks as a dumping ground for farm rubbish, empty containers, obsolete equipment or as a wash-down area for machinery and equipment. Remove the lids, triple rinse and puncture all used chemical containers and deliver to recycling or agents or specified council landfills. Adopt commercial recycling options to remove tyres, batteries, scrap metal, waste oil and any other recyclable wastes from farms. Where possible, purchase chemicals in a form that will reduce container waste or facilitate container recycling such as 	De-gradation of air quality	<ul style="list-style-type: none"> Properly maintain internal access roads to reduce fugitive dust.

- Regularly service vehicles and machines to ensure that they are in good conditions and that they do not produce harmful exhausts.
- Suppress dust by water spraying before sweeping and on dusty grounds.
- Dispose waste regularly and appropriately to avoid wastes decomposing at collection areas.
- Install multi-cyclones, wet collectors, bag filters and electrostatic precipitators to reduce particulate matter in boilers emissions.
- Install air heaters and economizers in the boiler and lag it to retain heat and thus prevent release of hot air that is associated with harmful gases such as sulphur dioxide (SO₂).

The Proponent (Krystalline Salt Limited) is proposing to outsource Biomass for fuel supply to be used at Krystalline Salt Limited, at Gongoni, Magarini Sub-County Kilifi County.

The proposed project is designed to engage the local community farmers within Magarini Sub-County to plant *Casuarina equisetifolia*, *Azadirachta indica* and *cacia siamea* in their farms that they will later sell exclusively to Krystalline Salt Limited Gongoni as wood biomass under agreed terms between the farmers and Krystalline Salt Limited. The project also involves Krystalline Salt Limited supporting local community members who will be involved in the project to boost fruit trees within their farms by planting *Mangifera indica* (Mango fruit tree), *Cocos nucifera* (Coconut tree) and *Anacardium occidentale* (cashewnut) as an incentives.

The following are the anticipated impacts and their proposed mitigation measures

Environmental and Social Mitigation measure impacts

- | | |
|----------------------------------|---|
| Food insecurity | <ul style="list-style-type: none"> • Ensure that any land owned by the participating farmers in the out grower program that is used for food crop farming as at the time of commencement of the proposed project should remain under food production. • Participating farmers should maximize on the available opportunities within the out grower programme of boosting fruit trees crops by planting as many fruit trees seedling as possible as will be provided by the programme. • There should be no ferrying and or replacement of any fruit trees for biomass trees at all. • Participating farmers should be advised to ensure that they continually improve on the acreage of land for crop production. • Part of the proceeds (money) that will be received from the project (once the biomass is harvested) should be ploughed back into crop production including buying food staffs. |
| Reduced community livelihoods | <ul style="list-style-type: none"> • Phased payments (before harvest of the trees is done) to the participating farmers should be done to ensure that the farmers are able to meet their financial obligation while they await tree crop to mature. • Participating farmers in the out grower programme to be encouraged to form a cooperative through which they can safe part of their earnings to increase their ability to borrow more and invest in other areas to improve their livelihoods. • Krystalline salt limited to explore possibility of organising avoidable financings for participating farmers for them to meet their financial obligations. |
| Depletion of soil nutrients | <ul style="list-style-type: none"> • Ensure species of trees to be grown are capable of fixing atmospheric nitrogen back into the soil, this will contribute in improve local soil fertility. • Application of appropriate fertilizers and mulching to be undertaken under the direction and advice of a qualified Forest Extension Officer. • Krystalline salt limited to organise for appropriate extension services from qualified Foresters to the participating farmers through which they can learn on how to maintain soil fertility as they plant the trees. |
| Pets and dieses | <ul style="list-style-type: none"> • Application of appropriate pesticides and fungicides to be done under the direction and guidance of a Forest Entomologist and pathologist Officer. • Appropriate tree silvcutural practices to be undertaken to deal with infected parts of trees. |
| Negation of carbon sequestration | <ul style="list-style-type: none"> • Practice rotational harvesting of mature stand of trees in an area to minimise clear felling that will drastically reduce local carbon sink. • Juvenile trees in a stand due for harvest can be left to mature as mature trees are harvested. • Ensure that replanting of harvested areas is carried out within a short duration. |
