## MARSABIT FOREST ECOSYSTEM MANAGEMENT PLAN, 2015–2025

IN EXERCISE of the powers conferred by section 44 (3) of the Wildlife Conservation and Management Act, 2013, the Cabinet Secretary for Environment, Natural Resources and Regional Development Authorities gazettes the Plan in the Schedule hereto.

## SCHEDULE

## MARSABIT FOREST ECOSYSTEM MANAGEMENT PLAN, 2015–2025

The Marsabit Forest Ecosystem Management Plan (hereinafter referred to as "the Plan") defines the principles and strategies that Marsabit forest stakeholders have designed to address forest and wildlife conservation, tourism development, and community livelihood issues in the Marsabit Forest Ecosystem. The Ecosystem covers two protected areas; the Marsabit National Reserve and the Marsabit Forest Reserve and adjacent community land within ten kilometres from the Marsabit National Reserve boundary.

The Plan emphasises that all the developments within the Marsabit Forest Ecosystem shall be in accordance with the Plan. The Plan is a dynamic document that shall be subject to periodic reviews, depending on emerging issues and new knowledge.

The success of this Plan hinges on stakeholders’ commitment to follow through with implementation of activities outlined in this Plan. Therefore, to facilitate Plan implementation, Marsabit Forest Ecosystem Management Plan Implementation Committee (hereinafter referred to as “the Committee”) shall be formed to co-ordinate and oversee the implementation of the Plan. The committee shall be an advisory body comprising representatives from Kenya Forest Service, Kenya Wildlife Service, County Government of Marsabit and other Government and non-governmental agencies co-opted by these three organizations. The committee shall meet regularly to review progress in Plan implementation and make adjustments needed to enhance achievement of Marsabit Forest Ecosystem’s management objectives. The committee will be chaired jointly by the Kenya Wildlife Service senior warden, Marsabit and the Kenya Forest Service Marsabit Ecosystem conservator. Progress in Plan implementation will be communicated with other relevant stakeholders with enough frequency to ensure that the Plan remains a living document.

The committee shall perform the following functions—

- (a) co-ordinate the implementation of the Plan;
- (b) mobilize resources for Plan implementation;
- (c) monitor and evaluate the progress of activities;
- (d) identify constraints in Plan implementation;
- (e) produce annual progress reports on Plan implementation; and
- (f) recommend review of the management Plan.

The Plan addresses threats to Marsabit Forest Ecosystem's conservation values through the following major policy and management intervention measures—

- (a) a moratorium on consumptive use of natural resources in the Marsabit Forest Reserve and Marsabit National Reserve shall be maintained during the ten year Plan duration;
- (b) the zoning scheme outlined in the Plan shall be implemented; and
- (c) five management programmes shall be implemented to achieve the Marsabit Forest Ecosystem management objectives.

The Plan's zoning scheme and management programmes are outlined in the following sections—

#### 1. ZONATION SCHEME

The Marsabit Forest Ecosystem's zonation scheme seeks to support both the decentralised management of the ecosystem as well as the regulation and promotion of allowable land uses across the area.

To achieve this, the Marsabit Forest Ecosystem has been divided into three land use zones and three management sectors. Each of the three management sectors will be managed from a sector headquarters, which will be delegated management authority over the sector concerned. Each land use zone will focus on providing a different type of tourism experience based on the unique tourism resources in each zone. Further, to enhance forest protection the Marsabit Forest Reserve is divided into five patrol sectors.

#### 2. MANAGEMENT PROGRAMMES

The Plan has five management programmes (Ecological Management Programme, Forest Resource Management Programme, Tourism Development and Management Programme, Community Partnership and Conservation Education Programme, and Protected Area Operations and Security Management Programme). Each management programme contains management objectives that set out the future desired state that the Plan implementers aim to achieve, and a set of specific management actions to achieve these objectives. In addition, to facilitate Plan implementation, each management programme has a three year Activity Plan, which breaks down the individual management actions into day-to-day management activities.

##### 2.1 ECOLOGICAL MANAGEMENT PROGRAMME

The Plan seeks to abate threats to the Marsabit Forest Ecosystem habitats and maintain all biological connections. It also aims at ensuring that water availability for wildlife, livestock and the community is improved, conservation of Marsabit Forest Ecosystem threatened large mammal species is enhanced, ecological monitoring and research information dissemination is strengthened, and climate change mitigation and adaptation measures are enhanced. This shall be achieved through implementation of the following actions—

- (q) monitor large carnivores; and
- (r) conduct research on carnivore-local community interactions.

In addition, the plan recognizes that ecological monitoring and research information dissemination should be strengthened. To gain support and participation from the community, climate change mitigation and adaptation measures should be enhanced. To achieve this, the following actions shall be implemented—

- (a) carry out bio-diversity assessments in the Marsabit Forest Ecosystem protected areas;

The proponent, Tanathi Water Services Board has proposed phase II of the Kiambere Mwingi Water supply and Sanitation Project which has two main components; (a) water component which entails the rehabilitation and augmentation of the Kiambere Mwingi Water Supply and (b) the sanitation component will encompass the construction of sewerage system and waste water management plant in Mwingi Town. The project will support the construction of two sites. The first one is the construction of a sewerage system and a subsequent waste water treatment plant located in Tyaa (Site A) and the other one in Kivou (Site B). Both sewerage plants are expected to be capable of handling a capacity of 2,500m<sup>3</sup>/day. The capacity for Kivou Site will be of 1,000m<sup>3</sup>/day and the site at Tyaa will be of 1500m<sup>3</sup>/day.
