The following are the anticipated impacts and proposed mitigation measures:

<i>Impacts</i>	<i>Proposed Mitigation Measures</i>
Vegetation clearance	<ul style="list-style-type: none"> Re-plant vegetation as much as practically possible once work is done. Limit vegetation clearance unless unavoidable.
Air quality	<ul style="list-style-type: none"> Maintain construction equipment at operational conditions. Carry out earth moving under dump conditions as much as possible. Piled materials should be maintained dump to prevent emission of dust. Notify the immediate neighbours on potential odours during excavations. Sprinkle water regularly at the construction site to suppress dust. Provide workers with PPEs.
Noise and excessive vibrations	<ul style="list-style-type: none"> Clearly label the high noise areas. Provide workers with PPEs such as ear muffs. Equipment should be fitted with standard noise attenuation features. Inform local residents when construction activities are likely to generate excessive noise. Sensitize truck drivers to avoid hooting especially when passing through sensitive areas such as hospitals, churches and residential areas.
Drainage and hydrology disruption	<ul style="list-style-type: none"> Excavated channels to follow contours to avoid interference with surface drains. Drains along the construction line should be directed towards existing drainage system. Level excavated ground where necessary and cover water and sewer lines laid in the ground. Ensure compliance with environmental laws.
Interruption of existing facilities	<ul style="list-style-type: none"> Formal request for permission to cross, break in and lay the pipelines should be sought from affected property owners. Develop a work plan with clear responsibilities for each part. Work in collaboration with the local community to ensure replacement of disrupted community water pipes that will be affected.

The plant will comprise of three main components: wastewater collection network, pumped waste water reticulation network, waste water treatment plant and recycled water distribution network.

The following are the anticipated impacts and proposed mitigation measures:

<i>Impacts</i>	<i>Proposed Mitigation Measures</i>
Storm-water, runoff and soil erosion	<ul style="list-style-type: none"> • Surface runoff and roof water shall be harvested and stored in underground reservoir for reuse. • A storm water management plan that minimizes impervious area infiltration by use of recharge areas and use of detention and/or retention with graduated outlet control structure will be designed.

- Ensure taps are not running when not in use.
- Install a discharge meter at water outlets to determine and monitor total water usage.
- Proper recycling of water from other uses for sprinkling dusty pavements.

Increased energy consumption
