(No. 8 of 1999)

THE NATIONAL ENVIRONMENT MANAGEMENT
AUTHORITY

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT
FOR THE PROPOSED 50 MW WIND POWER PLANT LOCATED
IN NGONG SUB-COUNTY, N. KEEKONYOIKE LOCATION,
OLOOSHOIBOR SUB-LOCATION OF KAJIADO COUNTY

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The proponent, New wind Energy Limited, is proposing to construct wind power plant with a nameplate capacity of 50MW that will comprise of 32 turbines of 1.6 MW nameplate capacity each to maximize the very high wind speed prevalent in the project area. The plant will be located in Oolesayeti area of Kajiado County.

The following are the anticipated impacts and proposed mitigation measures:

<i>Impacts</i>	<i>Proposed Mitigation Measures</i>
Loss of habitat and biodiversity	<ul style="list-style-type: none"> Discourage any wanton destruction of vegetation and habitats beyond the designed project works. Restore lost biodiversity on the disturbed area through planting of appropriate trees and shrubs and protection of fauna species and their habitat.
Soil erosion and siltation	<ul style="list-style-type: none"> Where applicable install silt traps to reduce sediment load directly entering riverine environments. Carry out terracing and landscaping of the disturbed sites as appropriate; Plant sediment binding grasses, shrubs and trees on the exposed slopes and other surfaces as appropriate.
Increased ponding conditions	<ul style="list-style-type: none"> Improve impeded drainage through landscaping and filling in the created depressions.
Visual intrusion	<ul style="list-style-type: none"> Rehabilitate all degraded areas through landscaping and subsequent planting of suitable grass, shrubs and trees to blend with the environment.
Generation of wastes	<ul style="list-style-type: none"> Use suitable human waste disposal systems including a combination of septic tanks, solar and pit latrines as found appropriate. Segregate solid wastes and arrange for subsequent disposal. Adherence to Waste Management Regulations, 2006.
Increase in noise levels	<ul style="list-style-type: none"> Use of protective hearing devices such as ear plugs and ear muffs among workers when noise levels exceed 85-90 dB. Selection of appropriate machinery and regular servicing of machinery and vehicles. Adherence to Noise And Excessive Vibration Pollution (Control) Regulations, 2009.
Increase in noise levels and gaseous emissions	<ul style="list-style-type: none"> Limit levels of dust through good practice such as watering of access routes, construction sites, deviations and other disturbed sites and cover lorries transporting construction materials. Provide workers with appropriate dust protective gear including masks and overalls. Reduce gaseous emissions by selection of appropriate machinery and regular servicing of vehicles. Provide workers with appropriate protective gear including masks to cut down on gaseous emissions inhaled. Adherence to Air Quality Regulations, 2014.
Reduction of socio-cultural impacts	<ul style="list-style-type: none"> Raise awareness among the local community on potential impacts of interacting with the labor force.
Increased incidences of diseases	<ul style="list-style-type: none"> Raise awareness and support mechanisms to prevent and control spread of diseases among the project workers and local communities.
Health and Safety	<ul style="list-style-type: none"> Design and implement safety measures and emergency plans to contain accidents risks. Provide workers with protective clothing (nose and mouth masks, ear muffs,

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED WASTE TAILINGS LAB, PRECIOUS METAL RECOVERY, WASTE TREATMENT AND RECYCLING PLANT IN NYAMARANGA VILLAGE OF SUNA WEST DISTRICT, MIGORI COUNTY

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The proponent, Environmental Analytical Services Limited, is proposing to construct a waste tailing treatment and incineration plant, precious metal recovery laboratory and a recycling plant of tailing waste to manufacture bricks and cabros for sale. Waste will be transported using trucks, weighed and deposited for pretreatment in designated areas before final disposal/recycling as appropriate either in landfills or incineration or any other method appropriate depending on the nature of waste being handled. At the material recovery station, there will be sorting of waste, waste blending and storage. Contaminated soil management area will be provided together with evaporation pit, precious/trace metal recovery plant, incineration plant, ash management area and finally brick plant. The site will also have a fuel station, office block, laboratory, clinic and a cafeteria. The facility will be on a 7.7 acre piece of land of L.R. No. SunaWest/Wasimbete/1885 at Buhembu Suna West in Migori County.

The following are the anticipated impacts and proposed mitigation measures:

<i>Impacts</i>	<i>Proposed Mitigation Measures</i>
Vegetation cover	<ul style="list-style-type: none"> Introduction of vegetation (trees, shrubs and grass) on open spaces within and around the site. Indigenous species would be preferred.
Environmental pollution	<ul style="list-style-type: none"> Ensure contractor undertaking on environmental considerations. Monitor trends on health and safety of construction workers and neighborhood. Equipment specifications to conform with environmental standards. Integrate environmental components in the site design (waste management, emission controls, etc.).

	<ul style="list-style-type: none"> Enhance in-house awareness and sensitization on environmental protection initiatives. Contractor to maintain material balance records at all times.
Air quality	<ul style="list-style-type: none"> Dry materials shall be kept dump or covered at all time. Install gadgets to intercept the particulate matter as well as controlling gaseous emissions. Strict adherence to Air Quality Regulations, 2014.
Waste management	<ul style="list-style-type: none"> Disposal of waste be done in accordance to waste regulations. Contractor to undertake safe waste disposal. Verify legality of waste disposal destination. Maintain isolation of surface storm water drains from those carrying oil/grease residuals. In-house training on waste management options for managers and supervisors. Provide leadership in waste recycling and re-use. Strict adherence to Waste Management Regulations, 2006.
Noise	<ul style="list-style-type: none"> Initiate a noise mapping programme and keep monitoring. Undertake a annual hearing survey of all the workers. Train, provide ear muffs/corks and enforce application.
Social aspects	<ul style="list-style-type: none"> Draw of-site contracts to enhance socially acceptable procedures. Involve more independent interested parties (waste collectors) in establishing options for collection and management. Address concerns of neighboring land users as per this report. Integrate public safety in the construction process. Utilize local labor for construction for enhance social harmony.
Occupational health and safety	<ul style="list-style-type: none"> Constitute health and safety committee. Maintain safety reticulation (e.g. fire detection and fighting equipment). Train on HS issues and provide PPEs and enforce applications. Engage a qualified staff to oversee environment, health and safety. Document in-house guidelines and procedures on environmental management. Comply with the provisions of OSHA 2007.

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED BOSTO DAM PROJECT ALONG KIPSONOI RIVER WITHIN THE SOUTH-WEST MAU FOREST RESERVE IN BOMET COUNTY

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The proponent, National Water Conservation and Pipeline Corporation, is proposing to develop Bosto Dam Project located along Kipsonoi River within the South West Mau Forest Reserve in Bomet County. The project will target to supply water to parts of Bomet County, and will serve a population of 603,182 in an estimated area of 1052km² including key urban centres such as Bomet, Sotik, Silibwet and Kapkatet. The supply will also cover the rural areas in Konoin, Bomet Central, Sotik and Chepalungu constituencies. The project is to be designed for a 20 years supply period (as recommended by Manual for Water Supply Systems in Kenya, 2005) with the initial year as 2020 in order to allow for four-year implementation period. The design horizon will be the year 2040. The estimated total water demand for the proposed supply area is 80,238 m³ /day while the design water demand is estimated as 80,238m³.

The following are the anticipated impacts and proposed mitigation measures:

Impacts	Proposed Mitigation Measures
Slope stabilization and soil protection	<ul style="list-style-type: none"> All excavation works must be properly backfilled and compacted. Rip compacted areas to reduce runoff and improve re-vegetation where required. The subgrade excavation and filling of side slope should be protected to control the water erosion caused by the excavation.
Biodiversity protection	<ul style="list-style-type: none"> Avoid fragmentation or destruction of critical terrestrial and aquatic habitats. Minimize unnecessary clearing of riparian vegetation along Kipsonoi River during construction. Ensure proper demarcation and delineation of the project area to be affected by construction works. Avoid construction worker's camps within protected areas. Design and implement an appropriate landscaping programme to help in re-vegetation of affected project areas after construction. Construction activities should only be restricted to the designated corridor in sensitive biodiversity sites in the Mau Forest Reserve. Areas from which vegetation is to be removed are to be delineated prior to removal and vegetation is only to be removed from these areas. KWS rangers should be engaged by the contractor on full time basis in order to ensure comprehensive wildlife security during the construction works in the South West Mau Forest Reserve. All construction works will be done during the day only and should stop at 6.00 p.m.

	<ul style="list-style-type: none"> • Early replanting and regular watering of the disturbed areas with local native vegetation should be undertaken to ensure speedy recovery of the cleared vegetation. 	Noise and vibrations	<ul style="list-style-type: none"> • All generators and heavy-duty equipment are to be insulated and /or placed within buildings to minimize the ambient noise levels.
Invasive species control	<ul style="list-style-type: none"> • Screen the construction equipment to avoid the spread of invasive species such as <i>Nicotiana glauca</i> seeds attached to road construction machinery. • Undertake regular monitoring and control of emerging invasive species in collaboration with KFS. 		<ul style="list-style-type: none"> • Loading and offloading of materials must be soft and careful so to reduce noise disturbance at the wildlife. • Strict measures should be undertaken to minimize loud noise in sensitive areas such as hospitals, educational institutions, residential areas, places of worship.
Construction waste	<ul style="list-style-type: none"> • The construction base camp should be provided with bins directing waste into collection bins. • The construction base camp should have appropriate sanitation facilities. • Potential contaminated effluent (by oils and lubricants), should be disposed captured using oil and water and sand filter separators. • Soils contaminated with hydrocarbons should be bio remediated or disposed of as hazardous waste. • Hazardous and general waste should be separated and removed from site for disposal at recognized waste management facilities as approved by the Contractor. • The management of construction solid waste should adopt the integrated solid waste management system through a hierarchy of options: Source reduction, Recycling, Composting and reuse, Combustion and lastly Sanitary land filling. 	Public health	<ul style="list-style-type: none"> • Adherence to Noise and Excessive Vibration Pollution (Control) Regulations, 2009. • Continuation of awareness programme on risks associated with STIs and HIV/AIDS will be undertaken along the project route especially close to the key construction camps and market centres. • Development and implementation of an awareness programme on risks associated with STIs and HIV/AIDS for construction workforce. • The use of preventive measures like condoms by availing condom dispensers to construction staff will be undertaken.
	<ul style="list-style-type: none"> • Adherence to Waste Management Regulations. 	Interruption of public utilities	<ul style="list-style-type: none"> • To ensure public awareness of traffic interruptions during the installation of water pipelines in the service area. • Raise awareness and request for public understanding and patience through the local administration and religious institutions.
Spillages of hazardous chemicals	<ul style="list-style-type: none"> • All hazardous chemicals including hydrocarbons such as fuel, oils and greases should be contained in bunded areas with sufficient capacity to contain the quantity stored in the bunded area. • Hazardous chemicals including hydrocarbons are to be handled over impervious surfaces. • Proper storage of liquids on site, such as oil, diesel and solvents should be ensured as well as containment of accidental oil spill. • Proper maintenance of construction vehicles and equipment should be undertaken. 	Loss of private properties	<ul style="list-style-type: none"> • To ensure reduction in loss of private properties. • Laying of pipeline should be done after removal of seasonal crops to minimize loss of crops. • Farmers should be given the pipeline laying schedule in time to allow them to harvest their crops. • Compensation should be done in case of loss of land.
Sewage and effluent	<ul style="list-style-type: none"> • Portable chemical toilets should be provided at dam site along Kipsonoi River. The portable toilets are to be cleaned on a regular basis. 	Occupational health and safety	<ul style="list-style-type: none"> • Management must ensure that First Aid Kits are provided in strategic locations in all the construction sites and base camps. • All vehicles and construction equipment should be under control of competent personnel. • Adequate equipment for emergency response should be provided at the construction base camps to deal with emergencies.
Sedimentation of the Kipsonoi River	<ul style="list-style-type: none"> • Storm water diversion berms should be installed in place up gradient of areas from which vegetation has been removed. 		<ul style="list-style-type: none"> • Employees will be informed on the necessary safety procedures and be competent in the work they are employed to do.
Air quality and dust	<ul style="list-style-type: none"> • Regular surface wetting should be implemented on sensitive construction sites especially the Bosto Hill areas which has several sensitive institutions including a dispensary to minimize entrainment of dust. • Strict on-site speed controls are to be enforced. • Strict adherence to Air Quality Regulations, 2014. 		<ul style="list-style-type: none"> • All necessary safety regulations must be abided by including building codes and fire practice requirements. • The construction company shall establish an emergency leading group, accident scene command group, an accident treatment group, a guard and defend group, a medical aid group, an environmental monitoring group, a logistics group, an accident investigation team. • The use of explosives for each segment shall be strictly controlled and

reasonable detonating sequence shall be followed to ensure safety.

- Comply with the provisions of OSHA 2007.

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED MYANGA-BUSIA-RANG'ALA-BONDO-NDIGWA HIGH VOLTAGE TRANSMISSION LINE PROJECT

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The proponent, Kenya Electricity Transmission Company, is proposing the construction of a 132kV double circuit transmission line from Myanga to Ndigwa, through Busia, Rang'ala and Bondo

Detailed scope of work for the project is as follows:

1. Transmission Line

- (a) 132kV Myanga – Busia – Rang'ala – Bondo – Ndigwa Overhead Power Line (123 k.m).
- (b) 132kV Tororo/Musanga Tee to the proposed 132kV Substation at Myanga (1 km).

2. Substations

- (a) 132kV Switching station at Myanga.
- (b) 2x23 MVA 132/33kV Substation at Busia.
- (c) Bay Extension of 132kV Rang'ala Substation.
- (d) 1x23 MVA 132/33kV Substation at Bondo.
- (e) 1x23 MVA 132/33kV Substation at Ndigwa.

The following are the anticipated impacts and proposed mitigation measures:

<i>Impacts</i>	<i>Proposed Mitigation Measures</i>
Dust emission	<ul style="list-style-type: none"> • Ensure strict enforcement of on-site speed limit regulations. • Avoid excavation works in extremely dry weather. • Sprinkle water on graded access routes when necessary to reduce dust generation by construction and vehicles. • Stockpiles of earth should be enclosed / covered / watered during dry or windy

conditions to reduce dust emissions.

Exhaust emission

- PPE to be provided to employees and ensure proper and constant use.
- Sensitise truck drivers and machine operators to switch off engines when not in use.
- Regular servicing of engines and machine parts to reduce exhaust emission generation.

Oil spills hazards

- Alternative non-fuel construction equipment shall be used where feasible.
- Install oil trapping equipment in areas where there is a likelihood of oil spillage e.g. during maintenance of vehicles.
- In case of an oil spill, immediate clean up measures will be instituted.
- Storage and liquid impoundment areas for fuels, raw and in-process material solvents, wastes and finished products should be designed with secondary containment to prevent spills and the contamination of soil, ground and surface water.
- A written substations response plan should be prepared and retained on the site and the workers should be trained to follow specific procedures in the event of a spill.
- Collected used oils should be re-used, disposed of appropriately by licenced waste handlers, or be sold for reuse to licenced firms.

Noise pollution and vibration

- Sensitise construction vehicle drivers and machinery operators to switch off engines of vehicles or machinery not being used.
- Sensitise construction drivers to avoid running of vehicle engines or hooting.
- Regular servicing of engines and machine parts to reduce noise generation.
- Ensure that all generators and heavy duty equipment are insulated or placed in enclosures (containers) to minimize ambient noise levels.
- Trees to be planted around the site to provide some buffer against noise propagation.
- The noisy construction works will entirely be planned to be during day time when most of the neighbours will be at work.
- Provide necessary PPE to workers who may be exposed to high levels of noise and ensure proper and constant use.
- All construction equipment and machinery to be used must be tested to verify if they are compliant with Kenya and the internationally acceptable standards of noise.

Increased solid waste generation

- Adherence to Noise and Excessive Vibration Pollution (Control) Regulations, 2009 .
- Use of an integrated solid waste management system i.e. the 3 R's: 1. Reduction at source 2. Reuse 3. Recycle.
- Accurate estimation of the dimensions and quantities of materials required.
- Use of durable, long-lasting materials that will not need to be replaced as often, thereby reducing the amount of

	<p>construction waste generated over time.</p> <ul style="list-style-type: none"> • Provide facilities for proper handling and storage of construction materials to reduce the amount of waste caused by damage. • Use building materials that have minimal or no packaging to avoid the generation of excessive packaging waste. • Reuse packaging materials such as cartons, cement bags, empty metal and plastic containers to reduce waste at site. • Waste collection bins to be provided at designated points on site. • Dispose waste more responsibly by contracting a registered waste handler who will dispose the waste at designated sites or landfills only and in accordance with the existing laws. • Strict adherence to Waste Management Regulations, 2006. 	
Destruction of existing vegetation and habitat	<ul style="list-style-type: none"> • Conduct selective clearing of vegetation on the way-leave corridor. Avoid unnecessary vegetation clearing; only tall trees that pose a danger to the transmission line and vegetation on the foot plinth of the tower to be removed. • Ensure proper demarcation and delineation of the project area to be affected by construction works. • Specify locations for trailers and equipment, and areas of the site which should be kept free of traffic, equipment, and storage. • Designate access routes and parking within the site. • With ssistant from community, KWS and KFS, initiate a tree planting exercise. • Design and implement an appropriate landscaping programme for the substations site. • Support community initiatives in tree planting. 	<ul style="list-style-type: none"> • Observe applicable Game Reserve regulations. • Bush clearing to be selective. Only tall trees on the wayleave corridor or vegetation on the footprints of the towers to be removed. • Consult the local KWS officer and conservancy owners for advice on construction timings to avoid disturbing wildlife. • Extensive public consultation during project planning. • Structures at the site should be designed in such a way that they will improve the beauty of the surroundings. • Restore site area through backfilling, landscaping and planting of trees, shrubs and grass on the open spaces to re-introduce visual barriers. • Design and implement an appropriate landscaping programme.
Soil erosion and storm-water runoff	<ul style="list-style-type: none"> • Surface runoff and roof water shall be harvested and stored in tanks so that it can be used for cleaning purposes. • A storm water management plan that minimizes impervious area infiltration by use of recharge areas and use of detention and/or retention with graduated outlet control structure will be designed. • Apply soil erosion control measures such as levelling of the project site to reduce run-off velocity and increase infiltration of storm water into the soil. • Ensure that construction vehicles are restricted to use existing graded roads. • Ensure that any compacted areas are ripped to reduce run-off. • Roof catchments will be used to collect the storm water for some substations uses. • Construction of water pans to collect storm water for substations use, tree planting and landscaping. 	<ul style="list-style-type: none"> • Upon discovery of a heritage site or an Archaeological find, the construction site will be stopped, the site if possible will be restricted using tapes or local materials, and relevant authorities including local administration officers and the museums of Kenya informed for further instructions. • Conduct a detailed and elaborate RAP. • Conduct consultation meetings with Project Affected Persons. • Ensure timely compensation for loss of property and land use. • Ensure adherence to country legal legislations and World Bank Safeguard Policy 4.12 on Involuntary Resettlement.
Disturbance on wildlife	<ul style="list-style-type: none"> • Ensure no worker engage in acts of poaching. • Restrict construction to day time. 	<ul style="list-style-type: none"> • Ensure strict compliance with the Occupational Safety and Health Act (OSHA) 2007. • Prohibit access by unauthorized personnel into the construction site. • Train all employees and regularly sensitize them on safe working procedures. • Periodic community sensitization of the dangers posed by the project. • Place warning signs where necessary. • Provide necessary PPEs to workers. • Erect a perimeter fence to enclose the substations. • Adherence to provisions of Occupational Health and Safety Act, 2007.

**IMPORTANT NOTICE TO SUBSCRIBERS TO
THE KENYA GAZETTE**

THE following notes are for the guidance of persons submitting "copy" for inclusion in the *Kenya Gazette, Supplement*, etc.:

- (1) *The Kenya Gazette* contains Notices of a general nature which do not affect legislation. They are, therefore, submitted to the Government Printer directly.
- (2) *Legislative Supplement* contains Rules and Regulations which are issued by the Central Government. Because of this, they must be submitted to the Government Printer through the office of the Attorney-General.
- (3) *Bill Supplement* contains Bills which are for introduction in the National Assembly.
- (4) *Act Supplement* contains Acts passed by the National Assembly.

All "copy" submitted for publication should be prepared on one side of an A4 sheet no matter how small the Notice is, each page being numbered and should be typewritten with double spacing. Copy should be clear, legible and contain no alterations.

Particular attention should be paid to the following points:

- (i) Signature must be supported by rubber-stamping or typing the name of the signatory in capital letters.
- (ii) Must be correct and filled in where necessary.
- (iii) Care should be taken to ensure that all headings to Notices and references to legislation are up to date and conform with the Revised Edition. of the Laws of Kenya.

EXTRACT FROM THE CODE OF REGULATIONS, SECTION D—

Kenya Gazette

"D 34. (1) Communications for the *Kenya Gazette* should reach the Government Printer not later than 9 a.m. on Friday of the week before publication is desired. The Government Printer will not publish communications received after that hour until the next subsequent issue of the Gazette.

(2) Ministries will be required to pay for the *Kenya Gazette* and to meet the cost of advertising in it.

It is emphasized that these notes are for guidance only, but it is requested that persons submitting copy for publication first satisfy themselves that such copy is complete in every respect.
