PURSUANT to the provisions of section 40 (1) of the Physical and Land Use Planning Act, 2019, notice is given that the preparation of the above draft plan was on 30th March, 2022, completed.

The 11 plans relates to land situated within the aforesaid town and market centres, and their immediate surroundings within Narok

County. The ten (10) year medium term development plans once completed will—

- (a) facilitate survey of parcels and preparation of title deeds;
- (b) provide through adequate provision of land, a special framework for upgrading infrastructural facilities and services;
- (c) provide framework for settlement upgrading by suggesting appropriate land use densities, development and activity guidelines;
- (d) identifying environmentally fragile areas and suggesting measures to ensure their protection;
- (e) provide a framework to unlock to the real socio-economic potential of these urban centres by suggesting measures to deal with underlying problems and for exploitation of existing opportunities.

Copies of the draft development plans as prepared have been deposited for public inspection at the Office of the County Executive Committee Member, Lands, Housing, Physical Planning and Urban Development (Municipality Office, Narok Town), respective Sub-county Headquarters offices.

The copies so deposited are available for inspection free of charge by all persons interested at the Office of the County Executive Committee Member, Lands, Housing, Physical Planning and Urban Development (Municipality Office, Narok Town), respective Sub-county Headquarters offices, between the hours of 8.00 a.m. and 5.00 p.m., Monday to Friday.

Any interested person who wishes to make any representation in connection with or objection to the above-named development plan may within sixty (60) days send such representations or objections in writing to be received by the County Executive Committee Member, Lands, Housing, Physical Planning and Urban Development, P.O. Box 898–20500, Narok and such representation, or objection, shall state the grounds on which they are made.

NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED LIKONI FLATS ESTATE REDEVELOPMENT ON PLOT NO. MOMBASA/MS/BLOCK 1/1840 SITUATED AT LIKONI, MOMBASA COUNTY

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The proponent, Goldland Rinco Company Limited proposes to redevelop Likoni Flats Estate which involves the relocation of existing tenants, demolition of old housing structures and construction of a new housing units in a project christened likoni heights for outright sale to the general public. A proportion of these housing units will be sold under the affordable housing project championed by the National Government. There will be a total of 1,116 housing units. The breakdown of housing units is as follows; housing units 1,364, community hall 1, playing surfaces, build up area 118,817m² and parking spaces 658.

The development will also revamp social amenities within the redeveloped estate to support the population that will be resident there on plot L.R. No. Mombasa/MS/Block 1/1840 situated at Likoni, Mombasa County.

The following are the anticipated impacts and proposed mitigation measures.

<i>Concerns</i>	<i>Proposed Mitigation Measures</i>	<i>Concerns</i>	<i>Proposed Mitigation Measures</i>
Construction waste	<ul style="list-style-type: none"> Avoid overloading trucks and cover trucks to minimize dust and spillages from trucks during transportation. For aggregate and sand, use water sprays or covered chutes to reduce dust emission during loading and unloading of materials. Contractors to have waste management plans to mitigate potential impacts. 	Occupational health and safety	<ul style="list-style-type: none"> Contractor to register all construction works by the Director, Directorate of Occupational Health and Safety Services (DOHSS) in compliance with the Buildings and Works of Construction Engineering Rules, 1984. Contractor to hire a qualified Health and Safety advisor to conduct training and monitoring of construction works. Contractor should provide adequate first aid facilities onsite. Contractor should train several workers in First Aid depending on the number of workers on site as stipulated in the First Aid Rules 1977 through DOSHS certified First Training institution e.g. Red Cross, St. John Ambulance
Noise and vibration pollution	<ul style="list-style-type: none"> Schedule noisy activities during normal working hours of between 8 a.m. to 5 p.m. The contractor should adhere to the provision in the Environmental Management and Co-ordination (Noise and Excessive Vibration Pollution) (Control) Regulations, 2009. Provide workers with appropriate PPEs when working under noisy environment e.g. ear plugs. 	Traffic impact	<ul style="list-style-type: none"> The timing of the truck arrivals and departures should be largely outside of the vehicular peak periods A traffic marshalling to be developed in unison with contractor during construction; Warning signs to be placed to advise pedestrians and manage their safety when walking across the construction driveways. No machinery or material to be stored on the footpath or verges or on public areas. All materials handling to be done within the site. Provide adequate parking facilities within the housing estate.
Air pollution	<ul style="list-style-type: none"> Practice dust management techniques, including watering spraying to suppress dust. Move earth and sand in covered vehicles/transport to avoid it being blown by wind increasing suspended particulate matter in the atmosphere. Set up dust barriers/screens at strategic locations. Provide and enforce use of Personal Protective Equipment (PPE) for staff. 	Social impacts	<ul style="list-style-type: none"> Implement a robust grievance redress mechanism. Provide a liaison office in the project area to enable community access project benefits. Hording of site to protect general public from construction site related hazards.
Increased water demand	<ul style="list-style-type: none"> Replace or repair leaking pipes supplying water to the construction sites to minimize wastage. Contractor should ensure provision of adequate water storage facilities on the construction site to meet project needs during periods of high demand externally and refill of storage tanks during periods of low demand. Incorporate water harvesting techniques and matched storage. Waste water treatment and reuse in landscaping. Commissioning borehole to supplement water supply. 	Liquid waste generation and management	<ul style="list-style-type: none"> On-site wastewater treatment plant/ bio digester. Regular inspection and maintenance of Waste Water Treatment Units
Pollution / contamination of ground water	<ul style="list-style-type: none"> Appropriate containment structures to be provided to store contaminated water from the construction site. The contractor should ensure this water are properly disposed and not allowed to be drained on site. Concrete batching area should be bounded to prevent contamination of soils and surface water features. All fuel storage to be appropriately bunded and provided with a canopy. Provision of adequate sanitary facilities for construction workers to enable proper disposal of fecal matter and avoid contamination of surface water features which could be a cause of water borne diseases. 	Increased loading on infrastructure services	<ul style="list-style-type: none"> Expand on rainwater harvesting designs. Provision of increased water storage capacity. Provide adequate storm water drainage system. Use of solar energy to supplement electrical demand.
		Insecurity	<ul style="list-style-type: none"> Ensure secure perimeter wall. Estate access points that is manned 24 hours.
		Solid waste generation and management	<ul style="list-style-type: none"> Regular inspection and maintenance of the waste disposal systems during operation phase. Establish a collective waste disposal and management system. Provide waste disposal bins to each house well protected from adverse weather and animals.

<i>Concerns</i>	<i>Proposed Mitigation Measures</i>
	<ul style="list-style-type: none"> Establish a collective waste segregation and holding system at the housing estate. Contract a NEMA licensed waste contactor to remove and dispose solid waste from facility.
Demolition waste	<ul style="list-style-type: none"> Use of an integrated solid waste management system ie through a hierarchy of options: source reduction, recycling, composting and reuse, combustion, sanitary landfilling. All buildings, machinery, equipment, structures and partitions that will not be used for other purposes must be removed and recycled/reused as far as possible. All foundations must be removed and recycled, reused or disposed of at a licenced disposal site. Where recycling/reuse of the machinery, equipment, implements, structures, partitions and other demolition waste is not possible, the materials should be taken to a licenced waste disposal site. Asbestos containing material and electrical and electronic waste must be handled as hazardous waste and handle and disposed in an approved manner. Trees should be planted at suitable locations so as to interrupt slight lines (screen planting), between the adjacent area and the development.

THE ENVIRONMENTAL MANAGEMENT AND CO-ORDINATION ACT

(No. 8 of 1999)

NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED MASHUJAA Q & M PLC LIMESTONE MINES SITE AT CHASIMBA SUB-LOCATION, KILIFI SOUTH SUB-COUNTY IN KILIFI COUNTY

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The proponent, Mashujaa Q & M PLC, proposes to develop a limestone mine site at Chisamba Sub-location, Kilifi South Sub-county

in Kilifi County. The mine site area will comprise of: mineral ore-limestone mining area, ore haulage, mineral ore storage, area, ore loading site, site garage, waste area and parking, administrative site offices, canteen and other related infrastructure. There is no existing houses on the proposed mine site. The topography and geology of the mine area inhabitable for human settlement. The proponent will employ an open pit surface mining method. It will involve removing the overburden, top soil and rock waste to expose the mineral-rich ore. The proponent has a team of competent and experienced directors with vast knowledge in the extractive industry.

The following are the anticipated impacts and proposed mitigation measures:

Environmental Impact Proposed Mitigation Measures

Impacts on land topography	<ul style="list-style-type: none"> Backfill open pits using mine waste and overburden. Revegetate the land with indigenous plant species. Provide measures for long-term run-off and erosion control. Reuse topsoil in landscaping. Provide for a buffer zone between the site, road and human settlements.
Impacts on drainage	<ul style="list-style-type: none"> The dump slope will have a retaining wall and garland drain to arrest the wash off from the dumps. Garland will be connected to the settling tank, and settled water will be transferred to the water reservoir and used for green belt development and dust suppression. No river passing the site area hence no eminent diversion of drainage patterns. Minimize surface runoff by minimizing the area of impervious surfaces. Install oil water separators and grease traps at refueling facilities.
Solid waste generation (mining waste/spoil and other solid waste)	<ul style="list-style-type: none"> It is proposed to store the top-soil in the earmarked site for plantation purpose after separating from the mixed rock boulders and pebbles. The portion of soil and any overburden unsuitable for plantation will be sold out to intending users for construction purposes with permission from county government authorities. Use mining waste for the making of mine roads and allied infrastructures. Dump slope will be provided with retaining wall and garland drain to prevent the wash off. Maintain a stable dump slope angle with horizontal. During the mine development phase, the waste generated will be utilized completely for road construction and levelling of ground area for site structures. Establishing a waste management hierarchy that considers prevention, reduction, reuse, recovery, recycling, removal and finally treating, destroying, and disposing of it in an environmentally sound manner. Contract a licensed waste collection and disposal company. Provide proper sanitary facilities for the workers.

Environmental Impact Proposed Mitigation Measures

	<ul style="list-style-type: none"> • Raise awareness on waste management. • Mining design improvement to minimize waste generations. • Technological improvement to minimize waste generation. • Sorting of waste at source. • Waste disposal as provided for in the Environmental Management and Co-ordination (Waste Management) Regulations, 2006. • Establishing waste management priorities at the outset of activities based on an understanding of potential environmental, health, and safety (EHS) risks and impacts and considering waste generation and its consequences. • Avoiding or minimizing the generated waste materials, as far as practicable. • Establishment of priorities based on a risk analysis that takes into account the potential EHS risks during the waste cycle and the availability of infrastructure to manage the waste in an environmentally sound manner;
Particulate matter (PM)	<ul style="list-style-type: none"> • Water sprinkling on mining site, dumping area and haul road during dry wind periods, using a water tanker. • Comply with Air Quality Regulations (2014) and Public Health Act provisions. • Dust emissions due to vehicles can be minimized by avoiding spillage from the loaded trucks. • Workers to be provided with PPE. • Enforcement of onsite speed limits. • Water sprinkling on the topsoil and overburden dump to minimize wind erosion. • Plant dust catching trees, species to act as efficient biological filters. Greenbelt development reduces the fugitive dust and also checks runoff and enhances the aesthetic beauty of an area. • There is the proposal of a proper green belt along the boundary for the reduction of dust and noise emission from the lease area. • Carry out wet drilling and blasting. • Ensure all trucks and machinery are in good serviceable condition. • Design and maintain safe systems of work and pollution prevention measures. • Minimize dust through strict enforcement of onsite speed controls. • Ventilation at the workplace to be sufficient.
Vehicular emission of particulates SO _x , NO _x , CO, CO ₂	<ul style="list-style-type: none"> • Proper maintenance of vehicles and other oil-operated equipment. Un-roadworthy vehicles not be allowed into the mine area. • Suitable green belt development and mining of limestone.

Environmental Impact Proposed Mitigation Measures

Increased noise pollution	<ul style="list-style-type: none"> • Mining equipment and machinery should be in good serviceable condition. • Development of green belt in the mine site buffer zone, which acts as a barrier for noise reduction. • The Proponent will properly maintain the noise generating pieces of machinery. • Choosing quieter machinery provided with efficient silencers/ noise reduction devices. • Confining noise by isolating the source • The proponent will provide the workers with proper PPEs to minimize the occupational exposures of noise. • Developing and implementing an effective noise control and hearing conservation program. • Posting notices and signs in noisy areas. • Educating all workers on the importance of making correct use of PPE provided to protect them against high noise levels. • Carrying out an audiometric test by a designated medical practitioner to all workers exposed to noise levels above 85dB(A).
Impact on water quality-surface and underground water quality	<ul style="list-style-type: none"> • The mining method to use is Opencast/open pit. There will be no wastewater generated due to the mining activity. The domestic effluents being generated will be discharged to soak pits through bio septic tank. • Mashujaa Q & M will restrict mining activities to the layer above the groundwater table. • Construct garland drains, settling tank and check dam in the mining area • The garland drains will be connected to the settling tank, and after settling, the water will be discharged to the natural drainage. • Convert some of the open pits to rainwater storage tank. • The rainwater stored in the pit will be utilized for plantation and dust suppression. • Run-off water/storm water during rains to be desilted and discharged. • Reclaimed pits will be stabilized with plantation where ever possible, and other areas will be converted to the water reservoir. • Oil water separators and grease traps should be installed and maintained as appropriate at refueling facilities, workshops, parking areas, fuel storage and containment areas. • Treatment to meet national standards for sanitary wastewater discharge. • Ensure regular monitoring of the sewage sanitation system.
Waste water related pollution and	<ul style="list-style-type: none"> • Segregation and pre-treatment of oil and grease containing effluents (e.g. use of a

Environmental Impact Proposed Mitigation Measures

sanitation management	<p>grease trap) before discharge into the environment.</p> <ul style="list-style-type: none"> • Treatment to meet national standards for sanitary wastewater discharges. • Sewage from the office blocks to be discharged to either a bio septic system or where the land is used as part of the treatment system, treatment to meet Environmental Management and Coordination (Water Quality) Regulations, 2006, standards for sanitary wastewater discharges.
Storm water-surface water management	<ul style="list-style-type: none"> • The Proponent will separate stormwater from sanitary wastewater and wastewater streams to reduce the volume of wastewater to be treated before discharge. • The proponent will prevent surface runoff from mine machine areas or potential sources of contamination. • Where this approach is not practical, runoff from storage areas should be segregated from potentially less contaminated runoff. • Sludge from stormwater catchments or collection and treatment systems may contain elevated levels of pollutants and should be disposed of in compliance with the Environmental Management and Co-ordination (Water Quality) Regulations, 2006. • Runoff from areas without potential sources of contamination should be minimized (e.g. by minimizing the area of impervious surfaces), and the peak discharge rate should be reduced (e.g. by using vegetated swales and retention ponds). • Where stormwater treatment is deemed necessary to protect the quality of receiving water bodies, priority should be given to managing and treating the first flush of stormwater runoff where the majority of potential contaminants tend to be present.
Occupational injuries and accidents	<ul style="list-style-type: none"> • Provide personal protective equipment like nose mask, earmuff, helmet, goggles to miners. • Display safety signs on mine site • Regular inspection and maintenance of mining equipment and vehicles. • Strict compliance to OSHA 2007 Public Health Act and Wiba. • Comply with fire risk reduction rules. • Ensure periodic medical examination of employees. • The Proponent will arrange regular medical checkups to detect occupational diseases and minor diseases in nearby settlements. • Education and training arrangement for the mines workers about the safety and various occupational health risks related to mining operation.
Use of explosives	<ul style="list-style-type: none"> • Ensure proper handling and storage of explosives.

Environmental Impact Proposed Mitigation Measures

	<ul style="list-style-type: none"> • Ensure only licensed and qualified blasters can handle and detonate explosives. • Notify neighboring community during blasting. • Comply with noise and excessive vibration pollution control Regulations and explosives Act.
Water scarcity	<ul style="list-style-type: none"> • Raise awareness on water recycling and conservation. • Provide water storage facilities.
Energy resource utilization	<ul style="list-style-type: none"> • Raise awareness on energy conservation. • Switch off electrical equipment, appliances and lights when not being used. • Install energy-saving fluorescent tubes at all lighting points.
Increased vehicular traffic along Kilifi-Kaloleni and site access road	<ul style="list-style-type: none"> • Liaise with Kenya National Highway Authority to ensure that appropriate road signs before the exit/entry junction area are erected. • Drivers to strictly observe the Highway Code. • Speed limits to be strictly observed. • Provide sufficient space for internal parking of lorries awaiting to deliver mine material or to load mine material. • Restrict unnecessary parking along access road.

NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT
FOR THE PROPOSED RESIDENTIAL APARTMENTS ON PLOT
L.R. NO. 209/9351 ALONG LIKONI LANE OFF DENNIS PRITT
ROAD IN KILIMANI, NAIROBI CITY COUNTY

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the

above proposed project.

The proponent, Alina Valley Company Limited, proposes to develop residential apartments comprising of three semi-detached 15-storey blocks with a total of 248No. apartment units (1No. one bedroom apartment, 154No. two bedroom apartments, 15No. two bedroom+DSQ apartments, 15No. three bedroom apartments, 48No. three bedroom+DSQ apartments, 15No. four bedroom+DSQ apartments), ground floor, 3No. basement floors, lifts, guard house, protected dustbin cubicles, driveways, and other associated facilities and amenities on L.R. No. 209/9351, along Likoni Lane off Dennis Pritt Road, Kilimani, Nairobi City County.

The following are the anticipated impacts and proposed mitigation measures:

<i>Impacts</i>	<i>Proposed Mitigation Measures</i>
Soil disturbance	<ul style="list-style-type: none"> Control earthworks and compact loose soils. Install drainage structures properly. Landscaping on project completion. Control and manage excavation activities. Control activities especially during rainy conditions. Provide soil erosion control and conservation structures/means where necessary. Ensure standard appropriate practices on the provided gardens.
Changes in land use-extent	<ul style="list-style-type: none"> Plant vegetation after project completion even if in pots. Ensure compliance with existing planning policy. Maintain the riparian reserve.
Protection of the Kirichwa Kubwa River	<ul style="list-style-type: none"> All wastewater from the toilets should be discharged into the sewer system effectively. The drainage channel discharging storm water into the river should be provided with effective and adequate screens to filter off any solid waste and should be regularly removed and appropriately disposed. Pegging has already been done by the Water Resources Authority to ensure that the river is not encroached into.
Changes in hydrology/impended drainage	<ul style="list-style-type: none"> proper Installation of drainage structures. Install cascades to break the impact of water flowing in the drains. Ensure efficiency of drainage structures through proper design and maintenance. Provide gratings to the drainage channels.
Air pollution	<ul style="list-style-type: none"> Enclose the site with dust-proof net during construction. Water should be sprayed during the construction phase of excavated areas during dry conditions. Control speed and operation of construction vehicles. Prohibit idling of vehicles. Ensure sound condition of construction machinery and equipment. Engage sensitive construction workers.

<i>Impacts</i>	<i>Proposed Mitigation Measures</i>
Noise pollution	<ul style="list-style-type: none"> Erect suitable barriers to control noise. Sensitize drivers of construction machinery on effects of noise. Maintain plant equipment (if present). Construction activities to be restricted to daytime. Workers in the vicinity of or involved in high-level noise to wear safety and protective gear.
Water resources	<ul style="list-style-type: none"> Management of water usage. Avoid unnecessary wastage. recycling of water at the construction phase where possible. Make use of roof catchments to provide water i.e. for general purpose.
Oil pollution	<ul style="list-style-type: none"> Proper storage, handling and disposal of new oil and used oil wastes as per waste regulations. Maintain plant and equipment to avoid leaks. Maintenance of construction vehicles should be carried out in the contractor's yard (off the site). Provide oil interceptors along the drains leading from car park and potentially oil risk areas.
Public health, occupational health and safety	<ul style="list-style-type: none"> Train staff/workers on occupational health and safety. Provide full protective gear and workmen's compensation cover in addition to the right tools and operational instructions and manuals during construction. Adopt sound waste management system to ensure proper solid waste disposal and collection facilities. Adopt sound housekeeping practices. Sensitize residents on environmental management. Design of sewerage system should be as provided in the plans and should be constructed to approved size and design, standard and of approved materials. Engage the services of qualified personnel and/or ensure training. Ensure use of standard construction materials and to the specifications. Avoid undesirable, substandard, hazardous or unauthorized materials during construction and maintenance. Sensitized staff on social/health issues such as drugs. Ensure machinery and equipment servicing and maintenance as per schedules and legal requirements. Post strategically the Factories and Other Places of Work Act Abstract and provide material safety data sheets.

<i>Impacts</i>	<i>Proposed Mitigation Measures</i>
	<ul style="list-style-type: none"> Post clear warning signs e.g. 'No unauthorized use of machines', ensure there are guards on moving parts etc. Provide fully equipped First Aid kits and train staff on its use. Ensure adherence with the legal requirements- Factories Act. Sensitize residents on environmental management. Ensure Nairobi City County certifies and issues occupation certificates.
Vegetation	<ul style="list-style-type: none"> Avoid unnecessary removal of vegetation. Landscaping and planting vegetation in all disturbed areas.
Record keeping	<ul style="list-style-type: none"> Collection and analysis of relevant environmental data of the site.
Fire safety and preparedness	<ul style="list-style-type: none"> Install firefighting equipment as provided elsewhere in the report. Conduct training on firefighting, evacuation and emergency response. Sensitize the residents on fire risks i.e. conduct regular fire drills. Adapt effective emergency response plan. Maintain/service firefighting machinery regularly. Provide emergency numbers at strategic points.
Water quality	<ul style="list-style-type: none"> The design of the entire sewerage system should consider the estimate discharges from individual sources and the cumulative discharge of the entire project even during peak volumes. Provide for adequate drainage system. Ensure effluents are discharged responsibly to the sewerage system. Install an oil water interceptor to trap oils that may be present in the wastewater. Apply and obtain an Effluent Discharge License (EDL) for effluent released into the environment. Monitor quality of wastewater to ensure compliance with the Environmental Management and Co-ordination (Water Quality) Regulations, 2006 and other relevant laws.
Waste Management	<ul style="list-style-type: none"> During construction phase, designate an area for temporarily holding waste materials. All wastes should be disposed of in accordance with the Environmental Management and Co-ordination (Waste Management) Regulations, 2006 and other relevant laws. Segregation of wastes at the source for ease of handling and disposal. Contract a NEMA licensed waste transporter to transport solid waste from the proposed

<i>Impacts</i>	<i>Proposed Mitigation Measures</i>
	<ul style="list-style-type: none"> site during construction and occupation phases. Sell recyclable waste to recyclers. Provide bins for temporarily holding waste before collection by licensed transporters during occupation phase.
Security	<ul style="list-style-type: none"> Provide security guards, CCTV cameras and other security apparatus during the entire project cycle.
Traffic Management	<ul style="list-style-type: none"> Conduct a traffic impact assessment and generate a traffic management plan. The traffic management plan should be followed throughout the project cycle.

The full report of the proposed project is available for inspection during working hours at:

**IMPORTANT NOTICE TO SUBSCRIBERS TO
THE KENYA GAZETTE**

THE following notes are for the guidance of persons submitting "copy" for inclusion in the *Kenya Gazette, Supplement*, etc.:

- (1) *The Kenya Gazette* contains Notices of a general nature which do not affect legislation. They are, therefore, submitted to the Government Printer directly.
- (2) *Legislative Supplement* contains Rules and Regulations which are issued by the National or County Governments. Because of this, they must be submitted to the Government Printer through the office of the Attorney-General.
- (3) *Bill Supplement* contains Bills which are for introduction in the National Assembly, Senate or County Assemblies.
- (4) *Act Supplement* contains Acts passed by the National Assembly, Senate or County Assemblies.

All "copy" submitted for publication should be prepared on one side of an A4 sheet no matter how small the Notice is, each page being numbered and should be typed with double spacing. Copy should be clear, legible and contain no alterations.

Particular attention should be paid to the following points:

- (i) Signature must be supported by rubber-stamping or typing the name of the signatory in capital letters.
- (ii) Must be correct and filled in where necessary.
- (iii) Care should be taken to ensure that all headings to Notices and references to legislation are up to date and conform with the Revised Edition of the Laws of Kenya.

EXTRACT FROM THE HUMAN RESOURCE POLICIES AND PROCEDURES MANUAL FOR THE PUBLIC SERVICE —
