According to PCK, the proposed tariff is reflective of the cost of providing services and maintaining the boxes. PCK is required to offer basic postal services to all customers within Kenya including remote parts of the country as part of its Universal Service Obligation (USO). PCK cites increased cost of fuel, conveyance, printing of stamps, administration, rentals on leased operational premises, and purchase of the letter boxes as necessitating review of the tariffs.

The proposed review of tariffs is likely to affect the public, local authorities, companies, persons or bodies of persons within the Republic of Kenya.

Any person or local authority, company or body of persons desirous of making any representation on or objection to the proposed new tariffs must do so by a letter addressed to the Director-General, Communications Commission of Kenya, Waiyaki Way, P.O. Box 14448 Nairobi, 00800, indicating "Postal Tariff Review" on the outside of the cover enclosing it on or before the expiry of thirty (30) days from the date of this notice and must forward to PCK a copy of the representation or objection.

Dated the 25th October, 2011.

FRANCIS WANGUSI,
Ag. Director-General.

THE ENVIRONMENTAL MANAGEMENT AND CO-ORDINATION ACT

(No. 8 of 1999)

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT
FOR THE PROPOSED SUBDIVISION OF REMAINING 3,053
ACRES IN KIU RANCH, LR NO.7612 MUKAA DISTRICT,
MALILI DIVISION, NGAAMBA LOCATION

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) regulations, the National Environmental Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the implementation of the proposed subdivision of remaining 3,053 acres in Kiu ranch.

The project proposes to subdivide the remaining portion of its ranch to its 1006 members. It also wishes to allocate 2,760 acres to the former squatters on its land as directed by the high court. This final subdivision will involve a total of 3,053 acres which after putting aside 500 acres for roads, social amenities etc will see the members share the remainder with each member getting only about 2.7 acres.

The proposed project will be in Kiu ranch, plot L.R No.7612 Mukaa district, Malili division, Ngaamba location.

The following are the anticipated impacts and proposed mitigation measures:

<i>Environmental issue</i>	<i>Mitigation Measures</i>
Changes in hydrology/impended drainage	<ul style="list-style-type: none"> • Avoid allocating to members river valleys, steep hill sides and identified wetlands • Ensure efficiency of drainage structures through proper design and maintenance • Use society funds to vegetate degraded valleys and hillsides
Flora and Fauna	<ul style="list-style-type: none"> • Work only according to the survey briefs. • Surveyor to Endeavour to access only areas

	where beacons are to be placed.
	<ul style="list-style-type: none"> • Avoid allocating sensitive ecological areas to individuals
Soil erosion	<ul style="list-style-type: none"> • Control earthworks & compact loose soils • Ensure management of any excavation activities • Control activities especially during rainy conditions
Solid Wastes	<ul style="list-style-type: none"> • Bring only required materials to site. • Avoid unnecessary excavations • Compost organic waste on site • Stockpile all mortar aggregate and use as landfill on the ranch
Air pollution	<ul style="list-style-type: none"> • Work only on designated areas • Engage sensitive construction workers. Ear muffs and other ear protectors
Public health and occupational safety	<ul style="list-style-type: none"> • Train staff/workers on occupational health and safety.
Deforestation and bush clearance	<ul style="list-style-type: none"> • Sensitize members on environment conservation • Enforce provision of the Agriculture Act 2003 Amendment that calls for 10% of land to be put under forests/trees • Encourage members to plant trees along the fences • Encourage members to use plants such as kei-apple, euphorbia etc as fences/hedges around their parcels • Sensitize members on the dangers of overstocking and why they must respect the carrying capacity of the land • Sensitize members on the advantages of planting drought resistant food crops
Loss of Wildlife Habitat	<ul style="list-style-type: none"> • Set aside ecologically sensitive areas as nature conservation blocks within the ranch • Partner with Government Agencies and NGO's to come up with best ways of managing the animals within the community • Sensitize the members on the importance of conserving our wildlife • Partner with KWS to relocate the cheetahs to designated game reserves as they are an endangered species • Partner with KWS to relocate unmanageable game to designated parks
Fragmentation of Land to Uneconomical units	<ul style="list-style-type: none"> • Rigorously Enforce the zoning laws • Set minimum sizes for parcels in agricultural zones
Aesthetic Loss	<ul style="list-style-type: none"> • Avoid vegetation clearance on hilltops, valleys • Preserve all mature trees as much as is practical

The full report of the proposed project is available for inspection during working hours at:

(a) Director General, NEMA, Popo Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED 200 3-BEDROOMED APARTMENTS ON L.R. NO.7149/26, MAVOKO MUNICIPALITY, MACHAKOS COUNTY.

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) regulations, the National Environmental Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the implementation of the proposed 200 3-bedroomed apartments.

The proposed development will entail construction of 200 spacious apartments (in 20 blocks each having 10 units) with excellent finishes on a five acre compound. They will be 3 bedrooms (plus DSQ) with a plinth area of approximately 150 sq metres. These will be built in phases development will include a jogging track, ample parking, baby swimming pool, Gazebo, baby class, shops and recreational areas.

The proposed project is located on plot L.R No. 7149/26, before Mlolongo, along Mombasa Road, Mavoko Municipality. The site is next to the railway line after Muthama Heights and Easypark apartments

The following are the anticipated impacts and proposed mitigation measures:

<i>Environmental issue</i>	<i>Mitigation Measures</i>
Soil Erosion and Compaction	<ul style="list-style-type: none"> The contractor will provide adequate soil conservation structures to ensure that areas prone to soil erosion are protected from runoff. Areas susceptible to erosion shall be properly sloped and compacted to reduce the effect of runoff, and shall be seeded immediately; Rehabilitation of exposed sites as soon as practicable The site preparation activity should be scheduled Re-plant degraded areas with local species common in the area to complement natural vegetation regeneration to improve ground cover.
Occupational Health and Safety	<ul style="list-style-type: none"> Workers will be provided with adequate Personal Protective Equipment during the construction phase, these will include safety boots, overalls, helmets, goggles and earmuffs. Workers will also be provided with safety harnesses and proper secure equipment for scaling heights Workers will be provided with a well stocked first aid box, which will be replenished at all times and managed by

	<p>trained first aiders.</p> <ul style="list-style-type: none"> • Sensitize workers on occupational health and safety. • Adequate sanitary facilities will be provided with proper segregation for both genders where applicable. • Fencing off the entire construction site • The contractor to protect stockpiles of friable material subject to wind- throw by wetting, or with barrier or windscreen; • Restrict speed on loose surface roads during dry or dusty conditions; incidence • Suppress dust during dry periods by use of water sprays; • Maintain equipment in good running condition-no vehicle to be used that generates excessive black smoke; • Enforce vehicle load restrictions to avoid excess emissions from engine overloading; • The contractor shall institute appropriate measures to minimize or avoid air quality impacts. This can be achieved through formulation of air quality management plan • The contractor to minimize/control emission of dust due to traffic movement and erosion of stockpile material and exposed soil. • The contractor to ensure that all equipment used and all facilities erected on site are designed and operated to control the emission of smoke, dust, fumes and any other air impurity into the atmosphere;
Air and dust pollution	
Noise Pollution and Excessive Vibration	<ul style="list-style-type: none"> • The contractor shall comply with the legal requirements for the managements of the noise impact specified in the recently gazetted noise quality regulations. • The contractor shall formulate noise management plan for minimizing the generation of noise and vibration from construction activities occurring on site and its impact on surrounding residents, businesses and workers. • All internal combustion equipment will have properly functioning silencers or mufflers; • Neighbours to the site to be notified about the construction schedule and activities, including blasting, should it be required; • Restriction of construction activities to daytime only..
Increase in Solid Waste	<ul style="list-style-type: none"> • Proponent will use an integrated solid waste management system by source reduction, recycling, composting, reuse or sanitary land filling. • The proponent will ensure that debris is collected by a NEMA approved waste handlers. • There will be a central collection point for waste generated preferably with segregation of the same. • The proponent will provide or construct proper waste receptacles to avoid littering.
Effluent Disposal	<ul style="list-style-type: none"> • The proponent will connect to Mavoko sewer trunk line along Mombasa road. • The proponent will ensure that the materials used for construction are of the right standards as per the building code. • The proponent will ensure that there are

Security	<p>routine checks for the sewer lines to ensure that there are no leakages.</p> <ul style="list-style-type: none"> • The proponent will ensure that guards are available and proper intrusion surveillance equipments are installed and are working all the times.
Traffic Movement for Construction Vehicles	<ul style="list-style-type: none"> • The proponent will ensure that there is adequate lighting in all areas and risk assessment is done regularly to identify any new threats. • The proponent will ensure the neighbours are informed through signage about irregular movements and guards to be used to direct traffic
Water Resources and Water quality	<ul style="list-style-type: none"> • Measures shall be instituted to minimize erosion and sediment transport, especially during construction activities. • These measures should include: limiting areas cleared of vegetation, stabilizing the soils on the sloppy areas with stone pitching and planting of grass. • Remedial measures shall be implemented by the Contractor in the event of erosion resulting in the sedimentation of surrounding areas after due consideration of the costs and benefits of such removal activity • Infrastructure shall be designed to ensure that contaminated run-off does not reach watercourses • In the event of an oil spill the procedures contained in the emergency response plan will come into effect.

The full report of the proposed project is available for inspection during working hours at:

- (a) Director General, NEMA, Popo Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.
- (b) Permanent Secretary, Ministry of Environment and Mineral Resources, NHIF Building, Community, P.O. Box 30521, Nairobi.
- (c) Provincial Director of Environment, Eastern Province.

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) regulations, the National Environmental Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the implementation of the proposed construction of a bitumen plant.

The project will involve building an emulsion bitumen plant with a boiler- bitumen preheating tank and one bitumen pump, a guardhouse, Sanitary facilities and a paved driveway running from the gate.

The proposed site for construction of a bitumen plant is in Nairobi Municipality on plot no 209/13714 along Masai Road, off Mombasa road. The proposed project site measures approximately 5 hectares.

The following are the anticipated impacts and proposed mitigation measures:

<i>Environmental issue</i>	<i>Mitigation Measures</i>		
Changes in hydrology/impended drainage	<ul style="list-style-type: none"> • Proper initial site exploration to avoid potential ground water contamination. • Proper Installation of drainage structures on site • Establishing water balance taking into consideration probable climatic events. • Install cascades to break the impact of water flowing in the drains. • Ensure efficiency of drainage structures through proper design and maintenance. • Provide gratings to the drainage channels. • Regular checks on any sludge along drainage channels. 		<ul style="list-style-type: none"> • washing bay • Developing an appropriate water management system minimising the impact on water users in the area. • Considering re-use of water. • Considering the potential impact to the water balance prior to commencing any de-watering activities. • Special attention should be paid to the sanitary facilities (pit latrines), they should be kept clean and well lit
Soil erosion	<ul style="list-style-type: none"> • Control earthworks • Rehabilitate degraded environment to avoid siltation and wash offs. • Ensure management of excavation activities • Provide soil erosion control and conservation structures where necessary. • Proper disposal of excavated loose soils. Solid wastes/ waste rock	<ul style="list-style-type: none"> Provide appropriate mechanisms of handling workshop scrap, and non process related industrial wastes. Provide adequate measures for handling waste to be disposed-off and lift height specifications or to be used in upgrading of the existent road network around the site Recyclable wastes like the oil cans, scrap metals, used tyres should be sold to licensed waster recyclers
Scraps and other debris on site including rock debris	<ul style="list-style-type: none"> Use of an integrated solid waste management system i.e. through a hierarchy of options: Wastes generated as a result of facility decommissioning activities will be characterized in compliance with standard waste management procedures. Disposal locations will be selected by the proponent based on the properties of the particular waste stream All machinery, equipment, structures and tools that will not be used for other purposes should be removed and recycled/ reused say in other projects Where recycling/reuse of the machinery, equipment, implements, structures, tools and other waste is not possible, the materials should be taken to approved dumpsites
Oil spills and leaks	<ul style="list-style-type: none"> Clean and treat all oil contaminated areas Suitably dispose all used oil and oil handling materials
Vegetation disturbance Land deformation: soil erosion, drainage problems	<ul style="list-style-type: none"> Implement an appropriate re-vegetation programme to restore and improve the site During the re-vegetation period, appropriate surface water runoff controls will be taken to prevent surface soil erosion; Monitoring and inspection of the area for indications of erosion will be conducted and appropriate measures taken to correct any occurrences; Fencing and signs restricting access will be posted to minimize disturbance to newly-vegetated areas; Comprehensive landscaping of the site
Loss of income Reduced ability to support dependants Loss of quality of life	<ul style="list-style-type: none"> The safety of the workers should surpass as a priority of all other objectives in the decommissioning project Adapt a project – completion policy: identifying key issues to be considered earlier before decommissioning. Assist with re-employment and job-seeking of the involved workforce. Compensate and suitably recommend the workers to help in seeking

opportunities elsewhere.

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED UPGRADING OF THE BUSIA – MALABA ROAD C43 TO BITUMEN STANDARD

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) regulations, the National Environmental Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the implementation of the proposed upgrading of the Busia – Malaba road c43 to bitumen standard

Road construction requires the deployment heavy duty machinery and considerable earthworks. Large quantities of construction materials will be used, mainly, gravel, hard-stone, sand and water.

The following activities will likely take place.

- Road condition survey
- Location of murram supply quarries
- Widening of the road to required width, where necessary
- Storage of fuel and lubricants
- Construction of a Labor Camp(s)
- Excavation
- Construction of haulage routes
- Construction of diversions
- Construction of bridges
- Installation of rock crushing plant
- Asphalt Plant operations
- Establishment of Quarries and Borrow pits
- Rock Blasting
- Mining of murram
- Screening and sizing of rock materials
- Mixing of concrete
- Employment of labor force
- Construction of workshops
- Steel fabrication operations
- Woodworking operations
- Water abstraction
- Transportation of crews, building materials and equipment

The proposed road project is located within Teso District, Western Province in the Republic of Kenya and covers a distance of 28km. The traverse of the road corridor originates at kilometer 117 on the B1 from Kisumu towards Busia and terminates at Malaba on the A104 from Eldoret

The following are the anticipated impacts and proposed mitigation measures:

<i>Possible Impact</i>	<i>Mitigation measures</i>
Habitat Destruction	<ul style="list-style-type: none"> • Restore cleared areas with indigenous trees and grasses. • Cutting of trees for firewood by construction crews must not be allowed. • Re-vegetation should be timed and take advantage of the rainy seasons. • Regenerate lost ecosystems to attract displaced fauna or support other species.
Loss of Land and Property	<ul style="list-style-type: none"> • Compensation at rates determined by representatives of the Community and the Government of Kenya. • A sufficient notice period should be given to enable salvage of valuable property.
Hydrology	<ul style="list-style-type: none"> • The road foundation must not impede the water recharge capacity of the wetlands. • Abstraction of water from local sources should not be done during dry seasons, but rather harvest rainwater during the wet for use later.
Water quality	<ul style="list-style-type: none"> • Reduce contamination by:- • Emplacing gabions and embankments downstream of earth works. • Waste water from gravel and sand cleaning must be contained to permit silting before release into water courses. • Provision of oil and grease traps from vehicle repair sheds. • Human wastes from construction camps be disposed of in accordance with the Public Health Act. • Toilets in the construction camps should not be dug in areas with a high water table.
Soil erosion	<ul style="list-style-type: none"> • Stabilise exposed top soils by re-vegetation. • Excavated soil stockpiles should not be placed adjacent to slopes or streams. • Gentle angles at all earth cuttings. • Terracing may be incorporated in steep slopes. • All excavations should be done in the dry weather. • Scour checks shall be placed at correct intervals to reduce run-off erosion potential. Scour checks, gabion mattresses, stone pitching and rock fill gabion works.
Drainage	<ul style="list-style-type: none"> • Run-off from mitre drains and offshoots shall not be directed into farmland or homesteads. • Compacted surfaces that may act as collectors of run-off shall be ripped up to permit percolation. • Excessively long side drains should be avoided as such water can flood small streams and exacerbate erosion.
Stone crushing and rock blasting.	<ul style="list-style-type: none"> • Locate stone crushing plant away from areas of habitation. • Blasting should take place at designated times and the community within 5 km radius duly informed.

Noise pollution	<ul style="list-style-type: none"> • Explosives should not be kept on the sites, instead they should be delivered to the site as necessary. • Use quiet equipment (i.e. equipment designed for low noise operation). • Install portable sound barriers to shield compressors and other localised noise emitters where necessary. • Limit construction activities to day-time hours only. • Observe a common-sense approach to vehicle use, and encourage drivers to shut off idle engines.
Dust emissions.	<ul style="list-style-type: none"> • Sprinkle water on haulage tracks, diversions and other compacted areas to suppress dust generation. • All crew exposed to dust pollution shall be provided with dust breathing masks.
Traffic Disruption	<ul style="list-style-type: none"> • Timely completion of construction targets to minimize inconvenience. • Well constructed and maintained traffic diversions. • Provide for two way traffic on diverted sections.
Solid Wastes	<ul style="list-style-type: none"> • Economy and Optimal utilization of resources and raw materials. • Procure construction materials, in tandem with amounts required to avoid idle stock. • Ensure that damage or loss of materials during construction is kept minimal through proper storage.
Safety	<ul style="list-style-type: none"> • Re-use materials left over in other projects. • Cordon off restricted construction sites or areas. • Designate access routes to and loading and parking at the site(s). • Ensure that incidents, accidents and dangerous occurrences during construction are recorded and reported using prescribed forms obtainable from the District Occupational Health and Safety Office. • Ensure that incidents, accidents and dangerous occurrences during construction are recorded and reported using prescribed forms obtainable from the District Occupational Health and Safety Office. • Ensure that all the workers are insured as per The Workmen's Injury and Benefits Act. • Before embarking on work in dangerous situations, like working at heights or in confined spaces, a work permit must be issued and the activity under surveillance in accordance with recommended practice. • Well stocked 1st Aid Boxes which can be easily accessed should be provided at all work sites.

The full report of the proposed project is available for inspection during working hours at:

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED COMMERCIAL DEVELOPMENT OF DAZ SQUARE OFFICE PARK AND HOTEL ON L.R. NO. 7158/76, ON LOWER KABETE ROAD, NAIROBI

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) regulations, the National Environmental Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the implementation for the proposed commercial development of daz square office park & hotel.

The project will construct six eco-friendly commercial buildings; five blocks of offices and a 4 star hotel which will all be storeyed, complete with associated external works including boundary walls, guard house, landscaped gardens, parking lots, and recreation centre among other components, to meet the ever-growing demand for well designed commercial space within the city of Nairobi.

The commercial block is located approximately 8 Kilometers from Nairobi Central Business District on Lower Kabete Road of Nairobi. The proposed site is on plot number L.R. No. 7158/76.

The following are the anticipated impacts and proposed mitigation measures:

<i>Environmental /Social Issue</i>	<i>Management & Mitigation and /or Enhancement Measures</i>
------------------------------------	-----------------------------------------------------------------

High Demand of Raw material	<ul style="list-style-type: none"> Source building materials from local suppliers who use environmentally friendly processes in their operations. Ensure accurate budgeting and estimation of actual construction material requirements to ensure that the least amount of material necessary is ordered. Ensure that damage or loss of materials at the construction site is kept minimal through proper storage. Use at least 7% recycled, refurbished or salvaged materials to reduce the use of raw materials and divert material from landfills. Ensure proper demarcation and delineation of the project area to be affected by construction works.
-----------------------------	--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

Vegetation and Animal disturbance	<ul style="list-style-type: none"> Ensure proper demarcation and delineation of the project area to be affected by construction works. Specify locations for trailers and equipment, and areas of the site which should be kept free of traffic, equipment and storage. Designate access routes and parking within the site. Preserve of some individual trees within the site. Introduction of vegetation (trees, shrubs and grass) on open spaces and their maintenance. Design and implement an appropriate landscaping programme to help in re vegetation of part of the project area after construction. Surface runoff and roof water shall be
-----------------------------------	---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

harvested and stored in underground reservoir for reuse.

- A storm water management plan that minimizes impervious area infiltration by use of recharge areas and use of detention and/or retention with graduated outlet control structure will be designed.

Increased storm water, runoff and soil erosion

- Apply soil erosion control measures such as leveling of the project site to reduce run off velocity and increase infiltration of storm water into the soil.
- Ensure that construction vehicles are restricted to existing graded roads to avoid soil compaction within the project site.
- Ensure that any compacted areas are ripped to reduce runoff.
- Site excavation works to be planned such that a section is completed and rehabilitated before another section begins.
- Construction of soil-gulleys on sloppy sections.
- Open drains all interconnected will be provided on site.
- Roof catchments will be used to collect the storm water for some domestic uses.
- Construction of water storage tanks to collect storm water for domestic uses.

Increased solid waste generation

- Use of an integrated solid waste management system i.e through a hierarchy of options: a) source reduction, b) Recycling c) Composting and reuse d) Combustion e) sanitary land filling.
- Through accurate estimation of the sizes and quantities of materials required, order materials in the sizes and quantities they will be needed, rather than cutting them to size, or having large quantities of residual materials.
- Ensure that construction materials left over at the end of construction will be used in other projects rather than being disposed of.
- Ensure that damaged or wasted construction materials including cabinets, doors, plumbing and lighting fixtures, marbles and glass will be recovered for refurbishing and use in other projects.
- Donate recyclable/reusable or residual materials to local community groups, institutions and individual local residents or home owners.
- Use of durable, long lasting materials that will not need to be replaced as often, thereby reducing the amount of construction waste generated over time.
- Provide facilities for proper handling and storage of construction materials to reduce the amount of waste caused by damage or exposure to the elements.

Dust Emission

- Ensure strict enforcement of on-site speed limit regulations.
- Avoid excavation works in extremely dry weathers.
- Sprinkle water on graded access routes when necessary to reduce dust generation by construction vehicles.

Exhaust emission

- Personal protective equipment to be worn.
- Vehicle idling time shall be minimized.
- Alternatively fuelled construction equipment shall be used where feasible equipment shall be properly tuned and maintained.

Noise and Vibration	<ul style="list-style-type: none"> • Sensitize truck drivers to avoid unnecessary racing of vehicle engines at loading/offloading points and parking areas, and to switch off or keep vehicle engines at these points. • Sensitize construction vehicle drivers and machinery operators to switch off engines of vehicles or machinery not being used. • Sensitize construction drivers to avoid gunning of vehicle engines or hooting especially when passing through sensitive areas such as churches, residential areas and hospitals. • Ensure that construction machinery are kept in good condition to reduce noise generation. • Ensure that all generators and heavy duty equipment are insulated or placed in enclosures to minimize ambient noise levels. • Trees around the site will provide some buffer against noise propagation. • The noisy construction works will entirely be planned to be during day time when most of the neighbors will be at work. 	<p>extinguishers and hydrants systems should be provided at strategic locations such as stores and construction areas.</p> <ul style="list-style-type: none"> • Regular inspection and servicing of the equipment must be undertaken by a reputable service provider and records of such inspections maintained. • Signs such as 'NO SMOKING' must be prominently displayed within the estate, especially in parts where inflammable materials are stored. • Enough space must be provided within the premises to allow for adequate natural ventilation through circulation of fresh air. • There must be adequate provision for artificial or natural lighting in all parts of the premises in which persons are working or passing.
Generation of waste water	<ul style="list-style-type: none"> • Provide means for handling sewage generated by construction workers. • Conduct regular checks for sewage pipe blockages or damages since such vices can lead to release of the effluent into the land and water bodies. • Monitor effluent quality regularly to ensure that the stipulated discharge rules and standards are not violated. 	<p>Oil spills</p> <ul style="list-style-type: none"> • A designated garage section of the site fitted with oil trapping equipment to be planned for changes. Such an area will be well protected from contaminating the soil. <p>Hydrology and water quality degradation</p> <ul style="list-style-type: none"> • Hazardous substance control and emergency response plan that will include preparations for quick and safe cleanup of accidental spills. • Hazardous materials handling procedures to reduce the potential for a spill during construction to be prescribed. • Identify areas where refueling and vehicle maintenance activities and storage of hazardous materials, if any, will be permitted.
Incidents, accidents and dangerous occurrences	<ul style="list-style-type: none"> • Ensure that provisions for reporting incidents, accidents and dangerous occurrences during construction using prescribed forms obtainable from the local Occupational Health and Safety Office (OHSO) are in place. • Ensure that provisions for reporting incidents, accidents and dangerous occurrences during construction using prescribed forms obtainable from the local Occupational Health and Safety Office (OHSO) are in place. • Ensure that the premises are insured as per statutory requirements (third party and workman's compensation). • Develop, document and display prominently an appropriate SHE policy for construction works. • Provisions must be put in place for the formation of a health and safety committee, in which the employer and the workers are represented. • Suitable, efficient, clean, well lit and adequate sanitary conveniences should be provided for construction workers. • Mobile toilets, changed regularly to be provided on site until sewer connection is established. 	<p>Air pollution</p> <ul style="list-style-type: none"> • Suitable wet suppression techniques need to be utilized in all exposed areas. • All unnecessary traffic must be strictly limited on site speed controls are to be enforced. • Ensure that the site is located away from such pollution sources. <p>The full report of the proposed project is available for inspection during working hours at:</p> <p>(a) Director General, NEMA, Popo Road, off Mombasa Road, P.O. NOTICE TO THE PUBLIC TO SUBMIT COMMENTS ON AN
ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT
FOR THE PROPOSED CONSTRUCTION OF SANITARY
LANDFILL IN RUAI

Pursuant to regulation 21 of Environmental (Impact Assessment and Audit) regulations, the National Environmental Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the implementation for the proposed construction of sanitary landfill.

The project involves the construction of a sanitary landfill in Ruai.

The proposed site is located in the East of Nairobi City, adjacent to Dandora Sewerage Ponds on one side by Nairobi River and the Embakasi Ranching Scheme on the other. The project area is located in Ruai Location.

The following are the anticipated impacts and proposed mitigation measures:

<i>Environmental/Social Issue</i>	<i>Management & Mitigation and /or Enhancement Measures</i>
-----------------------------------	-----------------------------------------------------------------

General wastes

- All solid waste will be collected at a central location at each site and will be stored temporarily until removal to an appropriately permitted landfill site in the vicinity of the site.
- No dumping within the surrounding area is to be permitted. Where potentially hazardous substances are being disposed of, a chain of custody document should be kept with the environmental register as proof of final disposal.
- Waste generated at the site should be categorised by the contractor and disposed of in a suitable manner into different waste streams (including general and hazardous waste). Wherever possible recycling should be carried out
- Litter generated by the construction crew must be collected in rubbish bins and disposed of weekly at registered waste disposal sites

Waste Water

- The contractor shall ensure that any wastewater generated during construction of the Sanitary Landfill is properly collected through drains and effectively stabilized
- No untreated waste water should be allowed to enter the wastewater system or disposed of via the solid waste stream
- Storm water should be managed in such a way that no overland flow is possible onto the site from any adjacent area Storm water drains in the area should be routinely inspected by the environmental officer for solid waste to avoid blockages and associated problems.

Fire prevention and control

- The Contractor shall take all reasonable and precautionary steps to ensure that uncontrolled fires are not started as a consequence of his activities on site.
- The Contractor shall ensure that there is basic fire-fighting equipment available on site as per requirement of the local Emergency Services. These include fire blankets and fire extinguishers.
- The Contractor shall ensure that all site personnel are aware of the fire risks and how to deal with any fires that

occur. This shall include, but not be limited to: Regular fire prevention and training sessions and posting of regular instructions to staff and training some of the staff on fire Marshall techniques

- Any accidental fires, which occur, shall be reported to the CCN DoE Manager immediately and then to the relevant authorities.

Erosion Control

- During Construction any construction materials should be screened or covered to prevent offsite movement (primarily windblown soil) and the surplus material should be removed from site to an approved disposal site.

- Stripping of vegetation should be minimized to avoid erosion.

Dust Control/ air pollution

- Mitigatory measures such as wetting down, as well as the erection of shade netting screens to prevent offsite movement of dust may also be required.

- The use of straw stabilisation or mulching of exposed soil should also be undertaken.

- Diesel exhaust emissions from heavy machinery on site (excavators, front end loaders and hauling trucks) must be controlled and minimised by regular checks and servicing of vehicles. Construction vehicles emitting excessive smoke should be removed from site

- All areas disturbed during construction of the sanitary landfill must be re-vegetated

Storm water Management and Control

- Proper drainage channels should be constructed within the construction site.

Machinery Management

- All vehicles, equipments, fuel and petroleum services and tanks must be maintained in good condition to prevent leakage and possible contamination of soil or groundwater

Health and Safety

- The Contractor shall comply with all standard and legally required health and safety regulations under the Occupational Health and Safety Act 2007 and associated regulations.

- The contractor should provide and maintain personal protective equipment and facilities to employees

- Official training in the correct fit, use, care, storage and limitations of all Personal Protective Clothing, Respiratory and Hearing Equipment must be given to the employees

- The Contractor shall provide a standard first aid kit at the site office of each camp and/or at additional identified locations where needed

Surface and ground water

- Machineries should be operated and maintained according to manufacturers guidelines to avoid oil, lubricants and fuel leaks that might pollute water resources in the area

- Ensure that excavated and stockpiled soil material is stored and bermed on the higher lying areas.

- Vegetation clearance must be kept to a minimum to reduce the risk of soil

	erosion		Museums of Kenya for further action
Noise and Vibrations	<ul style="list-style-type: none"> Adequate provision must be made for sanitation for the construction workers. Septic tanks on site are to be emptied regularly Construction and the use of construction machinery should be limited between 0600hr and 1800hr on weekdays. The contractor should use modern equipment, which produces the least noise. The use of noise shielding screens should be used and the operation of such machinery restricted to when it is actually required. Construction activities must abide by the national Noise regulations recently gazette by NEMA Prior to blasting (if required), the contractor must inform the adjacent landowners and local administration and obtain relevant permits from Mines and Geology Department 		<ul style="list-style-type: none"> Sensitive environments and natural features within and/or close to a site will be designated as restricted areas and will not be interfered with during decommissioning of the plant Any taxa, especially those of conservation concern (as per the ecological report) exposed during the closure of the site should be captured for later release or translocation to adjacent suitable habitat
Blasting and Drilling (if any)	<ul style="list-style-type: none"> In the event that blasting or rock drilling is required, the following recommendations will be implemented. The contractor shall take all necessary precautions to prevent damage to special features and the general environment, which include minimization of, and if required, removals of any fly rock Environmental damage caused by blasting / drilling shall be repaired at the contractor's expense to the satisfaction of the ECO and RE No blasting may be done on Sundays. Careful sealing off of the site and surrounding area will be carried out to ensure that all personnel are removed from the site and its immediate surrounds. Adequate warning must be provided prior to all blasting to all site staff and neighbours. All clear signals must also be clearly given 	Aesthetic/ visual	<ul style="list-style-type: none"> Prevent unnecessary removal of vegetation outside the width of the working area by clearly demarcating the working area Remove spoil material from the area once the trench has been filled Revegetate disturbed ground in the working area by seeding and spreading of vegetation that has been removed from the trench at the start of construction
General: Crime, safety and security	<ul style="list-style-type: none"> Ensure that only suitably qualified personnel use construction vehicles Ensure that the contact details of the police or security company and ambulance services are available on site Limit access to the construction crew camp to construction workers through access control Ensure that the handling of equipment and materials is supervised and adequately instructed Vehicular traffic during construction activities must be limited to a maximum speed limit of 30km/hr. Site notices informing the public of the planned activities must be placed at visible locations a few days prior to any blasting 	Demobilisation	<ul style="list-style-type: none"> The site is to be cleared of all construction materials, including litter prior to hand over Fences, barriers and demarcations associated with the construction phase must be removed from the site The site must be fully rehabilitated and stabilized (for example, through re-vegetation) A meeting must be held on site between the Engineer, ECO and the Contractor to approve all remediation activities and ensure that the site has been restored to a condition approved by the Engineer Rehabilitation Activities of Environmental Cases identified must continue throughout the defect liability period
Destruction/protection of heritage resource (if any)	<ul style="list-style-type: none"> Should any archaeological artifacts be exposed during excavation, work on the area where the artifacts were found, shall cease immediately and the ECO shall be notified as soon as possible, the ECO shall then notify the National

DUMPSITE, NJIRU DISTRICT, DANDORA DIVISION,
DANDORA LOCATION AND DANDORA SUB-LOCATION

Pursuant to regulation 21 of Environmental (Impact Assessment and Audit) regulations, the National Environmental Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the implementation of the proposed decommissioning of Dandora dumpsite.

The project will involve decommissioning of the Dandora dumpsite due to the major negative environmental impacts of the local environment as a result of uncontrolled and open dumping.

The dumpsite is located in the East of Nairobi City, surrounded by Dandora estate, Lucky Summer, Ngomongo, Korogochi villages and the Nairobi river. The project is located within the following administrative boundaries: Njiru District, Dandora Division, Dandora location and Dandora sub-location.

The following are the anticipated impacts and proposed mitigation measures:

<i>Environmental Impacts</i>	<i>Mitigation Measures</i>
Leachate management	<ul style="list-style-type: none"> Discharge of leachate from the dumpsite must be properly contained for treatment and disposal. The leachate should be analyzed regularly to determine the chemical composing, this will inform the threshold of treatment needed. Leachate should never be released into the sewer system, storm drain and the rivers before proper treatment
Methane / Hydrogen Sulphide and other gases management	<ul style="list-style-type: none"> Ventilation pipes fitted with gas traps and flares should be installed.
General: wastes	<ul style="list-style-type: none"> Clearing of bushes, excavation and cutting should be restricted within the project area. All solid waste will be collected at a central location at each site and will be stored temporarily until removal to an appropriately permitted landfill site. No dumping within the surrounding area is to be permitted. Where potentially hazardous substances are being disposed of, a chain of custody document should be kept with the environmental register as proof final disposal. Waste generated at the site should be sorted by the contractor and disposed of in a suitable manner into different waste streams (including general and hazardous waste). Wherever possible recycling should be carried out.
Liquid wastes	<ul style="list-style-type: none"> The contractor shall ensure that any liquid waste generated during decommissioning is disposed to a proper stabilizing lagoon; No decommissioning liquid wastes should be allowed to enter the wastewater or natural drainage systems No liquid waste shall be disposed off into soil; Storm water should be to avoid possibility of surface flow entry into the site from any adjacent area. Storm water drains in the area should be routinely inspected by the environmental officer for solid waste to avoid blockages and associated problems
Fire prevention and control	<ul style="list-style-type: none"> All reasonable and precautionary measures to prevent uncontrolled fires at the site due to decommissioning activities will be undertaken.

Erosion Control	<ul style="list-style-type: none"> Accidental fires will be reported to emergency teams, as well control with appropriate equipment located at site and properly documented. Ensure that there is basic firefighting equipment available on site as per requirement of the local Emergency Services. Any construction materials should be screened or covered to prevent off-site movement (primarily windblown soil) and the surplus material should be removed from site to an approved disposal site. Striping of vegetation should be limited to areas where civil works will be undertaken. Berming of open trenches to prevent them from being washed away by run-off.
Dust Control	<ul style="list-style-type: none"> During the decommissioning, phase windblown dust and sand may generate considerable negative impacts (reduced visibility for vehicles travelling along adjacent roads). Mitigation measures such as the use of water bowyers and wetting down, as well as the erection of shade netting screens to prevent
Machinery Management	<ul style="list-style-type: none"> All vehicles, equipment, fuel and petroleum services and tanks must be maintained in good condition that prevents leakage and possible contamination of soil or groundwater. Decommissioning machinery should be located away from sensitive areas when parked for extended periods of time. A dedicated parking area should be defined with drip trays beneath any leaking equipment to prevent soil contamination by the discharge from the machinery.
Emergency Procedures	<ul style="list-style-type: none"> The Contractor shall submit Method Statements covering the procedures and response plan for the main activities, which could generate emergency situations through accidents or neglect of responsibilities. These situations include, but are not limited to: <ul style="list-style-type: none"> - Accidental fires - Accidental leaks and spillages - Vehicle and plant accidents - Blasting (if required)
Health and Safety	<ul style="list-style-type: none"> The Contractor shall comply with all standard and legally required health and safety regulations as promulgated under the Occupational Health and Safety Act 2007 and associated regulations. The contractor must provide and maintain personal protective equipment and facilities to employees working with hazardous chemical substance. Official training in the correct fit, use, care, storage and limitations of all Personal Protective Clothing, Respiratory and Hearing Equipment must be given to the employees.
Air pollution	<ul style="list-style-type: none"> Un-surfaced roads and temporary roads must be regularly graded and watered to control dust. Active earth work areas, stockpiles and loads of soil being transported must be watered to reduce dust.

- Measure must be taken to immediately mitigate a situation in which excessive fugitive dust is observed. Works being undertaken must be undertaken with caution, or phase down while the source is being actively investigated and suppression measures are implemented.
- All areas disturbed during closure of the site that are not required for a specific activity must be re-vegetated. Disturbed soils, slopes and areas of open excavation must be minimized to avoid wind erosion.
- Diesel exhaust emissions from heavy machinery on site (excavators, front end loaders and hauling trucks) must be controlled and minimized by regular checks and servicing of vehicles. Any construction vehicle found to be emitting excessive smoke should be stopped from the operations for some mechanical attention before it could continue.

Surface and ground water

- The Decommissioning of Dandora dumpsite must preferably take place during the dry months. If construction activities take place in the wet months appropriate measures must be taken to control storm water and implemented to prevent erosion.
- Ensure that excavated and stockpiled soil material is stored and bermed on the higher lying areas.
- Vegetation clearance must be kept to a minimum to reduce the risk of soil erosion.
- Adequate provision must be made for sanitation for the construction workers. Septic tanks on site are to be emptied promptly when they fill up
- Construction vehicles are to be maintained in good working order, to reduce the probability of leakage of fuels and lubricants. No servicing of vehicles is to be undertaken in close proximity to watercourses.

The full report of the proposed project is available for inspection during working hours at:

- Director General, NEMA, Popo Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.
- Permanent Secretary, Ministry of Environment and Mineral Resources, NHIF Building, Community, P.O. Box 30521, Nairobi.
- Provincial Director of Environment, Nairobi Province.
- District Environment Officer, Kasarani and Njiru.

The National Environment Management Authority invites members of the public to submit oral or written comments within thirty (30) days from the date of publication of this notice to the Director General, NEMA, to assist the Authority in the decision making process of the plan. (EIA/5/2/787)

IMPORTANT NOTICE TO SUBSCRIBERS TO THE KENYA GAZETTE

THE following notes are for the guidance of persons submitting "copy" for inclusion in the *Kenya Gazette, Supplement*, etc.:

- (1) *The Kenya Gazette* contains Notices of a general nature which do not affect legislation. They are, therefore, submitted to the Government Printer directly.
- (2) *Legislative Supplement* contains Rules and Regulations which are issued by the Central Government. Because of this, they must be submitted to the Government Printer through the office of the Attorney-General.
- (3) *Bill Supplement* contains Bills which are for introduction in the National Assembly.
- (4) *Act Supplement* contains Acts passed by the National Assembly.

All "copy" submitted for publication should be prepared on one side of an A4 sheet no matter how small the Notice is, each page being numbered and should be typewritten with double spacing. Copy should be clear, legible and contain no alterations.

Particular attention should be paid to the following points:

- (i) Signature must be supported by rubber-stamping or typing the name of the signatory in capital letters.
- (ii) Dates must be correct and filled in where necessary.
- (iii) Care should be taken to ensure that all headings to Notices and references to legislation are up to date and conform with the Revised Edition of the Laws of Kenya.

EXTRACT FROM THE CODE OF REGULATIONS, SECTION D—

Kenya Gazette

"D 34. (1) Communications for the *Kenya Gazette* should reach the Government Printer not later than 9 a.m. on Friday of the week before publication is desired. The Government Printer will not publish communications received after that hour until the next subsequent issue of the Gazette.

(2) Ministries will be required to pay for the *Kenya Gazette* and to meet the cost of advertising in it.

It is emphasized that these notes are for guidance only, but it is requested that persons submitting copy for publication first satisfy themselves that such copy is complete in every respect.
