received an Environmental Impact Assessment Study Report for the above proposed project.

The Proponent (Dang'ai Herbal Limited) is proposing to construct a light industry for opaque beer brewing. The plant will consist of a production hall (brewing area, cold storage, laboratory, technical room, store and records room, offices, board room, loading and offloading area, washrooms, septic tank and its soak pit, gate house and a parking bay. A perimeter stone wall will be erected around the plant in addition to waste water system for treatment, purification and recycling of waste water.

Below is a summary of the anticipated impacts and the proposed mitigation measures:

Impact	Proposed Mitigation Measures
Soils erosion and siltation of water bodies	<ul style="list-style-type: none"> Site excavation works to be planned such that a section is completed and rehabilitated while another section begins. Apply soil erosion control measure such as leveling of the project site to reduce run-off velocity and increase infiltration of storm water into the soil
Noise pollution	<ul style="list-style-type: none"> The noisy construction works will entirely be planned to be during daytime. Ensure that all generators and heavy-duty equipments are insulated or placed in enclosures to minimize ambient noise levels Workers' operating noisy machines to be provided with ear muffs or plugs. Noise hazard signs should be put displayed where necessary. Iron sheets or other suitable means should be used to reduce noise exposure to neighbor or passersby. Noisy machinery should be modified or replaced with better machinery, well lubricated and serviced
Disturbances of soil and destruction of soil structure by excavation	<ul style="list-style-type: none"> Excavation material will be loaded into trucks and be transported to designated disposal sites. Design and implement an appropriate landscaping program to help in re-vegetation of part of the project area after construction. Reuse of the topsoil in landscaping
Waste generation and scattering by workers	<ul style="list-style-type: none"> Provide waste collection bins or skips and empty them frequently. Ensure that construction materials left over at the end of construction are used in other projects rather than being disposed off. Provide facilities for proper handling and storage of construction materials to reduce the amount of waste caused by damage or exposure. Minimize waste through accurate estimation of the sizes and quantities, rather than cutting materials to size. Collect non-toxic solid water for proper disposal
Damage to utility cables	<ul style="list-style-type: none"> Contractor should consult, KPC, Orange, EWASCO and CCM on the presence of utility cables
Oil Spills	<ul style="list-style-type: none"> Ensure that all transport and construction equipment are in good service condition and no service is carried out on sites. Ensure that no fuels or oils are stored on sites but procure them when needed.
