(No. 8 of 1999)

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY
ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT
FOR THE PROPOSED MODERN SLAUGHTER HOUSE ON PLOT
NOS.LR KWALE /MARENJE/434 & 462, DZOMBO LOCATION,
MSAMBWENI DISTRICT

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) Regulations, the National Environment Management Authority, (NEMA) has received an environmental impact assessment study report for the construction of the proposed modern slaughter house.

The project will involve building of a modern slaughter house with full slaughter house sanitary facilities, a livestock holding area, cold storage and wastewater treatment plant. The slaughter house will have a capacity of up to 300 heads of cattle and 600 heads of goats per day.

The proposed site for the modern slaughterhouse facility in Kwale County, Msambweni district, Dzombo location, Mrima sub-location on plot numbers LR Kwale /Marenje/434 & 462 The proposed project site is approximately 1.3 kilometres off the Lunga Lunga highway at a turn off called corner ya Nyati. The proposed project site measures approximately 150 acres (60 hectares).

The following are the anticipated impacts and proposed mitigation measures:

Environmental Impacts Mitigation Measures

- | | |
|----------------------------------|--|
| Livestock movement and diseases | <ul style="list-style-type: none"> All animals to the slaughter house will be moved by trucks for the livestock market centres at which they have been bought. No animal will be allowed into the slaughter house premises on hooves. All livestock will be moved through the correct procedure as set out in the Animal disease Act. The cattle holding area will be securely fenced to ensure that the cattle within the slaughter house do not interact with the local livestock/animal population; and Livestock suspected to be sick must be immediately isolated and the nearest veterinary officer notified. |
| Effluent generation and handling | <ul style="list-style-type: none"> An effluent treatment plant (ETP) must be designed and adequately sized to be able to treat all the effluent generated from the slaughterhouse operations. Management to apply for a license to discharge effluent to environment. Employees to be trained on the operation and maintenance of whatever effluent treatment system that will be put in place. Any pipes leakages and bursts in the ETP to be promptly fixed. Local ground water to be monitored periodically by sampling and testing. water from borehole in the neighbourhood every three months to check whether there are any traces of effluent finding their way to ground water aquifers. Treated effluent to be periodically analysed (every three months) to ensure BOD is maintained at 30mg/l or less and COD at 50mg/l or less. Maximising the segregation of blood by designing suitable blood collection facilities and allowing sufficient time for bleeding of carcasse during slaughtering (typically seven minutes is sufficient). Sweeping up solid materials for use as by-products, instead of washing them down the drain. Fitting drains with screens and/or traps to prevent solid materials from entering the effluent system. Using offal transport systems that |

	<p>avoids or minimise the use of water.</p> <ul style="list-style-type: none"> • Using water sprays with a pressure of less than 10 bar for carcass washing to avoid removing fat from the surface. • Using dry cleaning techniques to pre-clean process areas and floors before washing with water; and • Wastewater to be treated to environmental acceptable standards before discharge to the environment. 		
Solid waste from the slaughterhouse	<ul style="list-style-type: none"> • Solid waste from the facility to be handled, managed and disposed in accordance to the EMCA waste management regulations 2006; • Waste segregation at source. • Waste reuse, reduce and recycle. • Contract a NEMA certified waste collection firm to collect solid waste for disposal. • Construction of storm water drainage system; and • Installation of an incinerator and pit for handling of condemned carcasses. 		
Increased traffic incidences	<ul style="list-style-type: none"> • Provision of an acceleration & deceleration lane. • Provision of internal parking of all trucks to be used. • Provision of 2 gates into the project site. • Setting up of appropriate road markings, warning signs & speed limits along the road section. • Scheduling delivery and export of goods out of the facility at off peak traffic flow times. • Engagement of a traffic marshal to coordinate vehicle movement in and out of the facility; and • Erection of a public information board on the A14 highway and project site. 		
Sewage generation and handling	<ul style="list-style-type: none"> • All sewage to be first treated as provided for in the fourth schedule of the Environmental Management and Coordination (Water Quality) Regulations, 2006 before discharge into the environment. • Management to apply for effluent discharge license as provided for in the Environmental Management and Coordination (Water Quality) Regulations, 2006. • Sewage line and allied infrastructure to be regularly maintained; • Manhole covers and those of inspection chambers, soak pit and septic tanks to always be tightly fastened (air tight) to avoid escape and release of odour. • Regularly check the sewage line for blockage and bursts for prompt repair; • Regular monitoring of local ground water to be done to ensure that no contamination occurs. • Ensure only NEMA licensed company exhausts the sludge from the sewage system. • Ensure the vehicle used to carry exhausted sewage is NEMA registered; and • Ensure that once exhausted the sewage is disposed at a NEMA licensed facility 		
		<p>for sewage management and disposal.</p> <ul style="list-style-type: none"> • Squatters to be assisted to settle down in their new location. • Squatters to be allowed to harvest their crops from the proposed project site after maturity; and • Squatters to be given priority in employment once the slaughterhouse is operational. 	
		<p>Relocation of squatters</p> <ul style="list-style-type: none"> • Squatters to be assisted to settle down in their new location. • Squatters to be allowed to harvest their crops from the proposed project site after maturity; and • Squatters to be given priority in employment once the slaughterhouse is operational. 	
		<p>Increased demand for water and electricity supply to the area</p> <ul style="list-style-type: none"> • Approximate volumes of water to be required during construction of the project to be computed in order to put in place mechanisms of reliable supply. • Approximate volumes of water to be required per project in a specified time period to be computed in order to put in place mechanisms of reliable supply. • Water saving devices such as push taps to be installed to minimize loss through loose taps. • Sinking of borehole to be done after obtaining clearance and licensing from all relevant government authorities. • Energy saving bulbs to be used in lighting. • Generator to be installed to be automatic to save on fuel consumption when there is electricity from national grid. • Electricity to be used in heating and warming to be mainly solar; and • Wind energy to be harnessed and used in pumping water 	
		<p>Public and occupation safety and health</p> <ul style="list-style-type: none"> • Proper personal protective equipment. • Contractors and the management shall use barriers and guards as necessary to protect employees and visitors from physical hazards; • Signage -danger warning or CAUTION will be put at strategic places. • The contractor and management shall adhere to the provisions of environmental health and safety plan (EHS). • Ensure that the operational manuals are available and accessible for every equipment /machinery. • Dust suppression. • Development of occupational safety and health guidance plans; and • Form a safety and health committee to coordinate safety and health issues at workplace.

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT

FOR THE PROPOSED HOUSING ESTATE ON PLOT NO. 12715/449, MLOLONGO AREA IN MAVOKO MUNICIPALITY, ATHI RIVER

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) Regulations, the National Environment Management Authority, (NEMA) has received an environmental impact assessment study report for the construction of the proposed housing estate in Mlolongo, Athi River.

The project will involve construction housing estate of twelve (12) similar, five (5)-storey residential blocks each floor comprising eight (8), two bed roomed units, totaling to 576 units to be used as single family dwellings. The estate will have ample parking within the perimeter masonry wall.

The proposed site is on a 2.041 hectare parcel of land, Plot L.R. No. 12715/449, Mlolongo area in Mavoko Municipality. It is situated near Syokimau along Beijing Road about 250M off Mombasa Road.

The following are the anticipated impacts and proposed mitigation measures:

<i>Environmental issue</i>	<i>Mitigation Measures</i>
Loss of top soil cover	<ul style="list-style-type: none"> Avoid unnecessary movement of soil materials from the site. Provide soil conservation structures on the areas prone to soil erosion mostly to reduce impact by the run-off.

Increased power surge and black outs in addition to increased energy costs.	<ul style="list-style-type: none"> Control construction activities during rainy/wet conditions to control soil movement. Resurface/pave open areas after the completion of the project. Introduce suitable and well-managed vegetation to generate surface covers on the open areas and to control soil movement by erosion agents including water and wind. Provide suitable storm water drainage channels to effectively discharge water to safe areas. Such channels need to be regularly maintained and repaired to avoid point discharges in case of breakages or blockages. Switch off all electrical appliances when not in use. Optimize operations of electrical equipment to enhance energy conservation. Put off all lights immediately when not in use/required or are not needed. At end of functions take necessary measures to switch off lights immediately. Use energy conserving electric lamps for general lighting. Make use of alternative source of energy such as solar power, which is renewable. 	disposal	<p>consider the estimate discharges from individual sources and the cumulative discharge of the entire project. The gradient should be sufficient to ensure and maintain maximum depth of flow and junctions effectively designed and installed.</p> <ul style="list-style-type: none"> All drain pipes passing under the building, driveway or parking should be of heavy duty PVC pipe tube encased in 150mm concrete surround. All manholes on drive ways and parking areas should have heavy-duty covers set and double sealed airtight as approved by specialists. All waste pipes should have cleaning eyes accessible from outside and free to every part of the system for inspection, cleaning and repair Sanitary facilities should be kept clean always, through regular washing
Noise and vibration	<ul style="list-style-type: none"> Construction works should be carried out only during the specified time which is usually as from 0800 hrs to 1700 hrs. Machineries should be maintained regularly to reduce noise resulting from friction. Workers should be provided with Personal Protective Equipment such as earmuffs when operating noisy machinery and when in a noisy environment. There should not be unnecessary honking of the involved machinery. Provision of bill boards at the construction site gates notifying of the construction activity and timings. Shield the areas under works to reduce noise propagation. 	Security and fire	<ul style="list-style-type: none"> Protecting the Site from a fire outbreak will be achieved through sound engineering, reliable operations, written operating procedures, trained employees, good preventive and predictive maintenance techniques and commitment to safety. The proponent and the contractor shall provide firefighting equipment during the construction and operation phases of the building facility and also ensure that the following are done;
High water demand	<ul style="list-style-type: none"> Avoid excessive use of the water supplied on site Water use should follow approvals by the Council's Water Department. Encourage water reuse/recycling during both construction and operational phases. Roof catchments should be provided with rainwater harvesting systems to enhance collection and storage of the run-off. Such water can be used in watering flower gardens and all kinds of cleaning required on site. Provide notices and information signs on means and needs to conserve water resource to awaken the civic consciousness with regard to water usage and management. Install water conserving taps that turn-off automatically when water is not in use. 	Surface drainage system	<ul style="list-style-type: none"> -Install and maintain firefighting equipment and machinery -Sensitize the workers on fire risks & use fireproof materials -Provide emergency numbers at strategic points. -Potable firefighting equipment are located at strategic points -Provision of security during the construction & operation phases. -Ensure that all workers have access to communication facilities (phones etc.) for quick emergency response.
Sewage and effluent	<ul style="list-style-type: none"> The design of the sewer layout should 		<ul style="list-style-type: none"> During construction, the design (of the drainage system) should ensure that surface flow is drained suitably into the public drains provided to control flooding within the site. Drainage channels should be installed in all areas that generate or receive surface water such as car parking, driveways and along the building block-edges of the roofs. The channels should be covered with gratings or other suitable and approved materials to prevent occurrence of accidents and entry dirt that would compromise flow of run-off. The channels should be designed with regards to the peak volumes such as periods or seasons when there is high intensity of rainfall which is also not common in the project area but just in case such an event occurs. they should never at any time be full due to the resulting heavy downpours. The drainage channels should ensure the safe final disposal of run-off /surface water and should be self-cleaning which

	means it should have a suitable gradient.
Increased dust and gaseous emissions	<ul style="list-style-type: none"> Storm water generated from roof catchments should be harvested, stored and made use in various household activities such as general cleaning. This will reduce run-off reaching the drainage channels. Paving of the side walkways, driveways and other open areas should be done using pervious materials such as cabro to encourage water recharge and reduce run-off volume Provide personal protective equipments, materials and clothing such as nose masks and goggles to workers during demolition and construction phases. Regular and prompt maintenance of construction machinery and equipment. This will minimize generation of hazardous gases and other suspended particulate matter. Control over areas generating dust particles. Such areas should be regularly cleaned or sprinkled with water to reduce dust. Such areas can be enclosed to mitigate effects of wind and hence controlling propagation of dust to the neighbours. Use environmentally clean fuels/gasoline such as Unleaded Gasoline (ULG).
Accidents and occupational risks	<p>The proponent and the contractor will ensure that:</p> <ul style="list-style-type: none"> The implementation of safety measures and emergency plans to contain accident risks associated with vehicle transport, operation of any sophisticated machinery and other related activities. All staff is trained on the use of any unfamiliar machinery and equipment that may pose danger to the user before they are allowed to use them. Particularly important is the provision of protective clothing or gear. These include working boots, overalls, helmets, goggles, earmuffs, masks, gloves among others. A fully equipped first aid kit. The contractor should have workmen's compensation cover. It should comply with workmen's compensation Act, as well as other ordinances, Regulations and Union Agreements. Adequate sanitary facilities should be provided and standard cleanliness maintained. Food handlers preparing food for the workers at the site should be controlled and monitored to ensure that food is hygienically prepared. Workers should always be sensitized on social issues such as drugs, alcohol and diseases. There should be a training program, if possible, to facilitate this. Regular maintenance of machinery on site should be done.
Solid and liquid waste generation	<ul style="list-style-type: none"> Special attention shall be paid to the handling and disposal of all solid waste generated during construction and operation phases. A reputable solid waste handler will be contracted to regularly collect solid

waste for appropriate disposal following the Local Authority Guidelines.

- There will be adequate provision of strategically placed waste bins all over the building compound to ensure that there is no idle litter
- The materials should be properly segregated and separated to encourage recycling of some of them. Some demolished stone materials can be used as backfills.
- Non-usable solid waste materials generated during the demolition and construction shall be transported for appropriate disposal in one of the designated dumping sites.
- The proponent undertakes to provide well constructed sewage lines all draining into the designated sewer system next to the site.

The full report of the proposed project is available for inspection during working hours at:

- Director-General, the National Environment Management Authority (NEMA), Popo Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.
- Permanent Secretary, Ministry of Environment and Mineral Resources, N.H.I.F. Building, Community, P.O. Box 30521, Nairobi.
- Provincial Director of Environment, Eastern Province.
- District Environment Officer, Machakos District.

The National Environment Management Authority invites members of the public to submit oral or written comments within thirty (30) days from the date of publication of this notice to the Director-General, NEMA, to assist the Authority in the approval process of the project.

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED BOUNDARY WALL, STOREY UNITS, MARKET STALLS, BRIDGES AND FOOTPATHS IN MUKURU AND KIBERA IN KENYA RAILWAY RESERVE

INVITATION OF PUBLIC COMMENTS

Pursuant to regulation 21 of Environmental (Impact Assessment and Audit) regulations, the National Environmental Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the implementation of the proposed boundary wall, storey units, market stalls, bridges and footpaths.

The project involves the construction of boundary wall, 1490 residential and 1539 business relocation units, market stalls, bridges and footpaths.

The project area stretches from the 534/6 km mark to the 539/9 km mark within the Nairobi- Kibera section (5.3 Km) and Likoni Road to Mombasa Road within the Makadara- Embakasi section (7 Km) totaling some 12.3 Kilometers.

The following are the anticipated impacts and proposed mitigation measures:

<i>Environment al/Social</i>	<i>Management & Mitigation and /or Enhancement Measures</i>
----------------------------------	---

Issue

Oil spillage	<ul style="list-style-type: none"> • Ensure no spillage occurs 		to reduce waste at site
Materials spillage	<ul style="list-style-type: none"> • Ensure use serviceable machinery • Ensure no littering of the compound 		<ul style="list-style-type: none"> • Dispose waste more responsibly by contracting a registered waste handler who will dispose the wastes at designated sites or landfills only.
Littering the site	<ul style="list-style-type: none"> • Ensure safe storage of materials • Ensure accurate budgeting and estimation of actual construction material requirements to ensure that the least amount of material necessary is ordered. • Ensure that damage or loss of materials at the construction site is kept minimal through proper storage. • Use at least 5%-10% recycled refurbished or salvaged materials to reduce the use of raw materials and divert material from landfills. 	Air Pollution	<ul style="list-style-type: none"> • Waste collection bins to be provided at designated points on site • Ensure strict enforcement of on-site speed limit regulations. Regularly watering access roads and borrow pit sites in close proximity to human settlements during the dry season in order to suppress dust generation and particulate settlement • Avoid excavation works in extremely dry weather. • Mixing should not be done on windy location • All access roads and work areas to be regularly sprinkled with water • Sprinkle water on graded access routes when necessary to reduce dust generation by construction vehicles • Personal Protective equipment to be provided to employees (breathing protection gear)
Vegetation disturbance	<ul style="list-style-type: none"> • Ensure proper demarcation and delineation of the project area to be affected by construction works. • Specify locations for vehicles and equipment, and areas of the site which should be kept free of traffic, equipment, and storage. • Designate access routes and parking within the site. • Introduction of vegetation (trees and grass) on open spaces and around the project site and their maintenance • Design and implement an appropriate landscaping programme to help in revegetation of part of the project area after construction. 	Noise and Vibration	<ul style="list-style-type: none"> • Sensitise construction vehicle drivers and machinery operators to switch off engines of vehicles or machinery not being used. • Sensitise construction drivers to avoid reversing of vehicle engines or hooting • Ensure that construction machinery is kept in good condition to reduce noise generation. Limiting the extraction of gravel from borrow pits to normal working hours as legally provided for by Kenyan Laws and not outside 7:00 to 18:00 hours; • Ensure that all generators and heavy duty equipment are insulated or placed in enclosures (containers) to minimize ambient noise levels. • Trees to be planted around the site to provide some buffer against noise propagation • The noisy construction works will entirely be planned to be during day time when most of the neighbours will be at work
Increased storm water, runoff and soil erosion	<ul style="list-style-type: none"> • Surface runoff and roof water shall be harvested and stored in reservoirs so that it can be used for wetting and/or cooling purposes. • A storm water management plan that minimizes impervious area infiltration by use of recharge areas and use of detention and/or retention with graduated outlet control structure will be designed. • Apply soil erosion control measures such as levelling of the project site to reduce run-off velocity and increase infiltration of storm water into the soil. • Apply soil erosion control measures such as levelling of the project site to reduce run-off velocity and increase infiltration of storm water into the soil. • Ensure that construction vehicles are restricted to use existing graded roads • Ensure that any compacted areas are ripped to reduce run-off. Site excavation works to be planned such that a section is completed and rehabilitated before another section begins. • Interconnected open drains will be provided on site. • Roof catchments will be used to collect the storm water for some office uses. • Construction of water storage tanks to collect storm water for office and plant uses. 	Increased energy consumption	<ul style="list-style-type: none"> • Ensure electrical equipment, appliances and lights are switched off when not being used • Install energy saving bulbs/tubes at all lighting points instead of incandescent bulbs which consume higher electric energy • Plan well for transportation of materials to ensure that fossil fuels (diesel, petrol) are not consumed in excessive amounts • Monitor energy use during construction and set targets for reduction of energy use.
Increased solid waste generation	<ul style="list-style-type: none"> • Use of an integrated solid waste management system i.e. through a hierarchy of options: 1. Reduction at source 2. Recycling 3. Reusing 4. Incineration 5. Sanitary landfilling. • Through accurate estimation of the dimensions and quantities of materials required. • Use of durable, long-lasting materials that will not need to be replaced as often, thereby reducing the amount of construction waste generated over time • Provide facilities for proper handling and storage of construction materials to reduce the amount of waste caused by damage or exposure to the elements • Use building materials that have minimal or no packaging to avoid the generation of excessive packaging waste metal and plastic containers 	High Water Demand	<ul style="list-style-type: none"> • Water to be brought in from the City Water and Sewerage Company • Harness rainwater for office & gardening • Install water conserving taps that turn-off automatically when water is not being used • Promote recycling and reuse of water as much as possible • Install a discharge meter at water outlets to determine and monitor total water usage • Promptly detect and repair of water pipe and tank leaks • Sensitise construction workers to conserve water by avoiding unnecessary toilet flushing etc • Ensure taps are not running when not in use
		Generation of wastewater	<ul style="list-style-type: none"> • Provide means for handling/treating sewage generated at the construction site • Provide means for handling/treating sewage

- generated at the construction site
- Monitor effluent quality regularly to ensure that the stipulated discharge rules and standards are not violated
 - Ensure compliance with The OSHA (Building Operations and Works of Engineering Construction Rules), L.N. 40 of 1984
- Human Health And Safety.
- Sensitizing local communities not to allow children to play in flooded borrow pits during the rainy season; Conducting indoor spraying for mosquitoes. Conducting an awareness campaign covering construction equipment operators at borrow pits and the local community on matters of HIV/AIDS
- Oil spills
- Install oil trapping equipments in areas when there a likelihood of oil spillage such during the maintenance of construction equipment. Soil in such an area will be well protected from contamination
- Social and Economic Effects
- Compensation and Relocation Plan to take into account compensation for loss of location shelter, trading stalls, crops and other structures. Limiting borrow pit sites to infertile and uncultivated pieces of land as much as is possible and Compensating individuals for any losses incurred to personal property as a result of the operation of the borrow pits.
 - Enhance consultations with the locals on the activities affecting them and include them on impact reduction
- Solid waste generation
- Provide solid waste handling facilities such as waste bins and skips
 - Ensure that solid waste generated at the proposed development is regularly disposed of appropriately at authorized dumping sites
 - Ensure that occupants of the proposed development manage their waste efficiently through recycling, reuse and proper disposal procedures.
 - Donate redundant but serviceable equipment to charities and institutions
- Sewage release into environment
- Provide adequate and safe means of handling sewage generated at the proposed
- Energy Consumption
- Switch off electrical equipment, appliances and lights when not being used
 - Install energy saving fluorescent tubes at all lighting points within the proposed development instead of bulbs which consume higher electric energy
 - Monitor energy use during the operation of the project and set targets for efficient energy use
 - Sensitise the occupants to use energy efficiently
- Water Exploitation.
- Promptly detect and repair of water pipe and tank leaks
 - Residents to conserve water e.g. by avoiding unnecessary toilet flushing.
 - Ensure taps are not running when not in use
 - Install water conserving taps that turn-off automatically when water is not being used
 - Install a discharge meter at water outlets to determine and monitor total water usage
- Health & Safety Risks.
- Implement all necessary measures to ensure health and safety of workers and the general public during operation of the proposed development project as stipulated in Factories and Other Places of Work Act Cap 514
- Safety & Security of the premises and
- Ensure the general safety and security at all times by providing day and night security guards and adequate lighting within and around the premises during night hours.

The proposed transferee is Lion of Kenya Insurance Company Limited of 7th Floor, Williamson House, 4th Ngong Avenue, P.O. Box 30190-00100, Nairobi ("LOK")

Following receipt of the approval for the proposed transfer by the Minister of Finance, ICEA intends to transfer its general insurance business to LOK. ICEA will retain all of its long-term insurance business. Details of the general insurance business which will be transferred to LOK are set out in a Statement of Particulars which is available for public inspection as explained below.

The application for approval of the proposed transfer was made to the Minister of Finance through the Commissioner of Insurance pursuant to the provisions of section 113 of the Insurance Act.

Copies of a statement setting out particulars of the transfer have been deposited at the following offices:

1. Insurance Company of East Africa Limited of 17th Floor, ICEA Building, Kenyatta Avenue, P.O. Box 46143-00100, Nairobi.
2. Lion of Kenya Insurance Company Limited of 7th Floor, Williamson House, 4th Ngong Avenue, P.O. Box 30190-00100, Nairobi.
3. The Commissioner of Insurance, Zep-Re Place, Off Mara Road, Upper Hill, P.O. Box 43505-00100, Nairobi.

The copies of the Statement of Particulars will be available for inspection by any person interested during normal business hours for a period of thirty (30) days from the date of publication of this notice.

Any interested person (including any employee, director, shareholder or policyholder) who has reasonable grounds for believing that he would be adversely affected by the transfer, is invited to write or make oral representations to the Minister within thirty (30) days from the date of publication of this notice, stating the grounds on which he believes he would be adversely affected by the carrying out of the scheme of transfer.

Dated 18th October 2011.

IMPORTANT NOTICE TO SUBSCRIBERS TO THE KENYA GAZETTE

THE following notes are for the guidance of persons submitting "copy" for inclusion in the *Kenya Gazette, Supplement*, etc.:

- (1) *The Kenya Gazette* contains Notices of a general nature which do not affect legislation. They are, therefore, submitted to the Government Printer directly.
- (2) *Legislative Supplement* contains Rules and Regulations which are issued by the Central Government. Because of this, they must be submitted to the Government Printer through the office of the Attorney-General.
- (3) *Bill Supplement* contains Bills which are for introduction in the National Assembly.
- (4) *Act Supplement* contains Acts passed by the National Assembly.

All "copy" submitted for publication should be prepared on one side of an A4 sheet no matter how small the Notice is, each page being numbered and should be typewritten with double spacing. Copy should be clear, legible and contain no alterations.

Particular attention should be paid to the following points:

- (i) Signature must be supported by rubber-stamping or typing the name of the signatory in capital letters.
- (ii) Dates must be correct and filled in where necessary.
- (iii) Care should be taken to ensure that all headings to Notices and references to legislation are up to date and conform with the Revised Edition of the Laws of Kenya.

EXTRACT FROM THE CODE OF REGULATIONS, SECTION D—

Kenya Gazette

"D 34. (1) Communications for the *Kenya Gazette* should reach the Government Printer not later than 9 a.m. on Friday of the week before publication is desired. The Government Printer will not publish communications received after that hour until the next subsequent issue of the Gazette.

(2) Ministries will be required to pay for the *Kenya Gazette* and to meet the cost of advertising in it.

It is emphasized that these notes are for guidance only, but it is requested that persons submitting copy for publication first satisfy themselves that such copy is complete in every respect.
