**THE ENVIRONMENTAL MANAGEMENT AND
CO-ORDINATION ACT**
(No. 8 of 1999)

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY

**ENVIRONMENTAL IMPACT ASSESSMENT STUDY
REPORT FOR THE PROPOSED RESIDENTIAL DEVELOPMENT
AND PETROL STATION ON L.R. NO. KISUMU/BLOCK 7/197,
KISUMU TOWN**

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) Regulations, the National Environment Management Authority (NEMA) has received an environmental impact assessment study report for the implementation of the proposed residential development and service station.

The proposed development will comprise construction of both a commercial building and a filling station.

The development will see the construction of a seven storey building on L.R No. Kisumu / Block 7 / 197, located within the town area of Kisumu off the main Oginga Odinga street on Kendu road at a distance of about 50 meters from the junction of Oginga Odinga street and Kendu road. The development will see the construction of:

- Ground floor: filling station, garage, office, lubricant mart, gents and ladies.
- First floor: Seminar hall, Offices, Gents and ladies.
- Second to sixth floor: Nine self contained rooms in each floor.
- Seventh floor: Restaurant.

The project anticipates the following impacts and mitigation measures:

*Possible Impacts**Mitigation Measures*

Air pollution

- Control speed and operation of construction (materials) vehicles.
- Water should be sprayed during the construction phase.

*Possible Impacts**Mitigation Measures*

Noise Pollution

- Regular maintenance of construction plant and equipment.
- Engage sensitive construction workers.
- Sensitize drivers of construction machinery on effects of noise.
- Maintain plant equipment.
- Construction activities to be restricted to daytime.
- Workers in the vicinity of high-level noise to wear safety and protective gear.
- Provide barriers such as walls and trees around site boundaries to provide some buffer against noise proration.

Public health and occupations safety

- Ensure proper solid waste disposal and collection facilities.
- Ensure effective waste water management.
- Design of septic tank system should be as provided in the plans.
- Sensitize residents on environmental management.
- Provision of personal protective equipment (PPE).

Fire outbreak

- Install fire fighting equipment and sensitize the users on fire risks.
- Adopt effective emergency response plan.
- Provide emergency numbers at strategic points.

Waste water drainage

- Connect to wastewater drainage system.
- Provision of grates to cover the drains.
- Adoption of the use of waste not taps.
- User education.
- Metering of the supply mains.

Oil, fuel spills and fire

- Installation of a grated drain and an oil interceptor.
- Concrete floor on the forecourt since it is impervious to oil.
- Effective preventive maintenance program for pumps and dispensers-fixing of leaking pups and dispensers.
- Provision of cover-alls to employees.
- Provision of dry powder fire extinguishers at pump islands.
- Inspection of fire extinguishers every 6 months.
- Post Emergency response plan on a frame that is accessible at all times.
- Procure and mount 'NO SMOKING' and 'NO MOBILE' signs.
- Procure and mount a First Aid Box.

Leakage from tanks and fuel adulteration

- Use hoses and fittings in good condition
- Repair the cement screeds in all the chambers using water proof material.
- Construction of a monitoring well next to the tanks to monitor leaks

*Possible Impacts**Mitigation Measures*

- Water sources -high water demand
- Inspect products before offloading – use water finding paste on a dipstick and or a hydrometer to confirm density/specific gravity
 - Management of water usage. Avoid unnecessary wastage.
 - Recycling of water at the construction phase where possible.
 - Make use of roof catchment's to provide water. For general purposes, sink borehole (s) but follow approval from relevant department.
 - Install water conserving taps that turn off automatically when water is not being used.

The full report of the proposed project is available for inspection during working hours at:

- (a) Director-General, the National Environment Management Authority (NEMA), Kapiti Road, off Mombasa Road, P.O. Box 67839–00200, Nairobi.
- (b) Permanent Secretary, Ministry of Environment and Mineral Resources, N.H.I.F. Community, P.O. Box 30521, Nairobi.
- (c) Provincial Director of Environment, Nyanza Province.
- (d) District Environment Office, Kisumu District.

The National Environment Management Authority invites members of the public to submit oral or written comments within thirty (30) days from the date of publication of this notice to the Director-General, NEMA, to assist the Authority in the approval process of the project.

B. M. LANGWEN,
for Director-General,
National Environment Management Authority.

GAZETTE NOTICE NO. 2214

THE ENVIRONMENTAL MANAGEMENT AND CO-ORDINATION ACT (No. 8 of 1999)

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED KENYA POWER AND LIGHTING COMPANY KINDARUMA–MWINGI–GARISSA 132KV TRANSMISSION LINE

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) Regulations, the National Environment Management Authority (NEMA) has received an environmental impact assessment study report for the proposed KPLC Kindaruma–Mwingi–Garissa 132kV transmission line.

The proposed development will comprise construction of a new single circuit 132kV transmission line between Kindaruma-Mwingi-Garissa power transmission, comprising the following:

- 132 kV line (Wolf) Kindaruma – Mwingi, 32km
- 132 kV line (Wolf) Mwingi – Garissa, 192km

The proposed line will serve the greater districts of Mwingi in Eastern Province, Tana River in Coast province, and Garissa in North-Eastern province and beyond.

The project anticipates the following impacts and mitigation measures:

Possible Impacts Mitigation Measures

- | | |
|--|---|
| Terrestrial and Aquatic Habitat Alteration | <ul style="list-style-type: none"> • Re-vegetation of disturbed areas with native plant species; • Use human labour as opposed to heavy machinery; • Selective removal of tall-growing tree species and the encouragement of low-growing grasses and shrubs in transmission line rights-of-way; • Vegetation management should not eradicate all vegetation; excessive vegetation maintenance may increase likelihood of the establishment of invasive species; • Minimizing clearing and disruption to riparian vegetation. |
| Soil erosion | <ul style="list-style-type: none"> • Soils excavated for the erection of towers shall be used for re-filling and shall not be left exposed to wind or water for long periods; • Riverine vegetation shall be minimally disturbed during the construction phase to reduce soil erosion and safeguard riverbank protection; • Re-plant degraded areas with local species to improve ground cover. |
| Air Pollution (dust, fuel emissions) | <ul style="list-style-type: none"> • Control speed of construction vehicles; • Prohibit idling of vehicles; • Water shall be sprayed during the construction phase on excavated areas; • Regular maintenance of plant and equipment; • Provision of dust masks for use when working in dusty conditions. |
| Hazardous substances | <ul style="list-style-type: none"> • Use of designated areas for repair and maintenance of vehicles and powered machinery to avoid oil spills. |
| Noise pollution | <ul style="list-style-type: none"> • Noise reduction / hearing protection devices when working with noisy equipment • The right-of-way or way leave must be strictly adhered to mitigate the effects of the unwanted noise |
| Management of Solid Waste | <ul style="list-style-type: none"> • Provide solid waste collection facility (disposal container) for the temporary storage of waste prior to disposal at an appropriate and designated location • The storage yards shall also be provided with solid waste disposal facilities such as waste bins or chutes |
| Electrocution from Live Power Lines | <ul style="list-style-type: none"> • Ensure physical integrity of structures is maintained; • Deactivating and properly grounding live power distribution lines before work is performed on, or in close proximity, to the lines; • Ensuring that live-wire work is conducted by trained worker only; • Ensure the worker is properly isolated and insulated from any other conductive object (live-line work). |
| Physical Hazards | <ul style="list-style-type: none"> • Appropriate hand and foot protection (PPE) during the manual clearing of vegetation; • Adopting ergonomic work flow designs that fit physical tasks to employees and not vice versa while maintaining a balance with productivity; |
| <i>Possible Impacts</i> | <i>Mitigation Measures</i> |

- Land acquisition and Resettlement
- Ensure that the displaced persons are:
 - Informed about their options and rights pertaining to resettlement;
 - Consulted on, offered choices among, and provided with alternatives;
 - Provided prompt and effective compensation at full replacement cost for losses of assets attributable directly to the project;
 - Offered support after displacement, for a transition period, based on a reasonable estimate of the time likely to be needed to restore their livelihood and standards of living;
 - Provided with development assistance in addition to compensation measures;
- Working at heights
- Testing structures for integrity prior to undertaking work;
 - Implementation of a fall protection program that includes training in climbing techniques and use of fall protection measures;
 - Inspection, maintenance, and replacement of fall protection equipment
 - Use of helmets and other protective devices will mitigate against scratches, bruises, punctures, lacerations and head injuries due to dropping objects.
- Aircraft navigation safety
- Conduct survey to ensure TL does not obstruct flights into airstrips in the vicinity
 - Obtain KCAA approval for mast heights
- Power line related avifauna mortalities
- To minimize collision, undertake wire marking to alert birds to the presence of power line, allowing them time to avoid the collision;
 - Build raptors platforms on top of pylons for roosting and nesting;
 - Monitor data on electrocuted avifauna along the proposed transmission line
- Sites of cultural heritage
- Conduct a cultural heritage impact assessment survey in the project area.
 - In the event of chance finds of physical cultural resources, notify the National Museums of Kenya immediately – the resource shall be protected from any interference or manipulation of any kind.

The full report of the proposed project is available for inspection during working hours at:

- (a) Director-General, the National Environment Management Authority (NEMA), Kapiti Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED PINEAPPLE PLANTATION EXPANSION PROJECT ON PLOT L.R NO. 10967 (MUKA MUKUU CENTRAL FARM) IN KYANZAVI DIVISION, MATUNGULU DISTRICT

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) Regulations, the National Environment Management Authority (NEMA) has received an environmental impact assessment study report for the implementation of the proposed pineapple plantation expansion project by Del Monte Kenya Limited.

The proposed project entails the following specific activities:

- Clearing of the existing scattered coffee trees and/or bushes
- Construction of a road network to link the various parts of the fields and connect onto the main Ol Donyo Sabuk – Tala road. The road construction shall be limited to grading and gravelling of existing roads, construction of feeder roads and upgrading of culverts where necessary
- Excavation of trenches for the laying of irrigation water piping
- Laying of pipes and back filling
- Land preparation that includes ploughing using rippers, mould board ploughs and disc harrows
- Use of polythene mulch
- Planting of pineapples using pre-treated planting material transported from DMKL main plantation
- Application of herbicides for weed control by the use of boom sprayers
- Application of ground and foliar fertilizers to boost plant development
- Carrying out pest control activities but practising integrated pest management practises
- Irrigation of the fields during the dry months of January-March and June-October using water extracted from the Athi River and, boreholes and other water reservoirs (dams)
- Harvesting of mature and ripe pineapples and
- Transportation of pineapples to DMKL factory

The project site is from Muka Mukuu Farmers Co-operative Society Ltd in Ol Donyo Sabuk area, Kyanzavi Division, Matungulu District in Eastern province.

The project anticipates the following impacts and mitigation measures:

Possible Impacts	Mitigation Measures
Dust	<ul style="list-style-type: none"> • Install signs to limit vehicle speed • Establish a buffer zone of fast maturing vegetation including tall grass between residential areas and the pineapple plantation • Provide workers with Personal Protective Equipment (PPE) • Regular road maintenance • Apply water sprays to frequently used roads during dry season
Noise	<ul style="list-style-type: none"> • Avoid construction activities during the night
Possible Impacts	Mitigation Measures
	<ul style="list-style-type: none"> • Regular servicing & maintenance of

	<p>machines especially tractor mufflers</p> <ul style="list-style-type: none"> • Use of ear protectors by workers • Engine tune-up • Establish inspection program for equipment • Equipment to be used as stationary power source to be enclosed • Avoid leaving vehicles idling for prolonged periods • Educate drivers to avoid unnecessary hooting 		<p>Storage of agrochemicals</p> <ul style="list-style-type: none"> • Avoid packaging and repackaging of agrochemicals • Provide emergency exits in storage areas • Provide spill containment • Use of fire resistant store • Provide adequate natural &/or artificial light • Post appropriate warning signs at strategic points • Stacking and shelving of agrochemicals in a securely & orderly way with clearly visible labels • Maintain a record of agrochemicals stored • Maintain adequate first aid facilities at the store • Post at strategic place "No smoking signs" • Install adequate number of fire fighting equipment • Provide washing facilities
Clearing of vegetation	<ul style="list-style-type: none"> • Establish vegetation zones on the banks of rivers, streams, around the edges of earth dams & the farms • Turning under pineapple crop residue • Execute a soil erosion prevention and control programme • Use of sediment traps, sedimentation ponds & diversion ditches • Dredging & regular maintenance of structures that capture sediments 		
Emissions from transporting trucks, bull dozers & tractors	<ul style="list-style-type: none"> • Regular servicing and maintenance of equipment • Establish inspection program for equipment 		
Occupational Health & Safety	<ul style="list-style-type: none"> • Provide workers with appropriate personal protective equipment • Maintain a file on material safety data sheets at the farm office for reference by the users • Train workers on MSDS including safe use of chemicals, first aid and use of personal protective equipment • Store agrochemicals as per the manufacturers recommendations • Provide chemical spill response kits at the farm office and where chemicals are stored • Practise Integrated Pest Management • Establish a buffer zone of fast maturing vegetation including tall grass between residential areas and the pineapple plantation Presence of workers in the farms during boom spraying should be prohibited • Spray booms to be provided with a coloured sign, visible from 30 metres, corresponding to the toxicity of the product being applied • Maintain records of agrochemical application at the farm office. • Document & display at the farm office, emergency response procedures • Maintain on site a record of incidents and accidents • Workers handling agrochemicals to undergo pre-employment & employment medical examinations • Maintain first aid kits at the farm office and all workstations with potential for works to be injured • Storage facilities of agrochemicals to be designated, constructed & equipped to reduce the risk of accidents • Document and display at the farm office procedures relating to pre-application, application and post-application of agrochemicals 	<p>Irrigation of the farms</p> <ul style="list-style-type: none"> • Avoid packaging and repackaging of agrochemicals • Provide emergency exits in storage areas • Provide spill containment • Use of fire resistant store • Provide adequate natural &/or artificial light • Post appropriate warning signs at strategic points • Stacking and shelving of agrochemicals in a securely & orderly way with clearly visible labels • Maintain a record of agrochemicals stored • Maintain adequate first aid facilities at the store • Post at strategic place "No smoking signs" • Install adequate number of fire fighting equipment • Provide washing facilities • Provide separate ventilated accommodation for personal protective equipment <p>Waste management</p> <ul style="list-style-type: none"> • Residue of liquid agrochemicals to be drained out of containers for reuse • Empty containers to be cleaned prior to disposal • Packages of dry powders & granules must be shaken out thoroughly into a mixing vessel or the applicator tank for re-use • Clean containers to be punctured in several places or crushed to make them unusable or returned to supplier 	
<i>Possible Impacts</i>	<i>Mitigation Measures</i>	<i>Possible Impacts</i>	<i>Mitigation Measures</i>

Interaction of DMKL workers with local community

- Avoid undue accumulation of waste
- Document & implement a waste management plan for the farms
- Proper waste segregation
- Collect chemical waste from boom sprayers & spray in fallow fields

THE ENVIRONMENTAL MANAGEMENT AND CO-ORDINATION ACT

(No. 8 of 1999)

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED KAMITI HOUSING DEVELOPMENT ON L.R. NO. 71/6, MAZIWA ESTATE, KAMITI ROAD, NAIROBI

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) Regulations, the National Environment Management Authority (NEMA) has received an environmental impact assessment study report for the implementation of the proposed Kamiti housing development.

The proposed development will comprise construction of 820 residential units of different sizes and designs ranging from two to three bedroom units complete with associated external works.

The development has a frontage to Kamiti Road on L.R. No. 71/6, Maziwa Estate off Kamiti Road, Nairobi North District.

The project anticipates the following impacts and mitigation measures:

Possible Impacts Mitigation Measures

- | | |
|--|---|
| Increased storm water, runoff and soil erosion | <ul style="list-style-type: none"> • Roof water to be harvested and stored in underground reservoirs for use in cleaning and in the toilets. The tanks shall have a capacity of at 100, 000litres. To ensure the use of such water for the stated purposes, the building shall be fitted with a dual water distribution system • A storm water management plan that minimizes impervious area infiltration by use of recharge areas and use of detention and/or retention with graduated outlet control structure shall be designed. • Apply soil erosion control measures such as leveling of the project site to reduce run-off velocity and increase infiltration of storm water into the soil. • Ensure that construction vehicles are restricted to existing roads to avoid soil compaction within and around the project site. • Ensure that any compacted areas are ripped to reduce run-off. • Site excavation works shall be planned such that a section is completed and rehabilitated before another section begins. • Construction of soil-galleys on sloppy sections. • Open drains all interconnected shall be provided on site. • Roof catchments shall be used to collect the storm water for some domestic uses e.g. washing of floors and cars |
| Increased solid waste generation | <ul style="list-style-type: none"> • Use of an integrated solid waste management system i.e. through a hierarchy of options: reduction, sorting, re-use, recycling and proper disposal • Through accurate estimation of the sizes and quantities of materials required, order materials in the sizes and quantities they will be needed, rather than cutting them to size, or having large quantities of residual materials. |

Possible Impacts Mitigation Measures

- Ensure that construction materials left over at

	<p>the end of construction shall be used in other projects rather than being disposed of.</p> <ul style="list-style-type: none"> • Ensure that damaged or wasted construction materials including cabinets, doors, plumbing and lighting fixtures, marbles and glass will be recovered for refurbishing and use in other projects • Donate recyclable/reusable or residual materials to local community groups, institutions and individual local residents or home owners. • Use of durable, long-lasting materials that shall not need to be replaced as often, thereby reducing the amount of construction waste generated over time • Provide facilities for proper handling and storage of construction materials to reduce the amount of waste caused by damage or exposure. • Use building materials that have minimal or no packaging to avoid the generation of excessive packaging waste • Use construction materials containing recycled content when possible and in accordance with accepted standards. • Reuse packaging materials such as cartons, cement bags, empty metal and plastic containers to reduce waste at the site • Dispose waste more responsibly by dumping at designated dumping sites or landfills only. • Waste collection bins to be provided at designated points on site • Private waste disposal company to be contracted to transport and dispose the solid waste from site • Running educational campaigns amongst residents, e.g. through use of posters, to encourage reuse or recycling of the solid waste 	
Dust and Exhaust emissions	<ul style="list-style-type: none"> • Ensure strict enforcement of on-site speed limit regulations • Avoid excavation works in extremely dry weathers if and when possible • Sprinkle water on graded access routes when necessary to reduce dust generation by construction vehicles • Personal Protective equipment to be worn • Vehicle idling time shall be minimized • Alternatively fuelled construction equipment shall be used where feasible; equipment shall be properly tuned and maintained • Sensitize truck drivers to avoid unnecessary racing of vehicle engines at loading/offloading points and parking areas, and to switch off engines at these points 	<p>in good condition to reduce noise generation</p> <ul style="list-style-type: none"> • Ensure that all generators and heavy duty equipment are insulated or placed in enclosures to minimize ambient noise levels • Trees around the site shall provide some buffer against noise propagation • The noisy construction works shall entirely be planned to be during day time when most of the neighbors shall be away at work. • Provision of means for handling sewage generated by construction workers (there are toilets connected to septic tanks on the site) • Conduct regular checks for sewage pipe blockages or damages since such vices can lead to release of the effluent into the land and water bodies • Monitor effluent quality regularly to ensure that the stipulated discharge rules and standards are not violated
Noise and vibration	<ul style="list-style-type: none"> • Sensitize construction vehicle drivers and machinery operators to switch off engines of vehicles or machinery not being used. • Sensitize construction drivers to avoid gunning of vehicle engines or hooting especially when passing through sensitive areas such as churches, residential areas and hospitals 	<p>Incidents, accidents and dangerous occurrences.</p> <ul style="list-style-type: none"> • Ensure that provisions for reporting incidents, accidents and dangerous occurrences during construction using prescribed forms obtainable from the local Occupational Health and Safety Office (OHSO) are in place. • Enforcing adherence to safety procedures and preparing contingency plan for accident response in addition to safety education and training shall be emphasized. • Ensure that the premises are insured as per statutory requirements (third party and workman's compensation) • Develop, document and display prominently an appropriate SHE policy for construction works • Provisions must be put in place for the formation of a Health and Safety Committee, in which the employer and the workers are represented • Suitable, efficient, clean, well-lit and adequate sanitary conveniences have been provided for construction workers
Possible Impacts	<p><i>Mitigation Measures</i></p> <ul style="list-style-type: none"> • Ensure that construction machinery are kept 	<p>Oil Spills</p> <ul style="list-style-type: none"> • A designated garage section of the site fitted with oil trapping equipments to be planned for changes. Such an area shall be well protected from contaminating the soil <p>Hydrology and Water Quality Degradation</p> <ul style="list-style-type: none"> • Hazardous substance control and emergency response plan that will include preparations for quick and safe clean up of accidental spills. • Hazardous-materials handling procedures to reduce the potential for a spill during construction • Identify areas where refueling and vehicle maintenance activities and storage of hazardous materials, if any, shall be permitted • Make sure the project is at least fifteen metres away from the center/highest flood point of the river touching on one site of the project site <p>Air Pollution</p> <ul style="list-style-type: none"> • Suitable wet suppression techniques need to be utilized in all exposed areas • All unnecessary traffic shall be strictly limited on site; speed controls are to be enforced

IMPORTANT NOTICE TO SUBSCRIBERS TO THE KENYA GAZETTE

THE following notes are for the guidance of persons submitting "copy" for inclusion in the *Kenya Gazette, Supplement*, etc.:

- (1) *The Kenya Gazette* contains Notices of a general nature which do not affect legislation. They are, therefore, submitted to the Government Printer directly.
- (2) *Legislative Supplement* contains Rules and Regulations which are issued by the Central Government. Because of this, they must be submitted to the Government Printer through the office of the Attorney-General.
- (3) *Bill Supplement* contains Bills which are for introduction in the National Assembly.
- (4) *Act Supplement* contains Acts passed by the National Assembly.

All "copy" submitted for publication should be prepared on one side of an A4 sheet no matter how small the Notice is, each page being numbered and should be typewritten with double spacing. Copy should be clear, legible and contain no alterations.

Particular attention should be paid to the following points:

- (i) Signature must be supported by rubber-stamping or typing the name of the signatory in capital letters.
- (ii) Dates must be correct and filled in where necessary.
- (iii) Care should be taken to ensure that all headings to Notices and references to legislation are up to date and conform with the Revised Edition of the Laws of Kenya.

EXTRACT FROM THE CODE OF REGULATIONS, SECTION D—

Kenya Gazette

"D 34. (1) Communications for the *Kenya Gazette* should reach the Government Printer not later than 9 a.m. on Friday of the week before publication is desired. The Government Printer will not publish communications received after that hour until the next subsequent issue of the Gazette.

(2) Ministries will be required to pay for the *Kenya Gazette* and to meet the cost of advertising in it.

It is emphasized that these notes are for guidance only, but it is requested that persons submitting copy for publication first satisfy themselves that such copy is complete in every respect.
