INVESTIGATION REPORTS COVERING THE PERIOD FROM
1ST APRIL, 2023 TO 30TH JUNE, 2023

1. EACC/FI/INQ/31/2022.

Inquiry Into Allegations of Irregular Award of Contracts for The Implementation of the Lake Turkana Wind Power Project and Subsequent Payment of KSh. 18,499,082,672.00 to M/S. Lake Turkana Wind Power Limited by Various Government Agencies between the years 2005 and 2019

The Commission received a report from the Public Investment Committee (PIC) of the National Assembly on procurement irregularities, contract mismanagement and fraudulent payments touching on the contract for the construction of 400KV Transmission Interconnector power line from Loiyangalani to Suswa and related works.

Investigations established that the contract between Kenya Power and Lighting Co. Limited (KPLC) and Isolux Ingenieria S.A. (Isolux), resulted in a loss of KSh. 18 billion and increased electricity tariffs.

Investigations further revealed that in 2005, Lake Turkana Wind Power (LTWP) Limited, leased 150,000 acres of land in Marsabit, Northern Horr Area to put up a wind power generation plant. In 2006, LTWP Limited carried out a feasibility study in Loiyangalani Area and established that the area had a potential for production of renewable energy. LTWP Limited then proposed a wind power generation plant to the Government of Kenya (GOK), who took up the said proposal. KPLC entered into a Power Purchase Agreement (PPA) with LTWP Limited on 29th January, 2010 for the development of the Wind Power Plant (the LTWP Project). Among the terms of the PPA were that LTWP Limited would generate 300MW of electricity, and that KPLC would be the sole off taker (consumer) of that power. However, a 400 KV Transmission Inter-Connector Line (T.I. Line) needed to be constructed from Loiyangalani to Suswa Sub-Stations, so that this generated power could be transported to the National Grid in Suswa Sub-Station. Further that, if LTWP Limited finished developing the Power Plant and started generating power, they would start charging for the power, whether KPLC were evacuating that power or not, from the date of commissioning. The T.I. Line was to be constructed by Kenya Transmission Company (KETRACO) and LTWP Limited.

Investigations reveals that, the construction of the T.I. Line was incomplete, and as a result, LTWP Limited charged GOK KSh. 18,499,082,672/- for the Deemed Generated Energy. Further investigations revealed that public officers were involved in contractual fraud and money laundering.

A report was compiled and forwarded to the DPP on 5th June 2023 recommending that the suspects be charged with conspiracy to commit an offence of economic crime contrary to section 47A (3), fifteen counts of abuse of office contrary to section 46, conflict of interest Contrary to section 42(3), two counts of wilful failure to comply with the law relating to procurement Contrary to section 45 (2) (b), deceiving Principal contrary to section 41 (2), fraudulent acquisition Contrary to section 45(1)(a) all as read with section 48 of ACECA, three counts of Money Laundering contrary to section 3, six counts of Acquisition of Proceeds of Crime contrary to section 4 both as read with section 16 of the Proceeds of Crime and Anti-Money Laundering Act, 2009 and Neglect of official duty contrary to section 128 as read with section 36 of the Penal Code,

Inquiry into Allegations of Irregular Award of Tender for Construction of Langata Phase IV and V Residential Units at KSh. 1.1 Billion by National Housing Corporation to Lemna International Inc. Limited during the Financial Year 2009/2010 whose cost was Exaggerated by KSh. 100 Million

The Commission commenced investigations following a report made that the National Housing Corporation (NHC) had made double

payment of KSh. 100,000,000/- to Lemna International Inc. Limited. The Company was allegedly incorporated in the USA, and subsequently registered in Kenya. On 19th October, 2009, the NHC commenced procurement for construction of 230 3 bedroom units via Tender Number: NHC/TECH/275/2/2010-Proposed Infill Flats at Langata IV and V. The NHC opted for the Request for Proposals Method and on the 15th April, 2010, the Tender Committee recommended 19 firms, among them, Lemna International Inc. Limited, to be invited to submit their proposals under three options; conventional (Option 1), contractor financed (Option 2) and contractor financed-technology (Option 3). Lemna International Inc. Limited submitted their bid under the contractor financed (option 2).

Investigations established that the evaluation process was flawed as all bidders were non-responsive but the Tender Evaluation Committee nonetheless recommended the contract award to N.K. Brothers Limited. On 3rd June, 2010, the Tender Committee considered and disagreed with the recommendations of the Tender Evaluation Committee, they instead awarded the tender to Lemna International Inc. Limited at a contract sum of KSh. 902,142,259.80.

Investigations further established that the contract was signed on 31st December, 2010, between the Corporation and Lemna International Inc. Limited. Terms of the contract was that Lemna International Inc. Limited would receive 20% of the contract amount upon submission of an Advance Payment Guarantee (APG) and the balance on completion. Lemna International Inc. Limited subcontracted EPCO Builders Limited to implement the contract.

Investigations further revealed that, subsequently, the parties varied the terms of contract from contractor financed to conventional through execution of an addendum. The variation required the NHC to pay Lemna International Inc. Limited for works done based on the payment certificates raised. Investigation established that Certificates Nos. 1-4 were prepared for the sole purpose of measuring the works done while certificates 5-9 were raised for purposes of payment. However, a dispute arose in Payment of Certificate No. 10, the issue was referred to arbitration. The arbitrator found in favour of both the Contractor and the Corporation. Investigations further established that as the result of the dispute, the Corporation overpaid the Contractor by KSh. 1,075,895,612.42.

A report was compiled and forwarded to the DPP on 20th June, 2023 recommending that the suspects be charged with three counts of abuse of office contrary to section 46, four counts of wilful failure to comply with the procurement laws Contrary to section 45 (2) (b), unlawful acquisition of public property Contrary to section 45 (1) (a) and conspiracy to commit an offence of economic crime contrary to section 47A (3) all as read with section 48 of ACECA.

PART III—COST ALLOCATIONS*Segmental Statement of Fixed Assets*

9. (1) For the purpose of preparing a segmental statement of fixed assets, the value of the licensee's fixed assets in the company's statutory accounts shall be allocated to the separate activities referred to in Regulation 5 (2) in relation to the dominant purpose or function of the fixed asset.

(2) The purpose or function of a fixed asset should be assessed in relation to its role, if any, in the licensee's electrical systems, the purpose for which the asset was acquired and its expected use over its economic life.

(3) Where the dominant purpose or function of a fixed asset is to support a single business activity referred to in Regulation 5 (2), or derives from such a business activity, that asset shall be allocated to that activity.

(4) Where a fixed asset relates to the conveyance of electrical energy from one business activity to another, such as a transformer, it shall be treated as supporting the upstream activity.

(5) Where a fixed asset does not have a dominant purpose or function that relates to a single business activity—

- (a) If the asset forms part of the licensee's electrical systems, it shall be allocated to the upstream activity that it relates to;
- (b) Otherwise, it shall be allocated to corporate activities.

(6) For the purpose of this regulation, fixed assets include all non-current assets that would, were they to be acquired during the currency of these regulations, be eligible for inclusion as additions to the Regulatory Asset Base in accordance with the Energy (Electricity Tariffs) Regulations, 2022.

Other Asset and Liability Allocations

10. For the purpose of preparing a statement of financial position, unless the licensee considers that the financial position of its separate businesses can be considered as distinct from its financial position and it would be misleading to a reader of the regulatory accounts not to do so, liabilities and non-fixed assets need not be allocated to the licensee's separate businesses.

Cost Allocations

11. (1) Operating costs, including depreciation, shall be allocated to the separate businesses referred to in Regulation 5 (2) in relation to the way resources are consumed and with reference to the causation of cost at the level of business activities (activity-based).

(2) Costs which are incurred in respect of more than one activity, or which are not readily attributable to a single activity, shall be allocated objectively using a reasonable methodology, having regard to the materiality of the allocations, on—:

- (a) a cost-allocation methodology that materially meets best practice standards of activity-based allocation, or
- (b) where an activity basis cannot be computed at a reasonable cost, an alternative basis that provides a reasonable proxy for an activity-based allocation of costs in the light of best available information about the causation of cost.

(3) The Authority may require licensees to develop activity-based cost allocation systems.

(4) Except where costs do not relate to services supported by regulated tariffs, such as costs of corporate activities set out under Regulation 5 (2)(g), all other costs shall be fully allocated to the other activities of the holder where they fall under Regulations 5 (2) (a) to (f), as appropriate.

(5) The allocation of depreciation of fixed assets will reflect the usage of assets and will not necessarily reflect the balance sheet allocation of fixed assets under Regulation 10, as inter-activity recharges of depreciation.

Revenue Allocations

12. (1) Revenues shall be allocated as follows—

- (a) In respect of tariff-controlled licensees, revenues from the following tariffs shall be allocated in accordance with the business activities set out in Regulation 5 (2) as follows:

- (b) Other revenues shall be allocated in relation to the nature of the services provided and the allocation of the costs that are associated with providing those services.

Asset Base Valuation Adjustment

13. In order to ensure the regulatory accounts, present fairly the regulatory financial position of the licensee and of its separate business activities:

- (a) The regulatory accounts balance sheet shall include adjustments to reflect any material difference between the

book values of the licensee's net assets, excluding financing liabilities, and the Authority's assessment of the Regulatory Asset Base under the Energy (Electricity Tariffs) Regulations, 2022.

- (b) The regulatory accounts balance sheet shall incorporate any balance on any regulatory fuel cost recovery provision maintained in accordance with the Energy (Electricity Tariffs) Regulations, 2022, treating any accumulated surplus as a liability and any accumulated deficits (negative balance) as an asset.

Transactions with Related Licensee's

14. The regulatory accounts shall include an explanatory note disclosing the following:

- (a) The nature and scale of transactions with related or affiliated licensee's, analyzed by party and in enough detail for a user of regulatory accounts to understand components of the regulatory financial performance and statement of financial position that would be mainly affected.

- (c) Whether transactions with related or affiliated licensees were subject to competitive tendering.
- (d) Estimates of the effects on the comprehensive income, balance sheet and cash flows of any material transactions or groups of transactions that are not negotiated on an arm's length basis and on normal commercial terms.

15. (1) The licensee shall prepare a directors' report, a regulatory corporate governance statement and a regulatory business review.

(2) Subject to the following, the licensee may include summarized extracts of the corresponding statements in the licensee's statutory accounts.

(3) The regulatory business review shall include commentary on the licensee's financial performance in relation to the Authority's forecasts and other assumptions made and disclosed at the time it determined the relevant tariff control, any major events and changes to the business environment not anticipated in those assumptions and the impact on the position of investors and users.
