THE ENVIRONMENTAL MANAGEMENT AND

CO-ORDINATION ACT

(No. 8 of 1999)

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY

NOTICE TO THE PUBLIC TO SUBMIT COMMENTS ON AN ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED HOUSING DEVELOPMENT ON L.R. NO. 12715/631, MAVOKO MUNICIPALITY, MACHAKOS DISTRICT

Pursuant to regulation 21 of Environmental (Impact Assessment and Audit) regulations, the National Environmental Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the implementation of the proposed housing development.

The project involves construction of 300 residential flats complete with related facilities. The units will be 80 two bed roomed and 220 three bed roomed residential flats contained in 30 residential blocks.

The project is located on L.R. NO. 12715/631, Mavoko Municipality, Machakos District.

The following are the anticipated impacts and proposed mitigation measures:

<i>Possible Impact</i>	<i>Mitigation measures</i>
Clearance of vegetation and soil erosion	<ul style="list-style-type: none"> Minimize disturbance to flora and fauna in the neighbouring areas. Apply soil erosion control measures. Establish grass lawns, flower gardens and trees around and within the site.
Water & energy use	<ul style="list-style-type: none"> Provide adequate water storage facilities & reuse water where possible. Residents should use energy conserving lighting bulbs. Raise awareness on water and energy conservations.
Solid waste management	<ul style="list-style-type: none"> Contract a licenced waste collection and disposal company or MCM. Proper containment & disposal of solid waste in all project phases. Segregate, separate and re-use construction wastes.
Effluent discharge	<ul style="list-style-type: none"> Project to be connected to BioBox Treatment System. Maintain internal sewer system and network during operation.
Air and noise pollution	<ul style="list-style-type: none"> Ensure that noisy machineries are insulated/temporary fenced. Noise hazard signs should be put displayed where necessary. Machinery should be well lubricated and serviced. Ensure strict enforcement of on-site speed limits. Avoid excavation works in dry weather and sprinkle water to reduce dust. Restrict construction activities to day time only.
Occupational health and safety	<ul style="list-style-type: none"> Provide and enforce use of proper PPEs. Ensure that all workers have insurance covers. All lifting equipments should be inspected and well maintained. Shield construction activities to minimize accidents. Provide first aid facilities and have some workers trained in first aid. Use stable and safe ladders and scaffolds & display safety signs on site. Engage skilled labourers and appoint a safety supervisor.
Fire hazards and Accidents	<ul style="list-style-type: none"> Install proper fire fighting equipments during and after construction. Avoid storage of flammable materials near possible fire source. Sensitize workers on fire safety.
Security	<ul style="list-style-type: none"> Contract a reputable security firm to guard the site and the premise. Collaborate with authority and have community policing on security issues.

The full report of the proposed project is available for inspection during working hours at:

(a) Director-General, the National Environment Management Authority (NEMA), Kapiti Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.

GAZETTE NOTICE NO. 4930

THE ENVIRONMENTAL MANAGEMENT AND CO-ORDINATION ACT

(No. 8 of 1999)

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY

NOTICE TO THE PUBLIC TO SUBMIT COMMENTS ON AN ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR PROPOSED RENOVATIONS OF A PETROL STATION ON PLOT NO. NGENDA/KIMUNYU/997 IN ICHAWERI, GATUNDU TOWN

Pursuant to regulation 21 of Environmental (Impact Assessment and Audit) regulations, the National Environmental Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the implementation of the proposed upgrade of a petrol station.

The proposed project entails repairing the canopy over the pumps, the sales office, rehabilitating the drainage system, replacing the underground fuel tanks, repairing the drive ways, walkways, acceleration and deceleration lanes, repairing the Interceptor Tank and the washrooms.

The project is located on plot No. Ngenda/Kimunya/997 at Ichaweri next to the entrance to the late Hon. Jomo Kenyatta's home. It is along Kenyatta road 3.5Km to Gatundu Town. The property is approx. 1Km from Mutomo Market and owned by Hon. Mama Ngina Kenyatta. The plot has structures that will be renovated, repaired and some upgraded to meet the site engineers specifications to support the petrol station operations. The entire plot measures approx. 19.13Acres.

The following are the anticipated impacts and proposed mitigation measures:

<i>Possible Impact</i>	<i>Mitigation measures</i>
Air pollution	<ul style="list-style-type: none"> Control speed and operation of construction vehicles. Prohibit idling of vehicles. Spray water on excavated areas. Maintenance of construction plant and equipment. Sensitize construction workers. All bare areas should be landscaped after construction. Workers should be provided with dust masks if working in sensitive areas.
Noise pollution	<ul style="list-style-type: none"> Maintain plant equipment. Construction should be carried out only during daytime i.e 0800 – 1700 HRS. Workers to wear ear muffs if working in noisy section. Management to ensure that noise from the station is kept within reasonable levels.

<i>Possible Impact</i>	<i>Mitigation measures</i>
Traffic density	<ul style="list-style-type: none"> • Proper signage put in place to notify neighbours of the activity and presence of heavy vehicles and to direct traffic. • Presence of boards directing patrons to the site. • Strict adherence to traffic rules.
Soil erosion and compaction	<ul style="list-style-type: none"> • Provide soils conservation structures on the areas prone to soil erosion to reduce impact of erosion. • There should be designated pathways and driveways for movement to avoid unnecessary compaction. • All bare areas should be well landscaped after completion.
Solid waste	<ul style="list-style-type: none"> • Construction debris should be collected by a licensed private contracted waste collection company. • Excavation waste should be re-used or backfilled. • Waste generated should be collected by a privately contracted waste collection company and the contractor should ensure the construction of a central waste collection point with bulk storage facilities. • The site should have waste receptacles with bulk storage facilities at convenient points to prevent littering during occupation
Oil leaks and spills	<ul style="list-style-type: none"> • Machinery should be well maintained to prevent oil leaks. • Contractor should have a designated area where maintenance is carried out and that is protected from rain water. • All oil products should be stored in a site store and handled carefully.
Loss of vegetation	<ul style="list-style-type: none"> • Designate access pedestrian routes and parking zones that are cabro paved • Provide signs marked do not Walk/ Park on the grass. • The flora and fauna should be restored after construction by landscaping and maintaining the introduced plants.
Occupational Health and Safety	<ul style="list-style-type: none"> • Provide Personal Protective Equipment. • Train workers on personal safety and how to handle equipments and machines. • Report any accidents / incidences and treat and compensate affected workers. • Provide sufficient and suitable sanitary conveniences which should be kept clean. • The site will be fenced off using iron sheets during renovation.
Security	<ul style="list-style-type: none"> • The site will be fenced off using iron sheets during renovation. • Demolish all temporary kiosks on site. • Round the clock security for the facility. • Adequate lighting and an alarm system installed at strategic points.
Ecological considerations (flora & fauna)	<ul style="list-style-type: none"> • The flora and fauna should be restored after construction by landscaping and maintaining the introduced plants.

<i>Possible Impact</i>	<i>Mitigation measures</i>
Fire preparedness	<ul style="list-style-type: none"> • Fire fighting drills carried out regularly. • Fire fighting emergency response plan. • Ensure all firefighting equipment is regularly maintained, serviced and inspected. • Fire hazard signs and directions to emergency exit, route to follow and assembly point in case of any fire incidence.

The full report of the proposed project is available for inspection during working hours at:

(e) Director-General, the National Environment Management Authority (NEMA), Kapiti Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.

(f) Permanent Secretary, Ministry of Environment and Mineral Resources, N.H.I.F. Community, P.O. Box 30521, Nairobi.

(g) Provincial Director of Environment, Central Province.

(h) District Environment Officer, Thika District.

The National Environment Management Authority invites members of the public to submit oral or written comments within thirty (30) days from the date of publication of this notice to the Director-General, NEMA, to assist the Authority in the approval process of the project.

GAZETTE NOTICE No. 5099

THE ENVIRONMENTAL MANAGEMENT AND CO-ORDINATION ACT

(No. 8 of 1999)

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY

NOTICE TO THE PUBLIC TO SUBMIT COMMENTS ON AN ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED VALLEY VIEW APARTMENTS ON PLOT L.R. No.337/1002 MLOLONGO, MAVOKO MUNICIPALITY

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) regulations, the National Environmental Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the implementation of the proposed valley view apartments

The proposed project involves establishment of residential two bed-room apartments flats with four floors namely ground, first, second and third floors. There will be five apartment flats namely Block A, B, C, D, and E. In total the proposed project shall have 120 household units after completion of the project. Each household unit (apartment) has a plinth area of 680 sq.ft comprises of 2 bedrooms, a kitchen, lounge, dining area, shower room, sanitary facilities, rear balcony, dhobi and a spacious corridor. Every unit has an overhead water tank and a common underground tank with individual water pump. Most of the floor for the rooms shall be of PVC tiles except for the kitchen which shall have ceramic tiles.

The proposed project is situated on plot L.R. No. 337/1002 about 100 metres from Mlolongo Trading Centre, in Mavoko Municipality in Athi River Division of Machakos District. It's neighboring an already occupied residential estate which was part of the Phase I of housing development by Harp Housing Limited.

The following are the anticipated impacts and proposed mitigation measures:

<i>Possible Impact</i>	<i>Mitigation measures</i>
Noise and vibration	<ul style="list-style-type: none"> • Construction works should be carried out only during the specified time i.e. from 0800 hrs to 1700 hrs and should avoid working on Sundays when many residents are expected to be within the environs. • Provide buffers especially during the

	<p>demolition of escarpment. A wall should be established to separate the two estates.</p> <ul style="list-style-type: none"> • Use machine cut stone that requires no chisel dressing which can be a major source of noise • Sensitize construction vehicles' drivers and machinery operators to switch off engines of vehicles or machinery when not in use • Machineries should be maintained regularly to reduce noise resulting from friction. • The generators and other heavy duty equipment (if present) should be insulated or placed in enclosures to minimize ambient noise levels • There should be no unnecessary honking of the involved machinery and vehicles. • Provision of bill boards at the construction site gates notifying of the construction activity and timings. • Workers should be provided with relevant personal protective equipment (PPE)/ materials. 	
Surface drainage	<ul style="list-style-type: none"> • The designs should ensure that surface flow is drained suitably into the drains effectively. • The internal channels should be designed with regard to the peak volumes and must ensure the safe final disposal of run-off /surface water and must be self-cleaning. • Drainage channels should be installed in all areas that generate or receive surface water. • The channels should be covered with gratings or other suitable and approved materials to prevent occurrence of accidents and dirt entry that may compromise flow of run-off. • Storm water generated from roof catchments should be harvested, stored and made use in various household activities i.e. general cleaning and garden watering. • Paving of the side walkways, driveway, parking and other open areas should be done using pervious materials i.e. concrete blocks to encourage water percolation; reducing run-off volume • Ensure suitable storm water drainage channels to effectively discharge water safe to drainage channels. Such channels need to be regularly maintained and repaired to avoid point discharges (have pronounced effect to soil erosion) in case of breakages or blockages. 	<p>open areas; to control soil movement by erosion agents i.e. water, animals and wind. It is recommended that landscaping be done on completion of proposed works and introduce appropriate vegetation in open surfaces</p> <p>Increased Energy Demand</p> <ul style="list-style-type: none"> • Energy conservation involves optimum use of petroleum products (diesel and gasoline), electrical appliances (equipment), lighting systems and other electric machinery as used for different purposes. It also includes use of renewable energy sources. • Switch electrical appliances when not in use and optimize operations of electrical equipment or energized machinery to enhance energy conservation. • Install or Use energy conserving electric lamps for general lighting Put off all lights immediately when not in use or are not needed. • Make use or install alternative source of energy such as solar power, which is renewable. • The proponent should include solar power systems, which can be used for lighting purposes.
	<ul style="list-style-type: none"> • The internal and external sewerage system should be made of hard, strong, durable, smooth, impervious, and non-corrodible materials. • All drain pipes passing under building; driveway or parking should be of heavy duty UPVC pipe tube encased in concrete surround. All manholes on drive ways and parking areas must have heavy-duty covers set and double sealed airtight; as approved by specialists. All waste and soil pipes must be in ducts and bends must have cleaning eyes which must be accessible externally • Sanitary facilities must be kept clean always, through regular washing and disinfecting. • The design of the sewerage system should consider the estimate discharges from individual sources and the cumulative discharge of the entire project even during peak volumes. • The gradient should be sufficient to ensure and maintain maximum depth of flow. Branches should be streamlined in the direction of flow. (these measurements have been put into consideration in the architectural drawings for the sewage treatment plant. 	
Soil disturbance	<ul style="list-style-type: none"> • Avoid unnecessary movement of soil materials from the site and provide soil conservation structures on the areas prone to soil erosion mostly to reduce impact by the run-off. Depending on the period, monitor construction activities for appropriate and effective control measures of erosion e.g. during rainy / wet conditions, ensure suitable barriers on potential water erosion paths while avoiding wind erosion during dry conditions. • Conduct standard landscaping after project completion i.e. resurface (pave) open areas after the completion of the project and introduce suitable and well-managed vegetation to generate surface covers on the 	<p>Sewage and effluent</p> <p>Air Quality</p> <ul style="list-style-type: none"> • Provide personal protective equipment (PPE) / full protective gear to workers. They should also be trained on occupational health and safety and should be encouraged to go for regular health check-ups. • Regular and prompt maintenance of construction machinery and equipment. This will minimize generation of noxious gases and other suspended particulate matter. • Control over areas generating dust particles through regular cleaning or sprinkling of water to reduce dust. The areas can be enclosed to mitigate effects of wind on them. • Regular air monitoring and tests to analyze the quality of air.

Solid Waste	<ul style="list-style-type: none"> The contractor or proponent should work hand in hand with private refuse handlers, NEMA and the Local Council to facilitate sound waste management as per the prevailing regulatory provisions. The wastes should be properly segregated to encourage recycling of some useful waste materials. This calls for source reduction, recycling, composting and reuse. There should preferably be two bins maintained by every unit, one for organic matter and the other for mineral matter. The receptacles (bins) must be kept in a good condition, and frequently washed and disinfected. The collection of waste materials should be made at least once in 24 hours, and it should be done in such a way to minimize nuisance of smell and dust during filling into carts or vans. Train or educate the involved stakeholders/tenants on the importance and means of waste (garbage) management and handling especially during occupation phase. 	<ul style="list-style-type: none"> The contractor should not expose workers to stress inducing factors. The contractor should have workmen's compensation cover. It should comply with workmen's compensation Act, as well as other ordinances, Regulations and union Agreements. Sanitary facilities should be provided and standard cleanliness of the facilities maintained. Individuals preparing food for the workers at the site should be controlled and monitored to ensure that food is hygienically prepared. Workers should always be sensitised on social issues such as drugs, alcohol, diseases particularly HIV/AIDs etc. There should be a training program to facilitate this by the contractor. Billboards should be suitably elected on the onset of the project. The signs should indicate and inform the public e.g. 'DANGER! HEAVY VEHICLES TURNING'. The traffic along the connecting road should be controlled especially during construction phase.
Flora	<ul style="list-style-type: none"> Avoid unnecessary clearing of vegetation by conserving vegetation in the section being built up Landscape and plant vegetation in all open areas after the completion of the project and manage the introduced vegetation on completion of the development to restore or improve the site. 	Fire Preparedness
Visual Intrusion	<ul style="list-style-type: none"> Ensure no destruction of the existing vegetation not in the direct working areas and shield off the particular areas of construction with suitable materials. On completing the earthworks, the worked area should be restored through backfilling, leveling and planting of more vegetation so as to blend in a way to merge with existing environment. The building and the choice of colours should be attractive to match the general environment. All solid waste and debris from construction site must be cleared on completion. 	<ul style="list-style-type: none"> Install an automatic fire alarm system for the entire project mostly on occupation, provide 3No. 30m hose reel for each of the blocks and provide for adequate fire reserve water storage tanks with an automatic booster pump for hose reel and 6No. 9kgs water fire extinguisher. Provide 6No. powder or carbon dioxide extinguishers on the ground floor (for the parking) Provide appropriate Fire Hydrant Ring main with suitable outlet points. All installation to follow Municipal's Fire Masters requirements approval. Conduct regular fire fighting drills/simulations to sensitize workers/residents and adapt an emergency response plan for the entire project during occupational phase. Ensure that all firefighting equipment are strategically positioned, regularly maintained and serviced. Provide fire hazard signs such as 'No Smoking' signs, Direction to exit incase of any fire incidence and emergency contact numbers should be provided as well as the assembly points.
Occupational Health and Safety (OHS) and traffic	<ul style="list-style-type: none"> All workers should be provided with full protective gear. These include working boots, overalls, helmets, goggles, earmuffs, masks, and gloves among others. Factories Act abstract should be posted at a strategic point on site. The requirements of the Occupational Safety and Health Act, 2007 should be strictly adhered to, the Building Code and other relevant regulations. Only specialised machine operators should operate machinery and specialised equipment and all moving parts should be provided with appropriate guards. Properly design to allow for deceleration and acceleration to the site. Clearly indicate direction of traffic especially during construction A first aid kit(s) should be provided within the site. This should be fully equipped at all times and should be managed by a trained person. 	<p>The full report of the proposed project is available for inspection during working hours at:</p> <ol style="list-style-type: none"> Director-General, the National Environment Management Authority (NEMA), Kapiti Road, off Mombasa Road, P.O. **IMPORTANT NOTICE TO SUBSCRIBERS TO
THE KENYA GAZETTE**

THE following notes are for the guidance of persons submitting "copy" for inclusion in the *Kenya Gazette, Supplement*, etc.:

- (1) *The Kenya Gazette* contains Notices of a general nature which do not affect legislation. They are, therefore, submitted to the Government Printer directly.
- (2) *Legislative Supplement* contains Rules and Regulations which are issued by the Central Government. Because of this, they must be submitted to the Government Printer through the office of the Attorney-General.
- (3) *Bill Supplement* contains Bills which are for introduction in the National Assembly.
- (4) *Act Supplement* contains Acts passed by the National Assembly.

All "copy" submitted for publication should be prepared on one side of an A4 sheet no matter how small the Notice is, each page being numbered and should be typewritten with double spacing. Copy should be clear, legible and contain no alterations.

Particular attention should be paid to the following points:

- (i) Signature must be supported by rubber-stamping or typing the name of the signatory in capital letters.
- (ii) Dates must be correct and filled in where necessary.
- (iii) Care should be taken to ensure that all headings to Notices and references to legislation are up to date and conform with the Revised Edition of the Laws of Kenya.

EXTRACT FROM THE CODE OF REGULATIONS, SECTION D—

Kenya Gazette

"D 34. (1) Communications for the *Kenya Gazette* should reach the Government Printer not later than 9 a.m. on Friday of the week before publication is desired. The Government Printer will not publish communications received after that hour until the next subsequent issue of the Gazette.

(2) Ministries will be required to pay for the *Kenya Gazette* and to meet the cost of advertising in it.

It is emphasized that these notes are for guidance only, but it is requested that persons submitting copy for publication first satisfy themselves that such copy is complete in every respect.
