The proposed project will be located on Plot L. R. No. Suna East/Wasweta 1 /9032, Migori County.

The following are the anticipated impacts and proposed mitigation measures:

<i>Impacts</i>	<i>Mitigation Measures</i>
Change in land use and Loss of vegetation cover	<ul style="list-style-type: none"> Maintain all mature trees where possible. Remove only vegetation that is absolutely necessary. Ensure that buffer areas and green belts are incorporated in the project design. All raw materials must be sourced as close as possible to the construction site. Ensure that all vehicles are properly maintained and serviced; and machines must not be left idling to save fuel and reduce emissions.
Air pollution	<ul style="list-style-type: none"> The clearing of vegetation must be carried out on a phased basis. All material (sand and aggregate) stockpiled on the site should be regularly sprayed using water to minimize dust generation. All trucks carrying aggregate and sand should be covered during delivery to the site. Spill control measures should be in place to prevent spread.

Impacts

Mitigation Measures

Water pollution

- Ensure sprinkling of water to reduce dust in periods when wind speed is greatest and the rainfall amounts are lowest.
- All staff employed at the construction site must be provided with dust masks and be trained to use them.
- All diesel and motor oil should be stored in a designated area that is properly contained.
- Store all raw materials away from the water drains.
- Install siltation traps within the drainage design to collect silt and sediment.
- Conduct periodical water quality monitoring to ensure that standards are maintained.
- Ensure that all areas of the project site lined with geotextile material to prevent the contamination of ground water in the area.
- Maintain a vegetation buffer around natural environments to reduce the nutrient loading to these waterways.
- Ensure that all chemicals are properly stored and properly labeled. The area where chemicals will be stored and handled must be constructed with an impermeable surface.
- Ensure that there is proper storage and disposal of waste generated.

Noise and vibration pollution

- Conduct regular water quality monitoring of the waste water treatment facilities, water courses to ensure that these are in keeping with the prescribed water quality standards.
- Purchase and store only the amount of chemicals needed for the immediate future.
- Develop and follow a first in first out principle for chemicals stored and used.
- Machinery, vehicles and instruments that emit high levels of noise should be used on a phased basis to reduce the overall impact.
- Workers, especially those working with machinery, vehicles and instruments that emit high levels of noise should be supplied with ear plugs and ear muffs to reduce the risk of hearing impairment.
- Temporary barriers such as earth berms, zinc fencing and sound dampening fencing such as acoustic screens should be provided to reduce the impact of noise to the existing residents.
- Construction hours should be limited to the hours between 8.00 a.m. and 6.00 p.m. daily except Sunday.
- The delivery of raw materials must be limited to between 8.00 a.m. and 6.00 p.m.

Flora and fauna disruption

- Reduce edge effect and habitat loss by physically delimit the remaining vegetation by some means of fencing which will reduce the impact of secondary opportunistic clearance in the area as a result of increased accessibility created by the development.
- Incorporate as much local plants found within the area.
- The proponent should incorporate trees that are used by bird species for foraging to attract bird species to the area.

<i>Impacts</i>	<i>Mitigation Measures</i>
Increased water demand	<ul style="list-style-type: none"> • Ensure that there is adequate water available to supply the increased demand that the Construction / renovation activities will pose. • Ensure that there is an upgrade to the water supply in the area prior to the operation of the facility. • Maximize recycling of water in the Gold processing activities.
Solid waste generation	<ul style="list-style-type: none"> • The developer should seek to hire a private licensed solid waste collection company. • Chemicals bags and containers should be incinerated by licensed operator. • Provide garbage receptacles around the project. • The developer should install a mechanism to manage solid waste generated.
Fire risks and emergencies	<ul style="list-style-type: none"> • Burning should not be employed on the site preparation activities. Bund areas where flammable substances will be stored. • Place warning signs in areas where flammable substances will be stored. • Provide adequate firefighting equipment and ensure they are serviced regularly. • Display emergency exits, warning signage and clearly mark fire assembly points. • Conduct annual fire safety audit and regular fire drills. • Comply with the provisions of Occupational Safety and Health Act, 2007.
