ENVIRONMENTAL IMPACT ASSESSMENT STUDY  
REPORT FOR THE PROPOSED MWEA  
IRRIGATION DEVELOPMENT PROJECT

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) Regulations, the National Environment Management Authority (NEMA) has received an environmental impact assessment study report for the implementation of the proposed development of Mwea Irrigation Development Project.

The Government of Kenya (GOK) through National Irrigation Board (NIB) intends to implement Phase II of the Mwea Irrigation Development Project in Mutithi location of Mwea Division in Kirinyaga District, Central Province. The project area consists of 8,860ha of the irrigation area which is inclusive of Nderwa North, Marura, Mwea, Thiba, Wamumu, Karaba, MIAD, Tebere, MIS area (upland). It has proposed to construct a dam on Thiba River, in Kabare location of Gichugu Division to ensure reliable supply of water to the irrigation scheme. The project area therefore covers the catchment, dam site and downstream of the river Thiba river basin down to Mwea National Reserve.

The main project activities will include:

- (a) Construction of a new dam upstream of Thiba River in Kabare location of Gichugu Division. Originally designed in 1994, it is a central core type fill dam, and its related structures (dam control office and sand trap dam).
- (b) Construction of a new Link Canal III
- (c) Rehabilitation of the Link Canal I and II
- (d) Construction of new irrigation canals/road networks and drainages in Mutithi Area, Nderwa North Area and Marura Area

The project anticipates the following impacts and mitigation measures:

Possible Impacts	Mitigation Measures
Involuntary resettlement	• Prepare RAP including appropriate compensation and an alternative resettlement location
Possible Impacts	Mitigation Measures

Water usage or water Rights and rights of common

Hazards, risks and Infectious diseases

Soil erosion

Hydrological situation

Water pollution

Soil contamination

Possible Impacts

Noise and vibration

- Involve the affected persons on all stages of the RAP and its implementation,
- Due to the flexibility of the canal and road alignment, the alignment of canals and roads are suggested to be fine-tuned to minimize the resettlers in the future Review Detailed Design
- People with special needs and/or the vulnerable groups should be given special priority during the RAP.
- Provide convenient alternative access to water during construction and operation,
- During operation, initiate water flows monitoring for Thiba River on the long term as a water balance management,
- Institute a liaison committee to provide a communication channel between the community and NIB/Government on water resource management.
- Provide necessary awareness and information to the communities on dam safety aspects,
- Provide necessary awareness and information to the communities on infectious diseases such as HIV/AIDS.
- Minimise clearing vegetations during construction,
- Construction to be confined during the dry season,
- Encourage vegetation along the main stream, the dam buffer zone and link canals to intercept additional silt (if any) during construction and operation,
- De-silted soils from the sand trap dam upstream of Thiba dam will be applied in filling up eroded section of the river banks downstream of Thiba dam.
- Monitor the flow trends of Thiba River and the link canals over time.
- Ensure that minimum flows in Thiba River are maintained at all times in accordance with Water Resources Management Rules.
- Remove logs and plants before operation.
- Initiate water quality monitoring on the basic ambient water quality parameters in the reservoir to meet the applicable parameters of water quality standards (for domestic water/irrigation water) of NEMA.
- Initiate water quality monitoring on the agrochemicals and the other basic water quality parameters in MIS (see EMoP) to meet the applicable water quality standards of discharged water to environment of NEMA.
- Enhance guided application of agrochemicals such as Integrated Pest Management (IPM) in the irrigation areas by providing training and seminars for farmers
- Enhanced collaboration with other players on public education and awareness raising on application of agrochemicals such as Integrated Pest Management (IPM) for farmers in the irrigation areas.

the daytime only,

- Notification of the residents on unusual noise and vibration levels during construction
  - Compliance to the Environmental Management and Coordination Act (EMCA), Occupational Safety and Health Act Cap. 514, its Subsidiary Legislations and the Building by-laws of Kenya.
- Bottom sediment
- Appropriate maintenance of the sand trap dam
  - Trapped silt at the sand trap dam will be returned to the downstream riverbed.
- Accidents
- Establish the appropriate safety measures in the O and M manual for the operation phases.
  - Ensure safety of residents by providing safety signs at strategic places around the dam and canals.

The full report of the proposed project is available for inspection during working hours at:

- (a) Director-General, the National Environment Management Authority (NEMA), Kapiti Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.
