THE ENVIRONMENTAL MANAGEMENT AND CO-ORDINATION ACT

(No. 8 of 1999)

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY

ENVIRONMENTAL IMPACT ASSESSMENT STUDY
REPORT FOR THE PROPOSED NAIROBI WEST HOUSING
SCHEME PROJECT ON PLOT L.R. NO. 209/18566 OFF
LANGATA ROAD IN NAIROBI PROVINCE

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) Regulations, the National Environment Management Authority (NEMA) has received an environmental impact assessment study report for the implementation of the proposed Nairobi West Housing Scheme Project by National Housing Corporation.

The proposed project intends to complete the stalled existing four blocks of two and three bedroom flats which had been started by the

Kenya Railways Staff Pension Scheme, and in addition to constructing an additional 150 modern three bedroom units of 15 blocks. The project is located at L.R. No. 209/18566 in Nairobi West off Langata Road in Nairobi West District within the Province of Nairobi.

The project anticipates the following impacts and mitigation measures:

<i>Possible Impacts</i>	<i>Mitigation Measures</i>
Air quality	<ul style="list-style-type: none"> Watering all active construction areas as and when necessary to lay dust. Cover all trucks hauling soil, sand and other loose materials or require all trucks to maintain at least two feet of freeboard. Pave, apply water when necessary, or apply (non-toxic) soil stabilizers on all unpaved access roads, parking areas and staging areas at construction sites. Sweep daily (with physical sweepers) all paved access roads, parking areas and staging areas at construction sites. Fast growing trees will be planted around the project area to act as wind breaks to reduce the uplift of particulate matter that lead to respiratory diseases.
Noise emitted from the site	<ul style="list-style-type: none"> Install portable barriers to shield compressors and other small stationary equipment where necessary. Use quiet equipment (i.e. equipment designed with noise control elements). Co-ordinate with relevant agencies regarding all substation construction activities in the residential areas. Install sound barriers for pile driving activity Limit pick up trucks and other small equipment to a minimum idling time and observe a common-sense approach to vehicle use, and encourage workers to shut off vehicle engines whenever possible. Construction/Demolition works should be done during the day when people are away and also the outside environment is also noisy. Adhere to the provisions of Noise Prevention and Control Rules 2005, Legal Notice No. 24 regarding noise limits at the workplace.
Exhaust emission	<ul style="list-style-type: none"> Vehicle idling time shall be minimized. Alternatively fuelled construction equipment shall be used where feasible. Equipment shall be properly tuned and maintained.
Waste generation	<ul style="list-style-type: none"> Demolition and construction waste be recycled or reused to ensure that materials that would otherwise be disposed of as waste are diverted for productive uses. Consider the use of recycled or refurbished construction materials.
<i>Possible Impacts</i>	<i>Mitigation Measures</i>
	<ul style="list-style-type: none"> Provide waste handling facilities such as waste bins and skips for temporarily holding domestic waste generated at the site.
