WEST POKOT COUNTY PUBLIC SERVICE BOARD

YEARLY REPORT FOR THE PERIOD 1ST JANUARY, 2017 TO 31ST DECEMBER, 2017

(Submitted to the County Assembly on the execution of its functions, to section 57 (d) of the County Governments Act)

Introduction

The County Public Service Board is a Statutory Body created pursuant to section 57 of the County Government Act (No. 17 of 2012). The West Pokot County Public Service Board was inaugurated on 18th September, 2013.

1.0. Overview of West Pokot County Public Service Board Achievements

In submitting this report, the Board recognises its primary obligation to promote the values and principles referred to in Articles 10 and 232 of the constitution of Kenya 2010. The report will highlight on the achievements realised during the year, the challenges encountered so far and recommendations on how best the challenges can be addressed.

The report is submitted in fulfilment of Section 59 (6) of the County Government Act No. 17 of 2012 which requires the report to be published in the County gazette.

2.0. Recruitment and Selection

In March, 2017, CPSB carried out interviews for the post of Board of Directors, Kapenguria Water and Sewerage Company and forwarded to CEC water for appointment.

In June 2017, the board interviewed shortlisted candidates for the positions of Medical laboratory technologists, radiographers, Kenya registered community health nurses, nutritionists, clinical officers and pharmaceutical officers.

In November 2017, CPSB recruited candidates for the positions of County Chief officers, County Secretary and County Directors.

Health and Sanitation	48	February, 2017
Health and Sanitation	10	March, 2017
Water and Natural Resources	7	March, 2017

2.3 Discipline

In the year 2016, the Board on its own initiative carried out investigation on the violation of values and principles in the public service.

The Head of Human Resource Management and a clerical officer in the payroll were found to have fraudulently received money belonging to the County Government. They had also made irregular payment of salaries to county government employees. Ghost workers were paid salaries totalling KSh. 2,978,930.

Steps Taken

The officers were issued with show cause letters giving them an opportunity to exonerate themselves.

They were given a period of twenty-one (21) days to give their responses.

An investigation committee was instituted to investigate the allegations.

Further investigations found the officers guilty of the said offences and they were subsequently dismissed. The disciplinary process was followed appropriately.

2.3 Declaration of Income, Assets and Liabilities.

The County Public Service Board facilitated the Declaration of Income Assets and Liabilities by the County Public Officers in the Month of December 2017.

2.4 Challenges

The Board has faced various challenges in its promotion of the values and principles.

Vehicles

The Board does not have sufficient vehicles to carry out its mandate. The Board requires two utility vehicles.

Office Space

The Board has inadequate space to carry out its mandate.

2.5 Recommendations

- Provision of adequate resources and funding
- Development of relevant policies that comply with Constitution requirements
- Periodic monitoring and evaluation of employees to ensure effective and efficient service delivery.
- Increased public awareness and understanding of principles and values in public service delivery
- Enhances networking and sharing good practices on governance in the public service

2.6 Conclusion

The Board carried out its mandate as stipulated in the County Government Act section 59, which included recruitment and selection, discipline, promotion of values and principles in the County Public Service, and the promotion of staff.

The report was prepared by:

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT
FOR THE PROPOSED KILIMANI GALANA BUTTRESS DAM,
KILIMANI LOCATION BURAT WARD IN ISIOLO COUNTY

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The proponent, Drought Resilience Sustainable Livelihood Project, is proposing to construct Kilimani Galana Buttress Dam in Burat Ward, Isiolo Central Sub-county, Isiolo County. The project covers six arid and semi-arid counties namely Baringo, Isiolo, Marsabit, Samburu, Turkana and West Pokot.

The following are the anticipated impacts and proposed mitigation measures:

Impacts

Proposed Mitigation Measures

- | | |
|--|--|
| <p>Interference with existing infrastructure</p> | <ul style="list-style-type: none"> Drought Resilience Sustainable Livelihood Project should request for permission neighbors mainly KDF, break in accessing the project site. During construction works, the farmers and other property owners neighboring the proposed should be formerly engaged by the Project Contractor. Drought Resilience Sustainable Livelihood Project should allow provision of designing and construction animal watering points away from the construction site to minimize disturbances. |
| <p>Dam safety</p> | <ul style="list-style-type: none"> Strict supervision of construction activities by qualified staff and if possible in collaboration with KDF Personnel. Ensuring substandard material are not used and materials are used in strict conformation with set standards. Drought Resilience Sustainable Livelihood Project to ensure that material testing to be done in the presence of appointed qualified personnel. Drought Resilience Sustainable Livelihood Project to ensure that the resident Engineer is permanently on site during the construction period and should not be engaged in other activities. The project contractor to ensure that high skilled technicians /fundis of integrity are involved in concrete works and are provided with the right tools of trade. |

Workers accidents and hazards during construction	<ul style="list-style-type: none"> The Project Contractor will be required to provide appropriate personal protective equipment and a safe and healthy environment for construction workers. There should be a crisis management team to administer First Aid to injured persons. The Project Contractor should test and approve equipment before use. The Project Contractor should train workers on how to use various PPE and safe use of machines. Drought Resilience Sustainable Livelihood Project will be required to commit the contractor to Site Occupational Health and Safety rules and regulations as stipulated in the OSHA, 2007. 	<ul style="list-style-type: none"> Combine noisy operations so that they occur at the same time. Adherence to Noise and Excessive Vibration Pollution (Control) Regulations, 2009.
Generation of solid wastes	<ul style="list-style-type: none"> The project contractor to comply with NEMA's Waste Management Regulations of 2006. Drought Resilience Sustainable Livelihood Project should identify designated garbage storage areas during construction and the contractor should be responsible for handling and disposal of all construction related wastes. Drought Resilience Sustainable Livelihood Project and contractor to ensure that waste disposal by burning should not be permitted and workers should be sensitized on proper handling and disposal of waste. Debris from cut trees and bush should be instead used to put a fence /a barrier along the farm edges. The Project Contractor should as much as possible put to good and acceptable use any materials damaged or rejected for use on site. Mixing of concrete should be done away along the flood water pathway. Strict adherence to Waste Management Regulations, 2006. 	<ul style="list-style-type: none"> Public Health Office to ensure that strict measures are applied in the handling of construction materials such as cement, lime, concrete additives, etc. The Project Contractor to ensure that excavation, handling and transportation of erodible materials shall be avoided under high wind conditions or when a visible dust plume is present. The Project Contractor to minimize the number of motorized vehicles in use. The Project Contractor to wet all active construction areas as and when necessary to eliminate dusty conditions on site. The Project Contractor to ensure that vehicle speeds are limited to a maximum of 30 km/h. Adherence to Air Quality Regulations, 2014.
Depletion of flora and fauna	<ul style="list-style-type: none"> The Project Contractor shall ensure strict control of construction vehicles so that they operate only within the area to be disturbed by access routes and other works. Drought Resilience Sustainable Livelihood Project shall ensure proper demarcation of the Project area to be affected by construction works. The Project Contractor to minimize creation of new access routes as much as possible. Drought Resilience Sustainable Livelihood Project to establish tree nurseries in area and encourage planting of indigenous trees along the banks of the dam to replace any which will have been destroyed. 	<ul style="list-style-type: none"> KWS to monitor and control wildlife movement in the project area. Project contractor to report any incidences of interruption by wild animals.
Noise pollution	<ul style="list-style-type: none"> The Project Contractor to use the best available practices on-site to minimize occupational noise levels. The Project Contractor to regularly inspect all construction equipment to ensure they are maintained in good working condition. The Project Contractor to provide ear muffs for those working with noise producing equipment. 	<ul style="list-style-type: none"> Area chief in collaboration with the project contractor to lead cleansing exercise of the affected areas before construction begins. The Public Health Office should create awareness on waterborne diseases, water pollution and waste disposal should be adequately addressed. The Public Health Office should train community members on household water treatment. Public health office to create awareness on mosquito control in houses. DRLSP to introduce fish to the dam to with the intention of them eating mosquito larvae.
		<ul style="list-style-type: none"> Drought Resilience Sustainable Livelihood Project to install water meters at the intake and water distribution points in order to control water usage and ensure that water tariffs are settled. Water Resources Authority to strictly enforce the Water Act 2002 through issuance of water permit and empower WRUA and IWUA to control irrigation water usage and resolve water use conflicts among all water users. Drought Resilience Sustainable Livelihood Project to install common community water points among the non-beneficiaries as CSR service along the pipelines. Drought Resilience Sustainable Livelihood Project to share and create about project information among community members.
		<ul style="list-style-type: none"> Public Health Office to control disease causing vectors and avail health care services on site. The Project Contractor to provide clean drinking water and pit latrines on site.

- The Public Health Office should sensitize the migrant workers on risky sexual behavior.
- The Project Contractor in collaboration with the Public Health Office should have VCT services on site and encourage workers to be tested.
- The Public Health Office should provide condoms and other protective devices on site.
- Ensure strict compliance with the Occupational Safety and Health Act (OSHA) 2007.

The full report of the proposed project is available for inspection during working hours at:

- (a) Director-General, NEMA, Popo Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED CIVIL SERVANTS HOUSING SCHEME COMPRISING OF 220 2 AND 3 BEDROOM UNITS IN EMBU TOWN OF EMBU COUNTY

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The proponent, Ministry of Transport, Infrastructure, Housing and Urban Development, is proposing to construct 220 apartments that will comprise of 2 and 3 bedroom units, in Embu Town and demolish the existing fifteen (2) bungalows on the site.

The following are the anticipated impacts and proposed mitigation measures:

<i>Impacts</i>	<i>Proposed Mitigation Measures</i>
Solid waste generation	<ul style="list-style-type: none"> • Ensure solid generated at the house units are regularly disposed of appropriately at authorized dumping areas. • Use of integrated solid waste management of options i.e. source reduction, recycling, composting and re-use, combustion and sanitary land filling. • Ensure the occupants of the units manage their wastes effectively. • A private company to be contracted to collect and dispose solid waste on regular basis. • Strict adherence to Waste Management Regulations, 2006.

Release of sewage to the environment	<ul style="list-style-type: none"> • Use of the existing sewer line for effluent disposal. • Apply for the license to NEMA for effluent disposal. • Conduct regular inspection for the system to ensure it works effectively. • Strict adherence to Water Quality Regulations, 2006.
High demand for water	<ul style="list-style-type: none"> • Create water conservation awareness. • Install a discharge meter at water outlets to determine and monitor total water usage. • Ensure water taps are not running when not in use. • Residents to conserve water e.g. by avoiding unnecessary toilet flushing. • Promptly detect and repair of water pipes and tank leaks.
Dust disturbance	<ul style="list-style-type: none"> • Avoid excavation works in extremely dry weather. • Regular sprinkling of water to be done on open surface and dusty grounds during dry season until paving is done. • Ensure strict enforcement of on-site speed limit regulations. • Covering of all haulage vehicles carrying sand, aggregate and cement. • Stockpiles of fine materials (e.g. sand and ballast) should be wetted or covered with tarpaulin during windy conditions. • Access roads and exposed ground must be wetted in a manner and at a frequency that effectively keeps down the dust. • Workers in dusty areas on the site should be issued with dust masks during dry and windy conditions. • Providing appropriate enclosure for the concrete mixer. • Use of dust nets at high levels of the building.
Noise disturbance	<ul style="list-style-type: none"> • Comply with all the provisions of EMCA Air Quality Regulations (2014). • Sensitize construction drivers to avoid running of vehicles engines or hooting especially when passing through sensitive areas such as church, schools or hospitals. • Ensure the construction machinery are well kept in good condition • Sensitize construction drivers and machinery operators to switch off engines when not being used. • Trees to be planted on site to provide some buffer against noise propagation. • Ensure all generators and heavy machines are insulated or placed in an enclosure to minimize ambient noise levels. • Restrict noisy construction activities to normal working hours (8.00 a.m. to 6.00 p.m.). • Inform local residents beforehand, via notices and advisories, of pending noisy periods and solicit their tolerance well before the commencement of piling works. • Workers operating equipment that generate noise should be equipped with

	<p>noise protection gear including ear muffs and plugs. Workers operating equipment generating noise levels greater than 80 dBA continuously for 8 hours or more should use earmuffs whereas those experiencing prolonged noise levels of 70 – 80 dBA should wear earplugs.</p> <ul style="list-style-type: none"> • Limit pick-up trucks and other small equipment to an idling time of five minutes, observe a common-sense approach to vehicle use, and encourage workers to shut off vehicle engines whenever possible. • All construction equipment should be regularly inspected and serviced. • Adherence to Noise and Excessive Vibration Pollution (Control) Regulations, 2009.
Traffic control	<ul style="list-style-type: none"> • Issue notices/advisories of pending traffic inconveniences and solicit tolerance by local residents before the commencement of construction works. • As far as possible, transport of construction materials should be scheduled for off-peak traffic hours. • Appropriate traffic warning signs, informing road users of a construction site entrance ahead and instructing them to reduce speed, should be placed along the main road in the vicinity of the entrance to the site during the construction period. • Flagmen should be employed to control traffic and assist construction vehicles as they enter and exit the project site. • Maintain on site a record of incidents and accidents.
Security	<ul style="list-style-type: none"> • Ensure the general safety and security at all times by providing day and night security guards and adequate lighting within and around the premise.
Fire control	<ul style="list-style-type: none"> • Fire extinguisher to be placed strategic positions. • Escape routes to be provided. • Servicing of fire extinguishers as is necessary. Always inspect electricity wires.
High demand for electricity	<ul style="list-style-type: none"> • Switch off electrical appliances and lights when not in use. • Install occupational sensing lights at various locations such as storage areas which are not in use all the time. • Install energy saving fluorescent tubes. • Monitor energy use during the operation of the project and set targets for efficient use. • Sensitize housing units occupants to use energy efficiently.
Occupational health and safety	<ul style="list-style-type: none"> • Engaging only those workers that are trained to operate specific machines and equipment. • Proper signage on site to warn workers of safety requirements as regards machines with moving parts and other equipment at site. • Provide a First Aid box and have a trained person to handle site emergencies and incidences. • Display site telephone numbers of

ambulances or provide a site vehicle to specifically transport the injured to hospital.

- Provide fire-fighting mechanism at site. Display emergency call numbers that can be used in case of a site fire.
- Provide safe scaffoldings and railings at heights.
- Provide washing (enclosed bathroom) and toilet facilities at site with both drinking and washing water.
- Providing safety helmets, safety masks (welders), safety shoes (loaders), uniforms and hand gloves to the workers.
- Using well-maintained equipment by qualified personnel.

The full report of the proposed project is available for inspection during working hours at:

FOR THE PROPOSED CIVIL SERVANTS HOUSING IN
MACHAKOS COUNTY

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The proponent, State Department for Housing and Urban Development, is proposing to construct civil servants houses in Machakos County. The houses will be rented and/or sold to civil servants. The proposed housing project will have a total of 200 houses comprising of 2 blocks of 100-two bedroom houses and 100-three bedroom houses. Each unit block will have ground floor, and 1st-5th floors. Ground floor will comprise of parking space and 1st-5th floors will have houses

The following are the anticipated impacts and proposed mitigation measures:

<i>Impacts</i>	<i>Proposed Mitigation Measures</i>
Disruption of existing natural environment	<ul style="list-style-type: none"> Development restricted to follow zoning policy/approved density – building line, plot coverage and plot ratio. Careful layout and orientation of buildings to respect wind and sun direction. Adequate provision of green and open space planted with grass, shrub and tree cover. Minimum use of reflective building material and finishes for roof, wall and pavement.
Extraction and use of building materials	<ul style="list-style-type: none"> Availability and sustainability of the extraction sites as they are non-renewable in the short term. Landscape changes e.g. displacement of animals and vegetation, poor visual quality and opening of depressions on the surface.
Collapse of building during construction	<ul style="list-style-type: none"> Ensuring building strength and stability. Use of appropriate construction materials and reinforcements as per specifications. Ensuring building components are as per designs. Proper supervision. Ensure proper timelines are followed.
Disturbance of traffic flow	<ul style="list-style-type: none"> Proper signage. Awareness creation. Education to truck drivers. Dropping of materials during off-peak hours.
Soil excavation leading to site disturbance	<ul style="list-style-type: none"> Excavate only areas to be affected by buildings. Dumping of excess excavated materials to sites designated by NEMA and County Authority. Restoration of sites excavated.
Soil erosion	<ul style="list-style-type: none"> Create and maintain soil traps and embankments. Landscaping after completion of construction.

Noise pollution and
vibration

- Ensure use of serviced and greased equipment.
- Switch off engines not in use.
- Construction work to be confined to between 8 a.m. to 6.00 p.m.
- Ensure use of earmuffs by machine operators.
- Adherence to Noise and Excessive Vibration Pollution (Control) Regulations, 2009.

Air quality

- Water sprinkling of driveways or the use of biodegradable hydrant e.g. Terrasorb polymer will reduce dust emission during construction.
- Ensure servicing of vehicles regularly.
- Adherence to Air Quality Regulations, 2014.

Solid waste generation

- Ensure waste materials are disposed of on council and NEMA approved sites.
- Regular inspection and maintenance of the waste disposal systems.
- Ensure re-use of materials that can be re-used.
- Use of the 3rs – Reduce, Re-use, Re-cycle.
- Adherence to Waste Management Regulations, 2006.

Energy consumption

- Use electricity sparingly since high consumption of electricity negatively impacts on these natural resources and their sustainability.
- Use of standby generators.

Excessive water use

- Excessive water use may negatively impact on the water source and its sustainability.

Liquid waste generation
and management

- Regular inspection and maintenance of the waste disposal systems during the operation phase.
- Connection to sewer system.
- Strict adherence to Water Quality Regulations, 2006.

Security

- the facility will be manned by security guards.
- There will be 24 hrs. surveillance.
- Presence of perimeter wall.

Occupational health and
safety

- Education and awareness to all construction workers.
- Ensure use of appropriate personal protective clothing.
- Provide First Aid Kits on site.
- Ensuring building strength and stability
- Proper supervision.
- Proper signage and warning to public of heavy vehicle turning.
- Ensuring Building Strength and stability.
- Ensure strict compliance with the Occupational Safety and Health Act (OSHA) 2007.

The proponent, CIC Group Insurance Limited, is proposing to construct a mixed use development on plot LR. No 28800/6 in Kamiti Anmer Sub-location, Kamiti Location of Kiambu County. The proposed development is next to Tatu City and the total project area measures approximately 200 acres. It shall provide various components namely: Residential units, commercial units, educational units, recreational and other complementary facilities.

The following are the anticipated impacts and proposed mitigation measures:

<i>Impacts</i>	<i>Proposed Mitigation Measures</i>
Loss of biodiversity	<ul style="list-style-type: none"> • Clearance of vegetation should be done in necessary areas only. • After project completion, proponent should carry out environmental rehabilitation where harm cannot be avoided by use. • Retain vegetation screens to reduce the visual effect of construction activities where possible.
Soil degradation	<ul style="list-style-type: none"> • Landscape all disturbed areas after construction phase. • Stock piles to be covered with tarpaulins and slope stability to be checked.
Air pollution	<ul style="list-style-type: none"> • Spray water on exposed areas twice daily during dry weather to suppress dust. • Cover loads of friable materials during transportation and avoid pouring dust materials from elevated areas to ground. • Provide dust screens where necessary. • Control speed of construction vehicles and switch off machines when not in use. • Regularly service and maintain vehicles, mobile plants and machinery. • Provide PPE such as nose masks to the workers in dust generation areas. • All raw materials must be sourced as close as possible to the construction site thus reducing the emissions from vehicular traffic.

Noise and vibrations	<ul style="list-style-type: none"> • Strict Adherence to Air Quality Regulations, 2014. • Provision of barriers such as walls around the site boundaries to provide some buffer against noise. • Installation of portable barriers to shield compressors and other small stationary equipment where necessary. • Silenced machinery and instruments should be employed where possible. • Provide and enforce use of PPE among workers e.g. ear muffs. • Proper servicing of machinery and equipment (oiling, greasing etc.). • Monitor noise levels as per NEMA guidelines.
Increased solid waste	<ul style="list-style-type: none"> • Segregation of waste at source through provision of separate bins. • Provision of a waste transfer station within the development. • Contract a duly licensed waste handler to transport waste. • Limit quantity by developing appropriate budgets for purchase of raw materials to reduce wastage through exposure to weather elements. • Strict Adherence to Waste Management Regulations, 2006.
Increased water demands	<ul style="list-style-type: none"> • Installation of flush toilets with low volume cisterns and high pressure. • Efficient waste water recycling and rain water harvesting.
Wetland degradation	<ul style="list-style-type: none"> • Only permitted activities shall be undertaken within the riparian reserve as per Water Quality Regulations, 2006. • To the extent possible, limit any modifications to natural streams preserve and maintain the wetland, natural streams and drainage ways within the developed areas by designating them as part of the open space system. • Maintain a riparian buffer zone along the wetland as per WRMA recommendations.
Traffic management	<ul style="list-style-type: none"> • Planned deliveries to make sure they do not coincide with heavy traffic. • Provision of separate traffic routes for pedestrians, bikes and vehicles during operation phase. • Proponent to engage KURA in developing access roads for the proposed project. • Security checks to be conducted inside the development not at the entrance to reduce traffic. • Provision of designated entry and exit points.
Occupational safety and health	<ul style="list-style-type: none"> • Adequate sanitary facilities should be provided and standard cleanliness maintained. • Personnel to wear complete PPE • Only qualified personnel to operate the machinery. • Designate a health and safety officer to be in-charge of enforcing site compliance with OSHA rules and regulations.

- Provision of an adequately stocked first aid kit and at least one trained first aider on site.
- Display the contact numbers of the persons responsible for handling emergencies on the site.
- Contractor should have workmen's compensation cover which should comply with Workmen's Compensation Act.
- Provision of fire-fighting equipment.
- Comply with provisions of OSHA, 2007.

The full report of the proposed project is available for inspection during working hours at:

- (a) Director-General, NEMA, Popo Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.
- (b) Principal Secretary, Ministry of Environment and Mineral Resources, NHIF Building, Community, P.O. Box 30126-00100, Nairobi.
- (c) County Director of Environment, Kiambu County.

The National Environment Management Authority invites members of the public to submit oral or written comments within thirty (30) days from the date of publication of this notice to the Director-General, NEMA, to assist the Authority in the decision making process of this project.

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED NUCLEUS SUGARCANE PLANTATION AT CHAKAMA LOCATION, MAGARINI SUB-COUNTY IN KILIFI COUNTY

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The proponent, Tembo Farming Limited, is proposing to establish sugarcane plantation on a 3300 ha (8,155 acres) of land at Matolani/Lali site in Kilifi County. The project will involve setting up a nucleus sugarcane plantation to produce good varieties of sugarcane and will produce 375,000 MT of sugarcane per annum. The water to irrigate the cane will be abstracted from the adjoining Sabaki River

The following are the anticipated impacts and proposed mitigation measures:

<i>Impacts</i>	<i>Proposed Mitigation Measures</i>
Environmental changes	<ul style="list-style-type: none"> • The farm management should be imparted with necessary skills to monitor environmental and biological changes and the health and safety impacts to both the environment and the people of Matolani. • The project proponents shall monitor the project after its completion. • Conducting an environmental audit of the project upon its completion.
Damage to landscape	<ul style="list-style-type: none"> • Ensure that intake area is landscaped and that a 50m buffer zone along the

river is maintained by planting of water friendly trees and grass along the river embankment and on both sides of the intake structure, construction of river embankment structures, as well as re use of soil from trenching activities as a backfill.	
Water logging	<ul style="list-style-type: none"> • Adopt on the correct water application to ensure efficient irrigation technologies.
Use of pesticides, herbicides and fertilizers	<ul style="list-style-type: none"> • The farm management will review the material safety data sheet for pesticides and herbicides used in the farm. • Train workers on use and storage requirements of chemicals and personal protective equipments. • Consider and adopt Integrated Pest Management IPM.
Build- up of toxins in the soil	<ul style="list-style-type: none"> • Proper use of chemical and fertilizers at recommended rates. • Use of biodegradable farm herbicides, insecticides and fertilizers in the farm. • Explore organic farming options.
Increased waste generation	<ul style="list-style-type: none"> • Recycle and reuse waste including water. • Exercising appropriate waste handling and good housekeeping practices and procedures. • Strict Adherence to Waste Management Regulations, 2006.
Damage to features and materials of archeological importance	<ul style="list-style-type: none"> • Secure any finds and sites of archeological value and contact the National Museums of Kenya immediately.
Disruption of water course	<ul style="list-style-type: none"> • Stabilization of water courses and river banks after all constructions are complete. • Reuse of trenched soils as a backfill when laying the pipelines. • Abstract water as per the water permit.
Dust, emissions and other odors and noise	<ul style="list-style-type: none"> • Use hand tools to do excavation and limit use of heavy machinery. • Provide, enforce and use of personal protective equipment. • Adherence to Noise and Excessive Vibrations Pollution (Control) Regulations, 2009. • Regularly maintain and wet the farm roads. • Maintenance of all farm machinery and tractors as per the servicing schedule. • Sprinkling water when dusty conditions set in. • Strict Adherence to Air Quality Regulations, 2014.
Drying of river during low flow	<ul style="list-style-type: none"> • Control irrigation during extreme droughts. • Consult and join Sabaki River Water resource Users Association, in line with Water Act, 2002.
Rising of river bed upstream of the weir	<ul style="list-style-type: none"> • Carrying out periodic scouring of sediments deposited. • Have a river embankment upstream of the intake weir.
Rising of water table level adjacent to the weir	<ul style="list-style-type: none"> • Plant trees and grass to protect soil erosion loss.

- Loss of soil fertility
- Practice good agricultural techniques.
 - Practice seed intercropping.
 - Sensitization of community on erosion prevention measures and good agricultural practices.
 - Carry out mulching.
- Encroachment in the river line area
- Maintain the required riparian reserve along the river.
 - Enforce Agricultural Act on the same.
 - Sensitize community on importance of river line.
 - Plant grass in the river line for stabilization.
- Increase in waterborne diseases
- Wash and cook vegetables.
 - Avoid eating raw foods.
 - Train workers on proper practices and sanitation practices.
 - Treat water before using it for potable uses.

The full report of the proposed project is available for inspection during working hours at:

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The proponent, Tembo Sugar Mills Limited, is proposing to set up a 1,500 tonne cane per day sugar factory expandable to 2,500 tonne cane per day, a 30 kilo litre per day Ethanol/ENA distillery and a 16 MW power plant on L.R. No. 29837 Matolani-Chakama Location.

The following are the anticipated impacts and proposed mitigation measures:

- | <i>Impacts</i> | <i>Proposed Mitigation Measures</i> |
|----------------|--|
| Noise | <ul style="list-style-type: none"> • Provide ear muffs to employees exposed to high noise levels. • Construct a buffer wall around the property and machinery installation phase. • Restrict activities to daytime. • Adherence to Noise and Excessive Vibrations Pollution (Control) Regulations, 2009. |

- Water pollution
- Ensure proper oil handling to avoid spills.
 - Prepare an oil spill management plan.
 - Block all water drainages to the municipal drain until installation completed.
- Waste management
- Provide for a waste segregation and collection point and regularly collect waste.
 - Re-use as much waste as possibly can.
 - Strict Adherence to Waste Management Regulations, 2006.
- Energy use
- Regularly monitor energy consumption and prepare an Energy Management Plan.
- Air pollution
- Install all required pollution control equipments.
 - Regularly water the pavements and earth roads.
 - Complete combustion, ash silo system, hoppers, electro static precipitators, effective ash handling, mixing of collected ash with vinasse to produce biocompost to use in farm/to sell to farmers.
 - Effective stack height (approx.. 50-55mtr) and Electrostatic precipitator is proposed as an air pollution control device.
- Occupation health and safety
- Document Emergency Response Procedures.
 - Provide necessary safety signages.
 - Document all Operational Procedures.
 - Provide PPEs.
 - Comply with provisions of OSHA, 2007.

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED KIAMBU ROAD INVESTMENT LIMITED (KRIL) HOSPITAL ON PLOT L.R. NO.14861/8 AND 9 ALONG KIAMBU ROAD, MUTHAIGA NORTH IN NAIROBI CITY COUNTY

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The proponent, Kiambu Road Investment Limited, is proposing to develop a hospital that will consist of well-equipped theatres, an antenatal clinic, accident and emergency centers, laboratory, vaccination services, doctors' plaza and a car park. The hospital will have a maximum capacity of 100 beds for patients.

The following are the anticipated impacts and proposed mitigation measures:

<i>Impacts</i>	<i>Proposed Mitigation Measures</i>		
Air pollution, dust generation and noise pollution	<ul style="list-style-type: none"> • Sprinkle water during construction work. • Control of speed and movement of construction vehicles. • Use of low-sulphur diesel for diesel-operated machinery. • Use of ear protection aids by construction workers. • Construction to take place only during the day. • Use of attenuated equipment. • No unnecessary hooting by project vehicles. • Installation of sound barriers. • Temporarily fencing off of noisy machinery such as vibrators. • Adherence to Noise and Excessive Vibration Pollution (Control) Regulations, 2009. • Compliance to Air Quality Regulations, 2014. 	Generation of biomedical waste	<ul style="list-style-type: none"> • Provision of waste collection bins designed to hold biomedical waste and hazardous waste. • Contracting a licensed waste collection and disposal company specialized in handling bio-medical and hazardous waste. • Proper containment and disposal of the bio-medical waste. • Creation of awareness on proper bio-medical waste collection and disposal methods to the staff. • Strict adherence to Waste Management Regulations, 2006.
Clearing of vegetation	<ul style="list-style-type: none"> • Planting grass to cover open/bare grounds. • Maintaining trees in areas not affected. • Proper landscaping. • Use specialized equipment to minimize damage to tree roots. • If possible, plant new trees on approved public land to replace the trees cut down at the project site. • Establishment of flower gardens and lawns around project site. 	Increased demand for water and electricity	<ul style="list-style-type: none"> • Conservative use of water and electricity. • Provision of adequate water storage facilities. • Installation of waste water recycling systems. • Installation of rainwater harvesting structures. • Re-use of water where possible, especially during the construction phase. • Explore additional sources of water such as boreholes. • Utilize alternative and renewable sources of energy such as installation of solar panels. • Use of energy saving and efficient appliances.
Disturbance of soil structure	<ul style="list-style-type: none"> • Put soil traps around perimeter fence and on steep areas. • Landscaping with trees, shrubs and grass. • Maintaining specified routes for construction vehicles. • Control earthworks. • Use of light machinery and equipment. 	Fire hazards and accidents	<ul style="list-style-type: none"> • Acquire fire-fighting facilities/equipment. • Sensitize workers in fire safety • Avoid storage of flammable substances on the project site. • Keep well stocked first aid kits. • Proper handling and use of tools and machinery.
Destruction of habitat	<ul style="list-style-type: none"> • Maintaining trees and plants in areas not affected. • Avoid off-road driving. • Control of earthworks. 	Security	<ul style="list-style-type: none"> • Guarding of site by a reputable security firm. • Constant site patrol. • Adequate screening of visitors to the site. • Collaboration with existing security machinery.
Generation of solid waste	<ul style="list-style-type: none"> • Provision of waste collection bins. • Re-use of soil, construction debris and other reusable waste. • Proper containment and disposal of solid waste. • Contracting a licensed waste collection and disposal company. • Creation of awareness on proper solid waste disposal methods. • Re-use of timber off-cuts and wooden support for fuel or in other construction projects. • Strict adherence to Waste Management Regulations, 2006. 	Generation of waste water	<ul style="list-style-type: none"> • Proper connection of waste water and sewerage system to existing city council system as per approved design. • Provision of storm water drains. • Proper decommissioning of waste water and sewerage system. • Proper maintenance of the drainage system. • Strict adherence to Water Quality Regulations, 2006.
		Public health and safety	<ul style="list-style-type: none"> • Proper handling and disposal of solid waste. • Operation of noisy machinery in daytime only. • Control of visitors to the site. • Installation of adequate water supply. • Controlled developments around the facility.
		Increase in traffic flow	<ul style="list-style-type: none"> • Adequate road warning signs to traffic regulations.

	<ul style="list-style-type: none"> • Set driving speed limits and erection of road bumps. • Put acceleration and deceleration lanes to and from the main road. • Choice of access routes during construction phase should ensure minimum disturbance to the neighbors. • Develop a traffic plan to minimize traffic flow interference from construction activities e.g. schedule transport activities affecting traffic for off-peak hours. 	<ul style="list-style-type: none"> • Fencing or covering of risky areas such as deep pits. • Safety signage. • Use of permit-to-work authorizer for risky jobs. • Engagement of skilled laborers. • Insurance for workers if possible. • Comply with the provisions of OSHA, 2007.
Storm water run off	<ul style="list-style-type: none"> • Establish a storm water drainage system. • Proper maintenance of the drainage system. • Surface run-off and discharge should be controlled to prevent soil erosion. 	
Occupational health and safety	<ul style="list-style-type: none"> • Use of suitable personal protective equipment (PPE). • Site to be sprinkled with water to minimize dust. • Use of stable ladders and other climbing/support structures. • Sensitize workers on construction safety measures. • Cleanliness and organization at the construction site.

**IMPORTANT NOTICE TO SUBSCRIBERS TO
THE KENYA GAZETTE**

THE following notes are for the guidance of persons submitting "copy" for inclusion in the *Kenya Gazette, Supplement*, etc.:

- (1) *The Kenya Gazette* contains Notices of a general nature which do not affect legislation. They are, therefore, submitted to the Government Printer directly.
- (2) *Legislative Supplement* contains Rules and Regulations which are issued by the Central Government. Because of this, they must be submitted to the Government Printer through the office of the Attorney-General.
- (3) *Bill Supplement* contains Bills which are for introduction in the National Assembly.
- (4) *Act Supplement* contains Acts passed by the National Assembly.

All "copy" submitted for publication should be prepared on one side of an A4 sheet no matter how small the Notice is, each page being numbered and should be typewritten with double spacing. Copy should be clear, legible and contain no alterations.

Particular attention should be paid to the following points:

- (i) Signature must be supported by rubber-stamping or typing the name of the signatory in capital letters.
- (ii) must be correct and filled in where necessary.
- (iii) Care should be taken to ensure that all headings to Notices and references to legislation are up to date and conform with the Revised Edition of the Laws of Kenya.

EXTRACT FROM THE CODE OF REGULATIONS, SECTION D—

Kenya Gazette

"D 34. (1) Communications for the *Kenya Gazette* should reach the Government Printer not later than 9 a.m. on Friday of the week before publication is desired. The Government Printer will not publish communications received after that hour until the next subsequent issue of the Gazette.

(2) Ministries will be required to pay for the *Kenya Gazette* and to meet the cost of advertising in it.

It is emphasized that these notes are for guidance only, but it is requested that persons submitting copy for publication first satisfy themselves that such copy is complete in every respect.
