THE ENVIRONMENTAL MANAGEMENT AND CO-ORDINATION ACT

(No. 8 of 1999)

NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY
ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT
FOR THE PROPOSED INSTALLATION OF A HOT
STRUCTURAL SECTION MILL ON PLOT NO. 12034/2,
DANDORA, NAIROBI CITY COUNTY

INVITATION OF PUBLIC COMMENTS

PURSUANT to Regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The proponent, Tononoka Rolling Mills Limited, proposes to install a hot structural section mill in addition to the existing rolling mill. The project entails the construction of office blocks, oxygen plant, a melting shop, fuel storage plant and a scrap shed. The proposed project will be located on Plot No. 12034/2, off Komarock Road, Dandora, Embakasi-North Sub-county, Nairobi City County.

The following are the anticipated impacts and proposed mitigation measures:

Possible Impacts	Mitigation Measures
Air pollution	<ul style="list-style-type: none"> All personnel working on the project will be trained prior to starting construction on methods for minimizing air quality impacts during construction. Construction vehicle drivers will be under strict instructions to minimize unnecessary trips, refill petrol fuel tanks in the evening and minimize idling of engines. All active construction areas will be watered at least twice a week to reduce dust. All trucks hauling soil, sand and other loose materials shall be covered. Traffic speed of construction/other vehicles will be restricted to a maximum of 15 mph. Provide all workers with PPEs and enforce their use. Careful screening of construction site to contain and arrest construction-related dust. Vegetation will be replanted in disturbed areas as soon as possible to create green space and stabilize soils. Exposed stockpiles of e.g. dust and sand, will be enclosed, covered, and watered daily, or treated with Non-toxic soil binders.

<i>Possible Impacts</i>	<i>Mitigation Measures</i>	<i>Possible Impacts</i>	<i>Mitigation Measures</i>
	<ul style="list-style-type: none"> Excavation and grading activities will be suspended when wind speed exceeds 25 mph. Windbreakers will be installed at the windward side of the construction site. All workers on the site will be required to wear protective clothing while on duty. 		<ul style="list-style-type: none"> binding materials. Undertake roof catchment harvesting to reduce volumes of storm water. Dispose liquid waste appropriately.
Modification of micro-climate	<ul style="list-style-type: none"> Careful layout and orientation of the plant and buildings to respect microclimate: wind and sun direction. The project will use minimum reflective building materials and finishes for roof, walls and paving. Harmonize site drainage design with neighbouring premises. 	Solid waste	<ul style="list-style-type: none"> Wastes to be collected regularly to control air pollution and vermin/insects etc. Receptacles will be provided for waste storage prior to collection. Resource recovery will be encouraged once the project takes off so as to shrink waste stream and recover non-recyclables. Refuse collection vehicles will be covered to prevent scatter of wastes by wind. Wastes will be collected by a licensed operator to avoid illegal final dumping at unauthorized sites. All persons involved in refuse collection shall be in full protective attire. For hazardous waste- In case of spillage emergency spillage control measures to be instituted. Containerization of any hazardous wastes and disposal through a licensed waste handler.
Noise pollution	<ul style="list-style-type: none"> Portable barriers will be installed to shield compressors and other small stationary equipment where applicable. Encourage use of manual labour where appropriate. Use of equipment designed with noise control elements will be adopted where necessary. Trucks used at construction site shall be routed away from noise sensitive areas in the neighbourhood, where feasible. Sound barriers are to be installed for pile driving activities. Idling time for pick-up trucks and other small equipment will be minimized to limited time. Use of very noisy equipment will be limited to daytime only. All workers operating in noisy areas or operating noisy equipment will be provided with earmuffs to protect against extreme noise. Construction works to be carried out during daytime only. 	Occupational health and safety	<ul style="list-style-type: none"> Conduct regular training on work safety procedures. Proper storage and handling of flammable substances. Appropriate signage. Enforcement of PPEs. A comprehensive contingency plan will be prepared before construction begins, on accident response. Accordingly, adherence to safety procedures will be enforced. All workers, pursuant to labour laws, shall be insured against accidents. All workers will be instructed to wear protective clothing during construction, including helmets. This would be enforced to ensure compliance. Construction work will be limited to daytime only.
Loss of biodiversity and Soil disturbance, erosion	<ul style="list-style-type: none"> Limit excavation to marked project areas. Refilling and paving to limit impacts on soil. Provision of earth bunds or sand bags in areas where a large amount of exposed soils exists would be required. Proper waste disposal to avoid contamination of natural environment. Define areas for greening and rehabilitate to NEMA approval. 	Impacts on water and energy resources	<ul style="list-style-type: none"> Collect and treat all wastewater for reuse. Consider rainwater harvesting to augment the NAWASCO and borehole water supply. Reuse recycled water as much as possible with proper treatment procedures. Routinely undertake surface water quality monitoring. Undertake energy audits every 3 years. Implement 50% recommendations of audit before next audit. Consider capture of heat and gas from processes to supplement energy requirements of the project. Use energy efficient equipment on site
Water pollution	<ul style="list-style-type: none"> Plan emergency procedures in case of accidents, or spills of pollutants. Keep natural water channels free from obstruction. Define safety rules for work site. Storm water management plan that minimizes impervious area increases infiltration by use of recharge areas, and use of retention, and/or retention with graduated outlet control structures, will be used. Maintain internal and immediate external drainage systems clear all the times. Compact loose soils and apply non-toxic 	Air emission	<ul style="list-style-type: none"> Develop and implement BMPs within the plant to minimize gaseous emissions.

	<ul style="list-style-type: none"> Maintain good housekeeping . Monitor air quality for chimney stacks and ambient air quality and undertake regular air quality analysis. Regularly monitor piping systems to ensure no leakage of gases, fuels. Adopt a combined strategy including a reduction in energy demand, use of cleaner fuels, and application of emissions controls. Develop a green belt around the project site to absorb toxic emissions and carbon dioxide. Establish a community liaison to monitor the effects of project activities on people around the project. Cooling tower should be maintained for prevention of growth of Legionella bacteria. Paves all areas on site and grade access road to site. Mill scale from rolling processes should be stored in within contained premises to prevent air dispersions into neighbourhood. Undertake annual emission analysis according to the Air Quality Regulations and submit report to NEMA and DoSHS.
Waste generation	<ul style="list-style-type: none"> Treat all waste water arising from processes prior to reuse. Ensure treated waste water meets relevant standards in Water Quality Regulations. Undertake regular effluent analysis. Ensure all sanitary liquid is discharged into the public sewer. Where applicable ensure a sewer discharge license is obtained. Capture and contain runoff water from the storage area for treatment before release to the environment. Install oil traps at storm drain exit points. Pass any sludge produced through a filter press and dry in impermeable sludge drying beds prior to disposal. Dispose Sludge thorough licensed hazardous waste handlers. Undertake regular (waste) water analysis to ensure efficacy of the treatment plant. Put in place a monitoring program to ensure liquid waste from the plant is managed accordingly.
Climate change	<ul style="list-style-type: none"> Undertake an intensive greenhouse gas inventory to monitor GHG emissions. Develop and implement a GHG data management system. Consider converting waste heat into electricity. Include and maintain plant greenbelts and participate in tree planting activities to act as carbon sink. Include climate change prevention measures in environmental policy and sensitize workers on importance of adherence to the measures.

NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED MOUNTAIN BONGO AND BLACK RHINO SANCTUARY IN MARANIA AND MUCHEENE FOREST IN MT. KENYA ECOSYSTEM, MERU COUNTY

INVITATION OF PUBLIC COMMENTS

PURSUANT to Regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The proponent Meru Bongo and Rhino Conservation Trust In partnership with County Government of Meru proposes to establish a Mountain Bongo and Black rhino Sanctuary in Marania and Mucheene forest in Mount Kenya Ecosystem in Meru County. The project is expected to be undertaken in two phases with Phase 1 targeting the introduction of bongos into a sanctuary covering an area of 500 acres. Phase 2 will target the reintroduction of the black rhinoceros.

The following are the anticipated impacts and proposed mitigation measures:

Potential Impact	Proposed Mitigation Measures
Risks of contracting Diseases and disease epidemic	<ul style="list-style-type: none"> Undertake pre and post translocation disease screening for the animals to be repatriated. Undertake regular disease surveillance for the bongos and rhinos. Regular screening the animals in the area for rinderpest outbreaks early detection. Train animal keepers on early detection of sick animals. Vaccinate the bongos against rinderpest.
Human wildlife conflict	<ul style="list-style-type: none"> Adequate community sensitization. Involve community and relevant stakeholders in the entire project cycle. Ensure perimeter fence of sanctuary is always function always. Increase security patrols during construction and on sanctuary operations. Sensitise workers on the presence of dangerous animals like the elephants and buffaloes.
Poaching /illegal hunting	<ul style="list-style-type: none"> Strengthen the security at the temporary holding stockades and the entire sanctuary. Construction of perimeter fence and enhanced security surveillance around the sanctuary. Conservation education awareness and community sensitization. Ensure 24 hrs security surveillance along the fence and entire sanctuary when it is operationalized. Install sensors along the fence and a monitoring system.
Vegetation loss	<ul style="list-style-type: none"> Limit vegetation clearance to construction area and revegetate after work. Compensate vegetation losses with planting of indigenous species.

<i>Potential Impact</i>	<i>Proposed Mitigation Measures</i>
	<ul style="list-style-type: none"> Bongo stockades and enclosures to be designed around the existing indigenous trees and shrubs to reduce vegetation clearance. Alignment to meander through big trees to avoid their cutting. Site will be enriched through habitat modification with appropriate trees, grass, and shrubs.
Modification to surface water flow and quality	<ul style="list-style-type: none"> Maintain serviceable vehicles and machinery. Avoid storage of granular material near water courses during construction. Control efficiency of water intakes and treatment installations. Revegetate rapidly cleared areas. Conduct regular slope stability assessments on access roads and project development site.
Visual intrusion of the environment	<ul style="list-style-type: none"> Staff quarters and offices to consider developing architectural design well integrated in its visual environment including blending the structures with the natural environment.
Solid waste generation at the animal keeper and security camp	<ul style="list-style-type: none"> Daily collection, segregation, and disposal of waste at designated areas. Provide litter bins at the operation base for temporary holding before disposal. Ensuring the movement of waste from source to dumpsite is safe and controlled to prevent spillages and pollution. Employing waste minimization techniques such as the 4Rs (Reduce, Reuse, Recycle, Recover) principle. Prepare and display sanctuary rules and regulations against littering. Adhere to integrated Solid Waste Management Regulations.
Predation of the bongos	<ul style="list-style-type: none"> Undertake carnivore survey inside the sanctuary and relocate hyenas and leopards outside the sanctuary, on recommendations of the carnivore survey after fencing off the sanctuary. Ensure the perimeter fence is predator proof as much as possible. Monitor the sanctuary for incidences of predator intrusion.
Competition for pasture with livestock	<ul style="list-style-type: none"> Establish livestock improvement programme and reduction of stock numbers. Conservation education awareness. Support community alternative livelihoods compatible with conservation.
Occupation health and safety risks	<ul style="list-style-type: none"> Workers' sensitization and awareness creation on safety and rules and regulation. Routine vaccination of staff and animals. Providing workers with adequate and quality PPEs and replacing them as necessary.

<i>Potential Impact</i>	<i>Proposed Mitigation Measures</i>
	<ul style="list-style-type: none"> Providing and maintaining firefighting and first aid equipment (side buckets, hydrants, fire extinguishers). Maintain a fire break around the sanctuary.

**IMPORTANT NOTICE TO SUBSCRIBERS TO
THE KENYA GAZETTE**

THE following notes are for the guidance of persons submitting "copy" for inclusion in the *Kenya Gazette, Supplement*, etc.:

- (1) *The Kenya Gazette* contains Notices of a general nature which do not affect legislation. They are, therefore, submitted to the Government Printer directly.
- (2) *Legislative Supplement* contains Rules and Regulations which are issued by the National or county Governments. Because of this, they must be submitted to the Government Printer through the office of the Attorney-General.
- (3) *Bill Supplement* contains Bills which are for introduction in the National Assembly, Senate or county Assemblies.
- (4) *Act Supplement* contains Acts passed by the National Assembly, Senate or county Assemblies.

All "copy" submitted for publication should be prepared on one side of an A4 sheet no matter how small the Notice is, each page being numbered and should be typed with double spacing. Copy should be clear, legible and contain no alterations.

Particular attention should be paid to the following points:

- (i) Signature must be supported by rubber-stamping or typing the name of the signatory in capital letters.
- (iii) Care should be taken to ensure that all headings to Notices and references to legislation are up to date and conform with the Revised Edition of the Laws of Kenya.
