(No. 8 of 1999)

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY
ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT
FOR THE PROPOSED HOTEL DEVELOPMENT ON L.R. NO.
LTK/KIMANA/TIKONDO/4642, AMBOSELI

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) Regulations, the National Environment Management Authority, (NEMA) has received an environmental impact assessment study report for the implementation of the proposed hotel development.

The proposed development entails construction of a hotel with complimentary facilities within the site development. The proposed development will comprise of a hotel with lodges to serve visitors to Amboseli, a school, a hospital and a chapel to serve the local population.

The proposed development is located on L.R. No. LTK/Kimana/Tikondo/4642 after securing the land in May, 2010 within the Tsavo-Amboseli ecosystem.

The following are the anticipated impacts and proposed mitigation measures

<i>Environmental/social Impact</i>	<i>Proposed Mitigation Measures</i>
Air pollution	<ul style="list-style-type: none"> Control speed and operation of construction vehicles. Prohibit idling of vehicles. Spray water on excavated areas. Maintenance of construction plant and equipment. Sensitize construction workers. All bare areas should be landscaped after construction. Workers should be provided with dust masks if working in sensitive areas.
Noise pollution	<ul style="list-style-type: none"> Maintain plant equipment. Construction should be carried out only during day time. Workers to wear ear muffs if working in noisy section. A silencer to be installed on machinery as is necessary. Shield the site and avoid/reduce the use of very noisy equipment. Acquire the noise and excessive vibrations permit from NEMA.
Ecological considerations (flora and fauna)	<ul style="list-style-type: none"> During the decommissioning stage the proponent shall rehabilitate land by removing any unnecessary materials that shall be covering the land and preventing biodiversity. After completion of the project the proponent shall rehabilitate land by planting trees and ornamental flowers on the disturbed areas. Project construction will disturb as little area as possible in order to minimize potential impacts to biodiversity. There are also scattered trees within the proposed plot to be cut although a selective strategy will be applied in that those not interfering with the construction layout plans will be left intact. Also after the construction phase landscaping will be done. Vegetation that does not interfere with the sitting of the project will be left intact.

Environmental/social Impact

First aid

Proposed Mitigation Measures

- A well stocked first aid kit shall be maintained during construction and occupational phases.

- Presence of a certified nurse.

Soil erosion and compaction

- Provide soils conservation structures on the areas prone to soil erosion to reduce impact of run off.

- All bare areas should be well landscaped after completion.

- The proponent at the decommissioning phase will rehabilitate the land by loosening the soil.

- The contractor will always use a pre-determined route to the site.

- Unnecessary heavy machines will be avoided.

- Use of cheap tools like jembes, forks and shovels will be encouraged to do the ground breaking.

- Operations will be timed to take place during the dry season when the soils are dry to reduce the risk of soil compaction.

- Avoid unnecessary movement of soil materials from the sit.

- Provide soil conservation structures on the areas prone to soil erosion mostly to reduce impact by the run-off.

- Control construction activities especially during rainy conditions.

- Re-surface surface areas after completion of the project and introduce appropriate vegetation.

- Provide suitable storm water drainage channels to effectively discharge water to safe areas. Channels need to be regularly maintained and repaired to avoid point discharge incase of breakages or blockages.

- Conduct landscaping after the project completion to maximally control any possible chance of soil movement.

Solid waste

- Construction debris should be collected by a privately contracted waste collection company or by the Olkejuado County Council.

- Debris resulting from demolition process should be disposed off appropriately.

- Excavation waste should be re-used or back filled.

- Domestic waste should be collected by a privately contracted waste collection company or by the council.

- Proponent should ensure the construction of a central waste collection point with bulk storage facilities.

- The site should have waste receptacles at convenient points to prevent littering during occupation.

- During operation phase the proponent should ensure waste is collected and disposed appropriately.

Effluent disposal

- Within the proposed site there is no sewer line to serve the project area and thus the development will be connected to septic tanks.

- Proper connection to the system.

*Environmental/social Impact**Proposed Mitigation Measures*

- Prompt maintenance of the system.

Waste water (run-off)	<ul style="list-style-type: none"> • Cleanliness of the system. • Provision of reliable water supply. • Construction of well maintained drains to effectively manage surface run off. • Presence of well maintained sanitary facilities for the workers and visitors to the site. • During construction, the design of the drainage system should ensure that surface flow is drained suitably into the public drains provided to control flooding within the site. • Drainage channels should be installed in all areas that generate or receive surface water such as car parking, drive ways and along the building block-edges of the roofs. • Channels should be covered by approved materials to prevent occurrence of accidents and entry of dirt that would compromise flow of run off. • Drainage channels should ensure safe disposal of runoff/surface water and should be self cleaning. • Paving of the sidewalks, driveways and other open area should be done using pervious materials to encourage recharge and thus reducing water runoff volume. • The proponent should ensure that regular checks for the sewer line are done to avoid blockages or damages of pipes.
Oil leaks and spills	<ul style="list-style-type: none"> • Machinery should be well maintained to prevent oil leaks on the ground. • Contractor should have a designated area where maintenance is carried out and that is protected from rain water that would carry the oil to the river. • All oil products should be stored in a site store and handled carefully.
Fire preparedness	<ul style="list-style-type: none"> • Fire fighting drills carried out regularly. • Fire fighting emergency response plan. • Ensure fire-fighting equipment are in place and regularly maintained, serviced and inspected. • Train workers on fire fighting skills. • Fire hazard signs and directions to emergency exit, route to follow and assembly point in case of any fire incidence.
Effect on human health	<ul style="list-style-type: none"> • Unused areas on the project site shall be kept free from bushes to prevent mosquito breeding grounds and hiding areas for vermin.
Traffic density	<ul style="list-style-type: none"> • Proper signage out in place to notify neighbours of the activity and presence of heavy vehicles and to direct traffic. • Presence of boards directing patrons to the site. • Enforce speed limits for vehicles entering and exiting the site. • Provide billboards to notify motorists of the development.
Occupational health and safety	<ul style="list-style-type: none"> • All workers should be provided with full protective gear. These include working boots, overalls, helmets, goggles, earmuffs, masks and gloves.
Environmental/social Impact	<p><i>Proposed Mitigation Measures</i></p> <ul style="list-style-type: none"> • Construction crew at the site will be sensitized on social issues such as drugs,

alcohol diseases.

- A first aid kit should be provided within the site. This should be fully equipped at all times and should be managed by qualified person.
- The contractor should have workmen's compensation cover. It should comply with the workmen's compensation act, as well as ordinances, regulations and union agreements.
- Adequate sanitary facilities should be provided and standard cleanliness maintained.
- Food handlers preparing food the workers at the site should be controlled and monitored to ensure that food is hygienically prepared.
- Regular maintenance of machinery on site and provision of the factories and other places of work Act Cap. 514.
- Provide security guards and facilities during construction and operational phases.
- Control of secondary businesses.
- Adequate lighting and an alarm system installed at strategic points.

Security

The full report of the proposed project is available for inspection during working hours at:

- (a) Director-General, the National Environment Management Authority (NEMA), Kapiti Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.

THE ENVIRONMENTAL MANAGEMENT AND CO-ORDINATION ACT

(No. 8 of 1999)

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED REHABILITATION OF NGETHU-GIGIRI TRANSMISSION MAINS

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) Regulations, the National Environment Management Authority, (NEMA) has received an environmental impact assessment study report for the implementation of the proposed rehabilitation of Ngethu-Gigiri transmission.

Kwa Maiko – Gigiri Pipeline is proposed to boost the transmission capacity of the Ngethu – Gigiri mains to 440,000 m³/d. It is proposed to be a DN 800 and 900 PN 25 steel pipelines.

The construction will be as follows:

- 11.13 km of DN 800 pipeline from Kwa Maiko to Kiambu and;
- 6.1 Km of DN 900 pipeline from Kiambu to Gigiri.

The works will also involve rehabilitation and repair of the existing 3 No. pipeline from Ngethu - Gigiri, a distance of 36.4 km. The repair will consist of replacing/rebuilding broken chambers and missing air valves and reinstating eroded pipelines way leaves.

The following are the anticipated impacts and proposed mitigation measures.

<i>Possible Impacts</i>	<i>Mitigation Measures</i>		
Interference with the physical setting	<ul style="list-style-type: none"> The design shall in no way propose to implement developments that shall hinder drainage, change the topography or introduce physical changes that are not in harmony with the physical setting of the Project area. The structures to be developed shall be aesthetically acceptable to blend in with the surrounding. These structures shall not form or end up being used by the resident population as access, bridges or for informal settlement or business. However the design could provide for limited use by pedestrians and non-motorized transport. 		<p>observe a common-sense approach to vehicle use, and encourage workers to shut off vehicle engines whenever possible.</p> <ul style="list-style-type: none"> Provision of appropriate personnel protective equipment; and Construct mainly during the day.
Interruption of existing installations	<ul style="list-style-type: none"> The following shall be done for all crossings of installations. Formal request for permission to cross, break in and built the water pipeline should be sort from all relevant. Ministries concerned and all other institutions affected. Formal engagement of key land and other property owners neighbouring the pipeline. Passing of relevant information to each of the affected parties. A work plan with clear responsibilities for each party shall be developed to ensure smooth execution of the construction; and On completion of works, a Certificate of Satisfactory. Works Completion shall be issued to the Proponent. 	Dust emissions and air quality	<p>Dust emissions shall be controlled by the following measures:</p> <ul style="list-style-type: none"> Wetting all active construction areas as and when necessary to lay dust. Appropriately cover all trucks hauling soil, sand and other loose materials or require all trucks to maintain at least two feet of freeboard. Pave, apply water when necessary, or apply (non-toxic) soil stabilizers on all unpaved access roads, parking areas and staging areas at construction sites. Sweep when necessary (with physical sweepers) all paved access roads, parking areas and staging areas at construction sites.
Resettlement and land take	<ul style="list-style-type: none"> A compensation strategy and resettlement shall be developed to enhance good relationship with the affected land owners. Involuntary acquisition shall mainly be used to acquire the land for the additional wayleave and for the land that shall be used to construct the Contractor's and Engineers Offices and for the accommodation of the construction workers, stores, workshop and kitchen among others. The use of Provincial Administration and elders where feasible shall be pursued and proper and legally binding land transfers shall be sort by the Proponent. It is recommended that a thorough public-proponent engagement be natured from the design / planning stage. 	Disposal of excavated soil	<ul style="list-style-type: none"> The excavated soil shall not be disposed off from the wayleave. Instead it is recommended that excavated soil be used to cover the laid pipeline and re-spread in areas to be landscaped to enhance aesthetics along the wayleave area to be acquired.
Noise generation and vibration	<ul style="list-style-type: none"> The following noise-suppression techniques shall be employed to minimise the impact of temporary construction noise at the Project site. Install portable barriers to shield compressors and other small stationary equipment where necessary. 	Workers accidents and hazards during construction	<ul style="list-style-type: none"> The Proponent shall develop and commit the Contractors to Site Occupational Health and Safety rules and regulations as stipulated in the Occupational Safety and Health Act, 2007. Workers accidents especially in deep trenching operations shall be mitigated by enforcing adherence to safety procedures and preparing contingency plan for accident response. In addition, safety education and training shall be emphasized.
<i>Possible Impacts</i>	<i>Mitigation Measures</i>	Extraction and use of construction materials	<ul style="list-style-type: none"> The Contractor shall source construction materials such as sand and hard core from registered and approved quarry and sand mining firms whose projects have undergone satisfactory environmental impact assessment/audit and received NEMA approval. To reduce the negative impacts on availability and sustainability of the materials, the Contractor shall only order for what shall be required through accurate budgeting and estimation of actual construction requirements.
		Solid waste generation	<ul style="list-style-type: none"> The construction waste be recycled or reused as much as possible to ensure that materials that would otherwise be disposed of as waste are diverted for productive uses. The Proponent shall put in place measures to ensure that construction materials requirements are carefully budgeted and to ensure that the amount of construction materials left on site after construction is kept minimal.
	<ul style="list-style-type: none"> Use of quiet equipment (i.e. equipment designed with noise control elements). Limit pickup trucks and other small equipment to a minimum idling time and 	<i>Possible Impacts</i>	<i>Mitigation Measures</i>
			<ul style="list-style-type: none"> Use of durable, long-lasting materials that shall not need to be replaced often, thereby reducing the amount of construction waste generated over time.

Soil erosion	<ul style="list-style-type: none"> Minimizing the number of motorized vehicles on use. Rehabilitate disturbed areas. Provide scour checks on steep slopes or when working in loose soils. Manage erosion agents including water by channelling it into predetermined areas. Use predetermined tracks; and Avoiding machinery working in seasonally marshy areas, pans and floodplains.
Increased domestic wastewater generation	<ul style="list-style-type: none"> The Proponent shall invest in public sewer systems at a rate that can cope with the water supplied into the project area. The Proponent shall provide for long term plans to invest in a public sewerage system in the Project area.
Vandalism of valves along the pipeline	<ul style="list-style-type: none"> The Proponent through the relevant water Companies shall employ staff who shall scout the pipeline and ensure that the valves are not stolen. Measures shall be taken to include materials that are not susceptible to theft. The community shall also be educated not to tamper with the valves as tampering with the valves interfere with the system and also leads to wastage of water that would have been used by the community.

The full report of the proposed project is available for inspection during working hours at:

- Director-General, the National Environment Management Authority (NEMA), Kapiti Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.
- Permanent Secretary, Ministry of Environment and Mineral Resources, N.H.I.F. Community, P.O. Box 30521, Nairobi.
- Provincial Director of Environment, Nairobi Province.
- Provincial Director of Environment, Central Province.

The National Environment Management Authority invites members of the public to submit oral or written comments within thirty (30) days from the date of publication of this notice to the Director-General, NEMA, to assist the Authority in the approval process of the project.

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED LIQUEFIED PETROLEUM (LPG) STORAGE AND FILLING PLANT ON PLOT L.R. 9042/190, EMBAKASI AREA, NAIROBI

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) Regulations, the National Environment Management Authority, (NEMA) has received an environmental impact assessment study report for the implementation of the proposed LPG storage and filling plant.

The proposed project involves the installation of 2No. storage tanks, a fully automated filling plant, weighbridge, loading and offloading area, office block and fire fighting system.

The area is situated off Airport North Road, Embakasi Area, Nairobi. The site is on L.R. 9042/190.

The following are the anticipated impacts and proposed mitigation measures.

Possible Impacts	Mitigation Measures
Regulatory requirements	<ul style="list-style-type: none"> Comply with Energy Act, 2006, The Energy (Liquefied Petroleum Gas) Regulation, 2009. Scheme of supervision and control for storage and filling of LPG according to KS 1938-4:2005 (Kenya specification for construction, handling, storage and distribution of petroleum products KS 1938 as set out by the Kenya Bureau of Standards (KeBS).
Changes in hydrology/impended drainage	<ul style="list-style-type: none"> Proper installation of drainage structures. Install cascades to break the impact of water flowing in the drains. Ensure efficiency of drainage structures through proper design and maintenance. Provide gratings to the drainage channels. Regular checks on any sludge along drainage channels. Visual checks of oil interceptors and drainage channels for any leaks.
Soil erosion	<ul style="list-style-type: none"> Control any earthworks. Rehabilitate degraded environment to avoid siltation and wash offs. Compact loose soils. Landscaping. Ensure management of excavation activities. Control activities especially during rainy conditions. Provide soil erosion control and conservation structures where necessary. Proper disposal of excavated loose soil (black cotton soil).
Air pollution through dust and gaseous emissions	<ul style="list-style-type: none"> Prohibit idling of vehicles. Water should be sprayed during the construction phase of excavated areas. Regular maintenance of construction plant and equipment. Engage sensitive construction workers. Proper use of PPEs.
Noise pollution	<ul style="list-style-type: none"> Maintain plant equipment (if present/used). Construction activities to be restricted to daytime. Workers in the vicinity of or involved in high level noise to wear respective safety and protective gear i.e. earplugs and earmuffs. Appropriate selection of machinery.
Oil pollution	<ul style="list-style-type: none"> Proper storage, handling and disposal of new oil and used oil and related wastes. Maintain plant and equipment to avoid leaks.
Possible Impacts	Mitigation Measures
Public health and occupation safety	<ul style="list-style-type: none"> Provide oil interceptors along the drains leading from LPG filling area. Ensure proper solid waste disposal and collection facilities. Ensure effective wastewater management. Design of sewerage system should be as

- provided in the plans.
- Provide First Aid kits on the site.
 - Sensitize residents/workers on environmental management.
 - Ensure there is no poding to eliminate breeding of mosquitoes during construction.
 - Workers should be trained on occupational health and safety and First Aid administration.
 - Construct firewalls where safety distances have been compromised.
 - To enhance health and safety preparedness among stakeholders.
 - Ensure equipment is in good working condition.
 - Put up ERP notification instructions.
 - Put up simple instructions on how to handle fires, product spills, LPG incidents, armed robbery and product contaminations.

*Possible Impacts**Mitigation Measures*

Water quality/waste management

- Follow NEMA regulations. Ensure registration of contracted garbage handlers with NEMA for compliance with the prevailing regulations.

The full report of the proposed project is available for inspection during working hours at:

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT
FOR THE PROPOSED HAPPY VALLEY VILLA'S HOUSING
DEVELOPMENT PROJECT ON L.R. NO. 14/1197, ELDORET
MUNICIPALITY

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) Regulations, the National Environment Management Authority, (NEMA) has received an environmental impact assessment study report for the implementation of the proposed housing development.

The proposed project comprising of a comprehensive middle cost housing estate, will by design constitute 50 town houses-135sq meters (Type A), 34 town houses-150sq meters (Type B), the other two types 17 town homes (Type C & D)-180sq meters and all the supporting amenities. In total, one hundred and one (101) town housing units will be established in the proposed estate.

The proposed project will be located on Eldoret Municipality Block 14/1197 in the leafy Elgon View area of Eldoret town of Taragwa (Uasin Gishu South) District. The subject parcel of land

measures 13.09 ha whereby, the proposed estate will be subdivided into one hundred and one (101) 1/8th acres pieces each with clean and unencumbered legal titles.

The following are the anticipated impacts and proposed mitigation measures:

*Possible Impacts**Mitigation Measures*

Soil erosion

- Control earthworks.
- Install drainage structures properly.
- Ensure management of excavation activities.
- Landscaping.

Air pollution

- Stockpiles of earth shall be sprayed with water or cover during dry seasons.
- Provide dust masks for the personnel in dust generation areas.
- Sensitize construction workers.

Noise pollution

- Sensitize workforce including drivers of construction vehicles.
- Install sound barriers for pile driving activity.
- Install portable barriers to shield compressors and other small stationary equipment where necessary.
- Put up signs to indicate construction activities.
- Maintain all equipments.
- Workers in the vicinity of high level noise to wear safety and protective gear.

Dust Generation

- Spray stock piles of earth with water.
- Avoid pouring dust materials from elevated areas to ground.
- Cover all trucks hauling soil, sand and other loose materials.
- Provide dust screens where necessary.

Exhaust Emissions

- Vehicle idling time shall be minimized.
- Alternatively fuelled construction equipment shall be used where feasible.
- Equipment shall be properly tuned and maintained.

Water sources

- Management of water usage. Avoid unnecessary wastage of water.
- Avail storage tanks.
- Harvesting of rain water.

Site cleanliness and sanitary facilities

- Special attention shall be paid to the sanitary facilities on site.
- Garbage shall be disposed off periodically.

Road Safety

- Road signs on main roads.
- Enforce speed limits for construction vehicles.

Public health and occupational safety

- Ensure proper solid waste disposal and collection facilities.
- Ensure dustbin cubicles are protected from animals, rains and are well covered.
- Provide suitable safety gear for all personnel.
- Proper treatment of waste water.

*Possible Impacts**Mitigation Measures*

Vegetation

- Landscape the site by planting grass, shrubs, flowers and trees at all disturbed areas.
- Maintenance and care for the landscaped gardens and open spaces.

The full report of the proposed project is available for inspection during working hours at:

- (a) Director-General, the National Environment Management Authority (NEMA), Kapiti Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT
FOR THE PROPOSED ATLAS PETROL STATION ON PLOT LR.
NO. DAGORETTI/RIRUTA/4286 IN KAWANGWARE- NAIROBI

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) Regulations, the National Environment Management Authority, (NEMA) has received an environmental impact assessment study report for the implementation of the proposed atlas petrol station.

The proposed development entails construction of a petrol station and ancillary facilities.

The Proposed Petrol Station is Located along Kawangware Road off Naivasha Road in Kawangware Estate on plot LR. NO. Dagoretti/Riruta/4286. The site is directly opposite Kenya Bus Service Limited Yard in Kawangware along Kawangware road.

The following are the anticipated impacts and proposed mitigation measures:

Possible Impact	Mitigation Measures
Solid waste	<ul style="list-style-type: none"> Segregation of solid waste and collection into bins should be observed. Disposal of waste should be done through the laid down council procedure. Reuse where possible or sale to authorized waste handlers/collectors.
Occupational health and safety	<ul style="list-style-type: none"> All workers will be provided with protective clothing i.e. overalls, helmets, gloves and safety boots among others to guard against injuries and other bodily harm. Clean water will be provided to the workers for drinking. In the unlikely event of accidents, the labour laws governing reporting and management of the same i.e. OSHA 2007, will be applied.
Possible Impact	Mitigation Measures
	<ul style="list-style-type: none"> Adequate safety signs will be provided on site to prevent all workers and the general public of any dangers. Adequate lavatories will be provided for both ladies and gents separately. Speed limits will be observed and designated entry and exit routes observed without exception.

- Air and noise pollution
- Limiting construction traffic movement and operation to efficient and necessary activities.
 - Routine maintenance of vehicles and other machinery to be used during construction process to reduce any chances of emissions.
 - Minimizing transportation activities to day time only.
 - Limiting construction activities to day time only.
 - Sprinkle the construction site with water to keep dust levels down.
- Disturbance of soil
- Excavating only necessary areas.
 - Containment of soil heaps to prevent erosion caused by runoff.
 - Reduce the use of heavy machinery whenever possible.
 - Use of light machinery at the site during construction process.
 - Re-vegetate exposed areas on the site through proper landscaping.
- Effluent discharge
- Effluent discharge shall be channeled to the main sewer line that serves the area.
 - All waste oil must be reduced to harmless state through an oil interceptor before being discharged into the sewer system.
 - All effluent to meet NEMA standards for discharge.
- Ecosystem disturbance
- Ensure proper demarcation and delineation of the project area to be affected by construction works.
 - Designate access routes and parking within the site.
 - Preserve the existing trees within the project site and if possible plant more trees of fast maturity period within the site.
 - Design and implement an appropriate landscaping programme to help in re-vegetation of part of the project area after construction.

The full report of the proposed project is available for inspection during working hours at:

- (a) Director-General, the National Environment Management Authority (NEMA), Kapiti Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT
FOR THE PROPOSED LA NYAVU HOUSING PROJECT ON
PLOT L.R. NO 2259/703, BOGANI ROAD, KAREN-NAIROBI

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) Regulations, the National Environment Management Authority, (NEMA) has received an environmental impact assessment study report for the implementation of the proposed La Nyavu housing project.

The proposed development comprises five different designs totaling to 130 units. The units are grouped into five clusters namely cluster A, cluster B, cluster C, cluster D, cluster E. Each of the clusters is described as follows:

- Cluster A will have 26 units (also known as country house A) – The units will occupy 526 sqm.
- Cluster B will have 26 units (also known as Country house B) each occupying 434 sqm.
- Cluster C will have 26 units (also known as traditional) occupying 495 sqm.
- Cluster D will have 26 units each (also known as Cape Dutch) occupying 536 sqm.
- Cluster E will have 26 units each (also known as Mountain) occupying 417 sqm.

The proposed project will be located on land parcel number, 2259/703, Fair acres, Off Bogani Road, Nairobi. The parcel of land measures 72.5 acres.

The following are the anticipated impacts and proposed mitigation measures:

<i>Possible Impact</i>	<i>Mitigation Measures</i>
Air pollution & dust generation	<ul style="list-style-type: none"> • Ensure strict enforcement of on-site speed limit regulations. • Avoid excavation works in extremely dry weathers. • Sprinkle water on graded access routes each day to reduce dust generation by construction vehicles. • Use of dust nets to reduce spreading of generated dust. • Sprinkle water on ballast before feeding it in concrete mixer. • Use well maintained trucks and machinery that do not produce excess fumes. • Use low-sulphur diesel for diesel operated machinery. • Provide PPE to construction workers.
Noise and vibration	<ul style="list-style-type: none"> • Comply with EMCA (Noise and excessive Vibration Pollution Control) Regulations 2009 regarding noise limits at the work place. • Use manual labour as much as possible. • Provide workers with PPE. • No idling of vehicles and machinery if not in use. • Avoid unnecessary hooting of vehicles. • Ensure all generators and heavy duty machines are insulated or placed in enclosures to minimise noise levels. • All construction works should be carried out during day time. • Educate construction vehicle drivers and machinery operators to switch off engine when not in use.
<i>Possible Impact</i>	<i>Mitigation Measures</i>
Increased solid waste	<ul style="list-style-type: none"> • Use integrated solid waste management, through source reduction, recycling, reuse, combustion and sanitary land filling • Left over after the construction activities should be used in other projects instead of disposing them off. • Use of durable construction materials

Occupational health and safety

	<ul style="list-style-type: none"> • Use building materials that have minimal or no packaging materials. • Re-use or donate packaging materials such as cartons, plastic containers • Provide collection waste bins on site at designated area. • All waste should be disposed off at designated dumpsites or landfills. • Contract private companies to collect and dispose off the waste. • Run educational campaigns amongst employees/construction workers through use of posters to encourage the reuse and recycling of solid waste.
	<ul style="list-style-type: none"> • Remove and cart away earth works as soon as it's generated. • Warning signs of construction work going on should be displayed. • The contractor should maintain a regular inspection schedule with the Nairobi City Council to certify and conform to standards set. • Fence off the construction site • Appoint a safety supervisor. • Machines to be operated by qualified personnel only. • All machinery and other moving parts of machinery must be enclosed or guarded to protect injury. • Warning and safety signage indicating that construction is in progress should be clearly shown. • Provide fully equipped First Aid Kits • Provide PPE for all workers. • Install safety net to protect workers against falling objects. • Medical checkup for all workers prior to and after the employment. • Persons providing food for workers at the site must have all the necessary Public Health Licences. • Contractor should provide a section within project site with a shade and clean water where food will be served. • Provide a mobile toilet on site for construction workers. • Use stable ladders and other climbing/support structures. • Provision must be put in place for a Health and Safety committee with representatives from workers and employer.
Oil leaks and spills	<ul style="list-style-type: none"> • Use well serviced machinery to minimize grease/oil leaks. • No servicing of the machinery at the site. • Store petroleum products properly in the constructors store. • Use manual labour as opposed to machinery.
<i>Possible Impact</i>	<i>Mitigation Measures</i>
Increased water demand	<ul style="list-style-type: none"> • Building to have water harvesting and storage facilities. • Install water conservation taps that turn off automatically when water is not in use. • Provide information signs within the buildings on means and needs to conserve water.

- Promote re-cycling and re-use of water as much as possible.
- Sensitize the workers /staff to conserve water by avoiding unnecessary wastage.
- Install water meter at the water outlets to monitor total water usage.
- Detect and repair broken pipes promptly.
- Provision of storm water drains
- Sewage and effluents should always drain effectively into established sewerage treatment system as per approved design.
- Proper decommissioning of waste water and sewer system.
- Comply with EMCA (Water Quality), Regulation, 2006.
- Adequate road warning signs to traffic regulations.
- Erect speed pumps.
- Liaise closely with other development partners and government and council's departments to upgrade the existing road networks.

The full report of the proposed project is available for inspection during working hours at:

- (a) Director-General, the National Environment Management Authority (NEMA), Kapiti Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED REFURBISHMENT OF AN OIL STORAGE FACILITY ON L.R. NO. 209/4003, INDUSTRIAL AREA, NAIROBI INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) Regulations, the National Environment Management Authority, (NEMA) has received an environmental impact assessment study report for the implementation of the proposed refurbishment of an oil storage facility.

The proposed project shall comprise of four fuel tanks (two for diesel and two for paraffin), loading/unloading area enough for a 10,000 liter truck, toilets, and 9 small offices.

The proposed site is located in Industrial Area on a 0.0697 hectares plot on L.R. 209/4003.

The following are the anticipated impacts and proposed mitigation measures.

Possible Impacts	Mitigation Measures
Fire hazards and accidents	<ul style="list-style-type: none"> • Acquire fire fighting facilities. • Sensitize workers on fire safety. • Keep well stocked first aid box at site.

- Proper handling and use of tools and machinery.
- Making the depot a strictly no smoking zone.
- Re-use of construction debris and other waste.
- Proper containment and disposal of solid waste.
- Contracting a licensed waste collection and disposal company at operation stage.
- Creation of awareness on proper solid waste disposal.
- Use of suitable personal protective equipment.
- Use of stable ladders and other climbing/support structures.
- Sensitize workers on construction safety measures.
- Cleanliness and organization at the construction site.
- Fencing or covering of risky areas such as deep pits.
- Safety signage.
- Engagement of skilled labourers.
- Proper connection of waste water and sewerage system to existing city council system as per approved design.
- Provision of storm water drains.
- Proper handling and disposal of solid waste.
- Ensure no contamination of water sources by oil/oil products.
- Control of visitors to the site.
- Safe decommissioning of buildings and connections thereof.
- Installation of adequate water supply.
- Spray of water during construction work.
- Control of speed and movements of construction vehicles.
- Building a buffer fence around the construction site.
- Use of low-sulphur diesel for diesel-operated construction machinery.
- No unnecessary hooting by project and staff vehicles.
- Use of ear protection aids by construction workers.
- Use of equipment designed with noise control elements.
- Temporarily fencing off noisy machinery such as vibrators.

The full report of the proposed project is available for inspection during working hours at:

PROJECT IN KAMITI LOCATION, KIAMBAA DIVISION,
KIAMBU DISTRICT

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) Regulations, the National Environment Management Authority, (NEMA) has received an environmental impact assessment study report for the implementation of the proposed Migaa mixed development project.

The proposed project shall comprise of development of a mixed project which will include among others apartments, villas, shopping malls, boulevard and street scapes, country club, office parks, spa, pools and water park, golf course, schools and other amenities in the 774 acres plot. The land use will be as follow, residential 343.33 acres, communal facilities 22.87 acres, hotel 15.32 acres, commercial 19.69 acres, education 9.19 acres, pen space including golf course 339.2 acres and roads 24.58 acres.

The proposed site is located 16.5 km. from the Muthaiga roundabout at Kamiti Location of Kiambaa Division in Kiambu District, Central Province. The project will be on 6 parcels of land namely L.R. Nos. 4890/5, 4890/4, 5866 (orig. No. 98/3/1), 4925 (orig. No. 98/4/2), 4889, and 4890/3 amounting to 774 acres.

The following are the anticipated impacts and proposed mitigation measures.

Possible Impacts	Mitigation Measures
Occupational health and safety	<ul style="list-style-type: none"> Ensure that building plans are approved by Kiambu County Council. Workers will be provided with adequate PPEs during the construction phase, these will include working boots, overalls, helmets, goggles, earmuffs and goggles. Workers will also be provided with harnesses and proper secure equipments for scaling heights. The construction workers will also be sensitized on social issues such as drug abuses, use of alcohol and occupational diseases. Workers will be provided with a well stocked First Aid Box which will be replenished at all times and managed by trained first aiders. The proponent will ensure that the contractor through the Project Manager obtain a workmen's act, as well as ordinance and regulations.
Possible Impacts	Mitigation Measures
	<ul style="list-style-type: none"> Adequate sanitary facilities will be provided with proper segregation for both genders where applicable. Contractor will ensure that people provide food to the workers have been sensitized on safe handling of food to avoid outbreaks of food poisoning.
Soil erosion and compaction	<ul style="list-style-type: none"> The proponent will ensure that watering is done during excavation and adequate

screens will be provided.

	<ul style="list-style-type: none"> Landscaping will be done on the land during the decommissioning phase to ensure that the same is returned to its original state. The contractor will provide adequate soil conservation structures to ensure that areas prone to soil erosion are protected from runoff.
Air and dust pollution	<ul style="list-style-type: none"> While construction of building is going on, water shall be sprayed on excavated areas. There shall be proper maintenance of equipment and vehicles.
Noise pollution and excessive vibration	<ul style="list-style-type: none"> The exercise will only be carried during working hours. Workers will be provided with ear plugs. The proponent will also establish the noise levels for the various equipments to be used. Proponent will also provide barriers for noise.
Increase in solid waste	<ul style="list-style-type: none"> Proponent will use an integrated solid waste management system by source reduction, recycling, composting, reuse or sanitary land filing. The proponent will ensure that debris is collected by a NEMA approved waste handlers. There will be a central collection point for waste generated preferably with segregation of the same. The proponent will provide or construct proper waste receptacles to avoid littering.
Effluent disposal	<ul style="list-style-type: none"> The proponent will ensure that there are routine checks for the septic system lines to ensure that there are no leakages. The proponent will ensure that the materials used for construction are of the right standards as per the building code. The proponent will ensure that proper effluent disposal is done as the required legislations.
Security	<ul style="list-style-type: none"> The proponent will ensure that guards are available and proper intrusion surveillance equipment are installed and are working at all times. The proponent will ensure that there is adequate lighting in all areas and risk assessment is done regularly to identify any new threats.
Traffic movements for construction vehicles	<ul style="list-style-type: none"> The proponent will ensure that neighbours are informed through signages about irregular movements and ensure that vehicles maintain appropriate speed limits.

The full report of the proposed project is available for inspection during working hours at:

- Director-General, the National Environment Management Authority (NEMA), Kapiti Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.

MUNICIPALITY

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) Regulations, the National Environment Management Authority, (NEMA) has received an environmental impact assessment study report for the implementation of the proposed Ruiru Water Supply project.

The project involves construction and commissioning of the Ruiru water supply project that will supply to the residents of Ruiru town up to 10,000m³ of water per day.

The proposed project intakes works is located at the confluence of Ruiru and Komothai Rivers next to Coffee Research Foundation, within Ruiru District.

The project anticipates the following impacts and mitigation measures:

Possible Impacts	Mitigation Measures
Physical setting, flora and fauna	<ul style="list-style-type: none"> • Provide structures that will not hinder free movement of animals. • Structure shall not block drainages. • Grade sites to original levels to maintain topography. • Compensation/replacement for uprooted cash crops destroyed. • As much as practical limit the amount of vegetation cleared during works.
Interruption of key infrastructure installations	<ul style="list-style-type: none"> • Establish the nature of all stakeholders. • Identify key interests of each of the stakeholders. • Formally liaise with the stakeholder and communicate the project details to them with a view of developing a work plan. • Implement work plan. • Acquire Certificate of Satisfactory Works Completion.
Possible Impacts	Mitigation Measures
Compensation and land take	<ul style="list-style-type: none"> • Land take shall be minimized where feasible, exploring all viable alternative project designs e.g. realignment of the pipeline may significantly reduce compensation. • Where displacement is unavoidable, plan for compensation plans shall be developed with adequate compensation.
Noise and vibrations management	<ul style="list-style-type: none"> • Construction activities limited to between 7 a.m. to 6 p.m.. • All equipment used during the construction phase to be regularly

maintained to ensure efficient operation;

- Noise dampening materials to be used where excessive noise generating-equipment are in use.
- Use of appropriate cushioning for heavy equipment.
- Use of personal protective equipment by staff.
- Provide appropriate and adequate drainage infrastructure where required.
- Ensure machinery is regularly serviced to avoid leakages and/or spillage.
- Oils, fuels and other materials to be stored in accordance with the manufacturers' safety data sheets (MSDS).
- Train staff on spill response.
- Implement erosion and sedimentation controls.
- Energy management through use of sound equipment.
- Application of rated equipment in welding and related works.
- Use of efficient mechanical plant and energy savers on sites.
- Dampen work areas materials heaps and mulch bare ground to minimize dust emissions;
- Maintain equipment and machinery to manufacturers' specifications.
- Use environmentally friendly fuels.
- Minimize the period for machinery idling.
- Pursue good practice in energy use during operations and sensitize staff.
- Provide appropriate personnel protective equipment to site workers.
- All wastes shall be contained on site prior to disposal using appropriate storage containers.
- All wastes shall be regularly cleared from the site and disposed of in approved manner.
- High level of housekeeping shall be maintained.
- Staff shall be trained/sensitized about waste management at the start of the project and regularly as may be found appropriate.
- Develop an erosion and sediment control plan prior to commencement of works.
- Design erosion control structures to address operational erosion incidences;
- Provide for proper storage and sanitation utilities on site.
- Provide for run-off water diversions as appropriate.
- Plan for motorized machinery movement with limited disturbance of soil.
- Maintain as much vegetation as may be practical at work sites.
- Take corrective measures on noticing indication of land degradation.
- Follow procedures for chemical handling and dispensing.
- Enhance the staff appreciation through regular review and onsite training.
- Liaise with the Directorate of Occupational Health and Safety

Department to provide for appropriate induction training and regular updating of worker skill on occupational health and safety matters.

- Provide for appropriate signage and warnings at work sites.
- Use personal protective equipment (PPE) to workers and any visitors.
- Provide for First Aid facilities as per the OSHA.
- Provide and clearly display emergency contacts.
- Develop and implement a detailed and site specific emergency response plans.

The full report of the proposed project is available for inspection during working hours at:

**IMPORTANT NOTICE TO SUBSCRIBERS TO
THE KENYA GAZETTE**

THE following notes are for the guidance of persons submitting "copy" for inclusion in the *Kenya Gazette*, *Supplement*, etc.:

- (1) *The Kenya Gazette* contains Notices of a general nature which do not affect legislation. They are, therefore, submitted to the Government Printer directly.

- (2) *Legislative Supplement* contains Rules and Regulations which are issued by the Central Government. Because of this, they must be submitted to the Government Printer through the office of the Attorney-General.
- (3) *Bill Supplement* contains Bills which are for introduction in the National Assembly.
- (4) *Act Supplement* contains Acts passed by the National Assembly.

All "copy" submitted for publication should be prepared on one side of an A4 sheet no matter how small the Notice is, each page being numbered and should be typewritten with double spacing. Copy should be clear, legible and contain no alterations.

Particular attention should be paid to the following points:

- (i) Signature must be supported by rubber-stamping or typing the name of the signatory in capital letters.
- (ii) Dates must be correct and filled in where necessary.
- (iii) Care should be taken to ensure that all headings to Notices and references to legislation are up to date and conform with the Revised Edition of the Laws of Kenya.

EXTRACT FROM THE CODE OF REGULATIONS, SECTION D—

Kenya Gazette

"D 34. (1) Communications for the *Kenya Gazette* should reach the Government Printer not later than 9 a.m. on Friday of the week before publication is desired. The Government Printer will not publish communications received after that hour until the next subsequent issue of the Gazette.

(2) Ministries will be required to pay for the *Kenya Gazette* and to meet the cost of advertising in it.

It is emphasized that these notes are for guidance only, but it is requested that persons submitting copy for publication first satisfy themselves that such copy is complete in every respect.
