DEPARTMENT OF AGRICULTURE.

LOCUST REPORT FOR TWO WEEKS ENDING 16-4-30.

Owing to heavy rains and consequent difficulties of transport, it has not yet been possible to confirm reports of movements of swarms, in the northern and southern areas of the Colony. Weather conditions are at present extremely unfavourable for locusts in the Highlands. Only one case of slight damage to crops is reported.

FLYING SWARMS.

Machakos.—A small swarm was observed near Kisau, moving in a southerly direction on March 31st.

Naivasha.—Swarms were reported as moving over Naivasha in a northerly direction on 28th and 29th March, and 1st, 4th and 5th April.

Baringo.—A large swarm was reported near Marigat on 3rd April, and on April 19th, eggs were reported to have been laid near Lake Hannington and in Njemps. The swarm moved in the direction of Timboroa.

Embu.—A small swarm appeared near Embu on 31st March. Some damage was done to young maize.

Masai.—A small band of hoppers was reported near Lake Magadi on April 3rd.

Turkana.—A large swarm of yellow locusts was reported between Lomello and Karpeddo on 28th March. Small bands of young hoppers have been destroyed near Mt. Kameruk, and laying is suspected in the Turkwell Valley, near Kailimorok.

Several large swarms have been reported as moving south-eastwards for the Sudan, but these have not yet been seen in Kenya. The Locust Control Officer is investigating the position, but owing to heavy flooding of the Turkwell River, he has not yet been able to make contact with these swarms.

There appears to be some probability of these swarms reaching Turkana, and laying there. The position is being kept under observation as far as circumstances permit.
