NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY
ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT
FOR THE PROPOSED MINING AND TRANSPORTATION OF
LIMESTONE AT ROKA AND MATSANGONI LOCATIONS,
KILIFI NORTH SUB-COUNTY, KILIFI COUNTY

INVITATION OF PUBLIC COMMENTS

PURSUANT to Regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has

The proponent Mombasa Cement Limited, proposes to mine and transport coral limestone from 116 parcels of land/ plots located in Roka location, Roka and Chumani Sub-locations and Matsangoni location, Uyombo and Matsangoni Sub-locations, Kilifi County.

The following are the anticipated impacts and proposed mitigation measures:

Possible Impacts	Mitigation Measures
Loss of flora	<ul style="list-style-type: none"> Limit vegetation removal to actual areas within the proposed project site with limestone to be mined only. MCL to support planting of trees in public areas such as schools, Chief Camps, local dispensaries within the project catchment to offset overall vegetation loss in the area. Back fill and plant trees in all pits where mining is completed.
Loss and displacement of site fauna	<ul style="list-style-type: none"> MCL to maintain pockets of vegetation within the proposed project site where there are no limestone to be mined. MCL to maintain pockets of vegetation around the quarry camp that can support local fauna habitat need. MCL to maintain hedge of vegetation along quarry access roads that can support local fauna habitat needs. MCL to support planting of trees in public areas such as schools, Chief Camps, local dispensaries within the project catchment to support local fauna habitat needs.
Loss of local coconut cover	<ul style="list-style-type: none"> Coconut trees growing in parcels of land procured by MCL that do not have limestone deposits that can be mined to be preserved. MCL to support local communities to grow coconut trees in their private farms to offset overall reduction of coconut trees in the area.
Generation of fugitive dust	<ul style="list-style-type: none"> Regularly sprinkle water on dusty grounds including quarry access roads and active mining areas. Maintain vegetation buffer to buffer schools, local homesteads and other social amenities that border limestone pits. Maintain a hedge of trees along all quarry access roads to act as wind break, noise attenuator and trap fugitive dust.
Noise disturbance	<ul style="list-style-type: none"> Ensure quarry equipment and machinery are well serviced and maintained as per manufacturer's instructions. Use noise attenuators such as a hedge of vegetation around active quarry pits and along quarry access roads. Regularly measure and monitor noise levels to ensure they are maintained within the prescribed limits as provided for in the Environmental Management and Coordination (noise and excessive vibration pollution) (Control) Regulations 2009. MCL to develop and document a comprehensive environmental noise management and conservation programme that will cover all quarry activities.
Soil erosion	<ul style="list-style-type: none"> Maintain pockets of vegetation including trees to act as wind breaks in areas where limestone will not be mined.

Possible Impacts	Mitigation Measures
	<ul style="list-style-type: none"> • Maintain a vegetation buffer to buffer schools, local homesteads and other social amenities that border limestone pits. • Plant trees and other vegetation in open areas to minimize exposure of open ground to agents of erosion. • Maintain a hedge of trees along all quarry access roads to act as wind break.
Spills of oils and lubricants	<ul style="list-style-type: none"> • Provide an equipment service and maintenance garage complete with a service sump and oil/water separator for servicing quarry equipment. • Provide for oil absorbents to aid in cleaning out any spilled oil and lubricants.
Ponding of water in quarry pits	<ul style="list-style-type: none"> • Ensure all quarry pits are adequately and effectively drained to ensure no collection, stagnation and or ponding of rainwater in the pits when it rains.
Generation of solid waste	<ul style="list-style-type: none"> • Ensure all waste generated is managed and disposed as provided for in the Environmental Management and Coordination (Waste Management) Regulations, 2006. • Where possible and applicable practice the four Rs i.e reduce waste generation, reuse generated waste or recycle generated waste. • Provide for receptacles for dropping and collection of waste. • Segregate waste at source appropriately. • Contract the services of a waste collector, ensure the vehicle used to collect waste are licensed by NEMA. • Maintain dually filled and completed waste tracking documents for all waste collected and disposed from the quarry.
Injuries and accidents	<ul style="list-style-type: none"> • Fence off all active quarry pits and disused quarry pits to ensure no unauthorized person or livestock access the quarry pits. • Promptly backfill all quarry pits where mining of limestone is complete. • Ensure all quarry pits are adequately and effectively drained to ensure no collection, stagnation and or ponding of rainwater in the pits when it rains. • Ensure quarry equipment and machinery are well serviced and maintained as per manufacturer's instructions. • Ensure only well trained and experience plant and equipment operators are hired to operate quarry equipment and machinery.
Increase in trucks on local roads	<ul style="list-style-type: none"> • Use alternative routes/feeder roads to reduce number of trucks on one local feeder road. • Monitor number of trucks on local feeder roads from and to quarry. • Use fewer trucks of higher carrying capacity as opposed many trucks of lower carrying capacity.
Alteration of local hydrological condition	<ul style="list-style-type: none"> • Maintain pockets of vegetation within the quarry area to minimize surface runoff and increase rainwater percolation to improve recharge of local aquifer. • Quickly vegetate all areas where mining is completed to reduce soil moisture loss when dry and improve ground water aquifer recharge when it rains.

Possible Impacts	Mitigation Measures
	<ul style="list-style-type: none"> • No mining of limestone close to any existing well or borehole.
Dilapidation of local roads	<ul style="list-style-type: none"> • All trucks in and out of the quarry to strictly adhere to required axial load limits on all roads used. • Install weighbridge in the quarry to monitor weight of loaded trucks before they leave the quarry. • Upgrade local roads to meet heavy load transportation demand from the quarry. • Regularly rehabilitate and maintain all local roads being used.
