ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT
FOR THE PROPOSED CONSTRUCTION OF SOPHIA ESTATE

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) Regulations, the National Environment Management Authority (NEMA) has received an environmental impact assessment study report for the implementation of the proposed construction of Sophia Estate.

The proposed project will involve construction of complex at Sophia Estate in Juja, which was previously used for flower farming purposes. The complex will entail construction of the following facilities—

- (a) Apartments—2 to 3 bedroom (424 units).
- (b) Villas—3 to 4 bedroom (307 units).
- (c) Shopping centre-shops, club house, supermarket, restaurants, bank and ATM, clinic/chemist and offices.
- (d) Petrol station.
- (e) Sewer treatment plant.
- (f) Educational facilities—kindergarten.

The project is located north-east of Ruiru Township in Thika District and will be on plot numbers 13136/11, 13136/12, 13136/13, 13136/14 and 13136/15 at Juja, Thika.

The project anticipates the following impacts and mitigation measures:

<i>Possible Impacts</i>	<i>Mitigation measures</i>	<i>Possible Impacts</i>	<i>Mitigation measures</i>
Loss of biodiversity	<ul style="list-style-type: none"> During the decommissioning stage the proponent shall rehabilitate the land by removing any unnecessary materials that shall be covering the land and preventing the natural biodiversity. After completion of the project the proponent will rehabilitate the land by planting trees and ornamental flowers on the disturbed areas. Project construction will disturb as little area as possible in order to minimize potential impacts to biodiversity. The grass cover that does not interfere with the siting of the project will be left intact. 	Soil erosion	<ul style="list-style-type: none"> Avoid unnecessary movement of soil materials from the site. Provide soil conservation structures on the areas prone to soil erosion mostly to reduce impact by the run-off. Control construction activities especially during rainy conditions. Re-surface open areas after completion of the project and introduce appropriate vegetation. Provide suitable storm water drainage channels to effectively discharge water to safe areas. Channels need to be regularly maintained and repaired to avoid point discharge incase of breakages or blockages.
Loss of employment	<ul style="list-style-type: none"> Company will try and absorb some of the workers to work back into the complex. The complex will create job opportunities for many people both directly and indirectly either in the shops, restaurant, shopping mall, petrol station, school and even apartments. 	Fire, oil spills contamination of underground water from the proposed petrol station	<ul style="list-style-type: none"> Conduct landscaping after the project completion to maximally control any possible chance of soil movement. Adhere to Petroleum Act and legislations governing petrol stations.
Air quality/particulate matter (dust)	<ul style="list-style-type: none"> Vehicle speeds in the construction area will be limited to minimize dust in the area. Discourage idling of vehicles i.e. vehicle and equipment engines will be turned off when not in direct use to reduce exhaust emissions. Regular maintenance of construction plant and equipment. The management will sensitize the employees on sound environmental management. Provide personal protective equipments such as nose masks to the workers on site. The construction contractor will water the site with exposed soil surfaces twice each day during dry weather. 		<ul style="list-style-type: none"> Waste water from the petrol station should be well disposed to avoid contamination of underground water. Install fire fighting equipments which should be serviced regularly. Workers who will work on the petrol station should be trained on fire fighting skills and fire drills should be conducted at least once year. Annual Environmental Audits will be conducted on the petrol station. Underground tanks for storing petrol should be monitored regularly. Assembly point and fire exits should be indentified clearly. Drains should be well constructed for petrol and petrol mixtures; and also an interceptor into which petrol, in case of spillage and petrol mixtures, could be drained. Canopy should be constructed to allow proper air circulation to safeguard the health of workers The petrol station should have an exit and entry well marked/labelled Warning signs should be well labelled like do not smoke, switch off engine, switch off phone. Underground tanks should be inspected and a certificate should be issued.
Occupational health and safety	<ul style="list-style-type: none"> All workers should be provided with full protective gear, such as working boots, overalls, helmets, goggles, earmuffs, masks and gloves. Construction crew at the site will be sensitized on social issues such as drugs, alcohol diseases. A first aid kit should be provided within the site. The contractor should have workmen's compensation cover. It should comply with Workmen's Compensation Act, as well as ordinances, regulations and union agreements. Adequate sanitary facilities should be provided and standard cleanliness maintained. Food handlers preparing food for the workers at the site should be controlled and monitored to ensure that food is hygienically prepared. Regular maintenance of machinery on site and provision of the Factories and other places of Work Act (Cap. 514). 	Sewage and effluent	<ul style="list-style-type: none"> Routine checkups and monitoring of the sewage treatment plant to avoid leakages and blockages. The proposed capacity of the sewerage treatment plant is big enough to accommodate the number of anticipated people. Proper construction of the sewage treatment plant will be done to meet the standards required by Thika

<i>Possible Impacts</i>	County Council. <i>Mitigation measures</i>
Surface drainage	<ul style="list-style-type: none"> Quality building materials will be used to meet the standards of Kenya Bureau of Standards (KEBS). During construction, the design of the drainage system should ensure that surface flow is drained suitably into the public drains provided to control flooding within the site. Drainage channels should be installed in all areas that generate or receive surface water such as car parking, drive ways and along the building block-edges of the roofs. Channels should be covered by approved materials to prevent occurrence of accidents and entry of dirt that would compromise flow of run-off. Drainage channels should ensure safe disposal of run-off/surface water and should be self-cleaning. Paving of the side walkways, driveways and other open areas should be done using pervious materials to encourage recharge and thus reducing water run-off volume.
Solid waste	<ul style="list-style-type: none"> The contractor or the proponent should work hand in hand with the private refuse handlers, and Ruiru town Council to facilitate waste handling, and disposal from the site. The resulting debris will be collected, transported and disposed off at suitably approved dumpsites. The materials should be properly segregated and separated to encourage recycling of some of wastes. Demolished stones can be used as backfills.
Noise	<ul style="list-style-type: none"> Construction works should be carried out only during the specified time of 0800 hrs to 1700 hrs. Machineries should be maintained regularly to reduce noise resulting from friction. There should not be unnecessary honking of the involved machinery. Provision of billboards at the construction site notifying of the construction activity and timings. Sensitize drivers of construction machinery on effects of noise. Billboards will be suitably erected on the start of the project to psychologically prepare the people in the vicinity. Workers in the vicinity of high-level noise to wear safety and protective gears. Provide barriers such as walls around site boundaries to provide some buffer against noise propagation.
Increased water demand	<ul style="list-style-type: none"> Avoid wasting the water supplied to the site. Encourage water reuse/recycling during both construction and

<i>Possible Impacts</i>	operational phases. <i>Mitigation measures</i>
Increased power demand	<ul style="list-style-type: none"> Roof catchments should be provided with rainwater harvesting systems to enhance collection and storage of rain water. All electrical appliances should be switched off when not in use. Put off all lights immediately when not in use/required or are not needed. Use energy conserving electric lamps for general lighting. Utilize natural light inside buildings to avoid using electricity for lighting during the day.

The full report of the proposed project is available for inspection during working hours at:

(a) Director-General, the National Environment Management Authority (NEMA), Kapiti Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.

(b) Permanent Secretary, Ministry of Environment and Natural Resources, N.H.I.F. Community, P.O. Box 30521, Nairobi.

(c) Provincial Director of Environment, Nairobi Province.

(a) District Environment Office, Thika District.

The National Environment Management Authority invites members of the public to submit oral or written comments within thirty (30) days from the date of publication of this notice to the Director-General, NEMA, to assist the Authority in the approval process of the project.

IMPORTANT NOTICE TO SUBSCRIBERS TO THE KENYA GAZETTE

THE following notes are for the guidance of persons submitting "copy" for inclusion in the *Kenya Gazette*, *Supplement*, etc.:

- (1) *The Kenya Gazette* contains Notices of a general nature which do not affect legislation. They are, therefore, submitted to the Government Printer directly.
- (2) *Legislative Supplement* contains Rules and Regulations which are issued by the Central Government. Because of this, they must be submitted to the Government Printer through the office of the Attorney-General.
- (3) *Bill Supplement* contains Bills which are for introduction in the National Assembly.
- (4) *Act Supplement* contains Acts passed by the National Assembly.

All "copy" submitted for publication should be prepared on one side of an A4 sheet no matter how small the Notice is, each page being numbered and should be typewritten with double spacing. Copy should be clear, legible and contain no alterations.

Particular attention should be paid to the following points:

- (i) Signature must be supported by rubber-stamping or typing the name of the signatory in capital letters.
- (ii) Dates must be correct and filled in where necessary.
- (iii) Care should be taken to ensure that all headings to Notices and references to legislation are up to date and conform with the Revised Edition of the Laws of Kenya.

EXTRACT FROM THE CODE OF REGULATIONS, SECTION D—

Kenya Gazette

"D 34. (1) Communications for the *Kenya Gazette* should reach the Government Printer not later than 9 a.m. on Friday of the week before publication is desired. The Government Printer will not publish communications received after that hour until the next subsequent issue of the Gazette.

(2) Ministries will be required to pay for the *Kenya Gazette* and to meet the cost of advertising in it.

It is emphasized that these notes are for guidance only, but it is requested that persons submitting copy for publication first satisfy themselves that such copy is complete in every respect.
