GAZETTE NOTICE No. 13289

THE LAND REGISTRATION ACT

(No. 3 of 2012)

REGISTRATION OF INSTRUMENT

WHEREAS Joseph Maina Nguru, of P.O. box 155, is the registered proprietor of that piece of land known as Nthawa/Gitiburi/168, situate in the district of Mbeere, and whereas the High Court of Kenya at Embu in civil suit No. 37 of 2006, has ordered that the said piece of land be transferred to Njue Kiandiko, and whereas all efforts made to compel the registered proprietor to surrender the said title deed issued in respect of the said land to the land registrar have failed, notice is given that after expiration of thirty (30) days from the date hereof provided no valid objection has been received within that period, I intend to dispense with the production of the said land title deed and proceed with the registration of the said instrument of transfer and issue land title deed to the said Njue Kiandiko and upon such registration the land title deed issued earlier to the said Joseph Maina Nguru, shall be deemed to be cancelled and of no effect.

Dated the 27th September, 2012.

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The Proponent (National Irrigation Board) is proposing to rehabilitate and expand an earthen canal of approximately 8km in Kiboko for the development of an irrigation development project.

The following are the anticipated impacts and proposed mitigation measures:

<i>Environmental Impacts</i>	<i>Mitigation Impacts</i>
Vegetation loss	<ul style="list-style-type: none"> Avoid cutting down indigenous trees during the pipeline and canal survey and construction. Community training on catchment protection/conservation.
Effects on fauna through loss of habitats	<ul style="list-style-type: none"> Avoid processes and activities that impact negatively on both fauna and flora i.e. interfering with breeding, sheltering, watering and feeding grounds.
Displacement of people	<ul style="list-style-type: none"> The proponent to sign a memorandum of understanding with the affected individuals who are affected to either surrender their parcels of land willingly or be compensated for the land so surrendered for public use. The local Lands Office and the Local Council Office should be involved early at stakeholder level. There should be adequate compensation for the displaced individuals requiring resettlement.
Soil erosion	<ul style="list-style-type: none"> Introduce scour checks and gabion mattresses. Avoid excessive bush and tree clearing and finally re-seeding such grounds at appropriate times. Planting of trees along the exposed area through the help of the existing Community Forest association. Planting of trees should be undertaken so as to stabilize the soils.
Soil compaction	<ul style="list-style-type: none"> Avoidance of off-road driving Construction carried out during the dry season
Pollution of rivers and wetlands	<ul style="list-style-type: none"> There should be regular education from the agriculture extension officers on the safe use of fertilizers and agro-chemicals in the farms. There should be adequate solid and waste water disposal from the construction sites.
Increased traffic	<ul style="list-style-type: none"> Proper passage of information to the community on the proposed activities and the duration they are to take place. The construction activities should be

restricted to daytime only.

Extraction Construction Materials	<ul style="list-style-type: none"> Establish a comprehensive rehabilitation plan for the quarries and borrow pits where materials are extracted including landscaping and repairs of the intake and the materials disposal sites.
Construction wastes; Solid wastes, Waste water, Oil spill	<ul style="list-style-type: none"> The contractor should put in place adequate integrated waste management systems in place
Pollution; dust and air quality concern	<ul style="list-style-type: none"> Provide dust mask to the workers; Sprinkle water during the spreading and trench land filling. Sensitization of drivers and other machine operators; Check motor speed and noise ministries. Where possible offer women equal opportunities as men.
Occupational health and safety hazards	<ul style="list-style-type: none"> Follow the OSHA regulations 2007, all workstations to have trainings on OHS all workers to be covered under the workman's compensation Act; Ensure adequate facilities for sanitation for the workers. Use of PPE during construction time.
HIV/ AIDs prevalence to the community	<ul style="list-style-type: none"> There should be proper and adequate passage of information to the local communities to prevent spread of the social diseases. Provision of control measures such as condoms to prevent disease occurrences.
Water quality and quantity degradation	<ul style="list-style-type: none"> The levels of the river should be monitored over time. Water abstraction must adhere to WRMA limits.
Water-logging, soil salinization, sedimentation and leaching	<ul style="list-style-type: none"> The DIOs to advise on the irrigation patterns and methods so as to avoid incidences of over-irrigation, Promote the use of organic manure as much as possible.
Water-borne diseases	<ul style="list-style-type: none"> Avoid water leakage and stagnation. Awareness creation on prevention of malaria by use of mosquito nets. Collaborate with other community players on training and sensitization on disease and control to prevent diseases' spread.
Interference with movement paths	<ul style="list-style-type: none"> Bridges should be constructed along the livestock-human corridors. Excavation along the animals/human pathways should be done last before completion of the project so as to prevent potential for human- livestock conflicts.
Human-livestock-wildlife conflict	<ul style="list-style-type: none"> Community sensitization forums. Fencing of the farmlands. Use of Indigenous Knowledge System at planting.
Public health and safety	<ul style="list-style-type: none"> Restrict the construction activities to day-time only. Proper maintenance of vehicles and equipment to minimize noise levels. Comply with the NEMA standards on the levels of noise and vibration emitted from the construction sites.
Pests and crop diseases	<ul style="list-style-type: none"> There should be adequate involvement of the local DAOs in the prevention and mitigation of the various prevalent diseases.

- Loss of livelihood and incomes
- Proper guidance to farmers on the appropriate agro-chemicals to use.
 - Adopt economic earning activities to promote food security.
 - The contractor assists in the redeployment of workers to other sites.

The full report of the proposed project is available for inspection during working hours at:

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED REHABILITATION AND EXPANSION OF ISINET IRRIGATION PROJECT IN MBIRIKANI LOCATION, MBIRIKANI DIVISION ISINET MARKET, KAJIADO COUNTY

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The Proponent (National Irrigation Board) is proposing to rehabilitate and expand an earthen canal of approximately 12km in Isinet for development of an irrigation project.

The following are the anticipated impacts and proposed mitigation measures:

<i>Impacts</i>	<i>Mitigation Impacts</i>
Loss of flora	<ul style="list-style-type: none"> • Avoid cutting indigenous trees and vegetation within the survey area/ path of the water conveyance. • Avoid excessive bush clearing where possible adopt re-vegetation around the water intakes. • Minimize number of indigenous trees cut. • A forestation and reforestation programs in certain parts of farmlands. • Preserve certain sections for grazing purposes • The integrity of the forest resources should be well guarded from the spillover effects of the project' activities so as to maintain their functionalities.
Loss of fauna	<ul style="list-style-type: none"> • Construction within sensitive habitats should be avoided at all costs. • Wetlands should be buffered by a minimum of 50 meters. • Construction zone should be clearly indicated to prevent off site damage. • Modifications of canal routes should be

	<p>preceded by an ecological survey.</p> <ul style="list-style-type: none"> • There should be intensive tree planting • Setting aside woodlands.
Destruction of wildlife habitats	<ul style="list-style-type: none"> • The habitats diversity should be retained and protected by conserving them. • There should be no cultivation on riparian sections since they serve as habitats for several animal species. • Woodlands should be adequately established.
Risk of nvasive species	<ul style="list-style-type: none"> • Raw materials such as sand and rocks should be sourced from area without alien/ invasive species. • The equipment required for the construction works should be clean and free from alien plants and mud which may contain seeds of alien species.
Increased pests	<ul style="list-style-type: none"> • Develop a training program for farmers especially on integrated pest management. • Field sanitation should be adequately maintained.
Aquatic weeds	<ul style="list-style-type: none"> • Best practices in weed control should be applied. • Regulate water discharge and manipulate water levels to discourage weed growth. • Movement of animals should be checked since some weeds are transported by animals. • The weed debris shall be used for compost, biogas, and as fodder for animals.
Air and dust	<ul style="list-style-type: none"> • Provide dust masks to workers. • Sprinkle water on the soil during excavation and land filling. • Control speed of working machinery.
Noise	<ul style="list-style-type: none"> • Abate noise by sensitizing drivers in the project. • Use manual labour as much as possible. • Restriction of activities to daytime • Workers within the vicinity of high level noise to be provided with adequate PPE. • No idling of vehicles and machinery if not in use, they should be switched off. • Control speed and noise of construction machinery. • Insulate noisy machines and activities during construction to minimize noise. • Unnecessary hooting is to be avoided as much as possible.
Water	<ul style="list-style-type: none"> • Keeping all equipment and machinery free from mud. • Having standard operating procedures while working along water resources. • Apply appropriate irrigation procedures to prevent contamination. • Sensible use of agrochemicals to prevent deposition into rivers. • Adhere to waste discharge regulations. • Compaction of loose material/soils. • All repairs and maintenance work should be done at the contractors.
Water borne diseases	<ul style="list-style-type: none"> • Awareness creation to the local community. • Adequate provision of mosquito nets.

	<ul style="list-style-type: none"> • Better equipped health centers closer to the people with trained personnel. • Boiling and treatment of drinking water if collected from water pools. • Regular surveillance to ensure water does not stagnate. 		
Land repossession and relocation	<ul style="list-style-type: none"> • Stakeholder consultation and involvement in decision making at all levels. • Compensation of land to the farmers. • Provision of alternative land of similar value. • Skip areas where the crops are maturing to cut on the losses. • Measures to reduce loss of income to those affected by the relocations. 		
Social diseases	<ul style="list-style-type: none"> • Implement awareness creation for social evils such as HIV/AIDS and other STDs. • Sensitize the community on the prevention and management of HIV/AIDS. • Contraceptives should be provided at acceptable locations. • Opening up of VCTs in the local health facilities should be enhanced. 		
Irrigation related diseases	<ul style="list-style-type: none"> • There should be adequate health facilities. • There should be regular spraying of homes to control the presence of mosquitoes. • Mosquito nets should be adequately supplied and at subsidized prices. • The ground water abstracted for domestic use should be boiled or be treated. • Dry up stagnating water regularly to prevent potential breeding grounds for mosquitoes. 		
Water supply versus demand	<ul style="list-style-type: none"> • Use metering methods to abstract water. • Develop water monitoring strategy and a routine for water distribution. • Ensure Total Environment Flow as per WRMA regulation is adhered to. 		
Possibility of increased conflicts	<ul style="list-style-type: none"> • Avail drinking points for the livestock or build the water pans along the canal. • Fence off the farms to prevent animals' entry into the farms. • Hold regular communal discussions and dialogue to bring mutual agreements between various land users. • Encourage other modes of grazing such as zero grazing as it is less pasture demanding. • Produce fodder on irrigated land to reduce the pressure on the pastoral land. • Ensure 30%- 40% of River water allowed to flow downstream. 		
Population pressure	<ul style="list-style-type: none"> • Monitor the trend in migration to the area during the project. • Implementation and increase the requisite facilities. • Develop an efficient water and sewer system in the project areas in conjunction with the area districts' water offices. 		
Changes in land use	<ul style="list-style-type: none"> • Sensitizing the community on the new farming systems so that they can be fully involved in the transition process. • Encourage the growth of traditional and 		more indigenous crops where possible.
		Water use for domestic purposes	<ul style="list-style-type: none"> • Sensitize the community on the dangers of using canal water for domestic purpose. • Consider the possibility of providing tap water. • The local community should be encouraged to treat the tap water.
		Soil erosion	<ul style="list-style-type: none"> • Institute erosion control measures on areas prone to erosion especially steep slopes. • The topsoil should not be used during the construction phase • There should be intensive re-vegetation on bare grounds after construction.
		Soil compaction	<ul style="list-style-type: none"> • The excavation works should be backfilled and compacted. • The quarries and barrow pits should be rehabilitated after activities.
		Siltation and farm flooding	<ul style="list-style-type: none"> • Ensure proper design and layout of field to avoid canal on the steep gradients. • Ensure there is appropriate terracing where possible. • Ensure water application does not exceed soil intake rate, over irrigation. • Construction of water pans along the conveyance route.
		Salinization/leaching	<ul style="list-style-type: none"> • Avoid water logged conditions, where possible. • Add humus and organic manure to the soils regularly.
		Construction Waste	<ul style="list-style-type: none"> • The wastes produced should either be reduced reused or recycled. • There should be provision of adequate littering facilities. • Waste disposal sites should be located away from the water sources to prevent the possibility of potential run off into the water system. • Burning of chemical or hazardous wastes should not be done on site. • There should be adequate awareness raising on proper solid waste handling and disposal. • Proper containment and disposal of solid waste at all project phases.
		Waste water and effluents	<ul style="list-style-type: none"> • The minimization of waste water must be the principle governing project activities. • All grey water run-off or discharges should be contained and properly channeled away from water sources. Wash areas should have impermeable surfaces. • Water containing cement, lime or concrete should not be discharged on site. • Pollution incidences on site should be acted upon speedily.
		Occupational health and safety concerns (OHS)	<ul style="list-style-type: none"> • The contractor should have a comprehensive health and safety policy. • Ensure there is compliance to various health and safety regulations. • Carry out regular risk assessments of the workplace. • Establish a standard code of practice for the project workers including suppliers. • Install fully equipped first Aid Kits at

strategic points at the working areas.

- Ensure there are adequate sanitation facilities on sites.
- Warning signs/bumps to be erected and/or placed at risky points.
- Take out insurance covers for the workers under the workman's compensation Act.
- Provide adequate emergency procedures for the facility staff and conduct drills.
- Install at strategic points enough firefighting equipment.

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED CONSTRUCTION OF A PETROL SERVICE STATION ON PLOT L.R. NO. NAIROBI BLOCK 115/14 AND 115/15 ALONG THE EASTERN BYPASS, IN NAIROBI COUNTY

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The proponent (Astral Petroleum Co. Ltd) is proposing to develop a Petroleum Service Station consisting of: a Mini market; Fast food restaurant; Air and water point; Sanitary facilities; Associated piping works; Compressor and Generator Room; Underground storage tanks; Oil interceptor, septic tank and a soak pit; Fuel dispensers under a steel canopy; Service bays and a tyre centre, car wash and repair shop; Drive way and car park; and Management offices.

The following are the anticipated impacts and proposed mitigation measures:

Impact	Proposed Mitigation Measures
Environmental, Health and Safety Management Plan	<ul style="list-style-type: none"> • Environmental Management Plan and a workable and cost effective implementation plan be put in place during the construction and operations phases. • All activities be carried out in ensuring better working conditions and compliance with the legal requirements.
Wastes generated	<ul style="list-style-type: none"> • The materials that cannot be re-used should be disposed of at designated sites as stipulated in the environmental laws. • Proper waste disposal. • Provision of waste collection bins for

Rocks from excavation, concrete and block off-cut chips	<ul style="list-style-type: none"> • easier waste segregation and disposal of waste. • The soil excavated will be re-used in filling and leveling the foundation which should be minimal. • All the un-usable component be transported and disposed in designated areas.
Soil Erosion and Degradation	<ul style="list-style-type: none"> • The soil excavated will be re-filling the foundations. • Control earthworks to avoid interfering with land not to be built upon.
Construction materials	<ul style="list-style-type: none"> • Use of standard materials already certified by the government. • Comply with the building code on structural configurations and materials to be used.
Visual enhancement	<ul style="list-style-type: none"> • Use of colors and structures that enhance visual façade. • Paint entire walls and external entrances to render well to general neighbourhood.
Hydrology and drainage	<ul style="list-style-type: none"> • Storm water to be directed into the natural drains. • Properly design drainage structures to prevent silting and soil erosion.
Water resources	<ul style="list-style-type: none"> • Control usage of water to minimize wastage. • Install toilets flush with low volume cisterns and a long and short flush and push taps. • Rain water harvesting to prevent over dependence on already limited available water resources.
Biological resources	<ul style="list-style-type: none"> • Landscaping and planting of fast growing trees, shrubs, grasses and ornamental flowers where possible.
Conflict resolution	<ul style="list-style-type: none"> • Public consultation and interview • No interference with the any structure or resource of public and cultural interest to the community. • The project will also create employment opportunities during construction and operations phases.
Awareness on Environment, Occupational Health and Safety Regulations	<ul style="list-style-type: none"> • Awareness training sessions focusing on environmental, health and safety regulations, requirements of the Environmental Management and Coordination Act. • Prepare health and safety plan. • Adhere to the general matters, stipulated health, safety and workforce welfare regulations. • Provide workforce with safety wearing gear and enforce their use.
Emergencies and Accidents Occurrences	<ul style="list-style-type: none"> • Provision of personal protective clothing. • Protective clothing and safety gadgets to be provided to the workers and visiting clientele. • Emergency response plan.
Records of Accidents	<ul style="list-style-type: none"> • Records on number and nature of accidents and injuries to be maintained.
Air, dust and noise pollution	<ul style="list-style-type: none"> • Dust protection gadgets to be provided to the workers. • Carry out off-site maintenance of trucks and machinery.
Social security and safety	<ul style="list-style-type: none"> • Construction of perimeter fence.

- Install basic security facilities such as street lighting and security alarms.
- Erection of warning signs and directions
- Supervise movements of trucks and machinery at all times.
- Building design schedules to comply with local authority specifications of building regulations.
- Comply with Ministry of Work's code regulations for earthquakes.
- Comply with Kenya building code regulations for fire hazards.
- Certification of construction materials.

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED RAHOLE IRRIGATION DEVELOPMENT PROJECT, IN MBALAMBALA DISTRICT, GARISSA COUNTY

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The Proponent (National Irrigation Board (NIB), is proposing to construct Rahole canal and develop Rahole Irrigation project. The proposed Rahole Irrigation Development Project (RIDP) will cover a total estimated area of 10,000 acres with over 1800 households. The total length of this proposed canal is about 54 km. The proposed infrastructure consists of gravity fed surface irrigation system. The project will extract water from Tana River through the proposed Rahole Canal.

The following are the anticipated impacts and proposed mitigation measures:

Phase	Environmental Impacts	Mitigation Measures
Construction Phase	Interference existing Social infrastructure	<ul style="list-style-type: none"> • Construct bridges along the livestock /human corridors, • Excavation along the animals/human pathways should be done last
	Deforestation	<ul style="list-style-type: none"> • Minimize number of indigenous trees cutting • Re-afforestation
	Interference with Wildlife habitat	<ul style="list-style-type: none"> • Trees planting • Setting aside woodlands
	Soil Erosion	<ul style="list-style-type: none"> • Minimize number of trees cutting • Re-afforestation
	Siltation of water bodies	<ul style="list-style-type: none"> • Compaction of loose material

Water pollution	<ul style="list-style-type: none"> • Compaction of loose material/soils • All repairs and maintenance be done at the contractors yard/garage
Dust Pollution	<ul style="list-style-type: none"> • Regulate traffic speed and movement • Apply daily water sprays to suppress dust. • Provide PPE to construction workers.
Noise Pollution	<ul style="list-style-type: none"> • Use manual labor as much as possible. • Restriction of activities during daytime • Provide workers with PPE. • No idling of vehicles and machinery if not in use. • Construction to take the shortest time possible.
Interruption of transport channels	<ul style="list-style-type: none"> • Construct bridges/inverted siphons along the transportation routes • Routes should be excavated as the last stage of construction.
Possibility of Increased conflicts	<ul style="list-style-type: none"> • Avail drinking points for the wildlife by construction of water pans along the canal • Fencing off the farms using electric fence (solar power) • Identify and creation of conservancy area by KWS
Siltation and flooding	<ul style="list-style-type: none"> • Ensure proper design and layout of field to avoid steep gradients. • Ensure appropriate terracing if possible • Ensure water application rate does not exceed soil intake rate. • Construction of water pans along the conveyance route • Protection against flood at the intake and 200 m of the Rahole Canal
Water pollution	<ul style="list-style-type: none"> • Apply appropriate irrigation procedures • Sensible use of agrochemicals • Adhere to waste discharge regulations
Waterborne diseases	<ul style="list-style-type: none"> • Creating community awareness on the prevention measures such as spraying and use of treated mosquito nets.
Increase in pests and diseases	<ul style="list-style-type: none"> • Training on safe use of agrochemicals to avoid resistance
Salinization/Leaching	<ul style="list-style-type: none"> • Avoid water logged conditions, where possible • Add humus to the soils regularly • Capacity building by Agricultural extension officers.
Human-Human conflict.	<ul style="list-style-type: none"> • Capacity building on peace and governance issues. • Avail drinking points for livestock by construction of water pans along the canal.

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED FILLING STATION AND HOTEL AT CHIANDA IN UYOMA ALONG NDORI-LWANDA K'OTIENO ROAD ON PLOT NO. SIAYA/KOBONG/ 2893

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The Proponent (Christopher Chika) is proposing to construct a filling station and hotel at Chianda in Uyoma along Ndori-LwandaK'otieno road on plot no. Siaya/ Kobong/ 2893. The filling station shall consist of: 3 dispensing pumps (1 for super petrol, 1 for diesel and 1 for Kerosene); 3 underground storage tanks (10,000liters for super, 5,000liters for diesel and 5,000litres of kerosene); a canopy; Office block (store, office, and toilets); Pressurized air and water points; associated civil works and ancillary amenities. The proposed hotel will consist of 10 accommodation rooms offering bed and breakfast.

The following are the anticipated impacts and proposed mitigation measures:

<i>Anticipated Impacts</i>	<i>Proposed Mitigation Measures</i>
Product spills	<ul style="list-style-type: none"> Provision to pave the Pump Island and remote filling area with reinforced concrete as per the designs. Training of staff on proper dispensing practices. Monitor daily reconciliation of wet stock and inventory records. In case of suspect losses, institute tank and line integrity testing; and Conduct a soil gas survey to check the extent of contamination from the leaks.
Road traffic and road safety	<ul style="list-style-type: none"> Movement of construction vehicles timed to avoid peak periods. Provide temporary road signs or notices to indicate on-going works. Contractor to plan itineraries for site traffic on a daily basis and avoid peak traffic periods. Plan and implement traffic management programme on a daily basis. Comply with all applicable legislation and by-laws with regard to road safety and transport. Ensure adequate entry and exit lane design and appropriate signage.
Erosion control	<ul style="list-style-type: none"> Earthworks should be controlled so that land that is not required for the construction works is not disturbed.

Air and noise pollution	<ul style="list-style-type: none"> Wherever possible, earthworks should be carried out during the dry season to prevent soil from being washed away by the rain. Excavated materials and excess earth will be kept at appropriate sites approved by the supervising engineer and the earth dumping sites designed in such a manner as to facilitate natural water discharge. The Contractor shall protect areas susceptible to erosion by installing necessary temporary and permanent drainage works as soon as possible.
	<ul style="list-style-type: none"> Construction activities shall be confined to normal working hours. Noise sensitive areas like residential houses shall be notified at least 5 days before construction is commenced. All construction machinery shall be maintained and serviced appropriately. Dust generating activities shall not be carried out during strong winds. Water is applied whenever dust emissions are visible at the site. Vehicles delivering soil materials shall be covered to reduce spills and windblown dust. Vehicle speeds are limited to minimize the generation of dust on site.
Water and soil contamination	<ul style="list-style-type: none"> Carefully collect used oil in drums and dispose of by licensed refuse contractor. Adhere to wastewater management regulation of the legal Notice 121 and Water quality regulations of the Legal Notice 120. Conduct wastewater monitoring to check compliance and submit the results to NEMA. Document and train staff in the emergency spill response plan.
	<ul style="list-style-type: none"> The tank and lines will be used as per their design life of 30 years and replaced appropriately. Monitor daily reconciliation of wet stock and inventory records. In case of suspect losses, institute tank and line integrity testing; and Conduct a soil gas survey to check the extent of contamination from the leaks.
Leakage of tanks and product lines	<ul style="list-style-type: none"> Comply with the requirements of the Environmental Management (Waste Management) Regulations Legal Notice 120. Prepare a waste management plan. Clearly designate and construct an appropriate waste collection facility or provide covered refuse skips. Segregate waste at source and monitor waste volumes. Identify Licensed waste disposal contractor to remove from site.
	<ul style="list-style-type: none"> Provision and placement of appropriate fire extinguishers and training of personnel to handle emergency situations. Provision of fully equipped First Aid box on site at all times. Display warning signs at suitable

- locations.
- Prohibit unauthorized persons at the station.
 - Weatherproof fittings for all lighting and power points located outside the fuel station.
- Choice of construction materials
- Construction materials shall be from approved sources e.g. quarries.
 - Procure environmentally friendly and sustainable materials.
 - Do not use materials known to have adverse environmental effects e.g. asbestos.
- Public health and occupational health and safety
- Develop a site safety action plan detailing safety equipment to be used, emergency procedures, restrictions on site, frequency and personnel responsible for safety inspections and controls.
 - Conduct daily site inspections to ensure safe work practices are adhered to.
 - All workmen should be provided with personal protective equipment.
 - All incidents and accidents on site must be recorded and corrective actions taken.
- Energy utilization
- Develop an energy management plan;
 - Construction machinery and vehicles should be maintained and used in accordance with manufacturer's specifications.
 - Construction workers should be sensitized on efficient energy management.
- Water utilization
- The Contractor should monitor water consumption and utilization.
 - The Contractor should sensitize construction workers on the importance of proper water management.
- Handling of facilities
- Establish maintenance system and adequate resources.
 - There should be a plan and programme for inspections, repair work, cleaning and other maintenance activities.

The full report of the proposed project is available for inspection during working hours at:

**IMPORTANT NOTICE TO SUBSCRIBERS TO
THE KENYA GAZETTE**

THE following notes are for the guidance of persons submitting "copy" for inclusion in the *Kenya Gazette, Supplement*, etc.:

- (1) *The Kenya Gazette* contains Notices of a general nature which do not affect legislation. They are, therefore, submitted to the Government Printer directly.
- (2) *Legislative Supplement* contains Rules and Regulations which are issued by the Central Government. Because of this, they must be submitted to the Government Printer through the office of the Attorney-General.
- (3) *Bill Supplement* contains Bills which are for introduction in the National Assembly.
- (4) *Act Supplement* contains Acts passed by the National Assembly.

All "copy" submitted for publication should be prepared on one side of an A4 sheet no matter how small the Notice is, each page being numbered and should be typewritten with double spacing. Copy should be clear, legible and contain no alterations.

Particular attention should be paid to the following points:

- (i) Signature must be supported by rubber-stamping or typing the name of the signatory in capital letters.
- (ii) must be correct and filled in where necessary.
- (iii) Care should be taken to ensure that all headings to Notices and references to legislation are up to date and conform with the Revised Edition of the Laws of Kenya.

EXTRACT FROM THE CODE OF REGULATIONS, SECTION D—

Kenya Gazette

"D 34. (1) Communications for the *Kenya Gazette* should reach the Government Printer not later than 9 a.m. on Friday of the week before publication is desired. The Government Printer will not publish communications received after that hour until the next subsequent issue of the Gazette.

(2) Ministries will be required to pay for the *Kenya Gazette* and to meet the cost of advertising in it.

It is emphasized that these notes are for guidance only, but it is requested that persons submitting copy for publication first satisfy themselves that such copy is complete in every respect.
