GAZETTE NOTICE NO. 9906

THE ENVIRONMENTAL MANAGEMENT AND CO-ORDINATION ACT

(No. 8 of 1999)

NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY
ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT
FOR THE PROPOSED ASBESTOS CORRUGATED SHEETS
DISPOSAL SITE ON PLOT L.R. NO. 12177/68 IN SAGALLA,
TAITA TAVETA COUNTY

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The proponent Tai Lifestyle Limited, proposes to establish and manage an asbestos corrugated sheets disposal site. The strategy for disposal will be pit burial at a depth of 3 meters which will be excavated and lined with concrete and high density polythene to prevent soil and underground water contamination. The dimension of each pit are as follows; length 36m, breadth 14m and height 3m. The expected volume of the asbestos corrugated sheets is approximately 30,000 tonnes. The disposal of the sheets will be sectional, using and closing up filled up sections accordingly. The propose project will be on Plot L.R. No. 12177/68 in Sagalla, Taita Taveta County.

The following are the anticipated impacts and proposed mitigation measures:

Environmental Impacts Potential Mitigation Measures

Loss of grazing areas and wildlife habitat	<ul style="list-style-type: none"> • Preserve as possible indigenous trees and other vegetation cover that need not be removed.
Destruction of physical environment	<ul style="list-style-type: none"> • Restore degraded areas through landscaping by sediment binding grasses and trees. • Retain the excavated soil to be used in backfilling the disposal pits.
Occupational safety and health risks	<ul style="list-style-type: none"> • Register the site as a workplace with the DOSHS.

Environmental Impacts Potential Mitigation Measures

	<ul style="list-style-type: none"> • Obtain insurance cover for the workers at the site. • Provide adequate and appropriate PPE to workers and visitors to the site and enforce on their use. • Provide employees with correct tools and equipment for the jobs assigned and train on their use. • Ensure moving parts of machines and sharp surfaces are securely protected with guards. • Provide first aid services and emergency vehicle at the site. • Comply with the Occupational Safety and Health Act, 2007.
Air pollution	<ul style="list-style-type: none"> • Sprinkle water at the excavation areas to suppress dust. • Use of serviceable machinery/equipment and trucks. • Procure and enforce the use of dust masks to workers and visitors to the project site. • Monitor fugitive emissions. • Comply with the Air Quality Regulations, 2014.
Noise Pollution	<ul style="list-style-type: none"> • Procure and provide adequate ear muffs to workers and visitors to the site and enforce their use. • Sensitize truck drivers to avoid unnecessary hooting and running of vehicle engines. • Comply the Noise and Excessive Vibration Pollution (Control) Regulations, 2009.
Solid waste generation	<ul style="list-style-type: none"> • Use the generated overburden in backfilling and landscaping. • Procure and strategically place adequate solid waste collection bins with a capacity for segregation. • Procure a sizeable central solid waste collection bin with chambers to accommodate separated waste. • Sensitize construction workers on proper waste management • Procure the services of a NEMA licensed waste handler to dispose of the solid waste. • Comply with the Waste Management Regulations, 2006.
Water demand and effluent generation	<ul style="list-style-type: none"> • Sensitize the workforce on the need to conserve the available water resources. • Monitor the amount of water being abstracted from the borehole. • Procure and deliver to the site mobile toilets from a NEMA licensed waste contractor. • Comply with Water Quality Regulations, 2006.
Littering during transportation	<ul style="list-style-type: none"> • The ACMs waste should be transported to the disposal site in an enclosed vehicle or container.

Environmental Impacts Potential Mitigation Measures

	<ul style="list-style-type: none"> Vehicles transporting the asbestos waste should be licensed as per the Waste Management Regulations, 2006. Ensure all persons involved in handling and disposal of asbestos adhere to the stipulations set under the National Guidelines on Safe Management and Disposal of Asbestos, 2011.
Safety and health risks	<ul style="list-style-type: none"> Train workers on asbestos handling. Fence the disposal site using a chain link with an access gate to control access with clear hazard demarcations. Provide adequate and appropriate PPE to all workers, train them on correct use and enforce their use Comply with the provisions of the Occupational Safety and Health Act, 2007 and the National Guidelines on Safe Management and Disposal of Asbestos, 2011.
Air pollution	<ul style="list-style-type: none"> Provide adequate and appropriate PPE to all workers, train them on correct use and enforce their use. Lower the ACMs gently into the disposal site to avoid breakages. Wet any cracked pieces of ACMs to prevent release of the asbestos fibers. Comply with the provisions of the National Guidelines on Safe Management and Disposal of Asbestos, 2011 and the Air Quality Regulations, 2014.
Noise pollution	<ul style="list-style-type: none"> Provide earmuffs to employees and visitors to the disposal site. Comply with the Noise and Excessive Vibration Pollution (Control) Regulations, 2009.
Contamination of surface and ground water	<ul style="list-style-type: none"> The pits should be shallow and as such do not pose a threat to the water table. The design of the site should include appropriate drainage channels so as to divert surface runoff from the disposal area. Comply with the provisions of the Waste Management Regulations, 2006 and the National Guidelines on Safe Management and Disposal of Asbestos, 2011.
Soil contamination	<ul style="list-style-type: none"> The burial pits should be lined with concrete. Ensure the burial pits are fully covered with the HDP liner. Construct a concrete paved area to be used for clean-up activities Waste water from the clean-up area should be directed towards the established water drains. The contaminated soil during clean-up activities should be removed and disposed of at the disposal site.
Solid waste generation	<ul style="list-style-type: none"> Asbestos contaminated PPE should be disposed in the disposal pits. Comply with the provisions of the Waste Management Regulations, 2006 and the

Environmental Impacts Potential Mitigation Measures

	National Guidelines on Safe Management and Disposal of Asbestos, 2011
Water and effluent generation	<ul style="list-style-type: none"> Sensitize the workforce at the site on the need to conserve the available water resources Construct sanitation facilities for use by workforce. Install and commission a bio-digester to manage the generated effluent. Monitor the quality of the effluent from the bio-digester. Apply for and obtain an Effluent Discharge License from NEMA. Comply with the of the Water Quality Regulations, 2006.
Economic decline	<ul style="list-style-type: none"> Train employees on alternative livelihoods prior to decommissioning. Prepare and issue recommendation letters to the workers to seek alternative employment opportunities. Review potential job opportunities in other ongoing contracts by the proponent and recommend the employees who qualify. Comply with labor laws by paying the employees their terminal dues.
Creation of ecologically vulnerable land	<ul style="list-style-type: none"> Maintain the warning signs, fence and gate to prevent vandalism and interference of the disposal site. Rehabilitate the site through planting grass and appropriate tree species in consultation with the KFS.

The full report of the proposed project is available for inspection during working hours at:

- Principal Secretary, Ministry of Environment and Forestry, NHIF Building, 12th Floor, Ragati Road, Upper Hill, P.O. Box 30126-00100, Nairobi.
- Director-General, NEMA, Popo Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.
- County Director of Environment, Taita Taveta County.

A copy of the report can be downloaded at www.nema.go.ke

The National Environment Management Authority invites members of the public to submit oral or written comments within thirty (30) days from the date of publication of this notice to the Director-General, NEMA, to assist the Authority in the decision making process regarding this project.

Comments can also be emailed to dgnema@nema.go.ke

National Environment Management Authority.

GAZETTE NOTICE NO. 9907

THE ENVIRONMENTAL MANAGEMENT AND
CO-ORDINATION ACT

(No. 8 of 1999)

NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY
ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT
FOR THE PROPOSED MUMIAS-KAMILILI SEWERAGE
PROJECT IN MUMIAS TOWN, KAKAMEGA COUNTY

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The proponent Central Rift Valley Water Works Development Agency proposes to develop Mumias-Kimilili sewerage project which has three main sewers namely M-1, M-2 and M-3. The proposed sewer originates from Ekeru market and traverses to the East of Kakamega-Mumias Rd (C40) and will cross Mumias-Bungoma Rd (C33) near Finito sports pub as it discharges to the proposed M-3 trunk. The line serve the areas of Ekeru market and Ekama and towards areas to the East of Ekeru market and Ekama.

The following are the anticipated impacts and proposed mitigation measures:

Possible impacts	Mitigation Measures
Noise and vibration control from plant and equipment	<ul style="list-style-type: none"> The Contractor shall keep noise level within acceptable limits and construction activities shall, where possible, be confined to normal working hours. Planned operations in the residential, hospitals, schools and other noise sensitive areas shall be notified by the Contractor at least 5 days before construction is due to commence in the said vicinity. Any complaints received by the Contractor regarding noise will be recorded and communicated to the Resident Engineer. The Contractor must adhere to Noise Prevention and Control Rules of April 2005. Acquire Noise and excessive vibrations Pollution Control Permit and comply with conditions provided by the Environment Management and Co-ordination, Noise and excessive vibrations Pollution Control regulations of 2009.
Risk of illegal connection to the Sewer and water pipeline	<ul style="list-style-type: none"> Seek official water connection by applying and paying connection fee to the water and sewer provider. Constant inspection and monitoring of water and sewer lines by KACWASCO officials to identify and repair leakages on time. Institute fines and charges to illegal connections, arrest and prosecute. Conduct public sensitization programs on the importance of not interfering with the sewerage and water pipeline. Encouraging locals to report cases of illegal connections and damages to the water providers or nearest police station.
Risk of sewer blockage and overflows to the environment	<ul style="list-style-type: none"> Undertake community sensitization not to dump solid materials in manholes to prevent blockages. Regular cleaning of grit chambers and sewer lines to remove debris that may lead to sewer backups. Design manhole covers to withstand anticipated loads and ensure that the covers can be readily replaced if broken to minimize entry of garbage and silt into the system. Ensure sufficient hydraulic capacity to accommodate peak flows and adequate

Possible impacts	Mitigation Measures
Air degradation	<p>slope in gravity mains to prevent build-up of solids and hydrogen sulphide generation.</p> <ul style="list-style-type: none"> Development of an inventory of system components, with information including age, construction materials, and drainage areas served elevations. Workers will be trained on management of air pollution from vehicles and machinery. Construction machinery will be maintained and serviced in accordance with the specifications. The removal of vegetation shall be avoided until such time as clearance is required and exposed surfaces shall be re-vegetated or stabilised as soon as practically possible. The contractor shall not carry out dust generating activities (excavation, handling and transport of soils) during times of strong winds. Vehicles delivering soil materials shall be covered to reduce spills and windblown dust. Water sprays shall be used on all earthwork areas within 200 metres of human settlement. The contractor shall provide all workers in dusty areas with nose masks. The contractor shall abide with the provisions of Air Quality regulations of 2014 during the course of executing this assignment.
Risk of farming using raw sewage especially vegetables	<ul style="list-style-type: none"> Constant inspection, surveillance and monitoring of sewer line by KACWASCO officials to ensure that farmers do not divert raw sewer for farming. Conduct public sensitization programs on the health risks associated with using raw sewer to grow crops especially vegetables. Arrest and prosecute all those who will be found guilty of tampering with the sewer facility.
Waste generation and disposal	<ul style="list-style-type: none"> Construction wastes will be collected and disposed of by registered waste handlers at NEMA approved disposals sites in accordance with EMC (wastes) regulations Act, 2006. The contractor is encouraged to recycle and reuse materials and resources which are still in good working condition to reduce pressure on natural resources and the quantity of waste to be disposed. Contaminated organic matter in the work areas to be isolated for safe disposal material residuals to be disposed of in accordance with established NEMA regulations. KACWASCO to work closely with the locals for project acceptance and ownership.
Sludge handling and disposal	<ul style="list-style-type: none"> The proponent will ensure that the roofs of the sludge drying beds are always in good condition to ensure quick drying of sludge and appropriate disposal to reduce

Possible impacts	Mitigation Measures	Possible impacts	Mitigation Measures
	<p>odour emanating from wet sludge.</p> <ul style="list-style-type: none"> Workers to be educated and made aware on safe management, handling and application of the sludge cake. The quality and safety of the sludge cake should be ensured on a collaborative basis with (public health, agriculture, water and soil) before it is released to the users. 		<p>and ensure steady supply of condoms.</p> <ul style="list-style-type: none"> Develop an intervention strategy compatible with the construction programme to address success of the HIV/AIDS prevention and provide peer educators for sustainability in collaboration with other stakeholders; and, Integrate monitoring of HIV/AIDS preventive activities as part of the construction supervision. Basic knowledge, attitude and practices are among the parameters to be monitored, and particularly on provision of condoms, status testing and use of ARVs. (Number of trainings, attendance list of participants and training reports).
Earth moving and excavations, vegetation clearance, channelling and site preparations	<ul style="list-style-type: none"> The contractor shall inform the communities or stakeholders of the planned activities prior to commencement. Barrier tapes, notices, signage's and IEC materials will be relayed to the public for their safety at all locations where the project traverses. The contractor will install barriers along walkways, crossings and public places affected by the works for public safety. Where there is potential for nuisance from dust generation, ensure earth moving is under dump conditions. Construction activities will be limited to project sites/ routes, which already exist therefore limited destruction to vegetation cover. Stock piling of top soil, construction materials and wastes should be done only at designated sites approved by the supervising engineer, erosion prevention through berming of loose soil sites should be done in all areas susceptible to agents of erosion. Notify other service providers and open sections that can be reinstated within the shortest period to avoid public disruption. Mark the lines to avoid conflicts with other activities. Install temporary barriers and signage's in areas under operation. 	Local labour employment	<ul style="list-style-type: none"> Wherever possible, the Contractor shall use local labour, and women must be encouraged to be involved in construction work. The contractor shall ensure compliance to the gender balance as required by the 2/3 gender rule.
Spoil storage site	<ul style="list-style-type: none"> Preferably to be located on land already cleared wherever possible. People within the area shall be involved in the site location to avoid conflict. The need to be more than 20 meters from water courses and in a position that will facilitate the prevention of storm-water runoff from the site from entering the watercourse. Contouring of spoil site to approximate natural topography and drainage and/or reduce erosion impacts on the site. The Contractor shall ensure that the placement of spoil is done in such a manner to minimize the spread of materials and the impact on surrounding vegetation and that no materials 'creep' into 'no-go' areas. 	Child protection, sexual exploitation and abuse (SEA) of underage girls	<ul style="list-style-type: none"> Workers will be educated by relevant agencies such as police and probation officers on the relevant laws and policies protecting children. Reach out to children in and out of school in the vicinity of the construction sites with a life skills program focusing on HIV/AIDS and sexual abuse prevention among others areas. Mobilize and strengthen child protection institutions and structures near construction sites. Reach out to school authorities and parents near construction sites on paying special attention to child protection in light of labour influx. Partnerships will be established with relevant government agencies and NGOs to ensure children access survivor centred services such as medical care, psychosocial support, legal redress, safety, e.t.c as and when necessary. Ensure no children are employed on site in accordance with National Labour laws. Ensure that any sexual exploitation and abuse (SEA) of children by the contractors' workers are promptly reported to the police. Popularize /put in place confidential mechanisms and hotlines for reporting child.
Traffic management on site	<ul style="list-style-type: none"> Use of warning signage and tapes where the trenches are open and active sites. Employ and train road safety Marshalls who will be responsible for management of traffic on sites. 	Soil Erosion	<ul style="list-style-type: none"> The contractor/Proponent will ensure that all areas disturbed during the execution of the proposed project are re vegetated back to their former conditions. Practice soil control measures(terracing).
Spread of stis, HIV and AIDS	<ul style="list-style-type: none"> Contractor to develop appropriate training and awareness materials for Information and Education. The contractor to provide VCT services 		<ul style="list-style-type: none"> Avoid unnecessary vegetation clearing by limiting machineries to areas marked for clearance.to avoid extended soil degradation and its consequent erosion.

Possible impacts	Mitigation Measures	Possible impacts	Mitigation Measures
	<ul style="list-style-type: none"> Stock piling of top soil, construction material and wastes should be done only at designated sites approved by the supervising engineer, erosion prevention through berming of loose soil sites should be done in all areas susceptible to agents of erosion. 		<ul style="list-style-type: none"> Employ and train road safety marshalls who will be responsible for management of traffic on sites. Contractor to provide a traffic management plan during construction to be approved by the resident engineer.
Occupational health and safety issues	<ul style="list-style-type: none"> The contractor to provide construction workers with appropriate PPEs (gloves, safety shoes, overalls, reflectors, nose mask, ear muffs and helmets). Provide temporary/mobile toilets and bathrooms for the construction workers at the work sites. Provide fully furnished first aid kits accessible by the workers on need. Prepare and implement an emergency response plan during project execution. Isolate the site for access by the local communities during the construction for their safety and health. Contractor to develop and implement a Health and Safety Plan prior to the commencement of works to be approved by the Resident Engineer. A full-time health and safety officer should be employed by the contractor on site during construction phase of the project. 	Risk of encroachment and construction of structures on the sewer wayleaves.	<ul style="list-style-type: none"> Mapping and installation of beacons will be undertaken to mark the width of the pipeline reserve. Regular inspection of the sewerage corridor for possible encroachment. Prosecution of encroachers as required by City County By-laws on way leaves and road reserve maintenance. Conduct public sensitization programs to minimize encroachment and interference on way leaves and public reserve land.
Storage of fuel oils, lubricants, chemicals and flammable materials	<ul style="list-style-type: none"> The contractor and his staff should strictly follow and adhere to the specifications of Occupational Health and Safety Act, EMCA 1999 and others in the development and operation of stores. 	Contractor demobilization and site reinstatement	<ul style="list-style-type: none"> The contractor shall ensure that the site is tidy and cleared of all construction materials, including litter and debris prior to handing over. Fences, barriers and demarcations associated with the construction phase must be removed from the site. Rehabilitation Activities of Environmental Cases identified must continue throughout the defect liability period. Landscaping of degraded and bare lands must be undertaken before project hand over to the proponent.
Loss of land/displacement	<ul style="list-style-type: none"> The proponent/Contractor to ensure that land acquisition is done within the provision of Land Act, 2012 Prepare and Implement RAP recommendations before commencement of any works. All the PAPs should be compensated fairly at full replacement cost using current land market value. Creation of awareness to PAPs on alternative land use practices. Vulnerable PAPs should be offered resettlement assistance whenever possible. 	<p>The full report of the proposed project is available for inspection during working hours at:</p> <p>(a) Principal Secretary, Ministry of Environment and Forestry, NHIF Building, 12th Floor, Ragati Road, Upper Hill, P.O. Box 30126-00100, Nairobi.</p> <p>(b) Director-General, NEMA, Popo Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.</p> <p>(c) County Director of Environment, Kakamega County.</p> <p>A copy of the report can be downloaded at www.nema.go.ke</p> <p>The National Environment Management Authority invites members of the public to submit oral or written comments within thirty (30) days from the date of publication of this notice to the Director-General, NEMA, to assist the Authority in the decision making process regarding this project.</p> <p>Comments can also be emailed to dgnema@nema.go.ke</p> <p style="text-align: right;">MAMO B. MAMO, Director-General, National Environment Management Authority.</p>	
Sanitation issues resulting from both solid and liquid wastes on site	<ul style="list-style-type: none"> The Contractor shall follow laws relating to public health and sanitation. All temporary/ portable toilets or pit latrines shall be secured to the ground to the satisfaction of the resident engineer to prevent them from toppling over. A wash basin with adequate clean water and soap shall be provided alongside each toilet. Staff shall be encouraged to wash their hands after use of the toilet, in order to minimise potential spread of diseases. 		
Traffic management on site	<ul style="list-style-type: none"> Use of warning signage such as speed limits near residential/market areas, and tapes where the trenches are open and on active sites. 		

GAZETTE NOTICE No. 9908

THE ENVIRONMENTAL MANAGEMENT AND CO-ORDINATION ACT

(No. 8 of 1999)

NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED MUMIAS-KIMILILI SEWERAGE PROJECT IN KIMILILI TOWN, BUNGOMA COUNTY

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of the Environmental Management

and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The Proponent Central Rift Valley Water Works Development Agency proposes to develop Mumias-Kimilili Sewerage project in Kimilili town, which has one main trunk sewer namely k-1, the proposed k-1 trunk main sewer originates from Kamusinga area, north of Kimilili town centre. It reverses the banks of river kibisi, with two major paved road crossing on Kimilili-Kipsokwony road and Kimilili-Kamukuywa road. It then discharges waste water effluents to the proposed Kimilili waste water treatment plant located in south east of Kimilili municipality. The sewer will serve areas of Kamusinga, Kimilili town centre, Kimilili market, Jonaf Farm, Khamulati, Kimilili-Kamukuywa road, Kimilili Kipsokwony road, areas along the bank of river Kimilili/Kibisi, Matili TTI and Maeni areas. The specific area to be serve within this catchment include Moi Girls, Kamusinga, Friends school Kamusinga, CBSM Kimilili m school, Kory Family hospital Kimilili, Kimilili bus top Banks, shops, Offices and institutions within the CBD, western province police training institute, Kimilli market, Kamtiong market and Maeni market. The trunk will therefore serve a huge portion of the town.

The following are the anticipated impacts and proposed mitigation measures:

<i>Possible impacts</i>	<i>Mitigation Measures</i>
Accidents, injuries or death of workers or community member	<ul style="list-style-type: none"> The Contractor Will Provide construction workers with PPEs (gloves, safety shoes, overalls, reflectors, nose mask, ear muffs and helmets). The Contractor Will Provide temporary toilets and bathrooms for the construction workers at the work sites. The Contractor Will Provide first aid kits accessible by the workers on need. The Contractor Will Isolate and barricade the site for access by the local communities during the construction for their safety and health Contractor to provide a Healthy and Safety Plan prior to the commencement of works to be approved by the Resident Engineer.
Solid waste mismanagement leading to pollution	<ul style="list-style-type: none"> Preferably to be located on land already cleared wherever possible. People within the area shall be involved in the site location to avoid conflict The need to be more than 20 meters from water courses and in a position that will facilitate the prevention of storm-water runoff from the site from entering the watercourse. Contouring of spoil site to approximate natural topography and drainage and/or reduce erosion impacts on the site. The Contractor shall ensure that the placement of spoil is done in such a manner to minimize the spread of materials and the impact on surrounding vegetation and that no materials' creep' into 'no-go' areas.
Gender Based Violence (GBV)	<ul style="list-style-type: none"> Contractor will prepare a GBV Prevention and Response Plan and
<i>Possible impacts</i>	<i>Mitigation Measures</i>
Water quality deterioration including contamination of underground water resources	<ul style="list-style-type: none"> Construction wastes to be removed for safe disposal. Recycling to be encouraged. Contaminated organic matter in the work areas to be isolated for safe disposal. Material residuals to be disposed of in accordance with established NEMA regulations.
Disruption of amenities (access roads, water, cables, electricity and driveways) causing inconveniences to the community	<ul style="list-style-type: none"> Notify other services providers and open sections that can be reinstated within the shortest period to avoid public disruption. Mark the lines to avoid conflicts with other activities. Install temporary barriers and signage.
Air pollution from odour emanating from wastewater treatment works	<ul style="list-style-type: none"> Ensure scum is appropriately disposed off or properly stabilized. Ensure that the pond series have adequate water flow and aeration to reduce the potential of odour formation. The perimeter of the proposed site
	<p>implementation arrangements.</p> <ul style="list-style-type: none"> Contractor to prepare and enforce a No Sexual Harassment and discrimination Policy in accordance with national laws. Contractor to engage services of local CSO to educate all workers and nearby communities and stakeholders on preventing and responding to sexual harassment and GBV ahead of any project related works. Popularize and put in place confidential mechanisms and hotlines for reporting GBV and sexual offences cases. Strategies such as male involvement will be employed in preventing and responding to GBV and sexual harassment. Establish partnerships with relevant government agencies and NGOs to ensure survivors of GBV and sexual offences access survivor centered services such as medical care, psychosocial support, legal redress, safety, etc. as and when necessary. Provision of gender disaggregated facilities - separate bathing, changing, sanitation facilities for men and women. Grievance redress mechanisms including non-retaliation should be set up for the workers. Liaise with the administration units (County and sub-County governments, Police, DO, chiefs, etc.) to provide regular surveillance and patrols to protect workers and unacceptable behavioural interaction of local communities and workers.

Possible impacts	Mitigation Measures	Possible impacts	Mitigation Measures
	<ul style="list-style-type: none">should be vegetated with trees and plants of varying heights thereby forming windbreaker and reduce dispersion of odour.• Repair the roofs of the sludge drying beds to ensure quick drying of sludge and appropriate disposal to reduce odour emanating from wet sludge.• Ensure appropriate covering/ventilation of the pre-treatment unit.• Ensure appropriate handling and removal of grit/grease.• Ensure proper sizing and alignment of the lagoons.• Plant trees especially bamboos and eco-friendly indigenous trees around the waste water treatment plant to limit exposure of neighborhood to odour menace.	Risk of sewer blockage and overflows to the environment	<ul style="list-style-type: none">• Community awareness not to dump solids in manholes.• Regular cleaning of grit chambers and sewer lines to remove debris that may lead to sewer backups.• Design manhole covers to withstand anticipated loads and ensure that the covers can be readily replaced if broken to minimize entry of garbage and silt into the system.• Ensure sufficient hydraulic capacity to accommodate peak flows and adequate slope in gravity mains to prevent build-up of solids and hydrogen sulphide generation.• Development of an inventory of system components, with information including age, construction materials, and drainage areas served elevations.
Land and soil contamination	<ul style="list-style-type: none">• The service providers to attend to burst pipes promptly to prevent excessive loss of soil.• Provide high risk areas with appropriate drainage for effective channeling of burst sewage spills.• Encourage land owners along sewer lines to maintain vegetated belts along the pipeline to control any overflows flows and trap soil. They should be encouraged to take responsibilities at the lowest levels in regard to protecting the sewer line.• Mark clearly the pipeline for ease of identification and protection by the adjacent landowners.	Risk of encroachment and construction of structures on the sewer wayleaves	<ul style="list-style-type: none">• Mapping and installation of beacons to which illustrate the width of the pipeline reserve.• Arrest and prosecute.• Regular inspection of the sewerage corridor for encroachment.• Prosecution of encroachers as required by City County By-laws on way leaves and road reserves maintenance.• Conduct public sensitization programs on importance not interfering with way leaves and public reserve land.
Land and property loss	<ul style="list-style-type: none">• Proponent /contractor to ensure that land acquisition is done within the provision of Land Act 2012 Prepare and Implement RAP recommendations before commencement of any works• All Identified PAPS to be fairly compensated at full replacement rate / current market land rates.	Risk of illegal connection to the sewer and water pipeline	<ul style="list-style-type: none">• Sensitize the community to Seek official water connection by applying and paying connection fee.• Conduct constant inspection by NZOWASCO officials to identify and repair leakages.• Arrest and prosecute.• Conduct public sensitization programs on importance not interfering with the sewerage and water pipeline.
Risk of farming using raw sewage especially vegetables	<ul style="list-style-type: none">• Constant inspection by NZOWASCO officials to identify farming.• Conduct public sensitization programs on importance not interfering with the sewerage and water pipeline.• Arrest and prosecute.	Risks of environmental degradation	<ul style="list-style-type: none">• The site to be cleared of all construction materials, including litter prior to hand over.• Fences, barriers and demarcations associated with the construction phase must be removed from the site Fences, barriers and demarcations associated with the construction phase must be removed from the site.• Rehabilitation Activities of Environmental Cases identified must continue throughout the defect liability period.
Public health and safety risks /worker occupational safety risks	<ul style="list-style-type: none">• Contractor to notify public the intent to cut sections of the road for safety precautions.• To provide signage and safety information in all work areas.• To ensure compliance by workers with safety safeguards including the OHS, PPE and enforcement of application.	Risks of Increased STIS and HIV and Aids transmission in the area.	<ul style="list-style-type: none">• Contractor will develop appropriate training and awareness materials for Information and Education.• Develop an intervention strategy compatible with the construction programme to address success of the

Possible impacts	Mitigation Measures
	HIV/AIDS prevention and provide peer educators for sustainability in collaboration with other stakeholders; and
	<ul style="list-style-type: none"> Integrate monitoring of HIV/AIDS preventive activities as part of the construction supervision. Basic knowledge, attitude and practices are among the parameters to be monitored, and particularly on provision of condoms, status testing and use of ARVs. ((Number of trainings, attendance list of participants and training reports).
Temporary displacement of businesses, Health and safety risks, air pollution and social nuisance.	<ul style="list-style-type: none"> Inform immediate communities or stakeholders of the activities. Provide barrier tapes, notices, signage and information to the public for their safety at all locations. Install barriers along walkways, crossings and public places affected by the works for public safety. Where there is potential for nuisance from dust generation, ensure earth moving is under dump conditions.

The full report of the proposed project is available for inspection during working hours at:

- Principal Secretary, Ministry of Environment and Forestry, NHIF Building, 12th Floor, Ragati Road, Upper Hill, P.O. Box 30126-00100, Nairobi.
- Director-General, NEMA, Popo Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.
- County Director of Environment, Bungoma County.

GAZETTE NOTICE No. 9909

THE ENVIRONMENTAL MANAGEMENT AND CO-ORDINATION ACT

(No. 8 of 1999)

NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY
ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT
FOR THE PROPOSED PROPERTY DEVELOPMENT ON PLOT
L.R. NAKURU MUNICIPALITY BLOCK 7/554 LOCATED
ALONG NAKURU-KISUMU ROAD IN NAKURU COUNTY

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The proponent Local Authorities Provident Fund (LAPFUND) intends to construct a Commercial mall, a 5 Star Hotel, a Modern warehouse block, an Office block, Petrol Station, Kindergarten, Residential apartments and Parking lots within its premises on plot

L.R. Nakuru Municipality Block 7/554 located along Nakuru-Kisumu Road in Nakuru County.

The following are the anticipated impacts and proposed mitigation measures:

Environmental Impacts Mitigation measures

- | | |
|----------------------------------|---|
| Vegetation disturbance | <ul style="list-style-type: none"> Ensure proper demarcation and delineation of the project area to be affected by the construction work. Specify location for vehicles and equipment and areas of the site which shall be kept free of traffic equipment and storage. Designate access routes and parking within the site. Introduction of vegetation (trees, shrubs and grass) on open spaces and around the project site and their maintenance. Design and implement an appropriate landscaping programme to help in re-vegetation of open parts of project area after construction. |
| Dust emission | <ul style="list-style-type: none"> Ensure strict enforcement of on-site speed limit regulations. Sprinkle water during excavation works by heavy machines. Sprinkle water on graded access routes when necessary to reduce dust generation by construction vehicles. Dust masks to be provided to employees and should be worn. Use environmentally friendly fuels Minimize the period for machinery idling. Pursue good practices in energy use during operations and sensitize staff. Provide appropriate personnel protective equipment to site workers. |
| Increased solid waste generation | <ul style="list-style-type: none"> Use of an integrated solid waste management system i.e. through a hierarchy of options: 1. Reduction at source, 2. Recycling, 3. Reusing, 4. Incineration, 5. Sanitary land filling. Through accurate estimation of the dimensions and quantities required. Use of durable, long lasting materials that shall not need to be replaced as often as, thereby reducing the amount of waste generated over time. Provide facilities for proper handling and storage of construction materials to reduce the amount of waste caused by damage or exposure to the elements. Use building materials that have minimal or no packaging to avoid generation of excessive packaging waste. Reuse packaging materials such as cartons, cement bags, empty metal and plastic containers to reduce waste at site. Dispose waste more responsibly by contracting a waste registered handler who will dispose the wastes at designated sites only. |

Environmental Impacts Mitigation measures

- Health and safety
- Comply to the OSHA
 - Provide personnel and passers-by signage and warnings traffic control signs and warning.
 - Provide for appropriate signage and warnings at work sites
 - Provide appropriate personnel Protective Equipment (PPE) to site workers.
 - Provide for First Aid facilities as per the OSHA, 2007.
 - Plan to avoid congestion on road leading to the project area .
 - Provide and clearly display emergency contacts.
 - Develop and implement detailed and site specific Emergency Response Plans.
- Oil spills
- Install oil trapping equipment's in areas where there is a likelihood of oil spillage such as during the maintenance of construction equipment.
 - Soil in such an area shall be well protected from contamination.
- Noise and vibrations
- Sensitize construction vehicle drivers and machinery operators to switch off engines or machinery not being used.
 - Sensitize the construction vehicle drivers to avoid unnecessary hooting.
 - Ensure that construction machinery are kept in good condition to reduce noise generation.
 - The noisy construction works should be entirely planned to be during day time.

OPERATION PHASE

- Fire hazards
- Ensure fire extinguishers are stationed in visible places.
 - Security personnel and occupants to be trained in firefighting skills.
 - Drilling exercise to be conducted regularly.
 - Train substation operators on firefights.
 - Install smoke fire detectors and fire alarms.
- Energy resources management
- Ensure machinery is regularly serviced to improve efficiency in consumption of energy.
 - Energy management through use of sound/appropriate equipment.
 - Application of rated equipment in welding and related works
 - Use of efficient mechanical plant and energy savers on sites.
- Water and energy management
- Provide adequate and appropriate drainage infrastructure where required.
 - Ensure machinery is regularly serviced

Environmental Impacts Mitigation measures

- to avoid leakages and/or spillages.
- Oils, fuels and other materials to be stored in accordance with the manufacturers safety data sheets (MSDS).
 - Implement erosion and sedimentation controls
 - Energy management through use of sound equipment
 - Application of rated equipment in welding and related works
 - Use of efficient mechanical plant and energy savers on sites
- Increased storm water, runoff and soil erosion
- Surface runoff and roof water shall be harvested and stored in reservoirs so that it can be used for other purposes within the project site.
 - A storm water management plan that minimizes impervious area infiltration by use of recharge areas and use of retention with graduated outlet structures shall be designed
 - Apply soil erosion control measures such as leveling of the project site to reduce run-off velocity and increase infiltration of storm water into the soil.
 - Ensure that compacted areas are ripped to reduce run-off
- Insecurity
- The establishment to have 24-hour security guards to protect life and property.
 - Engage a security firm and ensure regular security patrols especially during the working shift exchange hours
- Sustainable resource utilization
- To ensure sustainable use of water and energy resources
 - Sensitize factory workers on efficient use of water and electricity

The full report of the proposed project is available for inspection during working hours at:

- (a) Principal Secretary, Ministry of Environment and Forestry, NHIF Building, 12th Floor, Ragati Road, Upper Hill, P.O. Box 30126-00100, Nairobi.
- (b) Director-General, NEMA, Popo Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.
- (c) County Director of Environment, Nakuru County.

A copy of the report can be downloaded at www.nema.go.ke

The National Environment Management Authority invites members of the public to submit oral or written comments within thirty (30) days from the date of publication of this notice to the Director-General, NEMA, to assist the Authority in the decision making process regarding this project.

Comments can also be emailed to dgnema@nema.go.ke

GAZETTE NOTICE NO. 9910

THE ENVIRONMENTAL MANAGEMENT AND
CO-ORDINATION ACT

(No. 8 of 1999)

NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY
ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT
FOR THE PROPOSED DEVELOPMENT OF 60 MEGAWATTS
WIND FARM AT SOUTH SAMBURU GROUP RANCH/88
KWALE COUNTY

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The proponent Devki Steel Mills Limited, proposes to develop a wind farm that will consist of 12 wind vestas V90 3MW turbines which are pitch regulated upwind wind turbines with active yaw and three blade rotor, with all necessary auxiliary facilities, overhead power line and access roads. This turbine has a rotor diameter of 90m with a generator rated of 3.0MW. The electricity generated will be fed to an existing nearby sub-station and power transmission grid within the premises of Devki Steel Mills Limited. The project will be located on Plot No. South Samburu Group Ranch/88 Kwale County.

The following are the anticipated impacts and mitigations measures:

<i>Impact</i>	<i>Mitigation Measures</i>
Impacts on terrestrial flora and fauna-vegetation clearing	<ul style="list-style-type: none"> Careful site selection for the wind farm and associated transmission lines to avoid or minimize the clearing vegetation and destruction of associated fauna habitats. Configuring wind turbines and access roads to minimize the clearing of vegetation and destruction of associated fauna habitats. Limit vegetation clearance and removal to actual location/installation of the turbine and allied infrastructure. Avoid off-road driving by wind farm personnel that can result in destruction of flora and fauna on site.
Noise and vibration	<ul style="list-style-type: none"> Limit the construction and turbine installation to daytime. Ensure equipment like heavy duty cranes being used to install the turbines are appropriately serviced and maintained. Put in place a comprehensive noise and vibration conservation programme which will include noise and vibration level monitoring, use of noise attenuators, training and use of appropriate personal protective equipment. Ensure the provisions of Environmental Management and Co-ordination (Noise and excessive vibration control) Regulation, 2009 are adhered to.
Particulate matter (dust) emission	<ul style="list-style-type: none"> Regular sprinkle water on opened dusty access roads. Secure construction site with dust screens. Provide construction workers with appropriate personal protective devices Monitor dust levels. Ensure the provisions of the Environmental Management and Co-ordination (Air Quality) Regulations, 2014

*Impact**Mitigation Measures*

Occupational injuries

are adhered to.

- Ensure only skilled and experienced workers are involved in the construction of the wind farm and allied infrastructure.
- Ensure suitable, appropriate, well serviced and maintained equipment are availed to the workers.
- Workers working at height and in confined areas must be provided with appropriate safety equipment.
- An all equipped first aid station to be on site with trained and experienced first aiders, stand by ambulance and referral hospital.
- Ensure that the provisions of the Occupational Safety and Health Act, 2007 are adhered to.

Traffic inconvenience along Mombasa-Kwale-Nairobi Road

- Permission to be sought from Kenya National Highway Authority for transportation of abnormal loads (wind turbines) prior to transportation.
- An escort vehicle one in front and one behind the truck transporting the turbines to be provided.
- Turbines to be transported during daylight only.
- Notice to be issued on local press of transportation of abnormal loads on the said road to inform other potential road users on order for them to exercise extra caution.

Visual impacts

- Thorough stakeholder engagement, including prior consultation, participatory decision-making, and information disclosure and dissemination. Adjusting the location of turbine rows or individual turbines to reduce perceived visual impacts.
- Choose wind power equipment with aesthetics in mind (where consistent with other objectives), such as a smaller number of (larger) turbines and reduced or different night lighting.
- Careful site selection to locate turbines where they would not produce shadow flicker around human dwellings.
- Use planning tools—standard industry software that predicts the location and timing of shadow flicker.
- Stakeholder engagement with potentially affected households and businesses.
- Create a visually balanced, simple and consistent image by adopting a regular wind turbine tower layout format such as a double line, a triangle, or a grid for regular landscapes such as an open or levelled space as is the case of the proposed project site.
- Turbine colors to be white, off-white or grey which gives people a feeling of cleanliness and efficiency and engage the turbines to the backdrops at different views and in different weather conditions.
- Design of wind farm according to the peculiarities of the site and with sensitivity

<i>Impact</i>	<i>Mitigation Measures</i>	<i>Impact</i>	<i>Mitigation Measures</i>
	to the surrounding landscape.		mortality.
	<ul style="list-style-type: none"> • Locate the wind farm at least reasonable distance from dwellings. • Selection of wind turbine design (tower, color) according to landscape characteristics; • Selection of neutral color and anti-reflective paint for towers and blades. • Underground cables • Lights for low-altitude flight only for more exposed towers. 		<ul style="list-style-type: none"> • Short-term shutdowns (in which the rotor blades do not turn during peak migration events) to minimize bird mortality. • The direction of tower layout should be properly designed to reduce the effects on bird migration.
Noise disturbance	<ul style="list-style-type: none"> • Careful site selection to locate turbines an adequate distance from human dwellings. • Use planning Tools—standard industry software that predicts specific noise impacts on nearby buildings. • Stakeholder engagement with potentially affected households and businesses. • Improved blade design to reduce the aerodynamic noise by decreasing rotational speeds to under 65 m/s at the tip; and using pitch control on upwind turbines, which permits the rotation of the blades along their long axis • Application of upwind turbines to reduce low frequency noise. • Use of special gearboxes for wind turbines instead of standard industrial gearboxes. Steel wheels of the special gearbox have semi-soft and flexible cores with hard surfaces to ensure strength, to extend the lifetime of the equipment, and to muffle noise. • Consider direct drive wind turbines without any gearbox or high-speed mechanical component which operate more quietly or variable-speed turbines which create less noise at low wind speeds than the constant-speed turbines. 	Reception of radio waves and weather radar electromagnetic interferences	<ul style="list-style-type: none"> • Careful site selection to avoid installing turbines within the line-of-sight of radar or telecommunications facilities. • Consider using turbine blades made from synthetic materials, which produced less electromagnetic interference compared to steel blades. • Install deflectors or repeaters to overcome the problem of already existing wind turbine induced electromagnetic interference.
		Local climate change	<ul style="list-style-type: none"> • Careful site selection for location of wind farm to ensure the wind farm is located in regions where wind energy is abundant and the frictional dissipation is high in this way, the wind energy will be harvested instead of losing as frictions. • Rotor generated turbulences to be reduced through improved rotor and blade designs and a proper design of turbine spacing and pattern.
		Blade throw	<ul style="list-style-type: none"> • Careful site selection to locate turbines an adequate distance from human dwellings • Timely servicing and maintenance of the turbines as per manufacturer's schedule.
Impacts on avifauna and bats	<ul style="list-style-type: none"> • Careful site selection to avoid building wind farm within important bird habitats and bird migration routes. • Bird flight activities in a zone of 200-500 m surrounding the planned wind farm should be recorded and analyzed. Flight heights, directions, species, and behaviors of birds should be studied systematically. • Restrict construction activities to non-breeding periods for avifauna to help reduce the negative effects of bird disturbance. • Structural design improvements to reduce bird mortality by enlarging the blades and slowing the rotational speed of the turbines. • Pattern paint the blades to increase the visual acuity of raptors. • Provide night illumination by lighting the turbine tower to improve blade visibility at night to reduce bird and bat collision with turbine towers at night. • Increased turbine cut-in speed (which is the lowest wind speed at which the rotor blades are spinning and generating electricity for the grid) to minimize bat 	Injuries and accidents	<ul style="list-style-type: none"> • Ensure that the provisions of the Occupational Safety and Health Act, 2007 are adhered to. • Ensure only skilled and experienced workers are involved in the decommissioning of the wind farm and allied infrastructure. • Ensure suitable, appropriate, well serviced and maintained equipment are availed to the workers. • Workers working at height and in confined areas must be provided with appropriate safety equipment. • An all equipped first aid station to be on site with trained and experienced first aiders, stand by ambulance and referral hospital.
		Noise and vibration	<ul style="list-style-type: none"> • Limit the dismantling of the turbines and allied infrastructure to daytime. • Ensure equipment used in the decommissioning of the entire wind farm are appropriately serviced and maintained. • Put in place a comprehensive noise and vibration conservation programme which will include noise and vibration level monitoring, use of noise attenuators, training and use of appropriate personal protective equipment. • Ensure the provisions of Environmental Management and • Co-ordination (Noise and excessive vibration control) Regulation, 2009 are

<i>Impact</i>	<i>Mitigation Measures</i>
	adhered to.
Dust	<ul style="list-style-type: none"> • Regular sprinkle water. • Secure decommission site with dust screens. • Provide decommissioning workers with appropriate personal protective devices • Monitor dust levels. • Ensure the provisions of the Environmental Management and Co-ordination (Air Quality) Regulations, 2014 are adhered to.
Waste generation	<ul style="list-style-type: none"> • Ensure all the waste generated is handled and disposed as provided for in the Environmental Management and Co-ordination (Waste Management) Regulations, 2006. • Explore possibility of re-use and or recycling.

The full report of the proposed project is available for inspection during working hours at:

- (a) Principal Secretary, Ministry of Environment and Forestry, NHIF Building, 12th Floor, Ragati Road, Upper Hill, P.O. Box 30126-00100, Nairobi.
- (b) Director-General, NEMA, Popo Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.
- (c) County Director of Environment, Kwale County.

GAZETTE NOTICE NO. 9911

THE TRUSTEE ACT

(Cap. 167)

IN THE MATTER OF THE ESTATE OF BRIAN SADLER LEIGH TRAFFORD

NOTICE is given pursuant to section 29 of the Trustee Act (Cap. 167) that any person having a claim against or an interest in the estate of Brian Sadler Leigh Trafford (deceased), of West Sussex, England, who died on the 21st February, 2021, at Greenhurst, Tismans Common, Rudgwick, Horsham, West Sussex, England is required to send particulars in writing of his claim or interest to the undersigned on or before the expiry of two (2) calendar months from the date that a copy of this notice shall appear in the *Kenya Gazette*, after which date the executors will distribute the estate among the persons entitled thereto having regard only to the claims and interest of which they shall have had notice and will not as respects the property so distributed be liable to any person of whose claim he shall not then have had notice.

*Jo Anne Elizabeth Summers &
David Jeremy Mallory Trafford,
c/o Daly Inamdar Advocates LLP,
ABC Place, Waiyaki Way,

GAZETTE NOTICE NO. 9912

THE INSOLVENCY ACT, 2015

SNACK RACK LIMITED

CREDITORS' VOLUNTARY LIQUIDATION

APPOINTMENT OF LIQUIDATOR

NOTICE is given that a creditors meeting of Snack Rack Limited was duly convened on the 22nd July, 2022 and the following resolution was duly passed:

"That the company be Wound-up voluntarily as a Creditors' voluntary liquidation; and that the official receiver be and is appointed for the purpose of the winding-up".

Creditors of the company are required to send full particulars of their claims on or before the 26th August, 2022, to the undersigned, the liquidator of the company, personally or by their proxies, and to come in and prove their debts or claims set out in such notice, or in default thereof, they may be excluded from the benefit or any distribution made before such debts are proved. The Liquidator acts on behalf of the company without any liability.

*The Official Receiver in Insolvency,
316, Upper Hill Chambers,
17th Floor, 2nd Ngong Avenue,
P.O. Box 30404-00100,
Nairobi.*

GAZETTE NOTICE NO. 9913

THE INSOLVENCY ACT

IN THE HIGH COURT OF KENYA AT NAIROBI

IN INSOLVENCY CAUSE NO. E51 OF 2021

IN THE MATTER OF JAPHETH MWANZIA MULE

B.O. made on the 17th May, 2022

BANKRUPTCY

(Subsection 48 (3) of the Insolvency Act)

TAKE NOTICE THAT:

Japheth Mwanzia Mule filed a petition for bankruptcy order on the 21st October, 2021 and the undersigned, Official Receiver, was appointed as trustee of the estate of the bankrupt by the Court.

Pursuant to section 254 (1) of the Insolvency Act, the bankrupt will be given an automatic discharge on the 17th May, 2025, unless the Official Receiver, the trustee of the estate of the bankrupt or a creditor of the bankrupt gives notice of intended opposition to the discharge of the bankrupt before that date.

Any creditor who intends to oppose the discharge of the bankrupt shall state in writing the grounds for his/her opposition and send a notice to this effect to the Official Receiver, the trustee of the estate of the bankrupt and the bankrupt at any time before the 17th May, 2025.

If the discharge of the bankrupt is opposed, the trustee will apply to the court without delay for an appointment for the hearing of the opposition in the manner prescribed by the Act and the Insolvency Regulations.

*The Official Receiver in Insolvency,
316, Upper Hill Chambers,
17th Floor, 2nd Ngong Avenue,
P.O. Box 30404-00100,
Nairobi.*

Dated the 2nd August, 2022.

**IMPORTANT NOTICE TO SUBSCRIBERS TO
THE KENYA GAZETTE**

THE following notes are for the guidance of persons submitting "copy" for inclusion in the *Kenya Gazette, Supplement*, etc.:

- (1) *The Kenya Gazette* contains Notices of a general nature which do not affect legislation. They are, therefore, submitted to the Government Printer directly.
- (2) *Legislative Supplement* contains Rules and Regulations which are issued by the National or county Governments. Because of this, they must be submitted to the Government Printer through the office of the Attorney-General.
- (3) *Bill Supplement* contains Bills which are for introduction in the National Assembly, Senate or county Assemblies.
- (4) *Act Supplement* contains Acts passed by the National Assembly, Senate or county Assemblies.

All "copy" submitted for publication should be prepared on one side of an A4 sheet no matter how small the Notice is, each page being numbered and should be typed with double spacing. Copy should be clear, legible and contain no alterations.

Particular attention should be paid to the following points:

- (i) Signature must be supported by rubber-stamping or typing the name of the signatory in capital letters.
- (iii) Care should be taken to ensure that all headings to Notices and references to legislation are up to date and conform with the Revised Edition of the Laws of Kenya.

EXTRACT FROM THE HUMAN RESOURCE POLICIES AND PROCEDURES MANUAL FOR THE PUBLIC SERVICE —

Kenya Gazette

A.30 (1) All communication for publication in the *Kenya Gazette* should reach the Government Printer not later than Friday of the week before publication is desired.

(2) A State Department will be required to meet the cost of advertising in the *Kenya Gazette*.

It is emphasized that these notes are for guidance only, but it is requested that persons submitting copy for publication first satisfy themselves that such copy is complete in every respect.

SUBSCRIPTION AND ADVERTISEMENT CHARGES
