(Cap. 411A)

MODIFICATION OF EXISTING LICENCES UNDER THE UNIFIED LICENSING FRAMEWORK (ULF)

The Communications Authority of Kenya introduced the Unified Licensing Framework (ULF) in 2008. Over this period, the Authority has identified a number of license conditions that require to be aligned with the prevailing regulatory and operational environment. The Authority therefore wishes to inform all its telecommunication licensees of its intention to modify the current ULF licences. All the licensees and industry stakeholders are invited to review the draft amended licences, which can be accessed at the Authority's website at http://www.ca.go.ke/images/downloads/public_consultations/

The Submarine Cable Landing Right Systems and Services (SCLR) licence will be affected by the modifications.

Licensees, members of the public and all stakeholders are invited to review and submit their representations on the proposed modifications within thirty (30) days from the date of this modification to the Authority at the address below.

(No. 3 of 2012)

REGISTRATION OF INSTRUMENT

WHEREAS Nthuku Mumo Muange (deceased), is registered as proprietor of that piece of land known as Makueni/Kako/216, situate in the district of Makueni, and whereas the principal Magistrate's court at Makueni in succession cause No. 15 of 2013, has issued letter of administration and confirmation to (1) Pascal Kisavi Nthuku and (2) Serah Mumbua Mutinda, and whereas the land title deed issued earlier to the said Nthuku Mumo Muange (deceased) has been reported missing or lost, notice is given that after the expiration of thirty (30) days from the date hereof, provided no valid objection has been received within that period, I intend to dispense with the production of the said land title deed and proceed with registration of the said instrument of administration and confirmation, and upon such registration the land title deed issued earlier to the said Nthuku Mumo Muange (deceased), shall be deemed to be cancelled and of no effect.

Dated the 7th November, 2014.

<i>Impact</i>	<i>Proposed mitigation measures</i>
Air pollution	<ul style="list-style-type: none"> Control speed and operation of construction vehicles. Prohibit prolonged engine idling. Spray water and/or wet surfaces during excavation works. Maintenance of construction plant and equipment. Sensitize construction workers on measures to reduce air pollution. All bare areas should be landscaped after construction to reduce dust. Provide respiratory protective devices.
Noise pollution	<ul style="list-style-type: none"> Maintain plant equipment. Construction should be carried out only during daytime i.e. 0800 – 1700 HRS. Workers to wear hearing protection when working in noisy section.
Traffic density	<ul style="list-style-type: none"> Proper signage put in place to notify neighbours of the activity and presence of heavy vehicles and to direct traffic. Presence of boards directing patrons to the site. Strict adherence to traffic rules.
Ecological considerations (flora and fauna)	<ul style="list-style-type: none"> The flora and fauna should be restored after construction by landscaping and maintaining the introduced plants.
Soil erosion and compaction	<ul style="list-style-type: none"> Provide soils conservation structures on the areas prone to soil erosion to reduce impact of erosion such as stone pitching on the drains which are near the road. There should be designated pathways and driveways for movement within the compound to avoid unnecessary compaction. All bare areas should be well landscaped after completion.
Solid waste management	<ul style="list-style-type: none"> Construction debris should be collected by a licensed waste handling company. Excavation waste should be re-used or backfilled. Waste generated should be collected by a licensed waste handling company and the contractor should ensure the construction of a central waste collection point with bulk storage facilities.
Oil leaks and spills	<ul style="list-style-type: none"> Machinery should be well maintained to prevent oil leaks. Contractor should have a designated area where maintenance is carried out and that is protected from rain water. All oil products should be stored in a site store and handled carefully.
Security	<ul style="list-style-type: none"> The site will be fenced off using iron sheets during renovation. Round the clock security for the facility. Adequate lighting and an alarm system installed.
Loss of vegetation	<ul style="list-style-type: none"> Designate access pedestrian routes and parking zones that are cabro paved. Provide signs marked do not Walk/ Park on the grass. The flora and fauna should be restored after construction by landscaping and maintaining the introduced plants.
Occupational health and safety	<ul style="list-style-type: none"> Provide Personal Protective Equipment. Train workers on personal safety and how to handle equipment and machines. Report any accidents / incident and treat

and compensate affected workers.

First aid

- The site will be fenced off using iron sheets during renovation to protect the public from unexpected accidents.
- A well-stocked first aid kit shall be maintained by a qualified personnel.

The full report of the proposed project is available for inspection during working hours at:

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED 15MW COAL FIRED PLANT IN MERRUESHI, KAJIADO COUNTY

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The Proponent (Devki Energy Company Limited) is proposing to construct a 15MW Coal Fired plant in Merrueshi, Kajiado County. The proposed coal power plant would be located at a site near south of Merrueshi village in Kajiado County. Proposed site is located at 22° 0' 49" N latitude and 69° 0' 30" E longitude. The site is well connected with State Highway Emali-Oloitok Road (A104). This project also is in line with the Government of Kenya's goal and plan of having an additional 5,000MW injected into the national grid by 2015 and therefore remains a critical contributor to this objective.

The following are the anticipated impacts and proposed mitigation measures:

<i>Impact</i>	<i>Mitigation Measures</i>
Air Quality	<ul style="list-style-type: none"> Undertake air sampling (quality) every 6 months for sensitive receptors. Applicable standard of 150 mg/Nm³ for particulate emission will be followed. Installation of electrostatic precipitators (ESP) and Single-flue; Advance low NO_x burners for steam generators. Sulphur content of the heavy fuel oil will not exceed 2%. Provision of dust suppression facilities. Develop Air Quality Management Plan
Degradation of water sources/water pollution	<ul style="list-style-type: none"> Ensure valid permits on construction of water abstraction (sources established in the project site/boreholes/ construction). Groundwater abstraction is on

	permits conditions (locations to be identified).		<ul style="list-style-type: none"> • Safety provisions (signage and lighting) for the work areas. • Conduct HIV/AIDS awareness training and other social diseases for local communities and workers. • Developing and implementing HIV/AIDS Policy • Provide Personal Protective Equipment (PPEs) for all workers at construction and operation.
Noise emission/pollution	<ul style="list-style-type: none"> • Construction of underground neutralization pit, guard ponds and ash ponds. • Construction of a sewerage system. • Construction of soak-away pits and or reticulated drainage network. • Provision of adequate PPE for workers. • Steam turbine generator to be housed in closed buildings. • Provision of 5m wide greenbelt at plant boundary to attenuate noise. • Develop Noise Mitigation Plan. 	In-Migration/cultural erosion	<ul style="list-style-type: none"> • Sensitization of all “foreign” workers on the culture, norms and traditions of the local communities. • Giving priority for unskilled and semi-skilled labour to local communities to reduce influx.
Ecological impacts	<ul style="list-style-type: none"> • Develop a Wildlife Management and Protection Plan. • Observation of speed limits. • Warning signs in areas where wildlife movement/crossing is common. • Education, training and awareness prohibiting workers from killing wildlife. 	Landscape and visual impact	<ul style="list-style-type: none"> • Landscaping the project site i.e. planting of trees in order to reduce the visual impacts. • Development of a landscape plan.
Solid waste impacts	<ul style="list-style-type: none"> • Develop Standard Operating procedures (SOPs) and schedules for the project works. • The contractors to develop waste management plans and provide appropriate facilities for their operations. • Spoil disposal sites should be approved by NEMA before dumping commences. • Ash generated will be stored in silos within the plant site and used for production of cement. • Disposal facilities (receptacles) provided at strategic points in the plant. • Consider Recycling or Re-Use and waste segregation during construction and operation. 	Socio-economic	<ul style="list-style-type: none"> • Enhance collaboration with communities on construction activities affected by establishing Community Liaison Officers (CLOs) and Committees. • Provide social amenities as part of the corporate social responsibilities as part of community improvement including water supply, health, sanitation etc.
		Decommissioning of Construction installations and project	<ul style="list-style-type: none"> • Develop a Rehabilitation and Restoration Plan and Project Closure Plan. • Undertake decommissioning audits for camp sites and seek approval of the decommissioning plan from NEMA. • Rehabilitate all material sites and material preparation yards in accordance with the approve rehabilitation plans.
Traffic and transport	<ul style="list-style-type: none"> • Develop Traffic Management Plan • Observing speed limits. • Awareness and training for drivers. • Erection of warning/caution signs. • Erection of speed humps. 	<p>The full report of the proposed project is available for inspection during working hours at:</p> <p>(a) Director-General, NEMA, Popo Road, off Mombasa Road, P.O. THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY
DRAFT STRATEGIC ENVIRONMENTAL ASSESSMENT FOR
THE OLKARIA AND EBURRU GEOTHERMAL FIELDS
DEVELOPMENT PROGRAMME
INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 42 and 43 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received Draft of Strategic Environmental Assessment (SEA) reports for the Olkaria Geothermal Field Development Programme and the Eburru Geothermal Field Development Programme.

The proposed Geothermal Development Programme at Olkaria and Eburru is part of KENGEN's Geothermal Expansion Programme, which is a nine-year programme (2012 to 2020). This Expansion Programme is part of KENGEN's Good to Great Transformation Strategy whose objective is to increase the Company's installed capacity to over 3000MWe by 2020. In this Strategy, the installed capacity for geothermal energy is expected to increase by over 1110MWe by 2020, and most of this expansion will take place in the Olkaria Geothermal Field.

Olkaria is a sensitive area in which the development of the geothermal resource needs to conform to the policies and strategic plans for ensuring environmental sustainability in Kenya, and a balance needs to be achieved between biodiversity conservation, the needs of the local communities, geothermal development and interests of all stakeholders.

The Eburru Geothermal License Area is a sensitive area that includes part of the valuable Eburru Forest (part of the Mau Forest Complex) and the Eburru community. Geothermal development in Eburru needs to conform to the policies and strategic plans for ensuring environmental sustainability in Kenya, and a balance needs to be achieved between biodiversity conservation, the needs of the local communities, geothermal development and interests of all stakeholders.

The methodology developed for the draft Strategic Environmental Assessment follows the 2012 Kenyan SEA Guidelines, International Best Practice and the requirements of the International Financial Institutions that are likely to fund the Programme, namely the World Bank, Agence Francaise de Development, KfW Entwicklungsbank, European Investment Bank and Japan International Cooperation Agency. The SEA assesses in detail the potential impacts of the proposed project, the obligations derived from other Policies, Plans and Programmes, and the stakeholder concerns in relation to all the significant environmental and social aspects identified, including biodiversity conservation, economy, employment, air quality, water, noise, soil, solid waste, tourism, agriculture, education, health infrastructure, housing, roads and transport.

The Strategic Environmental Assessment for Olkaria and Eburru proposes the following:

1. To assess the level of compliance of the Programme with the other relevant policies, plans and strategies;
2. To assess whether the proposed developments are compliant with EMCA (1999) and its Regulations ;
3. To assess compliance to international conventions that Kenya is a signatory and with the requirements of the International Financial Institutions that participate in the financing of geothermal process in the area;
4. To identify, predict, assess and where necessary mitigate the environmental and social impacts that are likely to be caused by the proposed programme;
5. To engage with the affected stakeholders throughout the process to ensure that it is transparent, to incorporate stakeholders' concerns into the assessment, incorporating their views on the long term impacts of geothermal developments and to promote stakeholders participation in the decision making process and;
6. To identify development alternatives in terms of location, technologies, scheduling, construction and operation.

The key points for Olkaria and Eburru SEA are:

- Analysis of KENGEN's Geothermal Development Programme.
- Review of legislation and regulatory framework for the SEA.
- Analysis of related Policies, Plans and Programmes.
- Description of the environmental and social baseline.
- Situation analysis.
- List the potential environmental and social impacts and related indicators, targets , threshold and limits of acceptable change.
- Development and analysis of alternatives.
- Prediction and assessment of impacts.

- Identification of enhancement opportunities and mitigation methods.

Over 80 mitigation measures, monitoring measures and recommendations are outlined in the SEA Reports to avoid, minimise or compensate for potential negative impacts and maximise positive impacts resulting from the programme. Key mitigation measures include the following:

Implementing a Strategic Environmental and Social Management System to apply and monitor the mitigation measures outlined in this SEA in a systematic, efficient, transparent and participatory manner;

Not developing geothermal resources (geothermal well drilling or power plant construction) in certain areas within the geothermal license area identified as critical for biodiversity conservation and tourism;

Training the local communities to increase the number of local people employed by KENGEN and to encourage the local groups to bid for contracts with KENGEN;

Developing a Corporate Social Responsibility Priority Setting System: KENGEN will design a system to prioritise CSR actions and handle CSR requests by the different stakeholders. This will be prepared in consultation with all identified stakeholders and ensure a systematic and transparent approach for the selection and implementation of CSR actions.

The key potential negative impacts and the recommended mitigation measures for Olkaria Geothermal Field Programme are highlighted below:

<i>Impacts of the Programme</i>	<i>Recommendations</i>
Direct loss of habitat	<ul style="list-style-type: none"> • Minimize the construction footprint by ensuring contractors adhere to detailed plan of the maximum construction footprint. • Reduce drilling pad footprint by reducing the footprint sizes, number of steam pipes and locating several drills in a drill pad. • Undertake Habitat restoration during construction and operational geothermal infrastructure by reducing the ordinary maintenance area. • Prevent and eliminate the invasive species.
Direct impacts on wildlife	<ul style="list-style-type: none"> • Protect biodiversity hotspots. • Carry out Risk assessments. • Avoid and mitigate impacts on wildlife by avoiding, minimising and compensating for the negative impacts.
Loss of habitat connectivity	<ul style="list-style-type: none"> • Protect biodiversity corridors by avoiding new barriers and protecting areas outside the Geothermal Licence Area. • Carry out a study on the effectiveness of elevated steam pipes on maintaining wildlife corridors. • Locate industrial parks near geothermal wells and other power generation facilities.
Hydrogen sulphide (H ₂ S) emissions	<ul style="list-style-type: none"> • Abate H₂S pollution by conversion of over 99.9 % of the H₂S from geothermal non-condensable gases into elemental sulphur and improving H₂S monitoring by KENGEN.
Water abstraction from Lake Naivasha	<ul style="list-style-type: none"> • Reuse the water for well drilling by using brine from geothermal wells for drilling whilst reducing the abstraction from Lake Naivasha.
Water losses	<ul style="list-style-type: none"> • Shift from contact condensers to hybrid cooling towers for the cooling systems.
Waste water discharge	<ul style="list-style-type: none"> • Use Brine from Olkaria I power plant for bottoming power plant in order to avoid the impacts related to discharge of

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED AUGMENTATION AND REHABILITATION OF GATANGA WATER SUPPLY IN GATANGA SUB-COUNTY, MURANG'A COUNTY

INVITATION OF PUBLIC COMMENTS

Pursuant to Regulation 21 of the Environmental Management and Coordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The Proponent (Athi Water Services Board) is proposing to improve the water supply in Gatanga Sub-County by rehabilitating and expanding the water supply system in Gatanga Sub-County, Murang'a County.

The following are the anticipated impacts and proposed mitigation measures:

Impact	Mitigation Measure
Loss of vegetation	<ul style="list-style-type: none"> • Retention of trees and shrubs, where possible on the potential sites for screening of the visual impact. • Where the proposed route requires the removal of any vegetation, care will be taken to minimize the destruction or damage of trees. • Re-planting of destroyed trees in cleared areas where works are complete.
Soil loss	<ul style="list-style-type: none"> • Pile the top soil where it can be reused. • Program of Works should be prepared in line with Aberdare region weather pattern so as to avoid such works during rainy seasons. • Restrict disturbance to soil structure

	<p>within project site.</p> <ul style="list-style-type: none"> • Put measures for protection of soil erosion (berming of loss soil). • Installing necessary temporary and permanent drainage works. • Minimize excavations to only the designated sections. 	Potential impact of traffic	<ul style="list-style-type: none"> • The site should have a Construction Traffic Management Plan. • Phasing of traffic movements to and from the site should be done so as to avoid potential convoys which could cause local scale congestion. • Trucks should not be over laden, and should be regularly serviced. • Good driving practices will be required from all delivery drivers. • Wherever and whenever construction approaches on the road or potentially affects the traffic signage will have to be placed and formal flagmen / women employed in order to ensure the public safety. • The contractor must ensure that the trucks carrying construction materials to the site are in good condition and no materials fall on the road as the truck moves around both on-site and off-site. • The contractor should ensure that the truck drivers adhere to and obey the speed limits.
Air quality issues	<ul style="list-style-type: none"> • Provision should be made available for water sprays to be used when dusts are being generated or at times of strong wind. • All materials stored or stockpiled on site should be adequately covered. • Maintain machineries at manufacturers specifications. • Where unavoidable, construction workers working in dusty areas should be given dust masks. • Limit removal of vegetation and a rehabilitation programme on site and associated infrastructure following construction. 		
Noise pollution and vibrations	<ul style="list-style-type: none"> • Use equipment that is properly fitted with noise reduction devices such as mufflers. • Use equipment that have low noise emissions as stated by the manufacturers. • Standard restrictions to hours of site works. • Workers should be provided with personal protective equipment. • The residents will be sensitized ahead of the commencement of works. 	Accidental spills or leakages	<ul style="list-style-type: none"> • Maintain vehicles and machineries at manufacturers specifications. • Ensure proper storage of chemicals / materials.
		Surface water run-off	<ul style="list-style-type: none"> • During the course of the construction works, temporary drainage channels should be constructed to encourage dispersal of meteoric waters. • Storage and stockpiling of materials on the site should be away from drainage channels. • Backfill of trenches in or near drains should be topped with rock fill to stop scour where drains have a gradient of 5% or over.
Generated wastes	<ul style="list-style-type: none"> • A waste minimisation approach should be adopted as part of the construction works. • Skips and bins should be strategically placed within the campsite and construction site, they should also be adequately designed and covered to prevent access by vermin and minimize odour. They should also be emptied regularly. • Measures to ensure that waste materials from the Project are disposed at suitable sites will be taken. These will include engaging only reputable truckers and conducting appropriate spot checks to verify that disposal are done in accordance with the requirements of NEMA. • The ultimate fate of the wastes should be monitored so that they are not illegally disposed of. • Provide portable sanitary conveniences for the construction workers for control of sewage waste. A ratio of approximately 25 workers per chemical toilet should be used. 	Requirement and use of local building materials	<ul style="list-style-type: none"> • Construction contract should stipulate that the Contractor sources materials from an approved site. • The tender documents should specify required standards and certification for procurement of all materials and appliances. • The sources of all required materials should be inspected prior to acquisition to confirm that they are legitimate operations. • The contractor should ensure that he sources construction materials sustainably. • The contractor should ensure that the storage area for materials is good so as to avoid spoils and waste.
		Occupational health and safety risks	<ul style="list-style-type: none"> • All construction workers should be advised of the dangers associated with construction work. • Workers should be provided with suitable foot wear, hard hats, protective glasses and generally with safety equipment where appropriate. • Provision of adequate sanitary facilities to workers. • Train all workers on Safety Health and

IMPORTANT NOTICE 1 PRINTED AND PUBLISHED BY THE GOVERNMENT THE KENYA GAZETTE

THE following notes are for the guidance of persons submitting "copy" for inclusion in the *Kenya Gazette, Supplement*, etc.:

- (1) *The Kenya Gazette* contains Notices of a general nature which do not affect legislation. They are, therefore, submitted to the Government Printer directly.
- (2) *Legislative Supplement* contains Rules and Regulations which are issued by the Central Government. Because of this, they must be submitted to the Government Printer through the office of the Attorney-General.
- (3) *Bill Supplement* contains Bills which are for introduction in the National Assembly.
- (4) *Act Supplement* contains Acts passed by the National Assembly.

All "copy" submitted for publication should be prepared on one side of an A4 sheet no matter how small the Notice is, each page being numbered and should be typewritten with double spacing. Copy should be clear, legible and contain no alterations.

Particular attention should be paid to the following points:

- (i) Signature must be supported by rubber-stamping or typing the name of the signatory in capital letters.
- (ii) must be correct and filled in where necessary.
- (iii) Care should be taken to ensure that all headings to Notices and references to legislation are up to date and conform with the Revised Edition of the Laws of Kenya.

EXTRACT FROM THE CODE OF REGULATIONS, SECTION D—

Kenya Gazette

"D 34. (1) Communications for the *Kenya Gazette* should reach the Government Printer not later than 9 a.m. on Friday of the week before publication is desired. The Government Printer will not publish communications received after that hour until the next subsequent issue of the *Gazette*.

(2) Ministries will be required to pay for the *Kenya Gazette* and to meet the cost of advertising in it.

It is emphasized that these notes are for guidance only, but it is requested that persons submitting copy for publication first satisfy themselves that such copy is complete in every respect.
