GAZETTE NOTICE No. 41

THE ENVIRONMENTAL MANAGEMENT AND
CO-ORDINATION ACT

(No. 8 of 1999)

NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT
FOR THE PROPOSED REFURBISHMENT OF HOMA BAY
STADIUM TO A MODERN SPORTING FACILITY LOCATED
WITHIN HOMA BAY TOWN, HOMA BAY COUNTY

INVITATION OF PUBLIC COMMENTS

Pursuant to Regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project

The proponent, County Government of Homa Bay, is proposing to refurbish Homa Bay Stadium to a modern sporting facility comprising of; football pitch, running track, VIP pavilion, six typical stands, four conner stands, net ball pitch, volleyball pitch and basketball court, four parking lots, well-managed landscape lawn in the compound located within Homa Bay Town, Homa Bay County.

The following are the anticipated impacts and proposed mitigation measures:

<i>Impacts</i>	<i>Proposed Mitigation Measures</i>
Increased exploitation of raw materials	<ul style="list-style-type: none"> • Source building materials from suppliers who use environmentally friendly processes in their operations. • Ensure accurate budgeting and estimation of actual construction material requirements. • Ensure that damage or loss of materials at the construction site are kept minimal. • Use at least 5%-10% recycled refurbished or salvaged materials.
Noise and excessive vibration	<ul style="list-style-type: none"> • Install portable hoods to shield compressors and other small stationary equipment where necessary. • Endeavour to use equipment installed with noise abatement devices as much as practicable. • Reduce idling time on trucks and other noisy equipment. • Encourage drivers to turn off vehicle engines when not in use. • Noise shielding screens should be used and the operation of such machinery restricted to when required. • For mobile equipment, fit efficient silencers and enclose engine compartments in plant vehicles. • For fixed plants, isolate source by enclosure in acoustic structure. • Raise barriers around noisy equipment. • Notify the public of construction activities that may be perceived as noisy and intrusive prior to starting construction. • The use of hearing protection gears by workers when exposed to noise levels above 85 dB(A). • Ensure that noise and excessive vibration from construction activities are within permissible levels as per the provision of the Environmental Management and Coordination (Noise and Excessive Vibration Pollution) (Control) Regulations, 2009.
Airborne emissions	<ul style="list-style-type: none"> • Construction equipment will be maintained in good operating condition to reduce exhaust emissions. • Construction sites, transportation routes, diversions and materials handling sites to be water-sprayed on dry and windy days to lay dust. • Use environmentally friendly fuels such as low sulphur diesel. • The project area will be cordoned off to minimize dust migration to nearby facilities by wind.

<i>Impacts</i>	<i>Proposed Mitigation Measures</i>	<i>Impacts</i>	<i>Proposed Mitigation Measures</i>
	<ul style="list-style-type: none"> Minimize exposed areas through the schedule of construction activities to enable dust control. Ensure no burning of waste on sites/non-designated areas. Rehabilitation of disturbed areas once completed. Speed controls by temporary speed bumps on diversions where necessary within the construction site. Staff working in dust generating activities should be provided with personal protective equipment (PPE) the use of PPE shall be enforced. 		<ul style="list-style-type: none"> Control the earthworks. Develop and implement a reinstatement plan. Ensure that clearance of vegetation is limited to the plinth of proposed structures and trench line to prevent soil erosion that would ensue after loss of vegetation. Ensure that construction vehicles use predetermined tracks at the site to reduce ground compaction. Oils, fuels, paints and any hazardous materials to be stored in accordance with their respective MSDS's, and in such a manner to avoid spillages or leakages.
Soil and water pollution	<ul style="list-style-type: none"> All machinery and equipment should be regularly maintained and serviced to avoid leak oils. Maintenance and servicing of vehicle, machinery and equipment must be carried out in a designated area. There should be no flooding within the site at all to prevent seepage of contaminated water into underground water sources. Label products and store in weatherproof containers on spill containment pallets and under a weatherproof tarp. Implementation of erosion and sediment control measures such as silt fences. Cover open stockpiles of construction materials with tarpaulin or similar fabric during rainstorms. 		<ul style="list-style-type: none"> Stabilize and maintain access roads created to access project sites. Stabilize construction sites and camp(s) entrances/exits. Avoid unnecessary removal/destruction of vegetation in site clearance. Development and implementation of a Reinstatement Plan. Re-vegetation of disturbed grounds with indigenous species. Locate construction traffic routes, spoil piles etc. away from existing vegetation. Provide for rescue of rare or distressed animals. Begin reservoir inundation after the dry season once hibernating animals have emerged. Implement "nuisance" plant monitoring programme for the construction site.
Increased solid waste	<ul style="list-style-type: none"> Adopt the method of selective demolition (for existing buildings) to the extent possible. Waste (such as metal scrap or wood waste) that can be reused/ recycled may be donated to local people. Segregate waste onsite. Ensure that waste is disposed of according to EMCA (Waste Management) Regulations, 2006 and the Homabay County Government by-laws. Contracted waste handlers should be licensed to transport and dispose waste at approved dumpsites only. During transportation of waste, it should be covered to avert dispersion along the way. Hazardous waste will not be mixed with other solid waste generated and should be managed by way of incineration or land filling. 	Ecology and biodiversity	<ul style="list-style-type: none"> Re-vegetation of disturbed grounds with indigenous species. Locate construction traffic routes, spoil piles etc. away from existing vegetation. Provide for rescue of rare or distressed animals. Begin reservoir inundation after the dry season once hibernating animals have emerged. Implement "nuisance" plant monitoring programme for the construction site.
		Increased safety and health risks	<ul style="list-style-type: none"> Strict instructions shall be given for drivers of heavy equipment. Develop evacuation procedures to handle emergency situations. Truck drivers should maintain a speed limit of not more than 20Km/hr. Speed controls by temporary speed bumps where necessary shall be undertaken within the construction site. Clear marking of work site hazards and training in recognition of hazard symbols. Training of all personnel in fire prevention and protection. Regular inspection, testing and maintenance of equipment and machinery. Provide full first aid kits at the construction yard. Containment of hazardous materials.
Water resource management	<ul style="list-style-type: none"> Develop and implement a site construction waste and wastewater management plan. Provide appropriate sanitary facilities at construction camp and sites, worker compounds and other construction facilities. Implement soil erosion control measures. Install and regularly empty sediment traps in surface drains around construction areas. Minimize soil disturbance and excavation during wet season. Obtain appropriate consents for any abstractions from, and discharges to watercourses during the construction period. 		<ul style="list-style-type: none"> Provide adequate protective gear to construction workers. Inform local communities of major activities in advance. Ensure all dangerous construction sites are fenced off. Enforce and monitor road safety standards. Follow best practice to prevent the creation of breeding areas for vermin. Provide awareness training to the workforce regarding the transmission of STDs, and traffic safety awareness.
Soil erosion	<ul style="list-style-type: none"> Landscaping to create contours towards the drainage systems. 	Community Health, HIV/AIDs safety and security	<ul style="list-style-type: none"> Enforce and monitor road safety standards. Follow best practice to prevent the creation of breeding areas for vermin. Provide awareness training to the workforce regarding the transmission of STDs, and traffic safety awareness.

<i>Impacts</i>	<i>Proposed Mitigation Measures</i>
	<ul style="list-style-type: none"> The contractor to keep carrying HIV/AIDS campaign for awareness creation and prevention of spread of diseases. Warning literature and notices prepared and posted at strategic points within campsite.
Traffic snarl up	<ul style="list-style-type: none"> Ensure all construction vehicles to and from the construction site use the designated entry/exit to the project site. “NO PARKING” signs will be posted around the building where Parking is prohibited. Signage and barricades should be used as part of the typical construction traffic controls. Adherence to Homa Bay County Government Traffic By-Laws and Kenya Traffic Laws.
Gender inequality	<ul style="list-style-type: none"> Equal employment opportunities will be provided for both men and women. Involve women groups in activities that they are good at such as landscaping. Expose and involve women in road construction and maintenance activities in an effort to transfer required skills to them. Enhance gender sensitivity and reduce gender discrimination in construction activities.
Security	<ul style="list-style-type: none"> Provide security guards and facilities during the entire project cycle. Strategic installation of lighting as well as security alarms and backup systems. The site shall be fenced.

The full report for the proposed project is available for inspection during working hours at:

(a) Principal Secretary, Ministry of Environment and Forestry,

NHIF Building, P.O. Box 30126-00100, Nairobi.

(b) Director-General, NEMA, Popo Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.

(c) County Director of Environment, Homa Bay County.

The National Environment Management Authority invites members of the public to submit oral or written comments within thirty (30) days from the date of publication of this notice to the Director-General, NEMA, to assist the Authority in the decision making process for this project.

GAZETTE NOTICE No. 42

THE ENVIRONMENTAL MANAGEMENT AND CO-ORDINATION ACT

(No. 8 of 1999)

NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED MALABA SEWERAGE PROJECT IN BUSIA COUNTY

INVITATION OF PUBLIC COMMENTS

Pursuant to Regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project

The proponent, Rift Valley Water Works Development Agency, is proposing to set up the Malaba Sewerage Project in Busia County. The

project consists of two main areas-setting up a new sewerage pipeline system and setting up a sewerage treatment plant. The proposed sewerage works will consist of; preliminary treatment consisting of inlet chamber, screening, grit chambers and measuring parshall flume, sewers of sizes ranging from 100mm total length 9.2 Km and consisting of 9 sewer lines, three main trunk sewer lines of diameter 200-600mm UPVC and concrete pipes and total length about 16km, a total of 12 waste stabilization ponds are proposed to be constructed to treat total of up to 4000m³/day of waste water. The ponds consist of 3No. anaerobic, 3No. facultative and 6No. maturation ponds, total area for the ponds is approximately 450m by 300m including space for future expansion.

The following are the anticipated impacts and proposed mitigation measures:

<i>Impacts</i>	<i>Proposed Mitigation Measures</i>
Air quality control	<ul style="list-style-type: none"> Workers shall be trained on management of air pollution from vehicles and machinery. All construction machinery shall be maintained and serviced in accordance with the contractor's specifications. The removal of vegetation shall be avoided until such time as clearance is required. Exposed surfaces shall be re-vegetated or stabilized as soon as practically possible. The contractor shall not carry out dust generating activities (excavation, handling and transport of soils) during times of strong winds. Vehicles delivering soil materials shall be covered to reduce spills and windblown dust. Water sprays shall be used on all earthwork's areas within 200 metres of human settlement.
Associated risks of environmental degradation	<ul style="list-style-type: none"> The site is to be cleared of all construction materials, including litter prior to hand over. Fences, barriers and demarcations associated with the construction phase must be removed from the site. Rehabilitation Activities of Environmental Cases identified must continue throughout the defect liability period.
Risk of sewer blockage and overflows to the environment (polluting River Malaba)	<ul style="list-style-type: none"> Awareness raising among community members not to dump solids in manholes. Development of an inventory of system components, with information including age, construction materials, and drainage areas served elevations. Design manhole covers to withstand anticipated loads and ensure that the covers can be readily replaced if broken. Ensure sufficient hydraulic capacity to accommodate peak flows and adequate slope in gravity mains to prevent build-up of solids and hydrogen sulphide generation.
Risk of illegal connection to the sewer pipeline	<ul style="list-style-type: none"> Constant inspection by BUWASCO officials to identify and repair leakages. Conduct public sensitization programs on importance not interfering with the water pipeline and the need to seek official water connection from BUWASCO.
Risk of encroachment and construction of structures on the sewer way leaves	<ul style="list-style-type: none"> Mapping and installation of beacons to which illustrate the width of the pipeline reserve. Regular inspection of the pipeline corridor for encroachment. Prosecution of encroachers as required by Busia County By-laws on way leaves and road reserves maintenance.

<i>Impacts</i>	<i>Proposed Mitigation Measures</i>
Soil Contamination	<ul style="list-style-type: none"> • Conduct public sensitization programs on importance not interfering with way leaves and public reserve land. • The BUWASCO to attend to burst pipes promptly to prevent excessive loss of soil. • Provide high risk areas with appropriate drainage for effective channeling of burst sewage spills. • Encourage land owners along sewer lines to maintain vegetated belts along the pipeline to control any overflows flows and trap soil. • Mark clearly the pipeline for ease of identification and protection by the adjacent landowners.
Solid waste accumulation	<ul style="list-style-type: none"> • Use of an integrated solid waste management system through a hierarchy of options. • All buildings, machinery, equipment, structures and partitions that will not be used up must be removed and recycled/reused. • All foundations must be removed and recycled, reused or disposed of at a licensed disposal site. • Where recycling/reuse of the machinery, equipment, implements, structures, partitions and other demolition waste is not possible, the materials should be taken to a licensed waste disposal site. • Donate reusable demolition waste to charitable organizations, individuals and institutions.
Change in landscape (both built and natural)	<ul style="list-style-type: none"> • Implement an appropriate revegetation programme. • Rehabilitate the affected locations to the satisfaction of NEMA and other. • Consider use of indigenous plant species in re-vegetation. • Trees should be planted at suitable locations so as to interrupt slight lines (screen planting) between the adjacent area and the development.
Environmental and safety risks associated with burrowing and opening up of new quarry sites	<ul style="list-style-type: none"> • Ensuring that appropriate authorization to use the proposed borrows pits and quarries have been obtained before commencing activities. • Topsoil shall be stripped prior to removal of borrow and stockpiled onsite. This soil shall be replaced on the disturbed once the operation of the borrow site or quarry is complete. • Construction material sources should be environmentally sustainable (approved accordingly). • Delivery routes and modes of transport should be approved. • Material storage on site not to be internal or external nuisance.
Risks of contaminating surface and underground water resources	<ul style="list-style-type: none"> • Construction wastes (residual earth, debris and scrap materials) to be removed for safe disposal. • Contaminated organic matter in the work areas to be isolated for safe disposal. • Material residuals to be disposed of in accordance with established regulations.
Occupational health and safety	<ul style="list-style-type: none"> • Provide construction workers with personal protective gear (gloves, gum boots, overalls and helmets). • Provide onsite first aid kit accessible by the workers on need.

<i>Impacts</i>	<i>Proposed Mitigation Measures</i>
	<ul style="list-style-type: none"> • Isolate the site for access by the local communities during the construction for their safety and health. • Contractor to provide a Healthy and Safety Plan prior to the commencement of works to be approved by the resident engineer.
Traffic management on site	<ul style="list-style-type: none"> • Strict use of warning signage and tapes where the trenches are open and active sites. • Employ and train road safety Marshalls who will be responsible for management of traffic on site. • Contractor to provide a traffic management plan during construction to be approved by the resident engineer.

The full report for the proposed project is available for inspection during working hours at:

(a) Principal Secretary, Ministry of Environment and Forestry,

NHIF Building, P.O. Box 30126-00100, Nairobi.

(b) Director-General, NEMA, Popo Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.

(c) County Director of Environment, Busia County.

The National Environment Management Authority invites members of the public to submit oral or written comments within thirty (30) days from the date of publication of this notice to the Director-General, NEMA, to assist the Authority in the decision making process for this project.

MAMO B. MAMO,

Ag. Director-General,

MR/0440842

National Environment Management Authority.

GAZETTE NOTICE NO. 43

THE ENVIRONMENTAL MANAGEMENT AND CO-ORDINATION ACT

(No. 8 of 1999)

NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED INTEGRATED GREEN SHIP RECYCLING AND STEEL MAKING FACILITY IN KIBUYUNI, KWALE COUNTY

INVITATION OF PUBLIC COMMENTS

Pursuant to Regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project

The proponent, Wasini Maritime Limited, proposes to construct a modern ship recycling and steel making plant with supporting infrastructure consisting of jetty, floating dry dock, dry berth for demolition of old ship to recover scrap, recycling of the recovered scrap by melting and production of new steel by hot rolling at Kibuyuni near Shimoni in Kwale County.

The following are the anticipated impacts and proposed mitigation measures:

<i>Impacts</i>	<i>Proposed Mitigation Measures</i>
Impacts on water quality	<ul style="list-style-type: none"> • Have in place an effective preventive maintenance programme for equipment and to prevent oil and fuel spillage. • Oil spill control measures should be adopted as per the National Oil Spill Response Contingency plan. • Marine environmental monitoring as per environmental monitoring programme during entire project period.

<i>Impacts</i>	<i>Proposed Mitigation Measures</i>
Impact on air quality	<ul style="list-style-type: none"> Prohibit use of heavy diesel oil as fuel and promotion of the use of low sulphur diesel fuel. Truck speed regulation and prohibition of trucks movement outside the designated routes. Environmental awareness and training should be carried out to all personnel involved in site operations. Monitoring of air quality to ensure compliance with EMCA (Air quality regulations).
Loss of mangroves and native vegetation	<ul style="list-style-type: none"> Proponent to support mangrove planting initiatives within Kibuyuni area and the wider Shimoni. Proponent to maintain pockets of vegetation within the project site. Proponent to only cut trees and clear vegetation in areas where structures of the proposed project will be constructed. Ensure no oil spills from any of the proposed project activities into the mangrove swamps within the inter-tidal zone. Ensure no disposal of effluent and any other waste from the proposed project into the inter-tidal zone. Consult with Kenya Forest Services (KFS), and observe the legal requirements stipulated in the Forest Act, 2019.
Potential negative impacts on established local marine management areas	<ul style="list-style-type: none"> There should be no installation or construction of project structures within or at close proximity to any of the identified marine management areas or the Marine Park. Ensure no oil spills from ships destined for scrapping including while on transfer to the land side or even while on the floating dry dock. There should be no disposal of effluent and any other waste from the proposed project into the marine environment.
Potential negative impacts on Kibuyuni seaweed farming	<ul style="list-style-type: none"> Avoid installation of any of the structures within or at close proximity to areas used for seaweed farming at Kibuyuni. Ensure no oil spills from any of the ships and operational activities that could spread oil into the seaweed farming areas. Work with seaweed farmers to promote seaweed farming at neighbouring farms.
Accidental injuries	<ul style="list-style-type: none"> Undertake job safety analysis prior to commencement of construction works. Safety awareness and training should be carried out to all personnel. Engage a trained and experienced safety officer at the site on full-time basis. Avail a fully equipped first aid box manned by trained first aid personnel at all times. Ensure an effective accident reporting and investigation procedure is in place.
Labour influx	<ul style="list-style-type: none"> The labour force to be sourced locally and include women and youth of both gender unless required skills not available locally. Local youths and women with capacity to supply construction materials should be given priority.
Increased risk of communicable diseases such as	<ul style="list-style-type: none"> Sensitization programs on HIV/AIDS for the project staff to be developed and carried out at the construction site by peer educators.

<i>Impacts</i>	<i>Proposed Mitigation Measures</i>
sexually transmitted diseases (STD)s and HIV/AIDS	<ul style="list-style-type: none"> Management to provide for medical facilities for their staff, comprising of free voluntary counselling and testing services.
Noise	<ul style="list-style-type: none"> Use only equipment complying with recommended standards. Adherence to a good and regular maintenance. Provide exposed personnel with protective gear like earplugs, muffs, etc.
Dust	<ul style="list-style-type: none"> Construction materials carried in vehicles should be properly covered. Enforce speed restrictions within the construction site. Sprinkle water on exposed surface and roads to maintain high moisture content. Erect temporary barriers where practicable to trap dust.
Potential discharge of ballast water	<ul style="list-style-type: none"> Compliance with KMA and KPA policy that prohibits discharge of ballast water. Abide by provisions of the Management of Ballast Waters in Port states currently under development by IMO; ratify and implement the Ballast water convention.

The full report for the proposed project is available for inspection during working hours at:

(a) Principal Secretary, Ministry of Environment and Forestry,

NHIF Building, P.O. Box 30126-00100, Nairobi.

(b) Director-General, NEMA, Popo Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.

(c) County Director of Environment, Kwale County.

The National Environment Management Authority invites members of the public to submit oral or written comments within thirty (30) days from the date of publication of this notice to the Director-General, NEMA, to assist the Authority in the decision making process for this project.

MAMO B. MAMO,
Ag. Director-General,
MR/0440990 National Environment Management Authority.

GAZETTE NOTICE NO. 44

THE ENVIRONMENTAL MANAGEMENT AND CO-ORDINATION ACT

(No. 8 of 1999)

NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED WATER RESEVOIR CONSTRUCTION ON L.R. NO. 4606/3, NJORO DISTRICT IN NAKURU COUNTY

INVITATION OF PUBLIC COMMENTS

Pursuant to Regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project

The proponent, Agriflora Kenya Limited, proposes to construct a water reservoir involving construction of auxiliary works, excavation works, embankment formation, spillway channel, spillway sill, ripraps and composition to at least 95% dry density of impermeable soil of the embankment of water for storage lagoons on plot L.R. No. 4606/3, Njoro District in Nakuru County.

The following are the anticipated impacts and proposed mitigation measures:

<i>Impacts</i>	<i>Proposed Mitigation Measures</i>
Health and safety of workers	<ul style="list-style-type: none"> Workers should be provided with full personal protective equipment (PPE). The site should be signed and controlled by trained flagmen/flag women and lit by night. Well stocked first aid boxes should be availed. The area should be fenced off to keep away unwanted persons. Install safety signage along the work areas.
Generation of waste	<ul style="list-style-type: none"> The soil generated will be used to level the area of land around the dam as well as landscaping some areas in the farm. Waste bins need to be provided for collection of wastes such as cement packaging bags. Construction waste should be recycled or reused as much as possible. Use of durable, long-lasting materials that will not need to be replaced often. Measures to ensure that waste materials from the project are disposed at suitable sites will be taken. Provide portable sanitary conveniences for the construction workers for control of sewage waste.
Noise pollution	<ul style="list-style-type: none"> Workers should be provided with appropriate personal protective equipment especially if the levels exceed 85dB for a continuous eight hours exposure. Install portable barriers to shield compressors and other small stationary equipment where necessary. Instruct the drivers to avoid unnecessary gunning of vehicle engines or hooting. Ensure that machines are switched off when not in use.
Generation of exhaust emissions	<ul style="list-style-type: none"> Proper and prompt maintenance of construction plants and equipment. Ensure that machines are switched off when not in use.
Dust emissions	<ul style="list-style-type: none"> Workers need to be in their respective PPEs during working hours. Use predetermined tracks where feasible and rehabilitate disturbed areas. Provide scour checks on over-15% slopes or when working in loose soils. Sprinkle water on graded access routes when necessary. Avoid excavation works during extremely dry weather if possible.
Traffic impacts	<ul style="list-style-type: none"> Ensure strict enforcement of on and off -site speed limits. Provide parking areas for the trucks. Provide entry and exit points into the site. Erect proper warning signs at a safe distance on the access roads. Ensure only serviceable trucks are used during transportation. Transport most of the materials during off peak hours when the traffic is low.
Increase in HIV/AIDS Prevalence and	<ul style="list-style-type: none"> Education and sensitization of workers on HIV/AIDS and STIs including provision of condoms to the project team.

<i>Impacts</i>	<i>Proposed Mitigation Measures</i>
other STIs	<ul style="list-style-type: none"> The contractor has to institute HIV/AIDS awareness and prevention campaign amongst workers for the duration of the contract. The contractor should ensure that the project workers are sensitized on the local culture.
Oil spills and leaks	<ul style="list-style-type: none"> Machines that utilize oil and petroleum products should be adequately serviced to ensure they do not leak. In case of any leak the affected soil should be collected and burned to get rid of the waste.
Disposal of spoil	<ul style="list-style-type: none"> Maximizing the re-use of excavated materials in the works as far as feasible. Properly disposing off the spoil in an area identified by the design team and approved by the confirmed land owners as well as by NEMA. Care should be taken to avoid spoil location in land that could otherwise be used for productive purposes.
Storm water	<ul style="list-style-type: none"> Drainage channels should be dug on the area lying on the upper side of the dam to ensure storm water does not enter the excavated area in case of rain.
Emergency/hazard response/preparedness plan	<ul style="list-style-type: none"> There must be a well-designed and documented emergency preparedness plans including fire emergency procedures. Signage around the farm warning the staff of possible danger and educate them on how to respond to emergencies.

The full report for the proposed project is available for inspection during working hours at:

(a) Principal Secretary, Ministry of Environment and Forestry,

NHIF Building, P.O. Box 30126-00100, Nairobi.

(b) Director-General, NEMA, Popo Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.

(c) County Director of Environment, Nakuru County.

The National Environment Management Authority invites members of the public to submit oral or written comments within thirty (30) days from the date of publication of this notice to the Director-General, NEMA, to assist the Authority in the decision making process for this project.

National Environment Management Authority.

GAZETTE NOTICE NO. 45

THE ENVIRONMENTAL MANAGEMENT AND CO-ORDINATION ACT

(No. 8 of 1999)

NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED DAM CONSTRUCTION ON L.R. NO. KJD/KIPUTEI-NORTH/1278 IN MAASAI FLOWERS LIMITED, KITENGELA, KAJIADO COUNTY

INVITATION OF PUBLIC COMMENTS

Pursuant to Regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project

The proponent, Maasai Flowers Kenya Limited, is proposing to construct a reservoir in its compound. The dam will hold 52,000 cubic

meters of water on plot L.R. No. Kjd/Kiputei-North/1278 in Maasai Flowers Limited, Kitengela, Kajiado County

The following are the anticipated impacts and proposed mitigation measures:

<i>Impacts</i>	<i>Proposed Mitigation Measures</i>
Health and safety of workers	<ul style="list-style-type: none"> Workers should be provided with full personal protective equipment (PPE). The site should be signed and controlled by trained flagmen/flag women and lit by night. Well stocked first aid boxes should be availed in case of any incidents or accidents. The area should be fenced off to keep away unwanted persons. Install safety signage along the work areas.
Generation of waste	<ul style="list-style-type: none"> The soil generated will be used to level the area of land around the dam as well as landscaping some areas in the farm. Waste bins need to be provided for collection of wastes. Construction waste should be recycled or reused as much as possible. Ensure that construction materials requirements are carefully budgeted and to ensure that there is minimal residual amount of construction materials. Use of durable, long-lasting materials that will not need to be replaced often. Ensure that waste materials from the project are disposed at suitable sites will be taken. Provide portable sanitary conveniences for the construction workers for control of sewage waste.
Noise pollution	<ul style="list-style-type: none"> Workers should be provided with appropriate personal protective equipment especially if the levels exceed 85dB for a continuous eight hours exposure. Install portable barriers to shield compressors and other small stationary equipment where necessary. Instruct the drivers to avoid unnecessary gunning of vehicle engines or hooting especially when passing through sensitive areas. Ensure that machines are switched off when not in use.
Generation of exhaust emissions	<ul style="list-style-type: none"> Proper and prompt maintenance of construction plants and equipment. Ensure that machines are switched off when not in use.
Dust emissions	<ul style="list-style-type: none"> Workers need to be in their respective PPEs during working hours. Use predetermined tracks where feasible and rehabilitate disturbed areas. Provide scour checks on over-15% slopes or when working in loose soils. Sprinkle water on graded access routes when necessary. Avoid excavation works during extremely dry weather if possible.
Oil spills and leaks	<ul style="list-style-type: none"> Machines that utilize oil and petroleum products should be adequately serviced. In case of any leak the affected soil should be collected and burned to get rid of the waste.

Impacts

Increase in HIV/AIDS prevalence and other STIs

Proposed Mitigation Measures

- Education and sensitization of workers on HIV/AIDS and STIs.
- The contractor has to institute HIV/AIDS awareness and prevention campaign amongst workers for the duration of the contract.
- The contractor should ensure that the project workers are sensitized on the local culture.
- The contractor has to ensure that staff are made aware of the risks of contracting or spreading sexually transmitted diseases.

Disposal of spoil

- Maximizing the re-use of excavated materials in the works as far as feasible.
- Properly disposing off the spoil in an area identified by the design team and approved by the confirmed land owners as well as by NEMA.
- Care should be taken to avoid spoil location in land that could otherwise be used for productive purposes.

Traffic impacts

- Ensure strict enforcement of on and off -site speed limits.
- Provide parking areas for the trucks.
- Provide entry and exit points into the site.
- Erect proper warning signs at a safe distance on the access roads.
- Ensure trucks do not damage the road structures and drainage systems.
- Transport most of the materials during off peak hours when the traffic is low.

Emergency/hazard response/preparedness plan

- There must be a well-designed and documented emergency preparedness plans including fire emergency procedures.
- Signage around the farm warning the staff of possible danger and educate them on how to respond to emergencies.

The full report for the proposed project is available for inspection during working hours at:

(a) Principal Secretary, Ministry of Environment and Forestry,

NHIF Building, P.O. Box 30126-00100, Nairobi.

(b) Director-General, NEMA, Popo Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.

(c) County Director of Environment, Kajiado County.

The National Environment Management Authority invites members of the public to submit oral or written comments within thirty (30) days from the date of publication of this notice to the Director-General, NEMA, to assist the Authority in the decision making process for this project.

Ag. Director-General,

MR/0440675

National Environment Management Authority.

GAZETTE NOTICE NO. 46

THE ENVIRONMENTAL MANAGEMENT AND CO-ORDINATION ACT

(No. 8 of 1999)

NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY
ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT
FOR THE PROPOSED USED OIL HANDLING, RECYCLING AND
STORAGE STATION ON PLOT L.R. NO. 2418/V/MN,
CHANGAMWE AREA, CHANGAMWE IN MOMBASA COUNTY

INVITATION OF PUBLIC COMMENTS

Pursuant to Regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project

The proponent Lukam Link Limited, is proposing to construct a used oil handling, recycling and storage waste oil yard which includes installation of two overhead farm tanks, perimeter wall, interceptors, concrete paving of the yard, office renovation, installation of firefighting equipment's, stores and offices, on plot No. 2418/V/MN at Changamwe area along Mombasa-Nairobi Highway at Changamwe Township in Mombasa County.

The following are the anticipated impacts and proposed mitigation measures:

<i>Impacts</i>	<i>Proposed Mitigation Measures</i>
Increased exploitation of raw materials	<ul style="list-style-type: none"> • Source building materials from suppliers who use environmentally friendly processes in their operations. • Ensure accurate budgeting and estimation of actual construction materials requirements. • Ensure that damage or loss of materials at the construction site is kept minimal through proper storage. • Use of at least 5%-10% recycled refurbished or salvaged materials to reduce the use of raw materials and divert material from landfills.
Ecosystem disturbance	<ul style="list-style-type: none"> • Ensure proper demarcation and delineation of the project area to be affected by construction works. • Specify locations for trailers and equipment, and areas of the site which should be kept free or traffic equipment and storage. • Designate access routes and parking within the site. • Design and implement an appropriate landscaping programme to help in re-vegetation of part of the project area after construction.
Run off and soil erosion	<ul style="list-style-type: none"> • Create storm water management practices, such as piping systems or retention ponds or tanks, which can be carried over after the building is complete. • Apply soil erosion control measures such as leveling of the project site to reduce run-off velocity and increase infiltration of storm water into the soil. • Ensure that construction vehicles are restricted to existing graded roads to avoid soil compaction within the project site.
Solid waste generation	<ul style="list-style-type: none"> • Accurate estimation of the sizes and quantities of materials required. • Ensure that construction materials left over at the end of construction will be used in other projects. • Ensure that damaged or wasted construction materials will be recovered for refurbishing and use in other projects. • Use of durable, long-lasting materials that will not need to be replaced as often. • Provide facilities for proper handling and storage of construction materials. • Reuse of packaging materials. • Dispose waste more responsibly by dumping at designated dumping sites or landfills only.

Impacts

Air pollution

Proposed Mitigation Measures

- Ensure strict enforcement of on-site speed limit regulations.
- Avoid excavation works in extremely dry weathers.
- Sprinkle water on graded access routes each day.
- Sensitize truck drivers to avoid unnecessary racing of vehicle engines at loading/offloading points and parking areas.
- Ensure proper planning of transportation of materials to ensure that vehicle fills are increased in order to reduce the number of trips done per vehicle or the number of vehicles on the road.

Noise pollution

- Sensitize construction vehicle drives and machinery operators to switch off engines of vehicles or machinery not being used.
- Sensitize construction drivers to avoid gunning of vehicle engines or hooting especially when passing through sensitive areas such as schools, residential areas and hospitals.
- Ensure that construction machinery are kept in good condition to reduce noise generation.
- Ensure that all generators and heavy duty equipment are insulated or placed in enclosures to minimize ambient noise levels.

Depletion of energy resources

- Ensure electrical equipment, appliances and lights are switched off when not being used.
- Install energy saving fluorescent tubes at all lighting points instead of bulbs which consume higher electric energy.
- Ensure planning of transportation of materials to ensure that fossil fuels (diesel, petrol) are not consumed in excessive amounts.
- Monitor energy use during construction and set targets for reduction of energy use.
- Install a discharge meter at water outlets to determine and monitor total water usage.
- Promote recycling and reuse of water as much as possible.
- Ensure taps are not running when not in use.

Effluent emissions

- Conduct regular checks for sewage pipe blockages or damages since such vices can lead to release of the effluent into the land and water bodies.
- Monitor effluent quality regularly to ensure that the stipulated discharge rules and standards are not violated.

Injuries caused by machineries and equipments

- All machines and other moving parts of equipment must be enclosed or guarded to protect all workers from injury.
- Arrangements must be in place to train and supervise inexperienced workers regarding construction machinery use and other procedures/operations.
- Equipment such as fire extinguishers must be examined by a government authorized person.
- Ensure that machinery, equipment, personal protective equipment, appliances and hand tools used in construction do comply with the prescribed safety and health standards and be appropriately installed maintained and safeguarded.

<i>Impacts</i>	<i>Proposed Mitigation Measures</i>
Emergencies	<ul style="list-style-type: none"> Design suitable documented emergency preparedness and evacuation procedures to be used during any emergency. Ensure that adequate provisions are in place to immediately stop any operations where there is an imminent and serious danger to health and safety and to evacuate workers. Ensure that the most current emergency telephone numbers posters are prominently and strategically displayed within the construction site. Provide measures to deal with emergencies and accidents including adequate first aid arrangements.
Catastrophes	<ul style="list-style-type: none"> Well stocked first aid box which is easily available and accessible should be provided with the premises. Provision must be made for persons to be trained in first aid, with a certificate issued by a recognized body. Firefighting equipment such as fire extinguishers and hydrant systems should be provided at strategic locations. Regular inspection and servicing of the equipment.
Food and toxins	<ul style="list-style-type: none"> Ensure that all chemicals used in construction are appropriately lab. Keep a record of all hazardous chemicals used at the premises. There should be no eating or drinking in areas where chemicals are stored or used.
Sanitary	<ul style="list-style-type: none"> Ensure that conveniently accessible, clean, orderly, adequate and suitable washing facilities are provided and maintained in within the site. Accumulations of dirt and refuse should be cleaned daily from the floors, benches, staircases and passages. Provision for repairing and maintaining of hand tools must be in place.

The full report for the proposed project is available for inspection during working hours at:

(a) Principal Secretary, Ministry of Environment and Forestry,
NHIF Building, P.O. Box 30126-00100, Nairobi.

(b) Director-General, NEMA, Popo Road, off Mombasa Road,

GAZETTE NOTICE No. 47

THE ENVIRONMENTAL MANAGEMENT AND CO-ORDINATION ACT

(No. 8 of 1999)

NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED MENENGAI WEST GEOTHERMAL DRILLING PROJECT IN NAKURU COUNTY

INVITATION OF PUBLIC COMMENTS

Pursuant to Regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The proponent, Geothermal Development Company, is proposing a geothermal exploration program in Nakuru County. The project will involve drilling deep geothermal wells. The selection of specific locations for exploration wells, including their depth and diameter will depend on; access to funds, land accessibility, environmental sensitivity, identification of feasible well pad locations and eventual power plant development potential.

The following are the anticipated impacts and proposed mitigation measures:

<i>Impacts</i>	<i>Proposed Mitigation Measures</i>
Loss of vegetation and wildlife habitat	<ul style="list-style-type: none"> Develop and implement an avifauna monitoring scheme, assessing bird population trends and direct hazards relating to the proposed project. Unnecessary vegetation clearing will be prohibited. Biologist survey and monitoring if necessary. Possible implementation of visual and acoustic barriers. Prohibit unnecessary cutting of trees and vegetation clearing.
Damage to landscape	<ul style="list-style-type: none"> Dismantle temporary treatment facilities and worker camps.
Fire prevention and response	<ul style="list-style-type: none"> Provide fire prevention and response equipment at each work site such as shovels, axes, fire extinguishers and dedicated water tanks.
Traffic control	<ul style="list-style-type: none"> Provide information signs where land and road closures could substantially disrupt traffic circulation.
Hazardous materials management plan	<ul style="list-style-type: none"> Use non-toxic and biodegradable drilling mud where feasible. Embank reserve pits if drilling mud contains foams. Install containment berms and redirect storm water flows around hazardous material storage sites. Cap drilling mud determined to be toxic with clean fill materials.
Increased waste generation	<ul style="list-style-type: none"> Prepare a Waste Management Plan for solid waste. Store and dispose of solid waste at an appropriate designated areas. Strict adherence to Waste Management Regulations, 2006.
Geotechnical investigation	<ul style="list-style-type: none"> Conduct geotechnical investigation prior to initiating civil works activities.
Loss of culture	<ul style="list-style-type: none"> Conduct surveys for archaeological and cultural resources prior to civil work activities. Handling all culturally sensitive issues. Provide archaeological and cultural resources training to workers.
Noise control	<ul style="list-style-type: none"> Install acoustic barriers between stationary equipment and sensitive receptors.
Air quality	<ul style="list-style-type: none"> Install gas detection and monitoring devices during well drilling and testing activities.

<i>Impacts</i>	<i>Proposed Mitigation Measures</i>
	<ul style="list-style-type: none"> Maintain and repair equipment according to the manufacturer's standard. Dust will be minimized by regularly watering of construction area.
Conflict	<ul style="list-style-type: none"> Provide compensation for farmers where farmland and crops are impacted by the proposed project.
Soil erosion	<ul style="list-style-type: none"> Plastic sheeting to secure topsoil. Reapply topsoil. Replant trees and grass after construction. Limit heavy machinery to designated routes.
Community engagement and sensitivity	<ul style="list-style-type: none"> Local people will be given priority in employment. Hold public meetings with the affected communities and install an informational sign at the entrance of each proposed project area and sites. Obey the local population custom.
Occupational health and safety	<ul style="list-style-type: none"> Prepare and implement an EHS plan with all required elements. Use relevant protective gear during construction, operation and maintenance. Provide First Aid and safety equipment. Provide information to workers regarding their rights on safety and payment; and provide training to workers for their position.
The full report for the proposed project is available for inspection during working hours at:

GAZETTE NOTICE No. 50

THE COUNTY GOVERNMENTS ACT

(No. 17 of 2012)

COUNTY GOVERNMENT OF KITUI

KITUI COUNTY PUBLIC SERVICE BOARD

REPORT ON THE EXTENT OF COMPLIANCE WITH THE NATIONAL VALUES AND PRINCIPLES IN THE KITUI COUNTY PUBLIC SERVICE

CHAPTER ONE

THE EXTENT OF COMPLIANCE WITH VALUES AND PRINCIPLES

Preamble

This Chapter enumerates the activities that demonstrate the extent to which the values and principles referred to in Articles 10 and 232 are complied with in the County public Service. It also explains the actions taken by the Board in the promotion of the specific values and principles.

THE EXTENT OF COMPLIANCE

1.1 ARTICLE 10: NATIONAL VALUES AND PRINCIPLES OF GOVERNANCE

- (a) Patriotism, National Unity, Sharing and Devolution of Power, the Rule of Law, Democracy and Participation of the People

Situational Analysis

The County Government has been unable to meet the 30% requirement on ethnic minority which is meant to enhance National unity. This has been due to the region being a hardship area and as a result not attractive to job seekers from other parts of Kenya. Political ethnic profiling has also contributed to people being inclined to serve in their ethnic backyards.

Action Taken

The Board has been advertising all open vacancies through at least two high circulating newspapers while also posting the same in the Government website. The County Government has continued making the working environment through improving the general infrastructure. The Board continues to advocate for patriotism and as a result, County colours and symbols are incorporated in all official County documents, information, education and communication materials, projects' branding and painting of County Government buildings. The County Government continues to participate in national holidays while

ensuring that County offices have portraits of the President of the Republic of Kenya.

The Board has, and continues to draw the attention of the County employees to the documents uploaded on the County website which include the Constitution of Kenya 2010 and other relevant laws and regulations.

Democracy and participation of the people has been and continues to be realised through policy formulation forums; the education forums, public participation on County Budget and Finance Bill and other stakeholder consultative meetings on development which are highly publicised. The County Government has continued to collaborate with the National Government officials especially the provincial administration to bridge the public participation gap.

- (b) Human Dignity, Equity, Social Justice, Inclusiveness, Equality, Human Rights, Non-discrimination and Protection of the Marginalized

Situational Analysis

Review on the compliance regarding human dignity, equity, social justice, inclusiveness, equality, human rights, non-discrimination and protection of the marginalized was done during the 2019 Calendar year. It was established that social amenities within the County Government offices were still deficient. Some ablution blocks are lacking gender labels.

Analysis of the composition of the County public service was done. It was established that the legal requirements for youth and gender in appointments had been met; however, there is still need for resolute effort to address the requirements for persons with disability, and the marginalized.

Action Taken

The County Government continued the construction of more ablution blocks in public places like markets, schools, offices and bus parks and created awareness to the general public to construct pit latrines in their homes in an effort to ensure that Kitui County is open defecation free and to promote human dignity.

The Board is fully committed to continuous monitoring of compliance to ensure that the ratio of male to female employees remain within the constitutional threshold.

The Board has enhanced the methods of advertising for job vacancies, including use of County Website, social platforms and distributing copies of the adverts through County Administration (Ward and Village Administrators) to ensure that more potential applicants from all regions get the information and in good time. Affirmative action is being undertaken to address the disadvantaged groups such as minority ethnic communities in the County, (e.g. the Tharaka, Arab, Somali, Muslim) persons with disabilities, youth and women.

The County Government remains committed to the representation of Kenya's diverse ethnic communities in the County public service as evidenced in the appointments and promotions undertaken during the period under review.

The County Government of Kitui launched Kitui County Health Insurance Cover (K-CHIC) on 21st August, 2018. The scheme was launched to provide quality and affordable health care to households in Kitui. The insurance covers medical bills, ambulance charges and mortuary fee for all residents of Kitui County. The program has relieved residents from colossal hospital bills that often lead to detention of patients in public and private hospitals. This goes a long way towards improving human dignity.

The County is mainstreaming HIV/AIDS, gender and disability in implementing various policies as can be reflected in the segmentation of County contracts and also in appointments. The County Government is working with development partners and faith based organizations such as Centre for Health Solutions and Christian Health Association of Kenya (CHAK) to address HIV/AIDS among other health care issues.

The County Government has continued to prioritise projects on water such as drilling of bore holes, construction/De-silting of earth and sand dams as well as water reservoirs to ensure that County residents, especially those in arid and marginalised regions, have access to portable water for drinking and other purposes.

- (c) Good Governance, Integrity, Transparency and Accountability

Situational Analysis

The County Government is going through strained financial resources where development projects require to be given a priority. This therefore require that savings be made from recurrent expenditures such as salaries, travel and daily subsistence allowances.

Action Taken

The County Government has participated in discussions and workshops led by the National Government on transforming the economy through a fiscally sustainable public wage bill.

The County Government introduced a number of austerity measures on recurrent expenditures. Any travel within the Country or outside has to be objective and properly accounted for. The County Government is also undertaking a rationalisation process to ensure that employees are properly utilised to fill available gaps in the county public service before considering fresh recruitment.

In order to enhance transparency and accountability, each Government project goes through the process of public participation to ensure involvement of the people in development issues.

- (d) Sustainable Development

Situational analysis

Kitui County Integrated Development Plan (KCIDP), which highlights the development needs of the County, has continuously guided the County development projects. The development projects contained in this document have been evaluated based on their sustainability. As a result, the projects initiated are considered viable and sustainable.

Action Taken

The County Government continues to implement projects in compliance with the KCIDP which is modelled on the Kenya Vision 2030 and the Sustainable Development Goals. The County Public Service Board has successfully continued to provide the human resource necessary for the implementation of planned activities.

Food and water, health, education, youth and women empowerment and wealth creation are the five pillars of H.E the Governor's manifesto meant to not only spur the growth of the County economy but also improve the citizens' livelihoods.

The County Government of Kitui through the County Ministry of Agriculture, Water and Livestock Development has invested heavily in supporting small scale agricultural programs dubbed 'Mianda Irrigation' scheme where farmers are supported through provision of seeds, fertilizer, pesticides, solar generators and agricultural extension officers who offer technical knowhow to the farmers.

The County Government launched mass Artificial Insemination program (AI) in January 2019 to improve the quality of livestock breeds both for dairy and beef for the citizenry. The aim of the initiative was to produce a superior breed of livestock leading to increased milk and meat production therefore, growing income for livestock keeping households.

The County Government of Kitui has also focused on training beekeepers on honey production and profitable beekeeping practices to enable farmers benefit from services that can help them achieve higher yields and income. The initiative is also focused on commercializing beekeeping for sustainable livelihoods in line with the wealth creation agenda.

The County Government has established Kitui County Textile Centre (KICOTEC); the first ever garment factory by a County Government in Kenya. The facility has employed over 300 youths from the County. The factory targets income from local and national productions that will play a key role in boosting the economy. The gains from KICOTEC will support other services of the county like provision of clean water, affordable healthcare and education.

The County Government has established an amenity ward and outpatient department at the Kitui County Referral Hospital. This has resulted in provision of quality healthcare to Kitui residents. Improved services and increased revenue collection have also been witnessed. Acquisition of ultra-modern ambulances has boosted movement of patients from rural areas to nearest health facilities.

1.2 ARTICLE 232: VALUES AND PRINCIPLES OF PUBLIC SERVICE

(a) High Standards of Professional Ethics

Situational Analysis

Standards of professional ethics were evaluated on the basis of code of conduct and ethics for officers in the public service; training for skills development; membership to professional bodies and declaration of income, assets and liabilities.

There was moderate compliance with professional ethics following continuous sensitization workshops and staff training.

Action Taken

Sensitization programmes on values and principles aimed at creating awareness, development of teamwork, improvement of service delivery and overall culture change in the County public service were undertaken.

To increase access to knowledge on the officers' professionalism, the Board has been drawing the attention of the County Government employees to the relevant legislations and laws which have been uploaded to the County website.

The Board undertook suitability tests and continues to do the same for various cadres for proper placement of staff and quality service delivery.

Long term training approvals for officers working in the County ministries were granted in order to ensure competence and provide employee motivation in the performance of their duties.

Various trainings have been held in the County including induction of staff, training on the filling of Asset Declaration forms, training on performance appraisal, customer care/public relations among others.

(b) Responsive, Prompt, Effective, Impartial and Equitable Provision of Services

Situation Analysis

The Board established that service delivery had not reached satisfactory standards as a result of slow integration of officers having been drawn from diverse organizational culture and work ethics.

Action Taken

The Board has been undertaking sensitization workshops on values and principles of public service aimed at transformative leadership, development of teamwork and improvement of service delivery and overall culture change in the public service. The Board has incorporated questions which gauge attitude in the interview tools of various cadres so as to ensure that the County public service is composed of employees with the right attitude for effective service delivery.

County Ministries/Departments have been encouraged to hold regular management and staff meetings to enhance effectiveness and teamwork in the provision of public services. The County Government has continued the use of Integrated Financial Management Information System (IFMIS), where all financial transactions, including procurement, are processed. This has enhanced the speed of service delivery.

The County Government through the ministries of Health and Sanitation and Agriculture, Water and Livestock Development has procured more ambulances and tractors respectively to serve the citizens better.

The Board undertakes mystery shopping to assess the quality of services offered by the county public service.

(c) Fair Competition and Merit as the Basis of Appointments and Promotions

Situational Analysis

Appointments, promotions and trainings were and continue to be guided by meritocracy and fair competition. They are also guided by other legal provisions such as the need to include communities not adequately represented in appointments or promotions in the public service, the gender balance and inclusivity of persons with disabilities.

Action Taken

As at 30th November, 2019, the County Public Service Board had employed a total of 29 female officers representing 38% of the total

staff appointed. The male appointed officers were 47, representing 62%. The Board has enhanced its recruitment process to adequately capture data on persons with disability. The Board continues to encourage them to apply for advertised positions, and also register with the association for persons with disability.

The Board has made 22 appointments from outside Kitui County. Meritocracy continues to be the guiding principle in the recruitment process and applicants are accorded equal opportunity. All the officers due for promotion based on the provisions of various schemes of service were promoted.

CHAPTER TWO

IMPEDIMENTS IN THE PROMOTION OF VALUES AND PRINCIPLES

The Board encountered various challenges in ensuring that values and principles were upheld. These included:

- (a) Kitui County has low internet connectivity, making the officers especially those working outside the County Headquarters unable to effectively communicate and access internet.
- (b) Insufficient public awareness on the role of citizens in governance and therefore low citizen participation in development issues.
- (c) Inadequate knowledge on the constitutional provisions on devolution and other relevant legislations among public officers.
- (d) Inadequate budgetary allocation to enhance the promotion of values and principles.
- (e) Officers from outside the County requesting for inter-county transfers and declining positions in Kitui owing to the vastness of the county, semi-arid climate, insecurity, the difficult terrain thus defeating efforts towards patriotism, national unity and inclusiveness.
- (f) Persons with disabilities and other special groups not applying for positions in the County while those that apply fail to indicate their status. Many officers and candidates with disabilities are yet to register with the relevant body.

CHAPTER THREE

PLANNED PROGRAMS IN UNDERTAKING PROMOTION OF VALUES AND PRINCIPLES

1. Develop, produce and distribute more information, education and communication material on values and principles in Kitui County.
2. Sensitization workshops on values and principles.
3. Induct new staff with regard to values and principles.
4. Monitor compliance with the values and principles.
5. Advise the County Government on its obligations under international treaties and conventions on need basis.
6. Recruit the required personnel for the full implementation of KCIDP; and
7. Advocate and lead in the finalization of staff establishment to ensure that any recruitment is within optimal staffing level.

CHAPTER FOUR

RECOMMENDATIONS

The Board recommendations are as follows—

- (a) Partnering with the County Assembly for public awareness creation on the role of citizens in governance and the need for full participation in development agenda and activities and employment creation.
- (b) Establishment of village councils to bolster public participation/ Involvement of the people.
- (c) Creation of an enabling environment for the exploitation of natural resources to create jobs for Kitui County residents.
- (d) Observation of OSHA guidelines in public offices.
- (e) Provision of adequate budgetary allocation to carry out activities that enhance promotion of values and principles in the County public service.

- (f) Establishing points for county public services at Huduma Centre.
- (g) Creation of a County gateway at eCitizen portal for County services.
- (h) Establishment of Public Service Centres at every Sub-county headquarter.
- (i) Decentralization of the National Council for Persons with Disabilities for easy access of its services.

CONCLUSION

The County public service registered substantial levels of compliance with the values and principles referred to in Articles 10 and 232 of the Constitution of Kenya 2010. However, there is still room for improvement in order to ensure that citizens of Kitui County fully benefit from the gains envisaged by the Constitution of Kenya 2010.

The Board appreciates the cooperation accorded by the office of the Governor, the office of the County Secretary, County Ministries/Departments and Sub-county Administration during evaluation of the extent to which values and principles have been complied with in Kitui County Public Service.

Further, the Board appreciates the members of the Kitui County Assembly for the oversight role and the advice given periodically on ensuring compliance with the values and principles.

Dated the 2nd December, 2019.

**IMPORTANT NOTICE TO SUBSCRIBERS TO
THE KENYA GAZETTE**

THE following notes are for the guidance of persons submitting "copy" for inclusion in the *Kenya Gazette, Supplement*, etc.:

- (1) *The Kenya Gazette* contains Notices of a general nature which do not affect legislation. They are, therefore, submitted to the Government Printer directly.
- (2) *Legislative Supplement* contains Rules and Regulations which are issued by the National or County Governments. Because of this, they must be submitted to the Government Printer through the office of the Attorney-General.
- (3) *Bill Supplement* contains Bills which are for introduction in the National Assembly, Senate or County Assemblies.
- (4) *Act Supplement* contains Acts passed by the National Assembly, Senate or County Assemblies.

All "copy" submitted for publication should be prepared on one side of an A4 sheet no matter how small the Notice is, each page being numbered and should be typed with double spacing. Copy should be clear, legible and contain no alterations.

Particular attention should be paid to the following points:

- (i) Signature must be supported by rubber-stamping or typing the name of the signatory in capital letters.
- (ii) Must be correct and filled in where necessary.
- (iii) Care should be taken to ensure that all headings to Notices and references to legislation are up to date and conform with the Revised Edition of the Laws of Kenya.

EXTRACT FROM THE CODE OF REGULATIONS, SECTION D—

Kenya Gazette

"D 34. (1) Communications for the *Kenya Gazette* should reach the Government Printer not later than 9 a.m. on Friday of the week before publication is desired. The Government Printer will not publish communications received after that hour until the next subsequent issue of the Gazette.

(2) Ministries will be required to pay for the *Kenya Gazette* and to meet the cost of advertising in it.

It is emphasized that these notes are for guidance only, but it is requested that persons submitting copy for publication first satisfy themselves that such copy is complete in every respect.
