THE ENVIRONMENTAL MANAGEMENT AND CO-ORDINATION ACT

(No. 8 of 1999)

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY

NOTICE TO THE PUBLIC TO SUBMIT COMMENTS ON AN ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED 132kV MAKINDU SOLAR PV TRANSMISSION LINE, MAKUENI COUNTY

INVITATION OF PUBLIC COMMENTS

Pursuant to Regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project

The proponent, Rareh Icon Solar Limited, is proposing to evacuate 132kV power from the solar PV plant to the Kiboko substation where it will be connected to the national grid. The main components of high-voltage electricity transmission line and associated facilities include; transmission pylons, transmission lines, access roads and substation. This project will be carried out in Makueni County.

The following are the anticipated impacts and proposed mitigation measures:

Impacts	Proposed Mitigation Measures
Air pollution	<ul style="list-style-type: none"> Maintain vehicle and equipment according to manufactures' specifications. Use standard fuel and lubricants. Sprinkle water to work areas to reduce and prevent dust during dry weather periods. Clean access routes in surrounding area on a daily basis to prevent dust. Collect and hold sanitary and cleaning wastes in appropriate container. Workers who may unavoidably have to work in dusty workplaces should be provided with nose and ear masks to protect them from excessive dust.
Noise pollution	<ul style="list-style-type: none"> Minimize noise according to NEMA, Kenya standards and World Bank guidelines. Control noise and vibration on site. Install adequate noise prevention devices, e.g. mufflers on noise generating sources. Switch off engines of vehicles and machinery while not in use. Provide information to the local communities (e.g. through the local system or local radio (FM) stations) with regard to work programme, and strict adherence to such. Workers who may unavoidably have to work with noise generating equipment, e.g. earthmoving equipment should be provided with ear plugs and advised/monitored to put them on.

<i>Impacts</i>	<i>Proposed Mitigation Measures</i>
Water pollution	<ul style="list-style-type: none"> • Contain solid wastes so that no solid waste, fuels or oils should not be discharged into surface water bodies. • Hold and store sanitary and cleaning wastes in appropriate containers to be disposed of at approved sites. • Park vehicles preferably on paved platforms. • Fuel storages should not leak, and should be periodically monitored, and repaired or replaced when necessary. • Sites for cleaning, fuelling and maintaining vehicles should be able to prevent leakage (e.g. paved). • Maintain fuel and clean vehicles and equipment at workshops/sites with adequate leakage prevention (e.g. impermeable surface, settlers and oil separator).
Soil erosion and contamination	<ul style="list-style-type: none"> • Carry out work under mild weather (not strong rains or winds). • Remove and store topsoil in separate piles and reinstate after refilling of trenches, to enable natural revegetation. • Storing all hazardous, sanitary and cleaning wastes in facilities approved by NEMA. • Installing leak-proof fuel storages on concrete platform with gutters and grease separators, which are monitored periodically and repaired or replaced when required. • Strictly enforce and monitor standard procedures for storing and handling hazardous wastes and raw material (e.g. fuel or chemicals). • Place drums for oil storage on impermeable floors in the stores. • Parking vehicles on paved platforms whenever possible. • Treat wastewater from maintenance workshops in oil separators before discharge.
Solid waste generation	<ul style="list-style-type: none"> • The contractor should prepare a Solid Waste Management Plan, as described in this report. • The contractor should maintain records of types, quantities, origin, (temporary) storage, transport and elimination/reuse of solid waste. • Any waste including excess soil should be disposed of at gazetted sites. • Excavated soils should be reused as much as possible as filling material. • Use licensed recycling companies to externally collect and recycle, recover or dispose off waste.
Impacts on flora and fauna	<ul style="list-style-type: none"> • Zone out working areas to reduce ecological destruction. • Agree with and compensate owners of trees. • Restore disturbed natural sites through environmental rehabilitation; restoring top soils and (re-)introduce genetic species similar to those destroyed.
Occupational health and safety exposure	<ul style="list-style-type: none"> • Ensure that work sites (especially excavation works), have proper protection with clear marking of safety borders and signals and fence off all dangerous areas. • Inform riparian neighbours about the construction programme in advance.

<i>Impacts</i>	<i>Proposed Mitigation Measures</i>
Increased vehicular traffic	<ul style="list-style-type: none"> • Confine access to restricted work sites. • Undertaking training and capacity building for all workers on use of chemicals. • Provide PPE to all workers using chemicals. • Inform local communities about the construction programme in advance. • Use reflective signature to direct traffic to designated areas. • Use flag men to give directions to traffic. • Install speed reduction humps at crossings of many people.
Spread of communicable diseases and HIV/AIDS infection	<ul style="list-style-type: none"> • Sensitize workers and the surrounding communities on awareness, prevention and management of HIV/AIDS. • Provide information, education and communication about safe uses of drinking water. • Provide an onsite clinic to provide Voluntary Counseling and Testing (VCT) services to construction crew and provision of Antiretroviral (ARVs) for vulnerable community members. • Integrate monitoring of HIV/AIDS preventive activities as part of the construction supervision. • Conduction of campaign meetings on transmission of diseases like HIV/AIDS and other STDs.
Raw material use	<ul style="list-style-type: none"> • Consider environmental performance of suppliers of raw material in the selection process. • Explore ways of reducing raw material use. • Special emphasis should be made on raw materials that may be reused and/or recycled/recovered.
Gender-based violence at the community level	<ul style="list-style-type: none"> • Effective and on-going community engagement and consultation, particularly with women and girls. • Review of specific project components that are known to heighten GBV risk at the community level, e.g. compensation schemes for women, employments schemes for women etc. • Specific plan for mitigating these known risks, e.g. sensitization around gender-equitable approaches to compensation and employment.
Disturbance and interruption of commercial and social activities	<ul style="list-style-type: none"> • Provide temporary access ways with the approval of local authorities where access roads are closed. • Reduce obstruction of access to and use and occupation of roads, footpaths and bridges. • Protect any items and/or sites of archaeological or cultural value (e.g. private graveyards) discovered during works with the aid of the appropriate Authorities.

The full report of the proposed project is available for inspection during working hours at:

THE ENVIRONMENTAL MANAGEMENT AND CO-ORDINATION ACT

(No. 8 of 1999)

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY

DRAFT STRATEGIC ENVIRONMENTAL IMPACT ASSESSMENT (SEA) STUDY REPORT FOR THE PROPOSED TATU CITY EXTENSION (MCHANA ESTATE) MASTER PLAN, KIAMBU COUNTY

INVITATION OF PUBLIC COMMENTS

IN LIGHT of the provisions of section 57 A of the Environment Management and Co-ordination Act (EMCA), Cap. 387, Regulations 42 and 43 of Environmental (Impact Assessment and Audit) Regulations, Legal Notice No. 101 of 2003, the National Environmental Management Authority (NEMA) has received a Draft Strategic Environmental Assessment (SEA) Study Report for the Proposed Tatu City Extension (Mchana Estate) Master Plan, Kiambu County. The SEA findings are expected to integrate the existing

sectoral plans and programs to establish sustainable economic zone development mechanisms.

Tatu City Limited is the Plan owner. Tatu City Extension (Mchana Estate) Master Plan will be a large new city redefining the quality and scale of urban development in Kenya, massively reducing congestion in central Nairobi and reverse traffic flows between the centre and Kiambu County. With living and working spaces, communities, schools and hospitals, Tatu City will help sustain and accelerate Africa's economic growth, meet the aspirations of Africa's burgeoning middle classes, and serve as a catalyst for further urban development.

The specific objectives of the Master Plan are:

- (a) To develop a housing development with low, medium and high-density units targeting both middle and high-income earners.
- (b) To establish industrial development that includes light and heavy industries.
- (c) To develop educational institutions including pre-primary, primary and secondary schools, middle level college, research Centre and university.
- (d) To designate recreational and sports facilities and services providing various sports and recreational activities with public amenities such as green open spaces.
- (e) To provide commercial Centre and services with various and mixed-use developments.
- (f) To design infrastructure and utilities and services with reliable power supply network that includes renewable sources.
- (g) To establish a transportation system with a comprehensive road network system that includes transit and local roads.
- (h) To designate natural green open spaces, wetlands and water bodies.

The Strategic Environmental Assessment (SEA) Objectives are:

- (a) To enhance proper forward-thinking in planning and zonation of the upcoming towns in order to avert the risks and consequences of poorly planned cities.
- (b) To identify environmental and poverty-combating priorities and how these may be influenced by the proposed Masterplan.
- (c) To ensure that conservation of biodiversity is at the core of the Masterplan formulation and implementation.
- (d) To ensure that the proposed Masterplan is compatible with sustainable environmental planning and management.
- (e) To ensure the consideration of alternative Masterplan options, including the do-nothing option, at an early stage when an agency has greater flexibility.
- (f) To enhance the consistency of the Masterplan across different sectors including the Big Four Agenda (Enhancing Manufacturing, Food Security and Nutrition, Universal Health Coverage, Affordable Housing).
- (g) To support decision-making and incorporate emerging environmental issues into sustainable development of the proposed city.
- (h) To identify environmental impacts and integrate mitigation measures during Masterplan formulation, and in the process, enhance environmental management.
- (i) To ensure the consideration of cumulative, indirect, or secondary impacts and other unintended consequences when planning multiple, diverse activities of the Masterplan.
- (j) To support time-efficient and cost-effective development planning by avoiding the need to reassess some issues and impacts at project level.
- (k) To inform decision makers by evaluating alternative options that meet the Masterplan's objective(s), while also being the best-practicable-environmental-option(s);
- (l) To integrate environmental principles into the development, appraisal, and selection of Masterplan's options e.g. selection of green technologies for the city.

(m) To provide an early opportunity to check whether the Masterplan complies with county, national and international environmental policy and consequent legislative obligations;
