Section 73 of the Principal Ordinance proposed to be repealed —

Disposal of
provident fund
contributions
in event of
dismissal from
the services

73 If a servant be dismissed from the service for fraud, dishonesty or misconduct, or retire from the service in order to avoid dismissal, or be ordered to resign on account of misconduct, he shall be refunded the amount of his own contributions only to any provident, pension or superannuation fund controlled by the High Commissioner, to which he may have contributed. Provided that, in case of a servant dismissed for fraud or dishonesty, the High Commissioner may deduct from any sums payable to such servant under this section the amount of any loss which the High Commissioner may have sustained by reason of such fraud or dishonesty.

Colony and Protectorate of Kenya.

GOVERNMENT NOTICE NO 562

HIS Excellency the Governor has approved of the following Bill being introduced into Legislative Council

G R SANDFORD,
Clerk to Legislative Council

A Bill to Amend the Kenya and Uganda Railway Ordinance, 1927

BE IT ENACTED by the Governor of the Colony of Kenya, with the advice and consent of the Legislative Council thereof, as follows —

1 This Ordinance may be cited as “ the Kenya and Uganda Railway (Amendment) Ordinance, 1929 ” and shall be read as one with the Kenya and Uganda Railway Ordinance, 1927, hereinafter referred to as “ the Principal Ordinance ”

Short title

15 of 1927

2 Section 73 of the Principal Ordinance is hereby repealed

Repeal of section 73 of the Principal Ordinance

OBJECTS AND REASONS

Section 73 of the Principal Ordinance provides (*inter alia*) that a servant of the High Commissioner for Transport dismissed for fraud, dishonesty or misconduct, or retiring from the Service of the High Commissioner for Transport in order to avoid dismissal, or ordered to resign on account of misconduct, shall be refunded the amount of his own contributions only to any provident, pension or superannuation fund controlled by the High Commissioner for Transport

It is considered that this is a hardship and that interest upon the servant's own contributions should be paid to him in the events above set forth

As this matter and the other provisions of the Section can be more adequately dealt with under the rules in operation regulating the Kenya and Uganda Railways and Harbours Provident Fund, and as such rules, so far as the provisions of Section 73 of the Principal Ordinance are concerned, are of no effect while such Section is in force, it has been decided that the whole Section should be repealed

DEPARTMENT OF AGRICULTURE

WEEKLY LOCUST REPORT TO 29TH AUGUST, 1929

HOPPER AREAS

KILIMBO PROVINCE

Karamoja (Uganda) — Staff withdrawn. Work ceased.

Suk — Heavy new hopper infestation near Kateruk, and generally at the north-east end of the district.

Northern Turkana — New large hopper areas have been reported by telegram.

Southern Turkana — No report. Contact has not been established between the parties working on hopper areas in the southern part of this area, and the concentration of officers in the northern portion of Baringo.

Elgeyo-Marakwet — Operations now confined to scouting the whole district for fresh hopper areas. Destruction of hoppers completed.

Baringo — Mossop Ridge area cleared. Infestation in area near Lake Baringo now cleared up. Work concentrated in Lulayo Kaipeddo South Turkana areas. Staff has been reinforced. Rain has fallen.

Northern Frontier — No advices received.

Although extensive destruction of hoppers, both by operations and naturally, has taken place, it would be premature to consider the menace this year as wholly past. An influx from the northern country may take place towards the end of September, and as indicated above, swarms from the south still evacuate northwards, passing through the Colony. In addition, there is a heavy hopper infestation to be dealt with in so far as its distribution is known, but laying possibly continued for some time after the mature swarms flew eastwards. Unfortunately, we have no information regarding their subsequent movements in the Northern Frontier Province.

FLYING SWARMS

Two swarms are reported from the Plateau. One near Sergoit Rock is moving east into the Kerio Valley. This swarm apparently came over high from the south. The other swarm near the Elgeyo Saw Mills was immobilized on account of cold and mist. This was approachable, and attacked both by spraying and baiting with considerable success.

The swarm reported last week as being in the Mau Forest has reached Mau Summit and Upper Molo. There is a small swarm near Londiani. These fliers should reach the region Ravine-Equator shortly. There are very small swarms still in Subukia and Solai, as reported last week.

The half mature swarm and its small offshoots reported last week as being in the Kikuyu Reserve is parasitised, and moving northwards. These locusts came from the south up the Kedong Valley. They have reached Mount Kenya, and are reported as being near Keruguya.

The Scouting Officer operating in the Masai Reserve, near the boundary, reports that nine swarms have moved northwards, and he has found traces of, and received information regarding, hopper bands which came to maturity in the region of Nara.

The bran baiting of flying swarms which remained in the trees on or near farms might be attempted by farmers, following the instruction as to preparation of bait hitherto published. Small quantities of arsenite for the purpose may be had on application to the Group Leader or the District Commissioner of the district. Farmers should provide their own stocks of bran.

The bait is best flung out in the early morning on bare spaces near the trees in which the locusts are roosting. When warm enough, locusts take a short flight from the trees to the ground, and sun themselves on any warm bare spot they can find. Thus, if baited, will effect the destruction of a portion of the swarm. It is not an operation from which success is invincible. Care should be taken to sweep up any unconsumed bait, and to bury it. Stock and natives should be kept away from baited areas, as the distribution of bait for flying swarms requires to be somewhat thicker (say 100 lb per acre) than the thin spraying of bait used on hopper bands, and the locusts should not be disturbed.
