THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED PETROL FILLING STATION ON PLOT L.R. NO. MAKINDU/KIBOKO B/687, IN MAKINDU, MAKUENI COUNTY

INVITATION OF PUBLIC COMMENTS

PURSUANT to Regulation 21 of the Environmental Management and Coordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has

received an Environmental Impact Assessment Study Report for the above proposed project.

The Proponent (Lawrence Mwangangi Mwanja) is proposing to construct a petrol Filling Station and associated facilities. The petrol station will consist of, the canopy over pumps (fore court), underground oil storage tanks and breathers, offices and shops, drive ways (walkways; acceleration and deceleration lanes; and parking areas), oil/water interceptor, washrooms, and associated piping work.

Below is a summary of the anticipated impacts and the proposed mitigation measures:

<i>Impact</i>	<i>Proposed Mitigation Measures</i>
Vehicular emissions	<ul style="list-style-type: none"> • Ensure that the vehicles are switched off while at the station. • The potential for the accumulation of emissions in the premises is however very low since the station is well aerated.
Oil spills	<ul style="list-style-type: none"> • Fit hoses with quick-acting leak-proof cock or with an approved nozzle • Train and supervise employee to ensure minimal spillage of fuel.
Wastewater	<ul style="list-style-type: none"> • Construct proper drainage system • Treatment of water through oil interceptors prior to discharge into the environment • Should meet the effluent standards as per Water Quality regulations (Amendment) 2012.
Leakages	<ul style="list-style-type: none"> • Use of approved fuel tanks and monitor fuel quantities to detect leakages. • To prevent any leaks from getting into the environment, the tanks should be properly treated. • A layer of clay should be used to encase the tanks during installation. • The underground tanks must satisfy the national standards.
Noise	<ul style="list-style-type: none"> • The noise levels are not likely to exceed the minimum standards. No measures are necessary except for the switching off engines while at the station. • Should ensure that noise regulations 2009 are adhered to.
Fire risks	<ul style="list-style-type: none"> • Firefighting drills carried out regularly. • Firefighting emergency response plan • Ensure all firefighting equipment is regularly maintained, serviced and inspected. • Fire hazard signs and directions to emergency exit, route to follow and assembly point in case of any fire incidence. • Adapt effective Emergency Response Plan
Water quality & Waste Management	<ul style="list-style-type: none"> • Construct and monitor oil interceptors. • Reduce waste at source, recycling, and disposal of unrecyclable waste in approved dumpsites. The proponent should explore engaging the services of a registered waste handler

INVITATION OF PUBLIC COMMENTS

PURSUANT to Regulation 21 of the Environmental Management and Coordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The Proponent (Nyali Bazaar Limited) is proposing to develop a shopping bazaar consisting of banking halls, office facilities, shopping stalls, open air boxes and car parking facility.

Below is a summary of the anticipated impacts and the proposed mitigation measures:

<i>Impacts</i>	<i>Proposed Mitigation Measures</i>
Soil compaction	<ul style="list-style-type: none"> • In order to prevent irreversible construction compaction effects arising from construction plant and equipment, ensure that to the extent possible, construction is undertaken during dry periods. • On completion, all non-built up areas should be landscaped.
Soil erosion	<ul style="list-style-type: none"> • To prevent soil erosion, all non-built up areas should be landscaped and appropriate soil binding grass planted.
Impact on surface water flow	<ul style="list-style-type: none"> • If possible undertake initial construction activities during the dry season to prevent water/soil run-off especially on side slopes. • Water should also be diverted away from the project footprint areas through properly constructed drainage channels
Impact on water quality	<ul style="list-style-type: none"> • Ensure that spills emanating from construction plant and equipment are cleaned immediately. • Any petroleum products stored on site must be stored in banded areas to prevent contamination of surface water. • Contractor to adhere to Construction HSE management plan during the construction phase.
Decreased air quality due to dust and VOC emissions	<ul style="list-style-type: none"> • Develop and implement effective measures for minimization of dust during the preconstruction and construction phase, followed by rehabilitation in a timely manner. • Contractor to ensure that construction plant and equipment is in a good state of repair at all times to prevent adverse exhaust air emissions.
Pollution from waste	<ul style="list-style-type: none"> • Develop and implement safe

generation	<p>procedures for management of non-hazardous and hazardous wastes in accordance with L.N. 121: Waste Management Regulations, 2006.</p> <ul style="list-style-type: none"> Contractor is responsible for this during the construction phase and the Proponent during the operational phase of the project.
Noise during construction	<ul style="list-style-type: none"> Contractor's plant and equipment should comply as a minimum with requirements of L.N. 25: Noise Prevention and Control Rules, 2005.
Noise during operation	<ul style="list-style-type: none"> The project will be designed to maintain noise levels at 70 dB (A) at the fence line.
Compatibility with existing land uses	<ul style="list-style-type: none"> The Proponent should create public awareness about "safe" land uses of any future projects in the vicinity of the proposed project area.
Increased crime and in-migration	<ul style="list-style-type: none"> Implement measures to manage expectations about job creation during the preconstruction, construction and operational phases. Develop and put into practice strategies to minimize crime, to include effective communication with landowners to inform them about the movement of work teams, and codes of conduct for contractors and employees.
Creation of employment	<ul style="list-style-type: none"> Implement where feasible measures to employ local community members during both the preconstruction and construction phase, as well as the operational phase.
Increased risk of communicable diseases	<ul style="list-style-type: none"> Ensure effective communication with communities to limit expectations of employment creation. Develop and implement a HSE program for employees.
Social divisions over limited jobs and preferential access	<ul style="list-style-type: none"> Develop and implement transparent employment and procurement measures which comply with the regulatory framework and maximize local benefits.
Accidents as a result of increased traffic	<ul style="list-style-type: none"> Implement measures to ensure that traffic and road safety hazards are minimized during the preconstruction, construction and operational phases.
Damage to roads and other transport infrastructure	<ul style="list-style-type: none"> Develop and implement measures to repair regularly used roads to the project site especially the section between the turn-off from the Nairobi – Mombasa highway to the project site. Ensure that contractor vehicles comply with axle load limits.
Increased traffic and road safety hazard	<ul style="list-style-type: none"> Develop and implement a traffic management plan to take advantage of off-peak hours for delivery of construction materials during the construction phase. Contractor drivers should possess defensive driving skills gotten from a reputable training consultancy.
Occupational health and safety	<ul style="list-style-type: none"> Develop and implement contractor safety rules which include the relevant provisions of OSHA, WIBA and their respective subsidiary legislation. Specifically ensure that the construction complies with L.N. 40: Building Operations and Work of Engineering Construction Rules, 1984.

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The Proponent (Ann Nyambura Maina) is proposing to construct Fuel Filling Station with six 23,000L USTs and four dispensing pump islands, a mini market, convenient store, restaurant and coffee shop, cyber centre and service bay, car wash, air and water point, generator and compressor room, pump shade and lubricants shop, sanitary facilities, soak pits and septic tank, associated electrical and civil works.

Below is a summary of the anticipated impacts and the proposed mitigation measures:

<i>Impact</i>	<i>Proposed Mitigation Measures</i>
Air pollution	<ul style="list-style-type: none"> Control speed and operation of construction vehicles. Minimize idling of vehicles. Spray water on excavated areas. Proper maintenance of construction plant and equipment. Sensitize construction workers. All bare areas should be landscaped after construction. Workers should be provided with dust masks if working in dusty areas.
Ecological considerations	<ul style="list-style-type: none"> The flora and fauna should be restored after construction by landscaping Provide signs marked do not Walk/ Park on the grass
Traffic density	<ul style="list-style-type: none"> Use traffic informative signage and posters Presence of direction signs for patrons to the site Strict adherence to traffic rules.
Solid waste generation	<ul style="list-style-type: none"> Provide waste receptacles on site Order just enough quantities of materials to prevent wastage.

	<ul style="list-style-type: none"> • Use material leftovers elsewhere • Use of durable, long-lasting materials that will not need to be replaced as often. • Provide proper material storage to prevent damage from exposure • Reuse materials as much as possible. • Dispose waste more responsibly by dumping at designated dumping sites only. 	Sewage/ waste water release	<ul style="list-style-type: none"> • Waste water should empty to the septic tank via well laid sewage pipes • Conduct inspections for sewer pipe blockages or damages and fix them • Empty septic tank whenever its full by a licensed exhauster services • The oil interceptor to be properly maintained to prevent blockages and overflows. • The filler point and dispensing area must be hard surfaced to prevent infiltration. • Oil contaminated water to be channeled through the oil interceptor. • Monitor effluent quality regularly to ensure that the stipulated discharge rules and standards are not violated
Noise pollution	<ul style="list-style-type: none"> • Sensitize construction vehicle drivers and machinery operators to switch off engines of vehicles or machinery not being used. • Sensitize construction drivers to avoid gunning of vehicle engines or hooting unnecessarily. • Ensure that construction machinery are kept in good condition to reduce noise • Ensure that all generators and heavy duty equipment are insulated or placed in enclosures to minimize ambient noise levels. • Workers to wear ear muffs if working in noisy section. • Construction should be carried out only during daytime 	Fire risk	<ul style="list-style-type: none"> • Provide adequate fire extinguishers of the right type. • Regular inspection of safety valves by qualified Personnel • Firefighting drills to be carried out regularly. • Firefighting emergency response plan to be implemented. • Ensure all firefighting equipment is regularly maintained, serviced and inspected.
Depletion of energy resources	<ul style="list-style-type: none"> • Ensure electrical equipment and lights are switched off when not being used. • Install energy-saving fluorescent tubes instead of bulbs high consuming bulbs • Ensure planning of transportation of materials to ensure that fossil fuels (diesel, petrol) are not consumed in excessive amounts. • Monitor energy use and set targets for reduction of energy use 		
Exploitation of water resources	<ul style="list-style-type: none"> • Promptly detect and repair of water pipe and tank leaks • Ensure taps are not running when not in use • Promote recycling and reuse of water as much as possible • Install a discharge meter at water outlets to monitor total water usage 		
Occupational Health and Safety	<ul style="list-style-type: none"> • Provide Personal Protective Equipment • Train workers on personal safety and how to handle equipment and machines • A well-stocked first aid kit shall be maintained by a qualified personnel • Report any accidents / incidences and treat and compensate affected workers • Provide sufficient and suitable sanitary conveniences which should be kept clean 		
Security	<ul style="list-style-type: none"> • Control of secondary businesses. • Round the clock security for the facility • Adequate lighting and an alarm system installed at strategic points. 		
Oil leaks and spills	<ul style="list-style-type: none"> • Machinery should be well maintained to prevent oil leaks. • Designate a maintenance area that is protected from rain water. • All oil products should be stored in a site store and handled carefully. • Install an oil water interceptor before draining to the storm water drainage system

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED AEROSOL TECHNIQUE APPLICATIONS (SAT APPLICATIONS) IN MERU CONSERVATION AREA

INVITATION OF PUBLIC COMMENTS

PURSUANT to Regulation 21 of the Environmental Management and Coordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The Proponent Pan African Tsetse and Trypanosomiasis Eradication Council is proposing to eradicate tsetse flies and Trypanosomiasis through aerosol technique applications in Meru Conservation Area.

The following are the anticipated impacts and proposed mitigation measures:

*Environmental Impacts**Chemical spillage:*

Spillage of deltamethrin or other chemicals in use may occur out of accidents or negligence. These may get to humans organisms or pollute the environment in general

Air quality:

This may be negatively impacted upon by dust emanating from transport trucks and traffic fumes during operations stages. This will have effects on construction workers and residents.

Vegetation loss:

Loss of vegetation on specific sites to be covered by buildings is expected during camp construction.

Noise:

This is expected to rise during operation from spray aircrafts flight activities and movements transport trucks. This is expected to impact on people in the operation working in the project and residents in the project areas. It will also impact negatively on wildlife in the conservation areas.

Increased water demand:

Increasing water consumption will occur both during project operation phase.

Human health and safety:

There will be many risks to human health during the project operation phase. These will include

Contacts with deltamethrin, consumption of polluted food substances. Possible accidents from tracks, aircrafts, falling objects, etc.

Fire Risks:

Fire outbreaks are a serious yet possible risk during operation. These can come as a result of use of faulty or wrong electrical appliances; careless use of inflammable materials.

Mitigation Impacts

- Good education on first aid on chemical poisoning
- Maintain a detoxication or treatment facility at the site
- Maintain an health care facility with antidotes for all expected poisoning

- Wetting the roads during operations
- Use of personal protective clothing and appliances
- Use of well-maintained vehicles

- Constructions should keep off 6m of riparian vegetation around rivers and dams
- Try as much as possible to retain existing plants especially those that are of conservation value and other commercial utilities.

- Ensure that trucks, vehicles, and auxiliary equipment are in good mechanical conditions.
- Provide ear muffs to project workers.
- Liaise with affected communities to be fully aware on the operation times (dates and times of the day)

- Ensure sustainable use and conservation of water by the project staff around the camps and areas of operation.

- Putting safe systems of work during operation i.e. appointment of safety supervisors, provision of welfare facilities, appointment of first aiders, arrangements for emergency services etc.

- Provision of personal protective clothing and appliances e.g. helmets, gloves, earmuffs, respiratory protectors, overalls, protective shoes and safety harnesses.

- Proper ventilation of confined spaces.

- Erection and posting of safety signs where applicable.

- Provision of adequate workmen compensation insurance cover during operation.

- proper garbage disposal and effluent surface spillage control

- Provision of operational firefighting appliances.

- Observance and practice of safe working procedures when working with flammable substances.

- Isolation of flammable substances

- Use of standard electrical appliances

- Electrical installations to be undertaken only by qualified registered experts.
- Provision of adequate, operational and accessible fire exit.
- Training of personnel on fire safety.

Waste management:

Some quantities of liquid and solid waste may be generated during the operation phase. These are; waste paper, plastic containers, cans, used water, human wastes etc.

- Put in place waste management systems (e.g., sorting solid wastes into designated bins).
- Recycling the wastes wherever possible.
- Dispose the wastes into authorized areas using licensed waste management firms or individuals

The full report of the proposed project is available for inspection during working hours at:

COUNTY.

INVITATION OF PUBLIC COMMENTS

PURSUANT to Regulation 21 of the Environmental Management and Coordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The Proponent (Karibu Homes Parktel Limited) is proposing to construct a residential estate of two and three bed-roomed apartments in one gated community. The project entails the construction of eight hundred and seventy one (871) residential units with forty eight (48) commercial units at the main entrance to the site. At the commercial centre, the proponent has provided for a police post and a chief's camp. A riparian of 30M along Athi River shall be maintained and converted into a relaxation/recreational park for the residents. Car parks will be provided at the ground floor of each residential block. The proponent will all provide an electric fence and live kei apple fence around the project site to enhance security within the site.

Below is a summary of the anticipated impacts and the proposed mitigation measures:

Impact

Solid waste

Proposed Mitigation Measures

- Provision of dustbins to temporarily hold the waste before disposal
- Reuse where possible or sale to authorized waste handlers/collectors
- Solid waste generated at the site is

	disposed of appropriately at authorized dumping sites regularly
Storm water	<ul style="list-style-type: none"> • Proper handling and storage of construction materials to reduce the amount of waste caused by damage or exposure to the elements • Solid waste generated on site must not find its way to the river at the rear end of the proposed site • Construction of proper drainage systems across the estate • Prevention of pollution during construction activities to minimize effects that may arise during surface runoff • Instituting water saving strategies to minimize water use • The drainage systems must be properly maintained to ensure no solid waste is carried away to Athi river to protect its aquatic ecosystem
Air and noise pollution	<ul style="list-style-type: none"> • Limiting construction traffic movement and operation to efficient and necessary activities • Routine maintenance of vehicles and other machinery to be used during construction process to reduce any chances of emissions • Minimizing transportation activities to day time only • The road leading to the site be sprinkled with water to mitigate excessive dust emission • Limiting construction activities to day time only • Sensitize construction drivers and machinery operators to switch off engines when not being used • Sprinkle the construction site with water to keep dust levels down
Soil	<ul style="list-style-type: none"> • Excavating only necessary areas • Containment of soil heaps to prevent erosion caused by runoff • Reduce the use of heavy machinery whenever possible • Use of light machinery at the site during construction process • Re-vegetate exposed areas on the site through proper landscaping
Effluent discharge	<ul style="list-style-type: none"> • Effluent discharge shall be channeled to the main sewer line that serves the area • Consider recycling the waste water from the estate and reusing it before direct disposal • All effluent to meet NEMA standards for discharge
Visual intrusion	<ul style="list-style-type: none"> • Maintaining the existing live fence to acceptable standards and improve it significantly to enhance scenic beauty of the area • Landscaping and gardening to restore biodiversity and aesthetic qualities of the project site

- Ecosystem disturbance
- Provide a riparian site of thirty metres from the river that can be converted into a recreational park to protect the ecosystem from possible pollution.
 - Ensure that all the drainage systems within the estate are properly maintained and cleaned to avoid solid waste being washed away into Athi river
 - Ensure proper demarcation and delineation of the project area to be affected by construction works
 - Designate access routes and parking within the site
 - Preserve the existing trees within the project site and if possible plant more trees of fast maturity period within the site
 - Design and implement an appropriate landscaping programme to help in re-vegetation of part of the project area after construction

THE ENVIRONMENTAL MANAGEMENT AND CO-ORDINATION ACT

(No. 8 of 1999)

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED REHABILITATION OF THE NAIROBI CITY PARK IN NAIROBI COUNTY.

PURSUANT to Regulation 21 of the Environmental Management and Coordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The Proponent (Aga Khan Trust for Culture in Public Private Partnership with the Government of Kenya) is proposing to rehabilitate the 65 hectare Nairobi City Park. The rehabilitation will involve the creation of the main circulation spine; establishment of an expanded state of the art spots facilities; creation of a plant nursery, maintenance and operation area; an upper central area on either side of the main circulation spine containing new educational facilities, cafes, small shops restaurant, food and beverage outlets; a passive and recreational leisure core; a conservation zone of about 41.5 ha where only passive activities will be allowed; restoration of the historic maze.

Below is a summary of the anticipated impacts and the proposed mitigation measures:

<i>Impact</i>	<i>Proposed Mitigation Measures</i>
Air pollution and dust generation	<ul style="list-style-type: none"> • Spray of water during construction work • Control of speed and movements of construction vehicles • Building a buffer fence around the construction site • Use of low-sulphur diesel for diesel-operated construction machinery • Avoid burning waste materials at the site • Material drop heights to be kept to minimum • Positioning of stockpiles to minimize effect of wind • Dust sheets over surface of stockpiled materials • Control earthworks and minimal clearance of vegetation
Noise Pollution	<ul style="list-style-type: none"> • No unnecessary hooting by project and occupants vehicles • Restriction of construction activities to day time • Use of ear protection aids by construction workers • Use of equipment designed with noise control elements • Temporarily fencing off noisy machinery such as vibrators

Clearing of vegetation	<ul style="list-style-type: none"> • Maintaining of some of the existing trees and vegetation at the site • Planting of indigenous trees and plants to maintain ecological system integrity • Coordination with National Museums of Kenya biologists on habitat impacts • Engagement of a supervisory entomologist to check on park flora and fauna • Use of attenuated equipment 	<ul style="list-style-type: none"> • Sprinkling the active construction sites with water to minimize dust • Sensitize workers on construction safety measures • Maintain cleanliness and organization at the construction site • Fencing or covering of risky areas such as deep pits • Use of permit-to-work authorizer for risky jobs • Engagement of skilled labourers • Insurance of workers
Disturbance of soil structure	<ul style="list-style-type: none"> • Put soil traps around perimeter fence and on steep areas to capture soil that might be washed away • Appoint a landscaping company to plant indigenous and ornamental trees and grass once construction is over in Zone B • Maintaining specified routes for construction vehicles (no off-road driving) • Control earthworks • Use of light machinery and equipment 	<ul style="list-style-type: none"> • Ensure children do not go near the swimming pool unaccompanied by adults • Safety signage in swimming pool area • Acquire fire fighting facilities • Sensitize workers on fire safety • No storage of inflammables at site • Keep well stocked first aid box
Destruction of habitat	<ul style="list-style-type: none"> • Maintaining of indigenous plants and trees. • Control of earthworks • Commissioning of ecosystem impact study in coordination with National Museums of Kenya to assess construction impact on biodiversity. 	<ul style="list-style-type: none"> • Proper handling and use of tools and machinery • Use of correct PPE • Initiate fire safety drills
Generation of solid waste	<ul style="list-style-type: none"> • Minimize generation of waste • Re-use of excavated soil for landscaping • Re-use of construction debris in other projects like rehabilitation of quarry pits • Provision of solid waste collection bins • Engaging the services of a licensed waste collection and disposal company at operation stage • Sensitizing construction workers and occupants on proper waste disposal and material re-use • Re-use of timber off-cuts and wooden supports for fuel 	<ul style="list-style-type: none"> • Ensure that the site is always guarded by a reputable security firm • Constant site patrol • Collaboration with existing security machinery • Partnership with neighbours and police in community policing
Increased demand for water and electricity	<ul style="list-style-type: none"> • Conservative use of water and electricity • Provision of adequate water storage facilities • Re-use of water where possible, mainly at construction phase Explore additional sources like sinking of a borehole • Use of energy conserving electrical appliances • Switching off appliances whenever not in use • Considering sources and use of renewable energy e.g. Solar energy • Install facilities for harvesting rain water 	<ul style="list-style-type: none"> • Proper connection of waste water and sewerage system to existing mains as per the project design • Proper maintenance of sewers within the building • Ensure use of provided pit latrines by construction staff • Proper handling and disposal of solid waste • Operation of noisy machinery at daytime only • Control of visitors to the site • Traffic control • Installation of adequate water supply • Enhanced site security Controlled developments around the facility
Storm water/run off	<ul style="list-style-type: none"> • Put in place a storm water drainage system 	<ul style="list-style-type: none"> • Landscaping the facility's compound • Embrace good neighbourhood practices like proper waste disposal and avoiding unnecessary externalities.
Occupational health and safety risks	<ul style="list-style-type: none"> • Provision of appropriate personal protective equipment to construction workers 	
<p>The full report of the proposed project is available for inspection during working hours at:</p> <p>(a) Director-General, NEMA, Popo Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.</p> <p>(b) Principal Secretary, Ministry of Environment and Mineral Resources, NHIF Building, Community, P.O. Box 30521, Nairobi.</p>		

(c) County Director of Environment, Nairobi County.

**IMPORTANT NOTICE TO SUBSCRIBERS TO
THE KENYA GAZETTE**

THE following notes are for the guidance of persons submitting "copy" for inclusion in the *Kenya Gazette, Supplement*, etc.:

- (1) *The Kenya Gazette* contains Notices of a general nature which do not affect legislation. They are, therefore, submitted to the Government Printer directly.
- (2) *Legislative Supplement* contains Rules and Regulations which are issued by the Central Government. Because of this, they must be submitted to the Government Printer through the office of the Attorney-General.
- (3) *Bill Supplement* contains Bills which are for introduction in the National Assembly.
- (4) *Act Supplement* contains Acts passed by the National Assembly.

All "copy" submitted for publication should be prepared on one side of an A4 sheet no matter how small the Notice is, each page being numbered and should be typewritten with double spacing. Copy should be clear, legible and contain no alterations.

Particular attention should be paid to the following points:

- (i) Signature must be supported by rubber-stamping or typing the name of the signatory in capital letters.
- (ii) must be correct and filled in where necessary.
- (iii) Care should be taken to ensure that all headings to Notices and references to legislation are up to date and conform with the Revised Edition of the Laws of Kenya.

EXTRACT FROM THE CODE OF REGULATIONS, SECTION D—

Kenya Gazette

"D 34. (1) Communications for the *Kenya Gazette* should reach the Government Printer not later than 9 a.m. on Friday of the week before publication is desired. The Government Printer will not publish communications received after that hour until the next subsequent issue of the Gazette.

(2) Ministries will be required to pay for the *Kenya Gazette* and to meet the cost of advertising in it.

It is emphasized that these notes are for guidance only, but it is requested that persons submitting copy for publication first satisfy themselves that such copy is complete in every respect.
