*Inquiry into Allegations of Procurement Irregularities and Misappropriation of Public Funds by Officials of Mandera County Government Through Construction of Regional Livestock Market*

The Ethics and Anti-Corruption Commission (the Commission) commenced investigation after receiving an allegation that the County Government of Mandera through its Ministry of Agriculture, Livestock and Fisheries misappropriated public funds amounting to KSh.120,000,000/=. The County Government had planned for the construction of a regional livestock market within the County in its County Integrated Development Plan during the financial year 2013/2014. It was alleged that the money had been released during the subsequent financial years yet the project had never been completed.

Investigation established that Mandera County Government had planned for the said construction in its CIPD 2013-2017 and in the County estimates for the financial year 2013-2014. The County had also advertised for the tender No. MCG/228/2013-2014 for construction of the regional market in the standard daily newspaper.

Investigation established that the contract was awarded at a cost of KSh. 169,922,855/= which was higher than what had been provided for in the budget. Investigation revealed that there were procurement irregularities in the evaluation of the tenders. The County later terminated the contract with the contractor who had been awarded owing to a fundamental breach of the contract.

The Ethics and Anti-Corruption Commission (the Commission) commenced investigation following receipt of a complaint received

concerning several allegations of corruption against officials of Meru County Assembly. It was alleged that the said officials were involved in procurement irregularities in the procurement of computers and printers awarded to Eduna East Africa Limited in the financial year 2013/2014.

Investigation established that Meru County Assembly had a budget allocation of KSh.15,097,375 for the purchase of computers, its accessories and other IT equipment. However, the annual procurement plan was prepared eight months after the beginning of the FY 2013/2014.

The Clerk of the County Assembly further appointed the same members who participated in the tender opening, evaluation, award, negotiation, inspection and acceptance committee meetings contrary to the requirements of the Public Procurement and Disposal Act, 2005.

Investigation established that Eduna East Africa Limited was awarded the tender despite not being the lowest evaluated bidder. The company was also requested to supply additional computer accessories that were not captured in the RFQ. The accounting officer failed to ensure that the procurement plan was in place, that letters to successful and unsuccessful bidders were issued and that accounting procedures were followed while processing payments to various suppliers.

The Ethics and Anti-Corruption Commission (the Commission) commenced investigation after receiving allegations that the County Government of Isiolo was in the process of making a fraudulent payment of approximately KSh.163,377, 754/= to various suppliers for goods not delivered. It was further alleged that the said suppliers had filed a civil case against the County in Isiolo Chief Magistrate Court in which they had obtained a favourable Judgment/Ruling for the payment.

Investigation established that the County Government of Isiolo contracted Dabasiti Contractors and Suppliers Limited for the supply of food items and hire of transport services. The two procurements were commenced without a procurement plan and budget.

The County did not employ any procurement method in the procurement for supply of relief food. Nonetheless, the food was delivered, received and distributed to County residents.

Further investigation established that the County failed to pay the Contractor KSh. 8.4m for the transport services and KSh. 17,062,000/- for relief food despite several demands for the same. ### *Impacts*

### *Mitigation measures*

#### Dust generation

- Display signs to indicate construction activities.
- Maintain all equipment; Workers in the vicinity of high-level noise to wear safety and protective gear.
- Spray stock piles of earth with water;
- Avoid pouring dust materials from elevated areas to ground.
- Cover all trucks hauling soil, sand and other loose materials.
- Provide dust screen where necessary.

#### Exhaust emissions

- Vehicle idling time shall be minimized;
- Equipment shall be properly serviced and maintained.

#### Increased water demand

- Installation of motion-sensing taps, urinals, and toilets to automatically switch off once the user leaves the station. A motion sensor tap would cut up to 85% of annual water usage compared to conventional taps.
- Rainwater harvesting: The harvested water would be used for cleaning, flushing toilets, watering plants.
- Avail storage tanks.

#### Solid waste generation

- Special attention shall be paid to the sanitary facilities on site.
- Garbage shall be disposed periodically.
- Contract a NEMA licensed waste handler.

#### Emission of greenhouse gas emission

- Installation of a solar PV system on the rooftop to supplement KPC supply thereby abating about GHG emissions.
- Implementing energy efficiency mechanisms to reduce energy consumption.
- Undertaking annual energy audits to monitor progress and exploit opportunities for energy efficiency.

#### Public health and occupational safety

- Ensure proper solid waste disposal and collection facilities; Ensure dustbin cubicles are protected from animals, rains and are well covered.
- Provide suitable safety gear for all personnel.
- Proper treatment of waste water.

#### Climate change risks and vulnerability

- Water management; The project should invest in water management strategies like rainwater harvesting, storage facilities, and efficient water use practices. These measures aim to mitigate water scarcity during dry periods and reduce flood risks during heavy rainfall events.
- Infrastructure Design: Incorporate resilient features to withstand extreme weather like flooding, storms, and high temperatures.
- Energy Efficiency: Implement technologies and practices to reduce greenhouse gas emissions and dependency on fossil fuels.
- Biodiversity Conservation; Protect and enhance natural ecosystems to preserve biodiversity and ecosystem services, including reforestation, habitat restoration, and sustainable land management practices.

#### Traffic disruption

- Properly plan for transportation of materials to ensure that vehicles are optimally filled to reduce the number of trips done or the number of vehicles on the access roads.
