#### THE ENVIRONMENTAL MANAGEMENT AND CO-ORDINATION ACT

(No. 8 of 1999)

#### THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY

#### ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED UPGRADING OF THE BUSIA – MALABA ROAD C43 TO BITUMEN STANDARD

#### INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) regulations, the National Environmental Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the implementation of the proposed upgrading of the Busia – Malaba road c43 to bitumen standard

Road construction requires the deployment heavy duty machinery and considerable earthworks. Large quantities of construction materials will be used, mainly, gravel, hard-stone, sand and water.

The following activities will likely take place.

1. Road condition survey
2. Location of murram supply quarries
3. Widening of the road to required width, where necessary
4. Storage of fuel and lubricants
5. Construction of a Labor Camp(s)
6. Excavation
7. Construction of haulage routes
8. Construction of diversions
9. Construction of bridges
10. Installation of rock crushing plant
11. Asphalt Plant operations
12. Establishment of Quarries and Borrow pits
13. Rock Blasting
14. Mining of murram
15. Screening and sizing of rock materials
16. Mixing of concrete
17. Employment of labor force
18. Construction of workshops
19. Steel fabrication operations
20. Woodworking operations
21. Water abstraction
22. Transportation of crews, building materials and equipment

The proposed road project is located within Teso District, Western Province in the Republic of Kenya and covers a distance of 28km. The traverse of the road corridor originates at kilometer 117 on the B1 from Kisumu towards Busia and terminates at Malaba on the A104 from Eldoret

The following are the anticipated impacts and proposed mitigation measures:

<i>Possible Impact</i>	<i>Mitigation measures</i>	
Habitat Destruction	<ul style="list-style-type: none"> <li>Restore cleared areas with indigenous trees and grasses.</li> <li>Cutting of trees for firewood by construction crews must not be allowed.</li> <li>Re-vegetation should be timed and take advantage of the rainy seasons.</li> <li>Regenerate lost ecosystems to attract displaced fauna or support other species.</li> </ul>	<ul style="list-style-type: none"> <li>Limit construction activities to day-time hours only.</li> <li>Observe a common-sense approach to vehicle use, and encourage drivers to shut off idle engines.</li> </ul>

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT  
FOR THE PROPOSED COMMERCIAL DEVELOPMENT OF DAZ  
SQUARE OFFICE PARK AND HOTEL ON L.R. NO. 7158/76, ON  
LOWER KABETE ROAD, NAIROBI

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) regulations, the National Environmental Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the implementation for the proposed commercial development of daz square office park & hotel.

The project will construct six eco-friendly commercial buildings; five blocks of offices and a 4 star hotel which will all be storeyed, complete with associated external works including boundary walls, guard house, landscaped gardens, parking lots, and recreation centre among other components, to meet the ever-growing demand for well designed commercial space within the city of Nairobi.

The commercial block is located approximately 8 Kilometers from Nairobi Central Business District on Lower Kabete Road of Nairobi. The proposed site is on plot number L.R. No. 7158/76.

The following are the anticipated impacts and proposed mitigation measures:

<i>Environmental /Social Issue</i>	<i>Management &amp; Mitigation and /or Enhancement Measures</i>
------------------------------------	---

High Demand of Raw material	<ul style="list-style-type: none"> <li>Source building materials from local suppliers who use environmentally friendly processes in their operations.</li> <li>Ensure accurate budgeting and estimation of actual construction material requirements to ensure that the least amount of material necessary is ordered.</li> <li>Ensure that damage or loss of materials at the construction site is kept minimal through proper storage.</li> <li>Use at least 7% recycled, refurbished or salvaged materials to reduce the use of raw materials and divert material from landfills.</li> <li>Ensure proper demarcation and delineation of the project area to be affected by construction works.</li> </ul>
-----------------------------	--

Vegetation and Animal disturbance	<ul style="list-style-type: none"> <li>Ensure proper demarcation and delineation of the project area to be affected by construction works.</li> <li>Specify locations for trailers and equipment, and areas of the site which should be kept free of traffic, equipment and storage.</li> <li>Designate access routes and parking within the site.</li> <li>Preserve of some individual trees within the site.</li> <li>Introduction of vegetation (trees, shrubs and grass) on open spaces and their maintenance.</li> <li>Design and implement an appropriate landscaping programme to help in re vegetation of part of the project area after construction.</li> <li>Surface runoff and roof water shall be harvested and stored in underground reservoir for reuse.</li> <li>A storm water management plan that minimizes impervious area infiltration by use of recharge areas and use of detention and/or retention with graduated outlet control structure will be designed.</li> </ul>
-----------------------------------	--

Increased storm water, runoff and soil erosion

- Apply soil erosion control measures such as leveling of the project site to reduce run off velocity and increase infiltration of storm water into the soil.
- Ensure that construction vehicles are restricted to existing graded roads to avoid soil compaction within the project site.
- Ensure that any compacted areas are ripped to reduce runoff.
- Site excavation works to be planned such that a section is completed and rehabilitated before another section begins.
- Construction of soil-gulleys on sloppy sections.
- Open drains all interconnected will be provided on site.
- Roof catchments will be used to collect the storm water for some domestic uses.

Increased solid waste generation

- Use of an integrated solid waste management system i.e through a hierarchy of options: a) source reduction, b) Recycling c) Composting and reuse d) Combustion e) sanitary land filling.
- Through accurate estimation of the sizes and quantities of materials required, order materials in the sizes and quantities they will be needed, rather than cutting them to size, or having large quantities of residual materials.
- Ensure that construction materials left over at the end of construction will be used in other projects rather than being disposed of.
- Ensure that damaged or wasted construction materials including cabinets, doors, plumbing and lighting fixtures, marbles and glass will be recovered for refurbishing and use in other projects.
- Donate recyclable/reusable or residual materials to local community groups, institutions and individual local residents or home owners.
- Use of durable, long lasting materials that will not need to be replaced as often, thereby reducing the amount of construction waste generated over time.
- Provide facilities for proper handling and storage of construction materials to reduce the amount of waste caused by damage or exposure to the elements.

Dust Emission

- Ensure strict enforcement of on-site speed limit regulations.
- Avoid excavation works in extremely dry weathers.
- Sprinkle water on graded access routes when necessary to reduce dust generation by construction vehicles.
- Personal protective equipment to be worn.
- Vehicle idling time shall be minimized.

Exhaust emission

- Alternatively fuelled construction equipment shall be used where feasible equipment shall be properly tuned and maintained.
- Sensitize truck drivers to avoid unnecessary racing of vehicle engines at loading/offloading points and parking areas, and to switch off or keep vehicle engines at these points.

Noise and

- Sensitize construction vehicle drivers and machinery operators to switch off engines of

Vibration	<p>vehicles or machinery not being used.</p> <ul style="list-style-type: none"> <li>• Sensitize construction drivers to avoid gunning of vehicle engines or hooting especially when passing through sensitive areas such as churches, residential areas and hospitals.</li> <li>• Ensure that construction machinery are kept in good condition to reduce noise generation.</li> <li>• Ensure that all generators and heavy duty equipment are insulated or placed in enclosures to minimize ambient noise levels.</li> <li>• Trees around the site will provide some buffer against noise propagation.</li> <li>• The noisy construction works will entirely be planned to be during day time when most of the neighbors will be at work.</li> </ul>	<p>such inspections maintained.</p> <ul style="list-style-type: none"> <li>• Signs such as 'NO SMOKING' must be prominently displayed within the estate, especially in parts where inflammable materials are stored.</li> <li>• Enough space must be provided within the premises to allow for adequate natural ventilation through circulation of fresh air.</li> <li>• There must be adequate provision for artificial or natural lighting in all parts of the premises in which persons are working or passing.</li> </ul>
Generation of waste water	<ul style="list-style-type: none"> <li>• Provide means for handling sewage generated by construction workers.</li> <li>• Conduct regular checks for sewage pipe blockages or damages since such vices can lead to release of the effluent into the land and water bodies.</li> <li>• Monitor effluent quality regularly to ensure that the stipulated discharge rules and standards are not violated.</li> </ul>	<p>Oil spills</p> <ul style="list-style-type: none"> <li>• A designated garage section of the site fitted with oil trapping equipment to be planned for changes. ## GAZETTE NOTICE NO. 14654

## THE ENVIRONMENTAL MANAGEMENT AND CO-ORDINATION ACT

(No. 8 of 1999)

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY  
NOTICE TO THE PUBLIC TO SUBMIT COMMENTS ON AN  
ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT  
FOR THE PROPOSED CONSTRUCTION OF SANITARY  
LANDFILL IN RUAI

Pursuant to regulation 21 of Environmental (Impact Assessment and Audit) regulations, the National Environmental Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the implementation for the proposed construction of sanitary landfill.

The project involves the construction of a sanitary landfill in Ruai.

The proposed site is located in the East of Nairobi City, adjacent to Dandora Sewerage Ponds on one side by Nairobi River and the Embakasi Ranching Scheme on the other. The project area is located in Ruai Location.

The following are the anticipated impacts and proposed mitigation measures:

<i>Environmental/Social Issue</i>	<i>Management &amp; Mitigation and/or Enhancement Measures</i>		
General wastes	<ul style="list-style-type: none"> <li>All solid waste will be collected at a central location at each site and will be stored temporarily until removal to an appropriately permitted landfill site in the vicinity of the site.</li> <li>No dumping within the surrounding area is to be permitted. Where potentially hazardous substances are being disposed of, a chain of custody document should be kept with the environmental register as proof of final disposal.</li> <li>Waste generated at the site should be categorised by the contractor and disposed of in a suitable manner into different waste streams (including general and hazardous waste). Wherever possible recycling should be carried out</li> <li>Litter generated by the construction crew must be collected in rubbish bins and disposed of weekly at registered waste disposal sites</li> </ul>	Erosion Control	<ul style="list-style-type: none"> <li>During Construction any construction materials should be screened or covered to prevent offsite movement (primarily windblown soil) and the surplus material should be removed from site to an approved disposal site.</li> <li>Stripping of vegetation should be minimized to avoid erosion.</li> </ul>

		Noise and Vibrations	<ul style="list-style-type: none"> <li>Construction and the use of construction machinery should be limited between 0600hr and 1800hr on weekdays.</li> </ul>

- The contractor should use modern equipment, which produces the least noise. The use of noise shielding screens should be used and the operation of such machinery restricted to when it is actually required.
  - Construction activities must abide by the national Noise regulations recently gazette by NEMA
  - Prior to blasting (if required), the contractor must inform the adjacent landowners and local administration and obtain relevant permits from Mines and Geology Department
- Blasting and Drilling (if any)**
- In the event that blasting or rock drilling is required, the following recommendations will be implemented.
  - The contractor shall take all necessary precautions to prevent damage to special features and the general environment, which include minimization of, and if required, removals of any fly rock
  - Environmental damage caused by blasting / drilling shall be repaired at the contractor's expense to the satisfaction of the ECO and RE
  - No blasting may be done on Sundays. Careful sealing off of the site and surrounding area will be carried out to ensure that all personnel are removed from the site and its immediate surrounds.
  - Adequate warning must be provided prior to all blasting to all site staff and neighbours. All clear signals must also be clearly given
- General: Crime, safety and security**
- Ensure that only suitably qualified personnel use construction vehicles
  - Ensure that the contact details of the police or security company and ambulance services are available on site Limit access to the construction crew camp to construction workers through access control
  - Ensure that the handling of equipment and materials is supervised and adequately instructed
  - Vehicular traffic during construction activities must be limited to a maximum speed limit of 30km/hr.
  - Site notices informing the public of the planned activities must be placed at visible locations a few days prior to any blasting
- Destruction/protection of heritage resource (if any )**
- Should any archaeological artifacts be exposed during excavation, work on the area where the artifacts were found, shall cease immediately and the ECO shall be notified as soon as possible, the ECO shall then notify the National Museums of Kenya for further action
  - Sensitive environments and natural features within and/or close to a site will be designated as restricted areas and will not be interfered with during decommissioning of the plant
  - Any taxa, especially those of conservation concern (as per the ecological report) exposed during the closure of the site should be captured

- for later release or translocation to adjacent suitable habitat
- Aesthetic/ visual**
- Prevent unnecessary removal of vegetation outside the width of the working area by clearly demarcating the working area
  - Remove spoil material from the area once the trench has been filled
  - Revegetate disturbed ground in the working area by seeding and spreading of vegetation that has been removed from the trench at the start of construction
- Demobilisation**
- The site is to be cleared of all construction materials, including litter prior to hand over
  - Fences, barriers and demarcations associated with the construction phase must be removed from the site
  - The site must be fully rehabilitated and stabilized (for example, through revegetation)
  - A meeting must be held on site between the Engineer, ECO and the Contractor to approve all remediation activities and ensure that the site has been restored to a condition approved by the Engineer
  - Rehabilitation Activities of Environmental Cases identified must continue throughout the defect liability period

### THE ENVIRONMENTAL MANAGEMENT AND CO-ORDINATION ACT

(No. 8 of 1999)

#### THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY

#### NOTICE TO THE PUBLIC TO SUBMIT COMMENTS ON AN ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED DECOMMISSIONING OF DANDORA DUMPSITE, NJIRU DISTRICT, DANDORA DIVISION, DANDORA LOCATION AND DANDORA SUB-LOCATION

Pursuant to regulation 21 of Environmental (Impact Assessment and Audit) regulations, the National Environmental Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the implementation of the proposed decommissioning of Dandora dumpsite.

The project will involve decommissioning of the Dandora dumpsite due to the major negative environmental impacts of the local environment as a result of uncontrolled and open dumping.

The dumpsite is located in the East of Nairobi City, surrounded by Dandora estate, Lucky Summer, Ngomongo, Korogocho villages and the Nairobi river. The project is located within the following administrative boundaries: Njiru District, Dandora Division, Dandora location and Dandora sub-location.

The following are the anticipated impacts and proposed mitigation measures:

<i>Environmental Impacts</i>	<i>Mitigation Measures</i>
Leachate management	<ul style="list-style-type: none"> <li>Discharge of leachate from the dumpsite must be properly contained for treatment and disposal.</li> <li>The leachate should be analyzed regularly to determine the chemical composing, this will inform the threshold of treatment needed.</li> <li>Leachate should never be released into the sewer system, storm drain and the rivers before proper treatment</li> </ul>
Methane / Hydrogen Sulphide and other gases management	<ul style="list-style-type: none"> <li>Ventilation pipes fitted with gas traps and flares should be installed.</li> </ul>
General: wastes	<ul style="list-style-type: none"> <li>Clearing of bushes, excavation and cutting should be restricted within the project area.</li> <li>All solid waste will be collected at a central location at each site and will be stored temporarily until removal to an appropriately permitted landfill site.</li> <li>No dumping within the surrounding area is to be permitted. Where potentially hazardous substances are being disposed of, a chain of custody document should be kept with the environmental register as proof final disposal.</li> <li>Waste generated at the site should be sorted by the contractor and disposed of in a suitable manner into different waste streams (including general and hazardous waste). Wherever possible recycling should be carried out.</li> </ul>
Liquid wastes	<ul style="list-style-type: none"> <li>The contractor shall ensure that any liquid waste generated during decommissioning is disposed to a proper stabilizing lagoon;</li> <li>No decommissioning liquid wastes should be allowed to enter the wastewater or natural drainage systems</li> <li>No liquid waste shall be disposed off into soil;</li> <li>Storm water should be to avoid possibility of surface flow entry into the site from any adjacent area. Storm water drains in the area should be routinely inspected by the environmental officer for solid waste to avoid blockages and associated problems</li> </ul>
Fire prevention and control	<ul style="list-style-type: none"> <li>All reasonable and precautionary measures to prevent uncontrolled fires at the site due to decommissioning activities will be undertaken.</li> <li>Accidental fires will be reported to emergency teams, as well control with appropriate equipment located at site and properly documented.</li> <li>Ensure that there is basic firefighting equipment available on site as per requirement of the local Emergency</li> </ul>

Services.

Erosion Control	<ul style="list-style-type: none"> <li>Any construction materials should be screened or covered to prevent off-site movement (primarily windblown soil) and the surplus material should be removed from site to an approved disposal site.</li> <li>Striping of vegetation should be limited to areas where civil works will be undertaken.</li> <li>Berming of open trenches to prevent them from being washed away by run-off.</li> </ul>
Dust Control	<ul style="list-style-type: none"> <li>During the decommissioning, phase windblown dust and sand may generate considerable negative impacts (reduced visibility for vehicles travelling along adjacent roads).</li> <li>Mitigation measures such as the use of water bowyers and wetting down, as well as the erection of shade netting screens to prevent</li> </ul>
Machinery Management	<ul style="list-style-type: none"> <li>All vehicles, equipment, fuel and petroleum services and tanks must be maintained in good condition that prevents leakage and possible contamination of soil or groundwater.</li> <li>Decommissioning machinery should be located away from sensitive areas when parked for extended periods of time.</li> <li>A dedicated parking area should be defined with drip trays beneath any leaking equipment to prevent soil contamination by the discharge from the machinery.</li> </ul>
Emergency Procedures	<ul style="list-style-type: none"> <li>The Contractor shall submit Method Statements covering the procedures and response plan for the main activities, which could generate emergency situations through accidents or neglect of responsibilities. These situations include, but are not limited to: <ul style="list-style-type: none"> <li>Accidental fires</li> <li>Accidental leaks and spillages</li> <li>Vehicle and plant accidents</li> <li>Blasting (if required)</li> </ul> </li> </ul>
Health and Safety	<ul style="list-style-type: none"> <li>The Contractor shall comply with all standard and legally required health and safety regulations as promulgated under the Occupational Health and Safety Act 2007 and associated regulations.</li> <li>The contractor must provide and maintain personal protective equipment and facilities to employees working with hazardous chemical substance.</li> <li>Official training in the correct fit, use, care, storage and limitations of all Personal Protective Clothing, Respiratory and Hearing Equipment must be given to the employees.</li> </ul>
Air pollution	<ul style="list-style-type: none"> <li>Un-surfaced roads and temporary roads must be regularly graded and watered to control dust.</li> <li>Active earth work areas, stockpiles and loads of soil being transported must be watered to reduce dust.</li> <li>Measure must be taken to immediately mitigate a situation in which excessive fugitive dust is observed. Works being undertaken must be undertaken with caution, or phase down while the source is being actively investigated and suppression measures are implemented.</li> </ul>

- All areas disturbed during closure of the site that are not required for a specific activity must be re-vegetated. Disturbed soils, slopes and areas of open excavation must be minimized to avoid wind erosion.
  - Diesel exhaust emissions from heavy machinery on site (excavators, front end loaders and hauling trucks) must be controlled and minimized by regular checks and servicing of vehicles. Any construction vehicle found to be emitting excessive smoke should be stopped from the operations for some mechanical attention before it could continue.
- Surface and ground water
- The Decommissioning of Dandora dumpsite must preferably take place during the dry months. If construction activities take place in the wet months appropriate measures must be taken to control storm water and implemented to prevent erosion.
  - Ensure that excavated and stockpiled soil material is stored and bermed on the higher lying areas.
  - Vegetation clearance must be kept to a minimum to reduce the risk of soil erosion.
  - Adequate provision must be made for sanitation for the construction workers. Septic tanks on site are to be emptied promptly when they fill up
  - Construction vehicles are to be maintained in good working order, to reduce the probability of leakage of fuels and lubricants. No servicing of vehicles is to be undertaken in close proximity to watercourses.

The full report of the proposed project is available for inspection during working hours at:

- (a) Director General, NEMA, Popo Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.
- (b) Permanent Secretary, Ministry of Environment and Mineral Resources, NHIF Building, Community, P.O. Box 30521, Nairobi.
- (c) Provincial Director of Environment, Nairobi Province.
- (d) District Environment Officer, Kasarani and Njiru.

The National Environment Management Authority invites members of the public to submit oral or written comments within thirty (30) days from the date of publication of this notice to the Director General, NEMA, to assist the Authority in the decision making process of the plan. (EIA/5/2/787)

### **IMPORTANT NOTICE TO SUBSCRIBERS TO THE KENYA GAZETTE**

THE following notes are for the guidance of persons submitting "copy" for inclusion in the *Kenya Gazette, Supplement*, etc.:

- (1) *The Kenya Gazette* contains Notices of a general nature which do not affect legislation. They are, therefore, submitted to the Government Printer directly.
- (2) *Legislative Supplement* contains Rules and Regulations which are issued by the Central Government. Because of this, they must be submitted to the Government Printer through the office of the Attorney-General.
- (3) *Bill Supplement* contains Bills which are for introduction in the National Assembly.
- (4) *Act Supplement* contains Acts passed by the National Assembly.

All "copy" submitted for publication should be prepared on one side of an A4 sheet no matter how small the Notice is, each page being numbered and should be typewritten with double spacing. Copy should be clear, legible and contain no alterations.

Particular attention should be paid to the following points:

- (i) Signature must be supported by rubber-stamping or typing the name of the signatory in capital letters.
- (ii) Dates must be correct and filled in where necessary.
- (iii) Care should be taken to ensure that all headings to Notices and references to legislation are up to date and conform with the Revised Edition of the Laws of Kenya.

EXTRACT FROM THE CODE OF REGULATIONS, SECTION D—

#### *Kenya Gazette*

"D 34. (1) Communications for the *Kenya Gazette* should reach the Government Printer not later than 9 a.m. on Friday of the week before publication is desired. The Government Printer will not publish communications received after that hour until the next subsequent issue of the Gazette.

(2) Ministries will be required to pay for the *Kenya Gazette* and to meet the cost of advertising in it.

It is emphasized that these notes are for guidance only, but it is requested that persons submitting copy for publication first satisfy themselves that such copy is complete in every respect.
