Investigations established that KPA followed the law in the procurement process and readily awarded this tender to the successful bidder. Investigations further established that one dissatisfied bidder unsuccessfully challenged the subject award both at the Public Procurement Administrative Review Board and the High Court of Kenya.

A report was compiled and forwarded to the DPP on 8th July, 2016 recommending that the inquiry file be closed with no further action for lack of culpable evidence.

Investigations established that the Executive, including the Governor, was not notified of the changes in the said estimates and there was no evidence that the Governor altered the said budget estimates in terms of Appropriation Bill, 2013 as alleged.

A report was compiled and forwarded to the DPP on 8th July, 2016 recommending that the file be closed with no further action.

On 27th September, 2016, the DPP accepted the recommendation that the file be closed with no further action.

Inquiry into Allegations of Misappropriation of a Government Grant of KSh. 700 Million initially Meant for Carrying out Feasibility Studies of the Standard Gauge Railway (Sgr) Project Between Mombasa-Nairobi-Malaba/Kisumu

EACC commenced investigations upon receipt of allegations that a sum of KSh. 700 million set aside for carrying out feasibility study for SGR Project had been misappropriated.

Investigations revealed that there was no misappropriation of funds. That part of that money, in the sum of KSh. 4,257,948, was spent for advertisement for international tenders, bidders' conference and evaluation. This is before the Government of Kenya and that of the People's Republic of China entered into a Memorandum of Understanding, whereby the latter government offered to carry out the feasibility study ex gratia, through one of its state companies.

Investigations further established that part of the allocated money, KSh. 415,958,560.80, was used to pay off claims submitted by the Concessionaire in respect of damage caused to the railway line as per the concession agreement; that Kenya Railways Corporation holds the balance of KSh. 279,875,283.65 in its pool account.

**THE ENVIRONMENTAL MANAGEMENT AND
CO-ORDINATION ACT**
(No. 8 of 1999)

**THE NATIONAL ENVIRONMENT MANAGEMENT
AUTHORITY**

**ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT
FOR THE PROPOSED KAPTEL TEA FACTORY ON L.R. NO.
NANDI/KAPTEL 809, TIRIH VILLAGE, KAPTEL SUB-
LOCATION, KAPTEL LOCATION, NANDI COUNTY**

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has

received an Environmental Impact Assessment Study Report for the above proposed project.

The proponent (DL Group of Companies) is proposing to construct a modern tea factory on a section of L.R. No. Nandi/Kaptel Block 809 situated at Tiriin Village, Kaptel Sub-location, Kaptel Location, Nandi County. The proposed project will entail construction of a single line CTC factory with a provision for future expansion, administration block, parking area, weighbridge, installation of above ground fuel tanks, overhead water tanks and other associated civil works (such as access roads, waste and storm water drains, and water reticulation drainages).

The following are the anticipated impacts and proposed mitigation measures:

<i>Impact</i>	<i>Mitigation Measures</i>
Soil and geology disturbance	<ul style="list-style-type: none"> The minimum area required for construction shall be cleared of vegetation. Top soil shall not be disturbed more than it is absolutely necessary but not below the first impermeable layer. A minimum amount of storm water will be allowed to flow on the site and control measures like paving and banding to avoid storm water damage. Denuded areas shall be landscaped and vegetation re-planted as soon as feasible after construction.
Loss of vegetation cover	<ul style="list-style-type: none"> Re-vegetation to control potential soil loss. Prevention of soil contamination through oil spills/leaks from construction machinery. Landscape area with similar vegetations. Preservation of excavated top-soil for future site restoration procedures particularly in highly disturbed areas. Limiting vehicular transport to defined roads as to prevent unnecessary injury to vegetation and habitat destruction. Implementing good housekeeping practices on site and implementing a Solid Waste Management plan in order to eliminate any source of hazard to the native fauna. Ensure proper demarcation and delineation of the project area to be affected by construction works. Utilize appropriately clearing techniques (e.g. hand clearing as opposed to mechanized clearing) by using human labour as opposed to heavy machinery. Minimize clearing and distribution to riparian vegetation.
Biodiversity loss	<ul style="list-style-type: none"> Generally, the following should be considered during construction. Design with a view to incorporating nature conservation into the development including appropriate friendly boundary fencing. Retain existing habitats where possible and aim to keep natural site features in context rather than in isolated fragments. Pay attention to field

boundaries and hedgerows and preserve wildlife corridors and habitat links. Consider integrating ecological features, for example climbing plants and bird nest boxes, within any buildings or structures.

- Routine checking of trenches (if any) and escape routes to minimize, if not prevent, entrapment of fauna.
- Reporting of any violation relating to hunting and trading activities.
- Minimizing the removal off-site of any soils containing invasive species.
- Compliance with the ecological requirements of the project and any other legal requirements with regard to waste management, environmental pollution, discharge to waters among others.
- Replacement of lost habitat throughout the site or in other areas, where possible.
- Ensure that landscape design reflects local ecology and uses locally sourced plants wherever possible. Native trees and shrubs should be used for landscaping where practical.

Soil erosion

- Any construction materials should be screened or covered to prevent off-site movement and the surplus materials should be removed from the site to an approved disposal site.
- Striping of vegetation should be limited to areas where civil works will be undertaken.
- Beaming of the open trenches should be undertaken to prevent them from being washed away by runoff.
- Sensitization of workers on environmental protection.
- Soils excavated from the tower pad area shall be used for backfilling.
- Soils shall not be left exposed to wind /water for long.

Noise pollution and vibration

- The contractor to inform neighbours two weeks prior to the commencement of construction activities for early preparedness.
- Construction activities shall only be undertaken during daytime.
- To obtain approvals where night works are to be done from relevant authority.
- The contractor should use modern equipments which produces the least noise. The use of noise shielding screens should be used and the operation of such machinery restricted to when it is actually required.
- Construction activities must abide by the national Noise regulations gazetted by NEMA.
- The contractor will endeavor to comply with the noise control regulations of 2006.
- Only serviceable machinery and equipments shall be used.
- Employees using equipments shall be provided with ear muffs.

	<ul style="list-style-type: none"> • Noise reduction /hearing protection devices when working with noisy equipment. • Use serviceable equipment with low noise emission. • Instruct truck and machinery operators to avoid raving of engines. 		<ul style="list-style-type: none"> • Control speed of construction vehicles. • Prohibit idling of vehicles.
Solid waste management	<ul style="list-style-type: none"> • Clearing of bushes/vegetation, excavation and cutting should be restricted within the project area. • All solid wastes should be collected at central location for temporary storage until removal to an appropriate disposal site. • Waste generated at the site should be sorted by the contractor and disposed of in a suitable manner into different waste streams. • As provided for by the Building Code, a temporary latrine will be provided on site to be used by construction workers. • Receptacles will be provided for waste storage prior to collection. • Resource recovery will be encouraged once the project takes off so as to shrink waste stream and recover non-recyclables. • Refuse collection vehicles will be covered to prevent scatter of wastes by wind. • Wastes will be collected by a licensed operator to avoid illegal final dumping at unauthorized sites. 	Pollution of water resources	<ul style="list-style-type: none"> • Regular maintenance of plant and equipment. • Provision of dust masks for use while working – in dusty conditions. • Use of serviceable vehicles and machinery to avoid excessive smoke emission. • Reduce wastewater production. • Recycle the wastewater (where practical). • Reuse the wastewater (generally after treatment) for a beneficial purpose (either onsite or on a neighbouring property) such as dust suppression. • Treat and discharge safely. • Treat and discharge wastewater to soakage or lined evaporation pit (where practical) Treat and discharge to drains or watercourses, meeting values. • Obtain a water abstraction permit from WRMA and implement mandatory seasonal water use limitations in liaison with WRMA. • Rain water harvesting.
Occupational health and safety	<ul style="list-style-type: none"> • Comply with relevant legislations during construction. • Develop and implement measures to minimize risks and injuries to the public during construction phase. • The contractor must provide and maintain personal protective equipment and facilities to employees engaged in construction activities. • The contractor shall provide a standard First Aid kit at the site office, just in case minor injuries. • All workers will be sensitized before construction begins, on how to control accidents related to construction. • Accordingly, adherence to safety procedures will be enforced. • All workers to wear protective gear (PPEs) during construction. • Undertake Job Risk Assessment Review at each task. • Carry out Tool Box Meetings daily; and • Construction work will be limited to daytime only. 	Energy management and conservation	<ul style="list-style-type: none"> • Install of interceptors to pre-treat effluents. • Secure effluent water license from NEMA. • Collection and treatment of contaminated runoff before discharge. • Constant review of the design to ensure that capacity is maintained and where necessary corrective measures are undertaken to address the dynamics; Implementation of an effluent program with the objective of monitoring of ground water and surface run off quality though a scheduled and regular sampling and analysis program using NEMA accredited laboratories. • Enough trees planted for provision of fuel wood. • Local farmers encouraged to plant trees for sale to the factory. • Switching off non operational machines/equipment and lights and using optimum lighting intensity for security and safety purposes.
Air pollution	<ul style="list-style-type: none"> • Appropriate mitigation measures to be implemented - such as wetting down, as well as the erection of shade netting screens, to prevent off-site movement of dusts may be required. • All areas disturbed during the construction of the factory must be re-vegetated. • Sensitization of workers on environmental protection and safety. 		<ul style="list-style-type: none"> • Routine maintenance of equipment and machines to ensure optimum operations and fuel efficiency. Adopting the use of energy saving lights and machines. • Creation of awareness among users. • Operational efficiency. • Development of key performance indicators.

FOR THE PROPOSED WEST KENYA SUGAR COMPANY LTD,
ON PLOT L. R. NO. 5740 / 15 & 5740 / 17 AT NAITIRI, AT
LUNGAI VILLAGE, ALONG SIKHENDU – NAITIRI ROAD IN
BUNGOMA COUNTY**

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The proponent, West Kenya Sugar Company Limited is proposing to expand its operations by putting up a 2500 TCD (Ton Sugar Cane crushed per day) sugar factory for the purposes of processing sugar cane and producing milled sugar and other related by-products on Plot L.R Nos. 5740/15 and 5740/17 in Lungai Village at Naitiri, Tongaren Sub-county in Bungoma County. The expected production capacity for the proposed sugar factory will be around 78,000 tons of brown and mill white sugar, molasses and bagasse by-product. The project will comprise of the cane yard section, mill house, process house, boiler house, spray pond, bagasse holding facility, distillery, bagasse co-production, water treatment facility, parking and administration section, workshop and firefighting section.

The following are the anticipated impacts and proposed mitigation measures:

Impacts

Mitigation Measures

Site disturbance

- Avoiding the disturbance of areas not within the site for the WESKCOL sugar factory.
- Designing and implementing an appropriate landscaping programme to help in vegetating a good part of the area in WESKCOL sugar factory.
- Using of appropriate methods for intercepting and slowing water runoff within the construction site.

Dust and gaseous emissions

- Exposed soils and other erodible materials should be re-vegetated or covered promptly in order to minimize dust emissions. New areas should be cleared and opened-up only when absolutely necessary. Any bare surfaces should be re-vegetated otherwise rendered non-dust forming when inactive.

Noise and vibration

- Loading, transfer and discharge of construction materials should take place with minimum height of fall and be shielded against the wind and consider the use of dust suppression spray systems.
- There will be no open burning of construction and/or waste materials at the site.
- There will be no excessive idling of construction vehicles in the sites
- Construction vehicles and other equipment shall be properly serviced
- Ensuring that noise levels at the nearest sensitive receptor should meet them EMCA (Noise and vibration Control Regulations, 2009)
- There will be no unnecessary hooting by construction vehicles at the construction site.
- Where it is necessary noise emissions should be controlled and minimized through the application of appropriate measures which may include:
 - Implementation of enclosure and cladding of noisy sections,
 - Installation of proper sound barriers and/or noise containments, with enclosures or curtains at the equipment e.g. crushers, graders and screens

Solid waste

- Use of an integrated solid waste management system through a hierarchy of the following options: a) source reduction, b) material recycling, c) composting and reuse, d) combustion and e) sanitary land filling.
- Dispose waste more responsibly by dumping at designated dumping sites or landfills only.
- Use building materials that have minimal or no packaging to avoid the generation of excessive packaging waste.
- Provide waste collection bins at designated points within the processing plant.
- Engage NEMA registered waste disposal company for transportation and disposal of solid waste from site.

Influx of construction workers

- WESKCOL in partnership with the local administration and religious institutions will undertake a skills audit could be undertaken and a register compiled of persons who have skills that could be used by the project.
- The WESKCOL recruitment policy should be well communicated to the general public in advance.

Health and safety

- All personnel should be trained on health and safety procedures and how to respond in case of accidents. All construction workers in the WESKCOL sugar factory should be trained on how to handle unexpected events such as accidents, fires or explosions, chemical spills, floods, power failures and earthquakes. To adequately prepare for an emergency, all personnel should plan, train, and practice emergency responses. Staff should also be encouraged to prepare for emergencies inside their workplace. As a standard

procedure on health and safety, appropriate guidelines and signage shall be put up in prominent places for the attention of all workers.

- All personnel should be trained to use of fire extinguishers. The types of fire extinguishers should be supplied based on the types of combustible and flammable materials in the processing plant.
 - Preparation of emergency response plans specifically applicable to exploration and production activities (considering the geographically isolated nature of mining sites) and including the provision and maintenance of necessary emergency response and rescue equipment.
 - Encourage the use of preventive measures like condoms.
 - Avail condom dispensers to the staff and workers.
 - Strengthen advocacy through awareness training in HIV/AIDS and other STDs.
 - Provide counseling and testing for HIV/AIDS to all the employees.
 - WESKCOL will ensure that appropriate washing and screening of all incoming construction machineries originating from other locations in order to avoid the transfer of dangerous invasive species through soil and biological material attachments on construction equipment.
 - Wherever possible, containment of water collected from areas with potential contaminants will be ensured. Such waste water should be reused.
 - Oil interceptors and sediment traps should be installed and maintained to ensure any discharge to the environment carries a low sediment load.
 - Storm water management canals and dams should be maintained and kept clean in order to ensure that the capacity of such systems is not compromised during the life of the operations.
 - Sensitization of the clients who buy molasses of the environmental effects of the product so as to prevent spillage of the same.
 - Sensitization of farmers to protect wetlands and other fragile ecosystems including riparian buffer zones as natural filters of farm-based nutrient leakage into streams and rivers.
- HIV/AIDS transmission and other social ills
- Invasive species
- Waste water
- Loss of valued ecosystems

The full report of the proposed project is available for inspection during working hours at:

- (a) Director-General, NEMA, Popo Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.
- (b) Principal Secretary, Ministry of Environment and Natural Resources, N.H.I.F. Building, Community, P.O. Box 30126-00100, Nairobi.
- (c) County Director of Environment, Bungoma County.
