THE WATER ACT

(No. 43 of 2016)

COAST WATER SERVICES BOARD

APPROVED TARIFF STRUCTURE FOR THE PERIOD 2017/18 TO 2019/20

The Coast Water Services Board applied to the Water Services Regulatory Board (WASREB) for a review of tariffs for the Coast Water Bulk Supply, for the period 2017/18 to 2019/20 as per section 72 (1) b of the Water Act 2016.

A public consultation meeting on the application was held on 12th May, 2017 at the Kenya School of Government, and a report submitted to WASREB in accordance to the requirements of section 139 of the Water Act, 2016. In response to a call for comments published on 26th May, 2017 by WASREB, and with a closing date of 28th June, 2017, no submissions were received on the application.

After considering the application, the written and oral submissions by all stakeholders during the consultation period, and based on latest available data, WASREB has determined a downward tariff review for the Coast water Bulk Supply is justified in order to improve service delivery at both the Bulk supply and the utilities in the coast region, operate sustainably and protect consumer interests by meeting the tariff conditions outlined below.

WASREB gives a one (1) month's notice to all existing and potential customers of Coast water Bulk Supply that the approved tariffs for the three financial years, 2017/18, 2018/19 and 2019/20 shall be as follows:

1.0 Water Tariff Structure for the period 2017/18, 2018/19 and 2019/20

FOR THE PROPOSED PYROLYSIS PLANT PROJECT ON PLOT
L.R. NO. MARIAKANI/KAWALA B/30 AREA ALONG

IN KILIFI COUNTY

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The proponent, Sunraj Tech (K) Limited, is proposing to install a pyrolysis plant on a vacant plot located in an industrial zoned area. The proposed site is secured within a perimeter wall and has access to other bulk infrastructure including water and electricity supply. The project main components include a shed to house the tyre pyrolysis machine, waste tyre storage shed, parking area, an office block of ground floor level, soak pit and septic for disposal of sewage. The site neighbors have undeveloped parcels of lands and a few establishments involving themselves in storage and transportation of cargos such as coal and clinker

The following are the anticipated impacts and proposed mitigation measures:

<i>Impacts</i>	<i>Proposed Mitigation Measures</i>
Ecosystem disturbance	<ul style="list-style-type: none"> Ensure proper demarcation and delineation of the project area to be

	affected by construction works.		fixtures, marbles and glass will be recovered for refurbishing and use in other projects.
	<ul style="list-style-type: none"> Specify locations for trailers and equipment, and areas of the site which should be kept free of traffic equipment, and storage. Designate access routes and parking within the site. Design and implement an appropriate landscaping programme to help in re-vegetation of part of the project area after construction. 		<ul style="list-style-type: none"> Use of durable, long-lasting materials that will not need to be replaced as often, thereby reducing the amount of construction waste generated over time. Provide facilities for proper handling and storage of construction materials to reduce the amount of waste caused by damage or exposure to the elements. Use building materials that have minimal or no packaging to avoid the generation of excessive packaging waste. Reuse packaging materials such as cartons, cement bags, empty metal and plastic containers to reduce waste at the site. Dispose waste more responsibly by dumping at designated dumping sites or landfills only; the use of a registered waste disposal company is encouraged. Adherence Waste Management Regulations, 2006.
Increased exploitation of raw materials	<ul style="list-style-type: none"> Source building materials from suppliers who use environmentally friendly processes in their operations. Ensure accurate budgeting and estimation of actual construction materials requirements to ensure that the least amount of material necessary is ordered. Ensure that damage or loss of materials at the construction site is kept minimal through proper storage. Use at least 5% - 10% recycled refurbished or salvaged materials to reduce the use of raw materials and divert material from landfills. 	Depletion of energy resources	<ul style="list-style-type: none"> Ensure electrical equipment, appliances and lights are switched off when not being used. Install energy saving fluorescent tubes at all lighting points instead of bulbs which consume higher electric energy. Ensure planning of transportation of materials to ensure that fossil fuels (diesel, petrol) are not consumed in excessive amounts. Monitor energy use during construction and set targets for reduction of energy use. Promptly detect and repair of water pipe and tank leaks Ensure taps are not running when not in use. Promote recycling and reuse of water as much as possible Install a discharge meter at water outlets to determine and monitor total water usage.
Run off and soil erosion	<ul style="list-style-type: none"> Create storm water management practices, such as piping systems or retention ponds or tanks, which can be carried over after the building is complete. Apply soil erosion control measures such as leveling of the project site to reduce run-off velocity and increase infiltration of storm water into the soil. Ensure that construction vehicles are restricted to existing graded roads to avoid soil compaction within the project site. 		
Noise pollution	<ul style="list-style-type: none"> Sensitize construction vehicle drivers and machinery operators to switch off engines of vehicles or machinery not being used. Sensitize construction drivers to avoid gunning of vehicle engines or hooting especially when passing through sensitive areas such as schools, residential areas and hospitals. Ensure that construction machinery are kept in good condition to reduce noise generation. Ensure that all generators and heavy duty equipment are insulated or placed in enclosures to minimize ambient noise levels. Adherence to Noise And Excessive Vibration Pollution (Control) Regulations, 2009. 	Effluent emissions	<ul style="list-style-type: none"> Provide means for handling sewage generated by construction workers. Conduct regular checks for sewage pipe blockages or damages since such vices can lead to release of the effluent into the land and water bodies. Monitor effluent quality regularly to ensure that the stipulated discharge rules and standards are not violated.
		Occupational health and safety	<ul style="list-style-type: none"> Suitable, efficient, clean, well-lit and adequate sanitary conveniences should be provided for construction workers. Arrangements must be in place for the medical examination of all construction employees before, during and after termination of employment. Ensure that machinery, equipment, personal protective equipment, appliances and hand tools used in construction do comply with the prescribed safety and health standards and be appropriately installed maintained and safeguarded. Ensure that equipment and work tasks are adapted to fit workers and their ability including protection against mental strain.
Solid waste generation	<ul style="list-style-type: none"> Through accurate estimation of the sizes and quantities of materials required, order materials in the sizes and quantities they will be needed, rather than cutting them to size, or having large quantities of residual materials. Ensure that construction materials left over at the end of construction will be used in other projects rather than being disposed off. Ensure that damaged or wasted construction materials including cabinets, doors, plumbing and lighting 		

- All machines and other moving parts of equipment must be enclosed or guarded to protect all workers from injury.
- Ensure that the most current emergency telephone numbers posters are prominently and strategically displayed within the construction site. Provide measures to deal with emergencies and accidents including adequate first aid arrangements.
- Arrangements must be in place to train and supervise inexperienced workers regarding construction machinery use and other procedures/operations. Equipment such as fire extinguishers must be examined by a government authorized person.
- The equipment may only be used if a certificate of examination has been issued.
- Reports of such examinations must be presented in prescribed forms, signed by the examiner and attached to the general register.
- Comply with the provisions of OSHA 2007.

The full report of the proposed project is available for inspection during working hours at:
