(No. 8 of 1999)

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY
ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT
FOR THE PROPOSED HOTEL DEVELOPMENT ON L.R. NO.
LTK/KIMANA/TIKONDO/4642, AMBOSELI

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) Regulations, the National Environment Management Authority, (NEMA) has received an environmental impact assessment study report for the implementation of the proposed hotel development.

The proposed development entails construction of a hotel with complimentary facilities within the site development. The proposed development will comprise of a hotel with lodges to serve visitors to Amboseli, a school, a hospital and a chapel to serve the local population.

The proposed development is located on L.R. No. LTK/Kimana/Tikondo/4642 after securing the land in May, 2010 within the Tsavo-Amboseli ecosystem.

The following are the anticipated impacts and proposed mitigation measures

<i>Environmental/social Impact</i>	<i>Proposed Mitigation Measures</i>
Air pollution	<ul style="list-style-type: none"> Control speed and operation of construction vehicles. Prohibit idling of vehicles. Spray water on excavated areas. Maintenance of construction plant and equipment. Sensitize construction workers. All bare areas should be landscaped after construction. Workers should be provided with dust masks if working in sensitive areas.
Noise pollution	<ul style="list-style-type: none"> Maintain plant equipment. Construction should be carried out only during day time. Workers to wear ear muffs if working in noisy section. A silencer to be installed on machinery as is necessary. Shield the site and avoid/reduce the use of very noisy equipment. Acquire the noise and excessive vibrations permit from NEMA.
Ecological considerations (flora and fauna)	<ul style="list-style-type: none"> During the decommissioning stage the proponent shall rehabilitate land by removing any unnecessary materials that shall be covering the land and preventing biodiversity. After completion of the project the proponent shall rehabilitate land by planting trees and ornamental flowers on the disturbed areas. Project construction will disturb as little area as possible in order to minimize potential impacts to biodiversity. There are also scattered trees within the proposed plot to be cut although a selective strategy will be applied in that those not interfering with the construction layout plans will be left intact. Also after the construction phase landscaping will be done. Vegetation that does not interfere with the sitting of the project will be left intact.

<i>Environmental/social Impact</i>	<i>Proposed Mitigation Measures</i>
First aid	<ul style="list-style-type: none"> A well stocked first aid kit shall be maintained during construction and occupational phases. Presence of a certified nurse.
Soil erosion and compaction	<ul style="list-style-type: none"> Provide soils conservation structures on the areas prone to soil erosion to reduce impact of run off. All bare areas should be well landscaped after completion. The proponent at the decommissioning phase will rehabilitate the land by loosening the soil. The contractor will always use a pre-determined route to the site. Unnecessary heavy machines will be avoided. Use of cheap tools like jembes, forks and shovels will be encouraged to do the ground breaking. Operations will be timed to take place during the dry season when the soils are dry to reduce the risk of soil compaction. Avoid unnecessary movement of soil materials from the sit. Provide soil conservation structures on the areas prone to soil erosion mostly to reduce impact by the run-off. Control construction activities especially during rainy conditions. Re-surface surface areas after completion of the project and introduce appropriate vegetation. Provide suitable storm water drainage channels to effectively discharge water to safe areas. Channels need to be regularly maintained and repaired to avoid point discharge incase of breakages or blockages. Conduct landscaping after the project completion to maximally control any possible chance of soil movement.
Solid waste	<ul style="list-style-type: none"> Construction debris should be collected by a privately contracted waste collection company or by the Olkejuado County Council. Debris resulting from demolition process should be disposed off appropriately. Excavation waste should be re-used or back filled. Domestic waste should be collected by a privately contracted waste collection company or by the council. Proponent should ensure the construction of a central waste collection point with bulk storage facilities. The site should have waste receptacles at convenient points to prevent littering during occupation. During operation phase the proponent should ensure waste is collected and disposed appropriately.
Effluent disposal	<ul style="list-style-type: none"> Within the proposed site there is no sewer line to serve the project area and thus the development will be connected to septic tanks. Proper connection to the system.
<i>Environmental/social Impact</i>	<i>Proposed Mitigation Measures</i>
	<ul style="list-style-type: none"> Prompt maintenance of the system.

Waste water (run-off)	<ul style="list-style-type: none"> • Cleanliness of the system. • Provision of reliable water supply. • Construction of well maintained drains to effectively manage surface run off. • Presence of well maintained sanitary facilities for the workers and visitors to the site. • During construction, the design of the drainage system should ensure that surface flow is drained suitably into the public drains provided to control flooding within the site. • Drainage channels should be installed in all areas that generate or receive surface water such as car parking, drive ways and along the building block-edges of the roofs. • Channels should be covered by approved materials to prevent occurrence of accidents and entry of dirt that would compromise flow of run off. • Drainage channels should ensure safe disposal of runoff/surface water and should be self cleaning. • Paving of the sidewalks, driveways and other open area should be done using pervious materials to encourage recharge and thus reducing water runoff volume. • The proponent should ensure that regular checks for the sewer line are done to avoid blockages or damages of pipes.
Oil leaks and spills	<ul style="list-style-type: none"> • Machinery should be well maintained to prevent oil leaks on the ground. • Contractor should have a designated area where maintenance is carried out and that is protected from rain water that would carry the oil to the river. • All oil products should be stored in a site store and handled carefully.
Fire preparedness	<ul style="list-style-type: none"> • Fire fighting drills carried out regularly. • Fire fighting emergency response plan. • Ensure fire-fighting equipment are in place and regularly maintained, serviced and inspected. • Train workers on fire fighting skills. • Fire hazard signs and directions to emergency exit, route to follow and assembly point in case of any fire incidence.
Effect on human health	<ul style="list-style-type: none"> • Unused areas on the project site shall be kept free from bushes to prevent mosquito breeding grounds and hiding areas for vermin.
Traffic density	<ul style="list-style-type: none"> • Proper signage out in place to notify neighbours of the activity and presence of heavy vehicles and to direct traffic. • Presence of boards directing patrons to the site. • Enforce speed limits for vehicles entering and exiting the site. • Provide billboards to notify motorists of the development.
Occupational health and safety	<ul style="list-style-type: none"> • All workers should be provided with full protective gear. These include working boots, overalls, helmets, goggles, earmuffs, masks and gloves.
Environmental/social Impact	<p><i>Proposed Mitigation Measures</i></p> <ul style="list-style-type: none"> • Construction crew at the site will be sensitized on social issues such as drugs,

alcohol diseases.

- A first aid kit should be provided within the site. This should be fully equipped at all times and should be managed by qualified person.
- The contractor should have workmen's compensation cover. It should comply with the workmen's compensation act, as well as ordinances, regulations and union agreements.
- Adequate sanitary facilities should be provided and standard cleanliness maintained.
- Food handlers preparing food the workers at the site should be controlled and monitored to ensure that food is hygienically prepared.
- Regular maintenance of machinery on site and provision of the factories and other places of work Act Cap. 514.
- Provide security guards and facilities during construction and operational phases.
- Control of secondary businesses.
- Adequate lighting and an alarm system installed at strategic points.

THE ENVIRONMENTAL MANAGEMENT AND CO-ORDINATION ACT

(No. 8 of 1999)

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED REHABILITATION OF NGETHU-GIGIRI TRANSMISSION MAINS

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) Regulations, the National Environment Management Authority, (NEMA) has received an environmental impact assessment study report for the implementation of the proposed rehabilitation of Ngethu-Gigiri transmission.

Kwa Maiko – Gigiri Pipeline is proposed to boost the transmission capacity of the Ngethu – Gigiri mains to 440,000 m³/d. It is proposed to be a DN 800 and 900 PN 25 steel pipelines.

The construction will be as follows:

- 11.13 km of DN 800 pipeline from Kwa Maiko to Kiambu and;
- 6.1 Km of DN 900 pipeline from Kiambu to Gigiri.

The works will also involve rehabilitation and repair of the existing 3 No. pipeline from Ngethu - Gigiri, a distance of 36.4 km. The repair will consist of replacing/rebuilding broken chambers and missing air valves and reinstating eroded pipelines way leaves.

The following are the anticipated impacts and proposed mitigation measures.

<i>Possible Impacts</i>	<i>Mitigation Measures</i>
Interference with the physical setting	<ul style="list-style-type: none"> The design shall in no way propose to implement developments that shall hinder drainage, change the topography or introduce physical changes that are not in harmony with the physical setting of the Project area. The structures to be developed shall be aesthetically acceptable to blend in with the surrounding. These structures shall not form or end up being used by the resident population as access, bridges or for informal settlement or business. However the design could provide for limited use by pedestrians and non-motorized transport.
Interruption of existing installations	<ul style="list-style-type: none"> The following shall be done for all crossings of installations. Formal request for permission to cross, break in and built the water pipeline should be sort from all relevant. Ministries concerned and all other institutions affected. Formal engagement of key land and other property owners neighbouring the pipeline. Passing of relevant information to each of the affected parties. A work plan with clear responsibilities for each party shall be developed to ensure smooth execution of the construction; and On completion of works, a Certificate of Satisfactory. Works Completion shall be issued to the Proponent.
Resettlement and land take	<ul style="list-style-type: none"> A compensation strategy and resettlement shall be developed to enhance good relationship with the affected land owners. Involuntary acquisition shall mainly be used to acquire the land for the additional wayleave and for the land that shall be used to construct the Contractor's and Engineers Offices and for the accommodation of the construction workers, stores, workshop and kitchen among others. The use of Provincial Administration and elders where feasible shall be pursued and proper and legally binding land transfers shall be sort by the Proponent. It is recommended that a thorough public-proponent engagement be natured from the design / planning stage.
Noise generation and vibration	<ul style="list-style-type: none"> The following noise-suppression techniques shall be employed to minimise the impact of temporary construction noise at the Project site. Install portable barriers to shield compressors and other small stationary equipment where necessary.
<i>Possible Impacts</i>	<i>Mitigation Measures</i>
	<ul style="list-style-type: none"> Use of quiet equipment (i.e. equipment designed with noise control elements). Limit pickup trucks and other small equipment to a minimum idling time and

	<p>observe a common-sense approach to vehicle use, and encourage workers to shut off vehicle engines whenever possible.</p> <ul style="list-style-type: none"> Provision of appropriate personnel protective equipment; and Construct mainly during the day.
Dust emissions and air quality	<p>Dust emissions shall be controlled by the following measures:</p> <ul style="list-style-type: none"> Wetting all active construction areas as and when necessary to lay dust. Appropriately cover all trucks hauling soil, sand and other loose materials or require all trucks to maintain at least two feet of freeboard. Pave, apply water when necessary, or apply (non-toxic) soil stabilizers on all unpaved access roads, parking areas and staging areas at construction sites. Sweep when necessary (with physical sweepers) all paved access roads, parking areas and staging areas at construction sites.
Disposal of excavated soil	<ul style="list-style-type: none"> The excavated soil shall not be disposed off from the wayleave. Instead it is recommended that excavated soil be used to cover the laid pipeline and re-spread in areas to be landscaped to enhance aesthetics along the wayleave area to be acquired.
Workers accidents and hazards during construction	<ul style="list-style-type: none"> The Proponent shall develop and commit the Contractors to Site Occupational Health and Safety rules and regulations as stipulated in the Occupational Safety and Health Act, 2007. Workers accidents especially in deep trenching operations shall be mitigated by enforcing adherence to safety procedures and preparing contingency plan for accident response. In addition, safety education and training shall be emphasized.
Extraction and use of construction materials	<ul style="list-style-type: none"> The Contractor shall source construction materials such as sand and hard core from registered and approved quarry and sand mining firms whose projects have undergone satisfactory environmental impact assessment/audit and received NEMA approval. To reduce the negative impacts on availability and sustainability of the materials, the Contractor shall only order for what shall be required through accurate budgeting and estimation of actual construction requirements.
Solid waste generation	<ul style="list-style-type: none"> The construction waste be recycled or reused as much as possible to ensure that materials that would otherwise be disposed of as waste are diverted for productive uses. The Proponent shall put in place measures to ensure that construction materials requirements are carefully budgeted and to ensure that the amount of construction materials left on site after construction is kept minimal.
<i>Possible Impacts</i>	<i>Mitigation Measures</i>
	<ul style="list-style-type: none"> Use of durable, long-lasting materials that shall not need to be replaced often, thereby reducing the amount of construction waste generated over time.

- Soil erosion
- Minimizing the number of motorized vehicles on use.
 - Rehabilitate disturbed areas.
 - Provide scour checks on steep slopes or when working in loose soils.
 - Manage erosion agents including water by channelling it into predetermined areas.
 - Use predetermined tracks; and
 - Avoiding machinery working in seasonally marshy areas, pans and floodplains.
- Increased domestic wastewater generation
- The Proponent shall invest in public sewer systems at a rate that can cope with the water supplied into the project area.
 - The Proponent shall provide for long term plans to invest in a public sewerage system in the Project area.
- Vandalism of valves along the pipeline
- The Proponent through the relevant water Companies shall employ staff who shall scout the pipeline and ensure that the valves are not stolen.
 - Measures shall be taken to include materials that are not susceptible to theft.
 - The community shall also be educated not to tamper with the valves as tampering with the valves interfere with the system and also leads to wastage of water that would have been used by the community.

The full report of the proposed project is available for inspection during working hours at:

- (a) Director-General, the National Environment Management Authority (NEMA), Kapiti Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.

- (c) Provincial Director of Environment, Nairobi Province.
- (d) Provincial Director of Environment, Central Province.

The National Environment Management Authority invites members of the public to submit oral or written comments within thirty (30) days from the date of publication of this notice to the Director-General, NEMA, to assist the Authority in the approval process of the project.

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED LIQUEFIELD PETROLEUM (LPG) STORAGE AND FILLING PLANT ON PLOT L.R. 9042/190, EMBAKASI AREA, NAIROBI

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) Regulations, the National Environment Management Authority, (NEMA) has received an environmental impact assessment study report for the implementation of the proposed LPG storage and filling plant.

The proposed project involves the installation of 2No. storage tanks, a fully automated filling plant, weighbridge, loading and offloading area, office block and fire fighting system.

The area is situated off Airport North Road, Embakasi Area, Nairobi. The site is on L.R. 9042/190.

The following are the anticipated impacts and proposed mitigation measures.

Possible Impacts

Mitigation Measures

IMPORTANT NOTICE TO SUBSCRIBERS TO THE KENYA GAZETTE

THE following notes are for the guidance of persons submitting "copy" for inclusion in the *Kenya Gazette, Supplement*, etc.:

- (1) *The Kenya Gazette* contains Notices of a general nature which do not affect legislation. They are, therefore, submitted to the Government Printer directly.
- (2) *Legislative Supplement* contains Rules and Regulations which are issued by the Central Government. Because of this, they must be submitted to the Government Printer through the office of the Attorney-General.
- (3) *Bill Supplement* contains Bills which are for introduction in the National Assembly.
- (4) *Act Supplement* contains Acts passed by the National Assembly.

All "copy" submitted for publication should be prepared on one side of an A4 sheet no matter how small the Notice is, each page being numbered and should be typewritten with double spacing. Copy should be clear, legible and contain no alterations.

Particular attention should be paid to the following points:

- (i) Signature must be supported by rubber-stamping or typing the name of the signatory in capital letters.
- (ii) Dates must be correct and filled in where necessary.
- (iii) Care should be taken to ensure that all headings to Notices and references to legislation are up to date and conform with the Revised Edition of the Laws of Kenya.

EXTRACT FROM THE CODE OF REGULATIONS, SECTION D—

Kenya Gazette

"D 34. (1) Communications for the *Kenya Gazette* should reach the Government Printer not later than 9 a.m. on Friday of the week before publication is desired. The Government Printer will not publish communications received after that hour until the next subsequent issue of the Gazette.

(2) Ministries will be required to pay for the *Kenya Gazette* and to meet the cost of advertising in it.

It is emphasized that these notes are for guidance only, but it is requested that persons submitting copy for publication first satisfy themselves that such copy is complete in every respect.
