- Ensure accurate budgeting and estimation of actual construction material requirements.
- Ensure that damage or loss of materials at the construction site is kept minimal through proper storage.
- Use at least 5%-10% recycled, refurbished or salvaged materials.

Vegetation disturbance

- Ensure proper demarcation and delineation of the project area to be affected by construction works.
- Specify locations for trailers, cranes and equipment, and areas of the site which should be kept free of traffic, equipment, and storage.
- Designate access routes and parking within the site.
- Introduction of vegetation (trees, shrubs and grass) on open spaces and around the project site and their maintenance.
- Design and implement an appropriate landscaping programme to help in re-vegetation of part of the project area after construction.

Increased storm water, runoff and soil erosion

- Surface runoff and roof water shall be harvested and stored in underground reservoir tanks for reuse.
- A storm water management plan that minimizes impervious area infiltration by use of recharge areas and use of detention and/or retention with graduated outlet control structure will be designed.
- Apply soil erosion control measures such as leveling of the project site.
- Ensure that construction vehicles are restricted to existing graded roads to avoid soil compaction within the project site.
- Ensure that any compacted areas are ripped to reduce run-off.
- Site excavation works to be planned such that a section is completed and rehabilitated before another section begins.

- Sweep daily (with water sweepers) all paved access roads, parking areas and staging areas at construction sites.
- Down wash of trucks (especially tires) prior to departure from site.
- Post signs that limit vehicle speeds onto unpaved roads and over disturbed soils.
- Use of electrically operated construction machinery to avoid externalities produced by diesel engines.
- Personal Protective equipment to be worn by all staff members.
- Vehicle idling time shall be minimized.

Noise and vibration

- Sensitize truck drivers to avoid unnecessary racing of vehicle engines at loading/offloading points and parking areas, and to switch off or keep vehicle engines at these points.
- Sensitize construction vehicle drivers and machinery operators to switch off engines of vehicles or machinery not being used.
- Use quiet equipment (i.e. equipment designed with noise control elements such as mufflers).
- Sensitize construction drivers to avoid gunning of vehicle engines or hooting especially when passing through sensitive areas.
- Ensure that construction machinery are kept in good condition to reduce noise generation.
- Ensure that all generators and heavy duty equipment are insulated or placed in enclosures to minimize ambient noise levels.
- Trees to be planted around the site to provide some buffer against noise propagation.
- Prescribe noise reduction measures if appropriate e.g. restricted working hours and transport hours and noise buffering.

<i>Impacts</i>	<i>Proposed Mitigation Measures</i>
