GAZETTE NOTICE NO. 1358

PROBATE AND ADMINISTRATION

TAKE NOTICE that after thirty (30) days from the date of this Gazette, and unless cause be shown to the contrary, I intend to apply to the High Court at Embu for representation of the estates of the persons named in the second column of the schedule hereto, who died on the dates respectively set forth against their names.

And further take notice that all persons having any claims against or interests in the estates of the said deceased persons are required to prove such claims or interests before me within two (2) months from the date of this Gazette, after which date the claims and interests so proved will be paid and satisfied and the several estates distributed according to law.

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED KIKAMBALA 7.5 MVA 33/11KV SUBSTATION IN KILIFI DISTRICT

PURSUANT of regulation 21 of Environmental (Impact Assessment and Audit) regulations, the National Environmental Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the construction of the proposed Kikambala 7.5 MVA 33/11 KV substation.

The project will involve installations of Reactors, 7.5MVA Transformer, disconnect Switches, bushings, Surge Arresters, Standoff Insulators and Earthing Switches, Lightning Arresters, an open area for electrical equipment such as the air-cooled reactors, typically about 4.5 high, and switchgear, typically about 5m high. In addition it will include an auxiliary services building, fire deluge pump house and tank among others.

The proposed site on land parcel subdivision number 2112 Section III Mainland North at Kikambala in Kilifi District it is located on about 1 acre parcel of land. It is off Mombasa – Malindi road within Kikambala division approximately 20 km from Mombasa City Centre.

The following are the anticipated impacts and proposed mitigation measures:

Environmental issue Mitigation Measures

Demand of Raw • Source building materials from local

Material	<p>suppliers who use environmentally friendly processes in their operations.</p> <ul style="list-style-type: none"> • Ensure accurate budgeting and estimation of actual construction material requirements to ensure that the least amount of material necessary is ordered. • Ensure that damage or loss of materials at the construction site is kept minimal through proper storage. • Use at least 5% - 10% recycled refurbished or salvaged materials to reduce the use of raw materials and divert material from landfills. 	<p>required.</p> <ul style="list-style-type: none"> • Use of durable, long lasting material that will not need to be replaced as often, thereby reducing the amount of construction waste generated over time. • Provide facilities for proper handling and storage of construction materials to reduce the amount of waste caused by damage or exposure to the elements. • Use building materials that have minimal or no packaging to avoid the generation of excessive packaging waste.
Vegetation disturbance	<ul style="list-style-type: none"> • Ensure proper demarcation and delineation of the project area to be affected by construction works. • Specify locations for trailers and equipment, and areas of the site which should be kept free of traffic, equipment and storage. • Designate access routes and parking within the site. • Introduction of vegetation (trees, shrubs and grass) on open spaces and around the project site and their maintenance. • Design and implement an appropriate landscaping programme to help in re-vegetation of part of the project area after construction. 	<ul style="list-style-type: none"> • Reuse packaging materials such as cartons, cement bags, empty metal and plastic containers to reduce waste at site. • Dispose waste more responsibly by contracting a registered waste handler who will dispose the wastes at designated sites or landfills only. • Waste collection bins to be provided at designated points on site.
Increased storm water, runoff and soil erosion	<ul style="list-style-type: none"> • Surface runoff and roof water shall be harvested and stored in tanks so that it can be used for cleaning purposes. • A storm water management plan that minimizes impervious area infiltration by use of recharge areas and use of detention and/or retention with graduated outlet control structure will be designed. • Apply soil erosion control measures such as leveling of the project site to reduce run-off velocity and increase infiltration of storm water into the soil. • Ensure that construction vehicles are restricted to use existing graded roads. • Ensure that any compacted areas are ripped to reduce run-off. • Site excavation works to be planned such that a section is completed and rehabilitated before another section begins. • Interconnected open drains will be provided on site. • Roof catchments will be used to collect the storm water for some substation uses. • Construction of water storage tanks to collect storm water for substation uses. 	<p>Dust emission</p> <ul style="list-style-type: none"> • Ensure strict enforcement of on site speed limit regulations. • Avoid excavation works in extremely dry weathers. • Sprinkle water on graded access routes when necessary to reduce dust generation by construction vehicles. • Personal Protective equipment to be provided to employees and worn.
		<p>Exhaust emission</p> <ul style="list-style-type: none"> • Vehicle idling time shall be minimized • Alternatively fuelled construction equipment shall be used where feasibly equipment shall be properly maintained. • Sensitise truck drivers to avoid unnecessary running engines of stationary vehicles and to switch off engines whenever possible.
		<p>Noise and vibration</p> <ul style="list-style-type: none"> • Sensitise construction vehicle drivers and machinery operators to switch off engines of vehicles or machinery not being use. • Sensitise construction drivers to avoid running of vehicle engines or hooting. • Ensure that construction machinery are kept in good condition to reduce noise generation. • Ensure that all generators and heavy duty equipment are insulated or placed in enclosures (containers) to minimize ambient noise levels. • Trees to be planted around the site to provide some buffer against noise propagation.
Increased solid water generation	<ul style="list-style-type: none"> • Use of an integrated solid waster management system i.e. through a hierarchy of options: Reduction at source, Recycling, Reusing, Incineration, Sanitary land filling. • Through accurate estimation of the dimensions and quantities of materials 	<p>Increased energy consumption</p> <ul style="list-style-type: none"> • The noisy construction works will entirely be planned to be during the day time when most of the neighbours will be at work. • Ensure electrical equipment, appliances and lights are switched off when not being use. • Install energy saving bulbs/tubes at all

		lighting points instead of incandescent bulbs which consume higher electric energy.
		<ul style="list-style-type: none"> • Plan well for transportation of materials to ensure that fossil fuels (diesel, transformer oil, petrol) are not consumed in excessive amounts. • Monitor energy use during construction and set targets for reduction of energy use.
Increased Demand	Water	<ul style="list-style-type: none"> • Water to be brought in from the City Water and Sewerage Company. • Harness rainwater for office & gardening. • Install water conserving taps that turn-off automatically when water is not being used. • Promote recycling and reuse of water as much as possible. • Install a discharge meter at water outlets to determine and monitor total water usage. • Promptly detect and repair of water pipe and tank leaks. • Sensitise construction workers to conserve water by avoiding unnecessary toilet flushing etc. • Ensure taps are not running when not in use.
Generation of waste water		<ul style="list-style-type: none"> • Provide means for handling sewage generated at the construction site. • Conduct regular checks for sewage pipe blockages or damages since such vices can lead to release of the effluent into the land and water bodies. • Monitor effluent quality regularly to ensure that the stipulated discharge rules and standards are not violated.
Statutory Requirements		<ul style="list-style-type: none"> • Ensure compliance with The OSHA (Building Operations and Works of Engineering Construction Rules), L.N. 40 of 1984.
Worksite Safety and Health Hazards to employees		<ul style="list-style-type: none"> • Ensure compliance with the Occupational Safety and Health Act (OSHA) 2007 provisions e.g. employees to be provided with appropriate PPE.
Oil spills Hazards		<ul style="list-style-type: none"> • Install oil trapping equipments in areas when there is a likelihood of oil spillage such as during the maintenance of construction facility. Soil in such an area will be well protected from contamination.

The full report of the proposed project is available for inspection during working hours at:

THE ENVIRONMENTAL MANAGEMENT AND CO-ORDINATION ACT

(No. 8 of 1999)

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED ECOLODGE AT HAGENIA, ABERDARE NATIONAL PARK

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) regulations, the National Environmental Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the implementation of the Proposed Ecolodge at Hagenia, Aberdare National Park.

The project entails construction of a 30 bed eco-lodge that shall consist of one-level structures on elevated wooden decks and with semi-permanent solid walls of natural materials that blend well with the environment with minimum concrete. In addition it will comprise of 15 luxury cabins, a club house, swimming pool and private lone huts for dining and bird watching.

The proposed project will be located at Hagenia site within Aberdare National Park on a 35 acre piece of land. The site is six kilometres south-west of Chania River and the Chania Picnic site.

The following are the anticipated impacts and proposed mitigation measures:

Environmental issue Mitigation Measures

Hydrology and Drainage

- Existing and new tracks should have provisions for side drains, mitre drains and culverts all located at appropriate points, that is, employing the principle of discharging water off the road little and often, particularly on sloped terrain.
- The drains must lead to the safest point of discharge (usually a water course).
- These structures must be regularly maintained.

Soil Erosion

- Only minimal bush clearing should be done
- With regard to creating and or gravelling of tracks, if recommendations for frequent drainage off the road are taken into consideration, then erosion will be minimized. The installation of check-dams (using sticks and stones, or naturally occurring biological material) and scour checks along the drains will also prevent erosion. Again these structures must be regularly maintained.
- Excavations of the site will be confined only within the sections upon which constructions is taking place.
- Excavated earth will be held away from locations of the site not susceptible to surface runoff of storm water.
- The earth removed from external disposal will require to be deposited on sites without the risk of being washed down during rains and where it will not compromise other land use activities in those areas.
- Extra precautions on control of soil erosion will be required on construction during periods of heavy rainfall.
- Re-vegetate exposed areas on the site so as

	to mitigate further erosion of soil.		emitting of fumes beyond the required levels
Water Resources	<ul style="list-style-type: none"> Landscaping with indigenous species will help to mitigate soil erosion during the operation phase of the project. Flows rates in the River or springs that are intended to be used as water sources should be established The Proponent should liaise with WRMA to obtain the necessary permit to draw water River water used for the eco-lodge's supply will have to be tested and treated accordingly. Parameters for testing should include suspended solids, nitrates, phosphates, pH, conductivity, organic matter and fluoride. Care should be taken to ensure that water tapped comes right from the source. Dosing with chlorine should be sufficient for the purposes of the eco-lodge, as this water is not intended for potable use. This can be done through automated procedures or manually, but whichever method is chosen, it is important that the residual concentration of 0.2 to 0.5 mg/l (depending on bacterial contamination levels) after 30 minutes of contact time is maintained in order to ensure bacterial disinfection. Good environmental practice would entail properly recording and filing water treatment procedures, so that in the absence of the person normally responsible for treatment of water, any other assigned person is able to competently carry out this function. In the same vein, guests as well as staff should be sensitized with regard to minimizing water usage. In order to reduce water consumption, guests should be encouraged not to have their clothes washed while they are at the Ecolodge. In addition, camps should arrange to take their linen, uniforms etc to Nyeri or Nairobi for washing. 	Solid Waste	<ul style="list-style-type: none"> Proper disposal of construction wastes and debris outside the National Park at approved dump site. Segregate waste Adopt reduce, reuse, recycle philosophy Waste to be taken to Nairobi until suitable local options is available. Train local communities to recycle/ reuse waste
		Construction/ Burrow Materials	<ul style="list-style-type: none"> Bona fide/ environmentally friendly materials sources Restricted use of certain specified materials Burrow pits to be located outside the National Park, ensure controlled excavation, and rehabilitation after use.
		Aberdares National Park	<ul style="list-style-type: none"> Monitor locations of wildlife within the National Park. Implementation of the Management Plan for the Forest Ecosystem and the National Park.
		Vegetation	<ul style="list-style-type: none"> Prohibit off-road driving Encourage neighbouring communities to grow vegetables to supply the camps Prohibit planting of non-endemic species in the National Park. Encourage communities to grow wood for campfire and energy sources
		General risks and hazards	<ul style="list-style-type: none"> Provision and maintenance of firefighting equipment Emergency response plans and training
Noise and Vibrations		Visual aspects	<ul style="list-style-type: none"> Locate facilities discretely Design structures to complement environment Camouflage structures

		NOTICE TO THE PUBLIC TO SUBMIT COMMENTS ON AN ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED DETAILED DESIGN FOR MARABA WASTE STABILIZATION PONDS, MARABA AREA, KAKAMEGA	
		PURSUANT to Regulation 21 of Environmental (Impact Assessment and Audit) regulations, the National Environmental	

Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the implementation of the proposed Maraba Waste Stabilization Ponds

The proposed project entails the construction of Maraba Waste Stabilization Ponds. The Maraba ponds will be discharging into River Lwatingu.

The proposed project site is located in Maraba approximately 8 Km away from Kakamega Town next to Lwatingu River. It is in Maraba ward, Lurambi Constituency, Kakamega District.

The following are the anticipated impacts and proposed mitigation measures:

Direct land take		<ul style="list-style-type: none"> All the affected people were identified by type of loss and extent of damages. Land acquisition was carried out in accordance with World Bank resettlement policy which requires quantification of impacts on land based on livelihood and fair compensation to land owners and the people relying on the land for their residence and/or livelihood. Adequate compensation of the affected persons was done before construction works commenced. 	<p>overflows especially during rainy seasons.</p> <ul style="list-style-type: none"> Use silt or clay soils for pond foundations and construction as these soils won't allow the wastewater to quickly percolate down through the lagoon bottom to the groundwater. External slopes to be protected from storm water erosion by providing adequate drainage. Surface drainage or storm runoff to be kept out of the ponds, if necessary diversion terraces or drains should be installed above the site.
Soil-Related Impacts		<ul style="list-style-type: none"> The valuable top soil containing organic material, nutrients as well as seeds and the soil fauna to be excavated separately and piled in an adequate manner for re-use. After completion of the construction works the Contractor to ensure immediate restoration by spreading piled top soil and by sowing adequate grass. Put up erosion control measures such as gabions and gunny bags filled with soil where there are erosion signs to slow down storm water flow in these sections during heavy rains. Plan emergency response measures in case of accidental oil spills during construction. 	<p>Sanitation Impacts</p> <ul style="list-style-type: none"> Maintain good hygiene at construction camps. A site waste management plan to be prepared by the Contractor prior to the commencement of construction works. This should include designation of appropriate waste storage areas, collection and removal schedule and identification of approved disposal site. Unusable construction waste, such as damaged pipes, formwork and other construction material, to be disposed of at an approved dumpsite or sold to willing buyers for salvage value.

IMPORTANT NOTICE TO SUBSCRIBERS TO THE KENYA GAZETTE

The following notes are for the guidance of persons submitting "copy" for inclusion in the *Kenya Gazette, Supplement*, etc.:

- (1) *The Kenya Gazette* contains Notices of a general nature which do not affect legislation. They are, therefore, submitted to the Government Printer directly.
- (2) *Legislative Supplement* contains Rules and Regulations which are issued by the Central Government. Because of this, they must be submitted to the Government Printer through the office of the Attorney-General.
- (3) *Bill Supplement* contains Bills which are for introduction in the National Assembly.
- (4) *Act Supplement* contains Acts passed by the National Assembly.

All "copy" submitted for publication should be prepared on one side of an A4 sheet no matter how small the Notice is, each page being numbered and should be typewritten with double spacing. Copy should be clear, legible and contain no alterations.

Particular attention should be paid to the following points:

- (i) Signature must be supported by rubber-stamping or typing the name of the signatory in capital letters.
- (ii) Dates must be correct and filled in where necessary.
- (iii) Care should be taken to ensure that all headings to Notices and references to legislation are up to date and conform with the Revised Edition of the Laws of Kenya.

EXTRACT FROM THE CODE OF REGULATIONS, SECTION D—

Kenya Gazette

"D 34. (1) Communications for the *Kenya Gazette* should reach the Government Printer not later than 9 a.m. on Friday of the week before publication is desired. The Government Printer will not publish communications received after that hour until the next subsequent issue of the Gazette.

(2) Ministries will be required to pay for the *Kenya Gazette* and to meet the cost of advertising in it.

It is emphasized that these notes are for guidance only, but it is requested that persons submitting copy for publication first satisfy themselves that such copy is complete in every respect.
