ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT
FOR THE PROPOSED GODOWN REFURBISHMENT AND
SETTING UP A FDG PRODUCTION FACILITY USING
CYCLOTRON FOR CANCER MEDICAL IMAGING ON PLOT L.R.
NO. 9042/130 AT EMIRATES BUSINESS PARK OFF AIRPORT
NORTH ROAD IN EMBAKASI, NAIROBI CITY COUNTY
INVITATION OF PUBLIC COMMENTS

Pursuant to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The proponent, Advanced Molecular Imaging Limited, is proposing to refurbish a godown and establish a medical Cyclotron at Emirates Business Park off Airport North Road in Embakasi, Nairobi City County. The project entails setting up of cancer related pharmaceutical production unit, installing the relevant machinery and equipment for the proposed FDG production facility, production of positron-emitting isotopes suitable for molecular imaging in the refurbished godown, production of ancillary molecules, which will include setting up equipment that would be required for production, testing, quality control, distribution, storage, warehousing and any other related activities. The main partitioning and rooms will be as follows: Manager and technicians rooms/offices, quarantine and storage room, incoming material zone, packaging and labelling area, dispatch area, deconcentrating room, waste storage room, cyclotron room and production and synthesis room.

The following are the anticipated impacts and proposed mitigation measures:

<i>Impacts</i>	<i>Proposed Mitigation Measures</i>
Air pollution	<ul style="list-style-type: none"> • Maintenance of plant and equipment and sensitize workforce. • Sensitize vehicle owners in the godown parking/passage area not to leave their vehicles; engine running while inside the Industrial Park. • Operations to be done during the day only. • Work equipment and engines to be switched off when not in use. • Strict adherence to Air Quality Regulations, 2014.
Waste management	<ul style="list-style-type: none"> • Provide appropriate options for waste management. • Assess opportunities for reducing solid waste generation in particular of hazardous and undesirable materials.

<i>Impacts</i>	<i>Proposed Mitigation Measures</i>	<i>Impacts</i>	<i>Proposed Mitigation Measures</i>
	<ul style="list-style-type: none"> Dispose all unwanted structures, wastes and unused materials in accordance to NEMA Waste Management Regulations. Workers to be encouraged to segregate waste from the source, use the 3R Management Approach: Reduce, Reuse and Recycle. Limit waste quantity by proper planning. Godowns management to be carrying out inspections within and around the building (general, spontaneous and verification types of inspections) to monitor waste, cleanliness and housekeeping status. Improvised waste management systems not to be encouraged. Godowns management staff to have a functional waste management system. Waste disposal bins to be placed in all departments in the godowns. Strict adherence to Waste Management Regulations, 2006. 	Radiological safety	<ul style="list-style-type: none"> Workers to wear radiation badge while in the building only. Workers should not bring food, drinks, chewing gum, makeup or their packaging in the working area, especially cyclotron room. Workers to wear disposable gloves while working with irradiated materials. Workers to put the used gloves in the container dedicated to potentially radioactive waste. Irradiated material should not be taken outside of the restricted area. Contractor and area chief to allow persons of good conduct only to work at the site.
Road accidents during delivery of equipment and machines	<ul style="list-style-type: none"> Secure traffic management signage near the godown site, e.g. warning sign "Heavy Traffic Turning" etc while transporting equipment and machinery. Appoint qualified persons to supervise traffic control procedures (when lorries entering or exit project site). Provide all necessary traffic signage at strategic locations that warns motorists of changes to traffic patterns/diverting. Ensure regular inspections as required on installed mitigation measures. 	Anti-social behaviour from the workers (social ills), permanent and casuals.	
Haulage of materials	<ul style="list-style-type: none"> Ensure on site speed regulations for haulage trucks. 	Occupational health and safety	<ul style="list-style-type: none"> Provide and enforce use of appropriate protective gear, -dust masks, protective shoes etc. The godowns construction site to be out of bounds to unauthorized intruders, food vendors or job seekers. Constructor at the godowns to have at least one trained first aider, aware of firefighting techniques, precautions etc. Develop liaison with health provision arms for emergency response. Provide security services within the godowns. All firefighting equipment to be constantly inspected by authorized agents for continual operability. Management staff of the godowns to have at least one trained first aider, aware of firefighting techniques, precautions.
Operations in the cyclotron room	<ul style="list-style-type: none"> Strict adherence to the set standards in radiation exposure levels in and around the cyclotron room. The radiation exposure levels outside the shielded area of the cyclotron should be minimal, in accordance to PPB standards/any other international accepted standard. This will include: ionization chamber, vault door/wall, console and outer wall of the cyclotron. There should be no leakage of the radiation outside the vault and all the values are to be below the recommended levels of exposure in accordance to PPB standards or any other international accepted standard. The exposure values should be noted before operation, during and after operation of the cyclotron. 		
Cyclotron room and possible exhausts.	<ul style="list-style-type: none"> Ventilation and air changes shall be in accordance with DIN 6844, Pt 1. The cyclotron room pressure shall be maintained at negative pressure relative to the surrounding areas. All exhaust from cyclotron and chemistry enclosures must pass through a proper filtration. monitoring system to meet national and local safety code requirements. Specified temperature and humidity levels are maintained during daily operation.

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT
FOR THE PROPOSED INLAND CONTAINER DEPOT NAIROBI
ACCESS ROAD LINE A ALONG THE INNER BOUNDARY OF
THE NAIROBI NATIONAL PARK

INVITATION OF PUBLIC COMMENTS

Pursuant to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the

National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The proponent, Kenya Railways, is proposing to construct a 4.153km access road linking the Nairobi inland container depot to the Southern Bypass Road along the inner boundary of the Nairobi National Park (NNP). Its starting point will connect the west entrance of the ICD running through the inner boundary of the NNP and the end forming a partial “pear-shaped” interchange with the Southern Bypass Road.

The following are the anticipated impacts and proposed mitigation measures:

<i>Impacts</i>	<i>Proposed Mitigation Measures</i>
To reduce, control and avoid land related conflicts	<ul style="list-style-type: none"> • Commissioning of a RAP study for the proposed project. • Undertake the RAP (where applicable) in accordance with the legal framework of the Government of Kenya.
Habitat loss and reduced ecosystem	<ul style="list-style-type: none"> • Compensation of land ceded for the project including that affected by disturbance impacts such as noise and air pollution. Such land should be purchased on the southern side of the NNP (i.e. Kapiti plains) pursuant to the objectives of Kenya's Vision 2030 regarding environmental conservation (Government of Kenya, 2006).
Conflicts related to hiring of workers	<ul style="list-style-type: none"> • Equitable provision of employment opportunities with regards to gender, skills, indigenous people and disability.
Traffic flow and safety	<ul style="list-style-type: none"> • No overloading of trucks and, good driving practices to be practiced. Suitable junction/access point to be provided. • Use of appropriate and legible signage. Employment of formal flagmen/women in order to ensure the public safety. • Erect road signage informing other road users of the nearby construction works. • Ensure that truck drivers are educated on road safety.
Soil erosion	<ul style="list-style-type: none"> • Grained materials (sand, marl, etc.) will be stockpiled away from drainage channels and low berms will be placed around the piles which themselves will be covered with tarpaulin to prevent them from being eroded and washed away. • Loose soils to be used to fill back excavated/disturbed areas. Loose soils to be compacted with a mechanical roller so as to avoid erosion by wind or water. • Planting of grass on the slopes of the subgrade to slow runoff.
Noise and excessive vibrations	<ul style="list-style-type: none"> • Provision of mufflers on exhausts and standard restrictions to hours of site works. Water spraying on dusty sites during strong wind. • Utility of machinery with high noise e.g. pile drivers should be conducted at day time; Night operations (if necessary) should only include machinery with low noise emissions. Use of ear muffs by construction workers. • Adherence to Noise and Excessive Vibration Pollution (Control) Regulations, 2009.
Air quality management	<ul style="list-style-type: none"> • Covering wetting of materials and wastes, during transportation. • Regular surface wetting on roads under construction and cleared areas to minimize entrainment of dust.

Proposed Mitigation Measures

- Reduce gaseous emissions by selection of appropriate machinery and regular servicing of vehicles.
- Provide workers with appropriate protective gear including masks to cut down on gaseous emissions inhaled. All workers involved in construction activities to wear face masks.
- Strict adherence to Air Quality Regulations, 2014.
- Screen the construction equipment to avoid the spread of invasive species such as seeds attached to road construction machinery
- All hazardous chemicals including hydrocarbons such as fuel, oils and greases will be contained in bunded areas with sufficient capacity to contain the quantity stored in the bunded area.
- Hazardous chemicals including hydrocarbons are to be handled over impervious surfaces.
- Proper storage of liquids on site, e.g. oil, diesel and solvents must be ensured as well as containment of accidental oil spill.
- Undertake regular and repair of construction machinery and vehicles.
- Portable chemical toilets to be provided at site offices; portable toilets are to be cleaned on a regular basis.
- Strict adherence to Water Quality Regulations, 2006.
- Under no circumstances should construction workers and management bring, or use banned plastic bags at the construction site.
- Retention of vegetation where possible and replanting of grass and shrubs in other undisturbed areas should be applied.
- Minimize the destruction or damage of vegetation cover by clearing construction designated areas only.
- The management of construction solid waste shall adopt the integrated solid waste management system through a hierarchy of options: Source reduction, recycling composting and reuse, combustion and sanitary land filling.
- The proponent and contractor will liaise with the county government and designate a proper site for disposing excavated soils in strict adherence to Waste Management Regulations, 2006.
- Adoption of alternatives to the alignment and their associated above-ground structures; and refinements to the basic engineering and architectural design including layout, built structures etc. to avoid and/or minimize potential adverse impacts.
- Care will be taken to avoid having open trenches in an area for a long period of time.
- Continuation of awareness (through distribution of flyers, condoms and holding related sensitization classes) program on risks associated with STIs and HIV/AIDS will be undertaken.
- Adherence to provisions of Public Health, Cap. 242.

<i>Impacts</i>	<i>Proposed Mitigation Measures</i>
Occupational health and safety	<ul style="list-style-type: none"> • Employees will be informed on the necessary safety procedures and be competent in the work they are employed to do. • All necessary safety regulations must be abided by including building codes and fire practice requirements. • Inspection of material and harmonization to the occupational health and safety standards. • The construction company shall establish an emergency leading group, accident scene command group, an accident treatment group, a guard and defend group, a medical aid group, an environmental monitoring group, logistics group, an accident investigation team. • Ensure adherence to OSHA, 2007.

The full report of the proposed project is available for inspection during working hours at:

(a) Director-General, NEMA, Popo Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.

(b) Principal Secretary, Ministry of Environment and Mineral Resources, NHIF Building, Community, P.O. Box 30126-00100, Nairobi.

(c) County Director of Environment, Nairobi City County.

The National Environment Management Authority invites members of the public to submit oral or written comments within thirty (30) days from the date of publication of this notice to the Director-General, NEMA, to assist the Authority in the decision making process of the plan.

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT
FOR THE PROPOSED CONSTRUCTION OF A BULK LPG
STORAGE TERMINAL AT MBARAKI OF GANJONI DIVISION IN
MOMBASA COUNTY

INVITATION OF PUBLIC COMMENTS

Pursuant to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The proponent, Mombasa Gas Terminal Limited, is proposing to construct and operate a 22,000 metric ton mounded storage LPG terminal in Mbaraki, Ganjoni Division of Mombasa County. The proponent intends to use a 20ft ISO certified LPG tanks to store and transport the gas to different part of the Republic and wider East African Community.

The following are the anticipated impacts and proposed mitigation measures:

<i>Impacts</i>	<i>Proposed Mitigation Measures</i>
Geology and physiography	<ul style="list-style-type: none"> • Ensure trenching/excavations are only done where necessary. • Ensure backfilling of excavations, reinstatement of disturbed ground and general restoration of site.

<i>Impacts</i>	<i>Proposed Mitigation Measures</i>
Soil	<ul style="list-style-type: none"> • Clear all waste from site. • Maintain proper handling of solid and liquid waste during construction. • Minimal earthworks should be undertaken during construction. • Excavated soil should be used in landscape design of the project site rather than stockpiling. • Construction equipment and vehicles should be well maintained, checked and promptly repaired. • Avoid deep excavations in areas sensitive to erosion. • Carry out construction works in the dry season. • Stabilize the soils in order to reduce potential erosion after project construction phase is over. • Restore all the sites that were damaged during construction. • At the end of construction works, level off the soils and facilitate vegetation regeneration.
Terrestrial (flora and fauna)	<ul style="list-style-type: none"> • Educate contractors on the importance of flora and fauna in the area, including the appropriate regulatory requirements to preserve fauna and flora. • Minimize vegetation clearance and demarcate areas of construction. • Restrict foreign material export to and from the site to curtail spread of invasive species.
Water quality	<ul style="list-style-type: none"> • Earthworks shall be halted when rain conditions are such that excessive erosion and silt loaded run-off can be expected. • The construction programme will avoid excessive exposure of bare earth surfaces which may be more prone to erosion. • If appropriate, settlement lagoons to be used to allow silts to be retained prior to discharge of run-off to the existing drainage channels or direct to sea (through the rock revetment). • Consideration will be given to undertaking routine maintenance of plant and vehicles off-site in a properly equipped cabro workshop with oil interceptors. • Avoidance of water accumulation and stagnation. • Existing drainage channels to be cleared of silt/debris and trash screens installed if appropriate.
Solid waste	<ul style="list-style-type: none"> • The contractor shall put in place a waste management plan aimed at minimizing the production of all wastes. • Where possible measures will be put in place to recycle materials such as metal off-cuts, some plastics and clean paper/cardboard utilizing existing specialist recycling firms in Kenya. • A suitable location within site for placing excess concrete and washing down equipment will be agreed to reduce visual impact. • Non-recyclable materials will be stored in plastic bins, collected and disposed of through the municipal waste system.

<i>Impacts</i>	<i>Proposed Mitigation Measures</i>	<i>Impacts</i>	<i>Proposed Mitigation Measures</i>
	<ul style="list-style-type: none"> Potentially hazardous wastes shall be stored separately, i.e. hydrocarbon containers, used batteries and collected by registered hazardous waste handler. Enforce regular collection and disposal of garbage by the project contractor through licensed NEMA waste handler. Clean storm water drains to minimize clogging. Strict Adherence to Waste Management Regulations, 2006. 	Water usage	<ul style="list-style-type: none"> Install and properly manage site sanitation facilities/ recycle waste water on site. Turn off taps when not in use. Install water conserving taps that turn off immediately when not in use. Install water meter to monitor water usage and bills.
Noise and vibration	<ul style="list-style-type: none"> Construction workers should be provided with appropriate ear protection. Use of vibratory hand operated equipment should be minimized. Noisy operations should be restricted to daytime operation. Power generator and other equipment should be state of the art and equipped with silencers/mufflers where necessary. Construction plant should be maintained in good running order; all vehicles should comply with the requirements of Road Traffic Act. Adherence to Noise and Excessive Vibration Pollution (Control) Regulations, 2009. 	Energy usage	<ul style="list-style-type: none"> Ensure that all lighting system are switched off when not in use. Install energy saving bulbs. Design the office infrastructure to maximise the use of natural light. Install metering system for monitoring.
Air quality	<ul style="list-style-type: none"> For potentially dusty earth works operations, construction workers to be enclosed within ventilated cabs or provided with facemasks for potentially dusty earth works operations. Where appropriate water damping to be used to control dust. Particular attention to be paid when the wind is from the south or west. Limit traffic speed and restrict movement of vehicles as to minimize dust generation. Construction plant will be maintained in good running order; all vehicles should comply with the requirements of road. Traffic Act and its subsequent regulations for emission control. Strict adherence to Air quality Regulations, 2014. 	Road traffic	<ul style="list-style-type: none"> Deliveries will be made to site outside of the periods of high congestion on the public road system (i.e. early morning, late afternoon). Materials haulage companies to use competent drivers and ensure that shift patterns do not result in excessive working hours resulting in compromised road safety. All haulage vehicles shall be maintained in good running order and should comply with the requirements of Road Traffic Act. Where feasible, and to limit the number of movements of haulage vehicles to and from the Port area, it is anticipated that bulk materials will be shipped to Port and moved directly to site (i.e. steel reinforcement, geogrid, etc. subject to appropriate port clearance).
Marine traffic	<ul style="list-style-type: none"> Kenya Ports Authority to control and regulate shipping movements within the port area. Kenya Ports Authority to have adequate controls enforced to ensure the safety of ship movements and berthing operations, and that this includes the avoidance and mitigation of potential negative environmental impacts. Put in place good marine traffic plan. Work in collaboration with Kenya Ports Authority to ensure the safety of ship movement and berthing operations. 	Security and public safety	<ul style="list-style-type: none"> Proponent should liaise with Mombasa County government and County Administrations during the mobilization phase. Ensure that all workers can be identified by staff uniform and badges at the site. Adequate security measures should be provided, e.g. perimeter fencing and security manning at the site. Journey management policy and monitoring to be enforced. Smoking will only be permitted in designated areas; no litter will be left along the construction sites; there will be no collecting of vegetation or firewood. Barriers and guards should be installed as necessary to protect employees and visitors from physical hazards and criminal activity.
Fire and safety	<ul style="list-style-type: none"> In the event of fire, fire management plan should be implemented. Install automatic shut off and gas leakage detectors. The entire plant should be networked with pressurised fire hydrants lines which should have fire hydrant, long range monitors and deluge valve at strategic locations. 	Socio-economic welfare	<ul style="list-style-type: none"> The contractor should promote dialogue with the local community, especially community involvement in the project activities through employment. Effectively plan for their transport of gas without interfering with the areas traffic. Inform the local community on the project activities through their local leaders. Resolve conflicts mutually and immediately they occur.
		Occupational health and safety	<ul style="list-style-type: none"> Construction workers safety should be in accordance with clients' prepared site specific health and safety plan that identifies site specific risks, safety equipment, decontamination procedures, action plans, and emergency response plans.

<i>Impacts</i>	<i>Proposed Mitigation Measures</i>
	<ul style="list-style-type: none"> • Daily site inspections should be done to ensure safe work practices are adhered. • Toolbox talks to be conducted on daily basis. • All workmen should be provided with Personal Protective Equipment. • Maintain safe workplaces and work systems. Provide information, instruction and training enabling employees to work without hazards. • Comply with the provisions of OSHA, 2007.

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED RESIDENTIAL DEVELOPMENT (FLATS) ON L.R. NO. 28428/51 OFF KIAMBU ROAD IN THINDIGUA AREA, KIAMBU COUNTY

INVITATION OF PUBLIC COMMENTS

Pursuant to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The proponent, Krishna Estates Limited, is proposing to construct residential flats and the auxiliary facilities on L.R. No. 28428/51 which measures approximately 0.8096 hectare. The development shall entail construction of seven (7) blocks of flats with two (2) of the blocks being for two-bedroom flats while the rest five (5) are for three-bedroom flats. All the seven (7) blocks shall have ground, 1st, 3rd, 4th, 5th, 6th, 7th and 8th floors. The total number of residential units from the proposed project shall be two hundred twenty-four (224) comprising of 64 two-bedroom flats and 160 three-bedroom flats

The following are the anticipated impacts and proposed mitigation measures:

<i>Impacts</i>	<i>Proposed Mitigation Measures</i>
Surface drainage	<ul style="list-style-type: none"> • Proper installation of surface drainage structures. • Rain water harvesting and storage.
Air pollution	<ul style="list-style-type: none"> • Enclose the site and buildings under construction with suitable dust nets/screens. • Sprinkle water to dry soils in excavated areas and earth roads to suppress dust.

<i>Impacts</i>	<i>Proposed Mitigation Measures</i>
	<ul style="list-style-type: none"> • Covering friable material loads during transportation. • Strict adherence to Air quality Regulations, 2014.
Noise pollution	<ul style="list-style-type: none"> • Maintain machinery, plant equipment. • Construction activities to be restricted between 8 a.m.–5 p.m. • Workers exposed to high-level noise to wear safety and protective gear. • Adherence to Noise and Excessive Vibration Pollution (Control) Regulations, 2009.
Water resources	<ul style="list-style-type: none"> • Construct water reservoirs and rainwater harvesting systems. • Installation of water conserving taps; waste water recycling and reuse.
Solid waste management	<ul style="list-style-type: none"> • Waste minimization by ordering right/accurate quantities and sizes rather than cutting to sizes leaving wastes or ordering excess quantities leaving residuals. • Waste recycling and reuse e.g. excavated soil used in landscaping the site and rehabilitation of quarry pits off-site. • Incorporate suitable facilities for collection, segregation and safe disposal of solid wastes. • Adherence to Waste Management Regulations, 2006.
Liquid waste management	<ul style="list-style-type: none"> • Construct suitable and adequate wastewater treatment system. • Regular monitoring of the treatment system. • Installation of sanitary systems that use less water. • Treatment and recycling of wastewater. • Strict adherence to Water Quality Regulations, 2006.
Public health and occupational health and safety	<ul style="list-style-type: none"> • Train staff/workers on occupational health and safety and Provide full protective gear protective gear. • Design and disseminate appropriate emergency response plans. • Installation and maintenance of fire prevention, control and management measures. • Ensure machinery and equipment servicing and maintenance as per schedules and legal requirements. • Ensure adherence to OSHA, 2007.

FOR THE PROPOSED LPG CYLINDER PRODUCTION LINE AND
LIQUEFIED PETROLEUM GAS (LPG) REFILLING PLANT ON
PLOT L.R. NO. MAKUYU/MARIANI/BLOCK III/460 IN
MAKUYU, MURANG'A COUNTY**

INVITATION OF PUBLIC COMMENTS

Pursuant to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The proponent, Excellent Logistics Limited, is proposing to develop an LPG cylinder production line and liquefied petroleum gas (LPG) Plant in Makuyu, on Plot No. Makuyu/Mariaini/Block III/460, Murang'a County. The proposed project involves the installation of an offloading point for LPG road tankers, a manual cylinder filling plant, LPG cylinders loading and offloading area, cylinders storage space, loading gantry, firefighting system and related offices. In addition, an LPG cylinder production line will be built.

The following are the anticipated impacts and proposed mitigation measures:

<i>Impacts</i>	<i>Proposed Mitigation Measures</i>
Solid waste generation	<ul style="list-style-type: none"> • Ensure solid generated at the plant are regularly disposed of appropriately at authorized dumping areas. • Use of integrated solid waste management of options i.e. source reduction, recycling, composting and re-use, combustion and sanitary land filling. • Carry out environmental awareness training to construction workers and plant employees during operation. • A private company to be contracted to collect and dispose solid waste on regular basis. • Strict adherence to Waste Management Regulations, 2006.
Release of sewage to the environment	<ul style="list-style-type: none"> • Effluent disposal to be done by use of conservancy tanks. • Apply for the license from NEMA for effluent disposal. • Conduct regular inspection for the system to ensure it works effectively. • Strict adherence to Water Quality Regulations, 2006.
High demand for water	<ul style="list-style-type: none"> • Create water conservation awareness. • Install a discharge meter at water outlets to determine and monitor total water usage. • Ensure water taps are not running when not in use. • The management to conserve water e.g. by avoiding unnecessary toilet flushing. • Promptly detect and repair of water pipes and tank leaks.
Security	<ul style="list-style-type: none"> • Ensure the general safety and security at all times by providing day and night security guards and adequate lighting within and around the premise.

Impacts

Fire control

Proposed Mitigation Measures

- Fire extinguisher to be placed in strategic positions.
- Escape routes to be provided.
- Servicing of fire extinguishers as is necessary. Always inspect electricity wires.
- Installation of a diesel engine driven fire pump and associated systems.
- A 200,000 liter firefighting water storage tank with connected water network and firefighting nozzles.

High demand for electricity

- Switch off electrical appliances and lights when not in use.
- Install occupational sensing lights at various locations such as storage areas which are not in use all the time.
- Install energy saving fluorescent tubes.
- Monitor energy use during the operation of the project and set targets for efficient use.
- Sensitize workers to use energy efficiently.

Dust disturbance

- Avoid excavation works in extremely dry weather.
- Regular sprinkling of water to be done on open surface and dusty grounds during dry season until paving is done.
- Ensure strict enforcement of on-site speed limit regulations.
- Covering of all haulage vehicles carrying sand, aggregate and cement.
- Stockpiles of fine materials (e.g. sand and ballast) should be wetted or covered with tarpaulin during windy conditions.
- Access roads and exposed ground must be wetted at a frequency that effectively keeps down the dust.
- Workers in dusty areas on the site should be issued with dust masks during dry and windy conditions.
- Providing appropriate enclosure for the concrete mixer.
- Use of dust nets at high levels of the building.
- Strict adherence to Air Quality Regulations, 2014.

Noise disturbance

- Sensitize construction drivers to avoid running of vehicles engines or hooting especially when passing through sensitive areas such as churches, schools or hospitals.
- Ensure the construction machinery are well kept in good condition.
- Sensitize construction drivers and machinery operators to switch off engines when not being used.
- Trees to be planted on site to provide some buffer against noise propagation.
- Ensure all generators and heavy machines are insulated or placed in an enclosure to minimize ambient noise levels.
- Restrict noisy construction activities to normal working hours (8 a.m.–5 p.m.).
- Inform local residents beforehand, via notices and advisories, of pending noisy periods and

Impacts**Proposed Mitigation Measures**

solicit their tolerance well before the commencement works.

- Workers operating equipment that generate noise should be equipped with noise protection gear including ear muffs and plugs. Workers operating equipment generating noise levels greater than 80 dBA continuously for 8 hours or more should use earmuffs.
- Limit pick-up trucks and other small equipment to an idling time of five minutes, observe a common-sense approach to vehicle use, and encourage workers to shut off vehicle engines whenever possible.
- All construction equipment should be regularly inspected and serviced.
- Adherence to Noise and Excessive Vibration Pollution (Control) Regulations, 2009.

Traffic control

- Issue notices/advisories of pending traffic inconveniences and solicit tolerance by local residents before the commencement of construction works.
- As far as possible, transportation of construction materials should be scheduled for off-peak traffic hours.
- Appropriate traffic warning signs, informing road users of a construction site entrance ahead and instructing them to reduce speed, should be placed along the main road in the vicinity of the entrance to the site during the construction period.
- Flagmen should be employed to control traffic and assist construction vehicles as they enter and exit the project site.
- Maintain on site a record of incidents and accidents.

Occupational health and safety

- Compliance to Occupational Health and Safety Regulations, 2007.

Public health and occupational health and safety

- Train staff/workers on occupational health and safety and provide full protective gear protective gear.
- Design and disseminate appropriate emergency response plans.
- Installation and maintenance of fire prevention, control and management measures.
- Ensure machinery and equipment servicing and maintenance as per schedules and legal requirements.
- Ensure adherence to OSHA, 2007.

The full report of the proposed project is available for inspection during working hours at:

- (a) Director-General, NEMA, Popo Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.
- (b) Principal Secretary, Ministry of Environment and Mineral Resources, NHIF Building, Community, P.O. Box 30126-00100, Nairobi.
- (c) County Director of Environment, Murang'a County.

The National Environment Management Authority invites members of the public to submit oral or written comments within thirty (30) days from the date of publication of this notice to the Director-General, NEMA, to assist the Authority in the decision making process of the plan.

**IMPORTANT NOTICE TO SUBSCRIBERS TO
THE KENYA GAZETTE**

THE following notes are for the guidance of persons submitting "copy" for inclusion in the *Kenya Gazette, Supplement*, etc.:

- (1) *The Kenya Gazette* contains Notices of a general nature which do not affect legislation. They are, therefore, submitted to the Government Printer directly.
- (2) *Legislative Supplement* contains Rules and Regulations which are issued by the Central Government. Because of this, they must be submitted to the Government Printer through the office of the Attorney-General.
- (3) *Bill Supplement* contains Bills which are for introduction in the National Assembly.
- (4) *Act Supplement* contains Acts passed by the National Assembly.

All "copy" submitted for publication should be prepared on one side of an A4 sheet no matter how small the Notice is, each page being numbered and should be typewritten with double spacing. Copy should be clear, legible and contain no alterations.

Particular attention should be paid to the following points:

- (i) Signature must be supported by rubber-stamping or typing the name of the signatory in capital letters.
- (ii) Must be correct and filled in where necessary.
- (iii) Care should be taken to ensure that all headings to Notices and references to legislation are up to date and conform with the Revised Edition of the Laws of Kenya.

EXTRACT FROM THE CODE OF REGULATIONS, SECTION D—

Kenya Gazette

"D 34. (1) Communications for the *Kenya Gazette* should reach the Government Printer not later than 9 a.m. on Friday of the week before publication is desired. The Government Printer will not publish communications received after that hour until the next subsequent issue of the Gazette.

(2) Ministries will be required to pay for the *Kenya Gazette* and to meet the cost of advertising in it.

It is emphasized that these notes are for guidance only, but it is requested that persons submitting copy for publication first satisfy themselves that such copy is complete in every respect.
