## THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED HIGH-RISE APARTMENTS, ON PLOT L.R. NO. 1870/11/251 AND 1870/11/162 OFF GENERAL MATHENGE ROAD IN WESTLANDS, NAIROBI COUNTY

## INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the

above proposed project.

The Proponent (Portofino Properties Limited) is proposing to construct on a three acre plot; a total of 43 high-rise residential units in six (6) blocks, parking area on the ground floor, and a sewage treatment plant on Plot L.R. No. 1870/11/251 and 1870/11/162 off General Mathenge Road in Westlands, in Nairobi County.

The following are the anticipated impacts and proposed mitigation measures:

*Environmental Impacts Mitigation Impacts*

High demand for raw materials

- Source building materials from local suppliers who use environmentally friendly processes in their operations.
- Ensure accurate budgeting and estimation of actual construction material requirements to ensure that the least amount of material necessary is ordered.
- Ensure that damage or loss of materials at the construction site is kept minimal through proper storage.
- Use of some recycled/refurbished or salvaged materials to reduce the use of raw materials and divert material from landfills.

Increased storm water runoff and soil erosion

- Roof water to be harvested and stored in underground reservoirs.
- A storm water management plan that minimizes impervious area infiltration by use of recharge areas and use of detention and/or retention with graduated outlet control structure should be designed.
- Apply soil erosion control measures such as leveling of the project site to reduce run-off velocity and increase infiltration of storm water into the soil.
- Ensure that construction vehicles are restricted to existing roads to avoid soil compaction within and around the project site.
- Site excavation works to be planned such that a section is completed and rehabilitated before another section begins.
- Construction of soil-galleys on sloppy sections.

Increased solid waste generation

- Use of an integrated solid waste management system
- Estimate and procure just the required amount of materials
- Ensure that construction materials left-overs are reused elsewhere.
- Donate recyclable/reusable or residual materials to needy groups
- Use of durable
- Provide facilities for proper handling and storage of construction materials to reduce the amount of waste caused by damage or exposure.
- Purchase of perishable construction materials such as paints should be done incrementally to ensure reduced spoilage of unused materials
- Use building materials that have minimal or no packaging to avoid the generation of excessive packaging waste
- Use construction materials containing recycled content when possible and in accordance with accepted standards.
- Reuse packaging materials such as cartons, cement bags, empty metal and
