INVESTIGATION REPORTS COVERING THE PERIOD 1ST JULY TO 30TH SEPTEMBER, 2014

EACC/FI/INQ No. 47/2014

Inquiry into Allegations that the Machakos County Assembly Irregularly Single-sourced Sixty Second-hand Laptops for County Representatives at a Cost of KSh. 75,000 per Laptop

The investigations established the members of the Machakos County Assembly Tender Committee resolved that direct procurement be used in sourcing for the laptops and the committee engaged a firm that had previously supplied five lap tops to the county, to supply 60 laptops at a price of KSh. 75,000 per laptop. Investigations revealed that Tender Committee flouted procurement regulations in using the direct procurement method without meeting the pre-requisite requirements for the use of direct procurement. The fact that the financial year was coming to a close was not sufficient justification for adopting the said method. Investigations further established that the firm that was awarded the contract for the supply of the laptops was not qualified as they used false documents when submitting their bid for the 5 laptops.

A report was compiled and forwarded to the Director of Public Prosecutions on 24th September, 2014 recommending that the suspects be charged with the offences of careless failure to comply with the law relating to procurement of goods contrary to section 45 (2) (b) as read with section 48 of the Anti-Corruption and Economic Crimes Act, Wilful failure to comply with the law relating to procurement of goods

The investigations established that customer service officer took an imprest of KSh. 2,343,000 for purposes of organizing a sensitization forum in Kakamega from 10th to 11th October, 2011. It emerged that the officer misrepresented the sums of money that were paid to the participants in allowances. Investigations further established that the officer also came up with fictitious names of persons who were listed as participants in a bid to justify the payments. The investigations showed that the suspect spent KSh. 1, 483,925 and not the KSh. 2,231,125 that she surrendered after the sensitization forum. The suspect could not therefore account for KSh. 747,200.

Investigations established that while the practice was that a cheque be issued, the said money was instead paid to the suspect in cash and not to the Chief Finance Officer as it had been indicated in the letter. The suspect did not acknowledge receipt of the money nor did the cashier generate an electronic withdrawal slip. However, investigations established that indeed the Managing Commissioner withdrew the money from the K.M.C. account. The primary goal of Mombasa SEZ Strategic Environmental Assessment (SEA) is to provide a high level of protection to the environment by integrating environmental considerations at the earliest stage in the plan-making process with a view to promoting sustainable development and informing the draft development plan of any significant environmental impacts.

The specific objectives for this SEA Study are:

- (a) To identify environmental and social priorities and key linkages between environmental protection and trade growth in areas influenced by SEZ;
- (b) To assess likely significant effects of SEZ development on these environmental and social priorities and key linkages;
- (c) To formulate a set of measures to address these priority concerns and to take advantage of opportunities that will emerge from SEZ development, considering institutional and financial conditions needed for implementing such proposal; and

(d) To recommend mechanisms that will enable future adjustments to maintain and promote sustainable and equitable economic/trade growth in response to phased and gradual development of SEZ.

GAZETTE NOTICE No. 8489

THE ENVIRONMENTAL MANAGEMENT AND CO-ORDINATION ACT

(No. 8 of 1999)

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY DRAFT STRATEGIC ENVIRONMENTAL ASSESSMENT REPORT FOR PROPOSED RED CORAL DEVELOPMENT IN LIMURU, KIAMBU COUNTY

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 42 and 43 of Environmental (Impact Assessment and Audit) Regulations, of 2003 the National Environmental Management Authority (NEMA) has received a Draft Strategic Environmental Assessment Report for Proposed Red Coral Development in Limuru, Kiambu County. The SEA findings are also expected to integrate the existing sectoral plans and programs to establish sustainable urban development mechanisms.

The primary goal of Strategic Environmental Assessment (SEA) is to provide a high level of protection to the environment by integrating environmental considerations at the earliest stage in the plan-making process with a view to promoting sustainable development and informing the draft development plan of any significant environmental impacts.

The Proposed Red Coral Development plan proponent – Red Coral Properties Limited is in possession of a 387-acre parcel of land on the outskirts of Limuru town and is desirous of developing the land to meet the growing demand for housing, commercial and light industries developments away yet proximal to the Nairobi City Centre. Red Coral Properties Limited has thus commissioned a Strategic Environmental Assessment of the proposed development master plan.

The objective of the Proposed Red Coral Development plan is to provide a quality environment which affords pleasant, clean and safe mixed communities for living, work and play away from the Capital City. Execution of the plan will contribute in the meeting part of the housing demand in the Nairobi Metropolitan region as well as provide

choices and options for existing residents wishing to live in a high quality environment provided with a wide range of amenities and easy access to services and employment opportunities.

The Proposed Red Coral Development SEA study entailed the following:

- (a) Collection of baseline information on the physical, biological and socio-cultural environment as identified during the scoping studies. This also included extensive review of legislative framework with the bearing on the plan and assessment of its compliance with the legislation;
- (b) Stakeholders' engagement to deliberate on the Proposed Red Coral Development plan and identified alternatives;
- (c) Analysis of the environmental and socio-economic baseline data to identify trends, opportunities and constraints in relation to Proposed Red Coral Development plan;
- (d) Identification, prediction and qualification of the significant environmental and social impacts of the Proposed Red Coral Development plan, evaluation of alternatives including their direct, secondary and cumulative effects, and selection of suitable alternatives that enhance environmental and social benefits; and
- (e) Identification of measures to enhance opportunities and mitigate adverse impacts.

The key potential management strategies and the recommended activities are highlighted below:

Category	Management Strategy of the Proposed Red Coral Plan	Recommendations
Physical setting and biodiversity	Provide appropriate measures that guarantee the protection of the physical and biological environment	<ul style="list-style-type: none"> • Maintain as much as possible the natural drainage systems and patterns; • Begin landscaping activities as soon as construction begins; and • Set out a landscaping plan for re-vegetation of disturbed areas and prioritize indigenous trees and shrubs in the choice of plants.
Energy resource management	Conserve energy resources	<ul style="list-style-type: none"> • Ensure the use of rated equipment in welding and related works; • Maintain equipment and equipment to manufacturers specifications by regular servicing to maintain efficiency in combustion and reduce carbon emissions; • Use environmentally friendly fuels such as low sulphur diesel; and • Minimise the period for machinery idling to save on fuel; • Create awareness to staff and other establishments within the development the need to conserve energy; • Install and maintain energy efficient appliances e.g. indoor lights and outdoor security lights; and • Continually seek avenues for energy conservation as international best practices evolve.
Air Quality, Noise	Abate pollution of the atmosphere by	<ul style="list-style-type: none"> • Sprinkle water on work areas and materials heaps

vibrations	reducing emissions and prevention of noise pollution and vibrations	<p>to minimise dust emissions;</p> <ul style="list-style-type: none"> • Maintain equipment and equipment to manufacturers specifications by regular servicing to maintain efficiency in combustion and reduce carbon emissions; • Use environmentally friendly fuels such as low sulphur diesel; • Ensure there is no burning of waste is done on site; and • Provide appropriate PPEs e.g. dust masks & ear muffs to site workers. • Install portable hoods to shield compressors and other small stationary equipment where necessary; • Endeavour to use equipment installed with noise abatement devices; • Reduce idling time on machinery, trucks and other noisy equipment; • Encourage drivers to turn off vehicle engines when not in use; • Carry out construction work during the day only; • Ensure regular maintenance of generators and the incinerators to maintain high combustion efficiency; • Ensure the continual planting and maintenance of vegetation to act as carbon sinks; • Carry out noise and excessive vibration monitoring and mapping as found appropriate; and • Maintenance of vegetation that attenuates noise within the development. 	Water resource management	Conserve water resource through lowering the consumption levels in the development	<ul style="list-style-type: none"> • Implement erosion and sedimentation controls and ensure proper disposal of waste waters. • Apply measures for preventing soil erosion; • Avoid extravagant use of water and avoid wasteful use of water; • Seek approvals from relevant authorities before abstraction of underground water; • Monitor water consumption and maintain records; • Harvest storm water to supplement other sources of water; • Establish silt fences; • Channel construction waters to sediment traps; • Recycle and reuse construction waste waters; • Incorporate water accounting systems and metring for all areas; • Encourage all stakeholders in the Red Coral to conserve water through awareness programs; • Install and maintain low volume fixtures in toilets, baths and other wet areas; • Use recycled and harvested storm water in cleaning and watering the lawns; and • Continually seek new avenues for water conservation as international best practises evolve.
Soil resource management	Prevention of degradation of soil resource	<ul style="list-style-type: none"> • Use the excavated soils to create buffers and berms during landscaping; • Identify fertile soil borrow-pits near the site; • Ensure immediate re-vegetation of the disturbed sites; • Ensure construction vehicles use predetermined tracks to minimise soil compaction; • Allow sedimentation of construction waste waters to minimise the amount of soil lost during construction; • Oils, fuels, paints and all hazardous materials should be stored well to avoid leakages and spillages; 	Traffic management	Develop and observe traffic management plans	<ul style="list-style-type: none"> • Ensure construction vehicles do not cause nuisance through obstructions and speed limits; • Develop and maintain a traffic management plan that caters for vehicular and pedestrian traffic associated with the development; • Set up traffic control/warning signs; and • Advance discussions with Kenya Railways to make the railway station a reality for the development.
			Health and safety	Provide proper safety equipment, facilities and conditions that will eliminate the risks to all	<ul style="list-style-type: none"> • Comply with OSHA 2007 and other relevant legislations that govern health and safety at workplaces; • Access to the active construction sites shall be controlled by hoarding the construction sites and posting warning signs to the general public; • Provide appropriate

- signage and warning in the potential risk areas;
- Provide appropriate PPEs to staff;
 - Provide first aid facilities and train workers on emergency response e.g. First aid;
 - Provide adequate sanitary facilities;
 - Develop and implement a detailed site specific Emergency Response Plan; and
 - Comply with the requirements of the ILO code of practice for safety at work places.
- Raw materials management Conservative use of raw materials.
- Source construction materials from registered and approved quarries and sand harvesting firms;
 - Implement stringent inventory mechanisms;
 - Order materials as per construction requirements;
 - Manufacture building elements off-site and deliver to site.
- Waste Management Ensure waste generated is adequately managed and disposed off
- Identify a temporary holding area for construction wastes;
 - Recycle and reuse construction wastes;
 - Avoid pile-up of construction wastes and dispose off the non recyclable/reusable the soonest possible;
 - Wastes should be disposed off well in designated disposal/landfills sites;
 - Ensure proper acquisition of construction materials to avoid left overs;
 - Ensure use of durable and long lasting material to avoid regular replacement;
 - Pursue waste minimisation at source principle by zero generation, reduction. Reuse and/or recycle;
 - provide mechanisms to segregate wastes at the source, temporarily storing at transfer stations and final disposal in a designated sites; and
 - ensure regular inspection and maintenance of drainage system and waste water treatment plants.
