ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED CONSTRUCTION PHASE 2 OF EPZA WASTEWATER TREATMENT PLANT AT KINANIE, ATHI RIVER SUB-COUNTY IN MACHAKOS COUNTY

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The proponent, Export Processing Zones Authority (EPZA) is proposing to provide new treatment facility of 20,000 m³/day capacity near the existing Wastewater Treatment Plant (WWTP) at Kinanie, Athi River Sub-County, in Machakos County.

The proposed project is meant to treat wastewater from EPZA, additional industrial units and adjoining are and the proposed Leather Industrial Park. The project will comprise of the construction of 2.5 MLD WWTP to treat effluent from the tanneries; 10MLD WWTP to treat all influent sewage from Athi River including the effluent from the Leather Industrial Park; sludge dewatering units; reticulation system for Leather Industrial Park and electrical system.

The following are the anticipated impacts and proposed mitigation measures:

Impacts

Mitigation Measures

Air emissions

- Decreasing the number of trips carried out by the vehicles will minimize air pollution.
- Vehicles to be used during the construction phase are to be kept in good

Noise pollution

working condition and should not be the source of excessive fumes.

- Road traffic movements shall be scheduled to normal working hours (08H00 – 17H00).
- All equipment and vehicles on the site should be equipped with noise suppressing measures and kept in proper working order.
- Silencers on equipment such as generators will be properly designed.
- Temporary noise pollution due to construction works will be controlled by proper maintenance of equipment and vehicles, and tuning of engines and mufflers.

Dust pollution

- Settled areas within project access routes will be identified and maximum speeds of project vehicles will be established within these areas.
- Speed limit of 15km per hour will be posted and enforced to reduce airborne fugitive dust caused by vehicular traffic.
- Construction materials will be delivered in bulk to avoid repetitive movements of delivery vehicles.
- Construction materials and stockpiled soils will be covered if they are a source of fugitive dust.

Surface and ground water contamination from wastewater and sludge

- Effluent /wastewater quality will be tested on a regular basis to ensure that its characteristics are within the set standards. Set out in the third schedule of Water Quality Regulations 2006.
- Proper measures will be taken to avoid accidental surface runoff intrusion from the manholes of the sewerage network, which can overburden the plant and cause discharge of partially treated wastewater from the WWTP into the river.
- Proper handling and drying of sludge will be done in drying beds, during dry season.
- With continuous sampling and laboratory tests, the performance of the WWTP will be optimized.

Odors as a result of mismanagement of solid wastes

- The staff of the plant will be properly trained, to enable them to handle grease and sand removal and taking samples for lab testing.
- Produced residuals will be stored in closed containers and transported in enclosed container trucks to landfill site.
- Aeration tanks will always be kept at an optimum aeration rate.
- Proper landscape around the facility will be done to serve as a natural windbreaker and minimize potential odor dispersions, if present.
- Odors will be reduced or prevented through normal housekeeping and improved operation and maintenance design procedures.
- Regular cleaning of aeration tank walls and floors, washing weirs, and removing scum regularly, will be done to help in odor reduction.
- Where odor emissions could lead to complaints, the provision of covers to the odor sources will be considered,

	<p>especially for sludge holding tanks and sludge dewatering systems.</p> <ul style="list-style-type: none"> Flow regulating chambers, drainage valves, standby pumps, as well as electric standby generators shall be provided to reduce the possibility of wastewater flooding within the wastewater treatment plant site, which results in possible generation of obnoxious smell. 	
Impacts on water	<ul style="list-style-type: none"> In general, the C-Tech systems produce a highly treated and well-nitrified effluent that typically meets the required effluent quality standards. Disinfection with chlorine will further suppress bacterial population in the discharged effluent. Thus, the proposed facilities' discharge effluent quality is expected to meet the Minimum Standards contained in Water Quality Regulations 2006. The implementation of training recommendations, maintenance plans, and process and effluent monitoring programs will be mandatory. Sufficient instrumentation and standby equipment (blowers, pumps, and electric generators) shall be provided to ensure an uninterrupted and controlled operation, thus avoid inefficient process performance. To attain the expected safe effluent discharge, skilled and trained operator will be available for proper process loading, optimization, control, and thus performance. Continuous sampling and laboratory tests will ensure that the performance of the WWTP will be optimized. The greasy material from the grease trap will be regularly removed and stored in proper barrels and then collected and disposed with the municipal solid waste. 	<ul style="list-style-type: none"> Laborers will be educated as to the importance of not simply killing all snakes and other fauna that is perceived as dangerous.
Impacts on soil	<ul style="list-style-type: none"> Periodic tests will be done to assure the quality of effluent wastewater, to avoid partially treated wastewater to reach the soils. Effluent will be appropriately disposed of by ensuring that they meet the required standard prior to discharge taking place. Effluent quality will be monitored on a continuous basis to avoid partially treated wastewater reaching the soils. Excavated soil will be utilized for landscaping and then tree planting purposes. 	<p>Health and safety impacts</p> <ul style="list-style-type: none"> The Contractor shall conform to all the stipulations of the Occupational Health and Safety Act, 2007. The Act requires the designation of a Health and Safety representative when more than 20 employees are deployed. The contractor shall provide ample warning signs, guard rails, warning tape, etc., around open excavations, stacks of material, debris, etc. and shall be held liable for all claims as a result of neglect of such precautions and provisions. Proper access control shall be enforced to ensure that no unauthorized persons enter the site. Material delivery vehicles shall be under the control of competent personnel. It will be ensured that persons handling equipment and materials are suitably trained, supervised and adequately instructed. Railing will be installed around all process tanks and pits. The use of a life line will be required and personal flotation device (PFD) when workers are inside the railing, and it will be ensured that rescue buoys and throw bags are readily available. A confined spaces entry program that is consistent with applicable national requirements and internationally accepted standards will be implemented.
Impact on flora	<ul style="list-style-type: none"> To avoid loss of biodiversity, proper management of WWTP outputs will be done. Limits of construction zones will be identified and marked, and all activity will be kept within marked boundaries. When detected, sensitive species or habitats shall be conserved. 	<p>The full report of the proposed project is available for inspection during working hours at:</p> <p>(a) Director-General, NEMA, Popo Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.</p> <p>(b) Principal Secretary, Ministry of Environment and Mineral Resources, NHIF Building, Community, P.O. Impacts on fauna	<ul style="list-style-type: none"> Tree planting will be done to maintain habitats for avifauna. No snaring or hunting will be allowed on or around the site. Contact details for someone who can be called if catching and relocation of snakes, spiders or other unwanted species is needed will be kept at the site. 	<p>MR/2483724 <i>National Environment Management Authority.</i></p>

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT
FOR THE PROPOSED KIRANDICH PHASE II WATER SUPPLY
PROJECT IN BARINGO COUNTY

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The Proponent, Rift Valley Water Services Board is proposing to expand the water supply services in Kabarnet by rolling out Kirandich Phase II water supply project. Tapping water from the existing Kirandich dam, the expansion will include the following major components:

- Transmission pipelines made of steel with a total length of 6,4420M.
- Reinforce Concrete Storage tanks-7No.
- Distribution pipeline with a total length of 12,300m of 50mm diameter pipes made of either High Density Polyethylene (HDPE) or galvanised steel depending on the terrain.

The following are the anticipated impacts and proposed mitigation measures:

<i>Impacts</i>	<i>Proposed Mitigation Measures</i>
Habitat disturbance	<ul style="list-style-type: none"> • Clearly mark out construction sites and restrict construction activities to the marked areas. • Seek approval from NEMA for any new material extraction sites. • Carry out re-vegetation of disturbed areas where possible.
Loss or change in vegetation cover illegal logging restoration impact	<ul style="list-style-type: none"> • Felling of any tree should be done only with consent from the Baringo County Government and KFS. • The contractor should as much as practical not interfere with endangered species such as <i>Prunusafricana</i> and <i>Vitex kinesis</i> species which are considered as vulnerable under the Wildlife Conservation and Management Act, 2013. Where it is necessary to clear these species, clearance shall be sought from KFS and KWS.
Soil erosion	<ul style="list-style-type: none"> • The contractor must implement erosion control measures to avoid erosion in areas that are prone to erosion, e.g. steep slopes and drainage lines. • Construct soil conservation measures at stockpiled sites. • Any quarries and borrow areas exploited for the project must be reinstated and rehabilitated. • All excavation works must be properly backfilled and compacted.
Ground and surface water pollution	<ul style="list-style-type: none"> • Implement Standard Operating Procedures (SOPs) for working near water, including checks on equipment condition (especially leaks of oils, fuel, hydraulics), refueling protocols (at safe location away from water, availability of spill kits and knowledge of their use, and emergency spill procedures). • Apply standard best practice for site sediment control procedures (e.g. settling ponds) to minimize sediment in site drainage waters returning to the river. • Ensure all staff and workers are fully aware of the limits to the site for each activity, SOPs, and emergency procedures. • All grey water runoff or uncontrolled discharges from the site/working areas (including wash down areas) to water courses should be contained and properly channeled. • Water containing such pollutants as cements, concrete, lime, chemicals and fuels shall be discharged into a conservancy tank for removal from site.

Noise and vibrations	<ul style="list-style-type: none"> • Potential pollutants of any kind and in any form shall be kept, stored and used in such a manner that any escape can be contained and the water table not endangered. • Wash areas shall be placed and constructed in such a manner so as to ensure that the surrounding areas (including groundwater) are not polluted. • Spill/pollution emergency response plan shall be developed for site works. • Noise levels shall be kept within acceptable limits and the contractor should not permit high noise activities. • Workers exposed to prolonged excessive noise levels will be required to wear ear muffs. • Equipment should be maintained regularly to reduce noise resulting from friction. • Noise levels at the construction site boundary should be kept within acceptable limits of 60 dB(A) during the day and 35 dB(A) during the night as stipulated within the Environmental Management and Coordination (Noise and Excessive Vibration Pollution) (Control) Regulations, 2009. • Limit idling time of pickup trucks and other small equipment and observe a common sense approach to vehicle use and encourage workers to shut off vehicle engines whenever possible.
Air pollution	<ul style="list-style-type: none"> • Limit clearance of vegetation within the construction site to ensure that he cover act as barriers to the dust. • The removal of vegetation shall be avoided until such time as clearance is required and exposed surfaces shall be re-vegetated or stabilised as soon as practically possible. • Regular watering of dusty roads should be maintained during this phase. • Any damage to public roads should be made good to the satisfaction of the responsible road authority immediately it occurs and at the latest before the end of the contract. • After use, all temporary access routes on cultivated land or pasture (grassland) should be restored to their previous condition or better. This will involve the removal of all non-soil material and the replacement of topsoil if this has been destroyed or removed. • Limiting truck speeds to avoid stirring up the dust. • Ensure all fuel powered equipment and vehicles are in good working order through regular maintenance
Occupational health and safety	<ul style="list-style-type: none"> • Contractor to establish a comprehensive Health and Safety Policy and safety management plan incorporating training and awareness. • Ensure the site is registered as a works place with DOSHS.

- Provide appropriate and adequate PPE to all workers and enforce usage.
 - Implement the specified H&S program throughout the construction period.
 - Establish an emergency response procedure and display on all work areas.
 - Provision of a standard first aid kit at the site office at all times, Its content to include anti-venoms for snake bites.
 - Provision of fire-fighting equipment available at the workers camp.
- Solid waste
- Maximize the re-use of all excavated materials in the works.
 - Contractor shall ensure segregation of hazardous from non-hazardous wastes and provide appropriate receptacles for their handling on site.
 - The contractor should not burn any wastes on site or dump in open pits.
 - Final disposal of the waste should be done at a location approved by Resident Engineer in accordance with the waste management plan after consultation with the relevant stakeholders, including the local community.
- Waste water
